American Railroad Journal.

New York, Saturday, January 6, 1866.

☞ For our Annual Table of Railroads in the United States, see pages 9 to 16 of our present issue.

The Past, Present and Future.

The present number heralds the thirty-sixth year of the AMERICAN RAILROAD JOURNAL. From a single idea on the part of its original founder, it has grown up to be a solid and permanent institution, the steady and untiring friend of the great railroad interests of the country. It has seen them in a regular and constant state of progression; from a single doubtful line, as regards which the public could scarcely make up its mind, to many thousands of miles of finished and remunerating roads, over which millions of passengers and of tons of freight are continually and successfully being transported. So too it has seen an infinite variety of changes in the structure, plant and management of these roads; an aggregation of vast capital; the establishment of armies of employees and managers; and the money market itself, obedient to its demands, or joyful in its gains. In short, it has seen a mighty power rise up as an element of our prosperity; and geographical, political, commercial and financial interests swayed by its influence. The JOURNAL has never for a moment forgotten its relations to these interests; but has been unceasing in its efforts to strengthen and maintain them. It has been the untiring friend of useful routes, energetic and enterprising companies, good officers and faithful servants. It has always been ready to give its advice, aid and co-operation to all good projects, and its assistance in the establishment of the best lines. It can therefore look on the American Railway system with complacency not only, but sincere regard; praising its past, encouraging its present, and cheering its future. It perceives in it, many great securities for the permanence of the Union, attended by a further advance in the arts of life, in civilization, in education and a general prosperity. Connected with this watchfulness over this modern form of transportation, so infinitely surpassing all other kinds previously known, the relations of commerce in the abstract as well as the concrete have naturally attracted the attention and study of the JOURNAL. It has therefore always devoted a large share of its columns to that topic; and in its numerous volumes are preserved very careful records of their progress and extension.

Every important fact bearing upon them is continuously recorded, so that its pages furnish ample materials for thinkers, writers and historians, and are constantly resorted to by those who discuss these subjects. In all the great public libraries of the country where the volumes of the JOURNAL are preserved, the student can find the amplest and the most complete materials for his contemplation.

Nor is this all. The progress and history of finance with the changes of the Money Market have also been carefully preserved; so that in this department of political economy, it has done a most useful work. On its pages are to be found almost exclusively the records of prices and of fluctuations, the rise and fall of securities, and the expansion and decline of credits. These are historically preserved for reference, and are a guide, a beacon, and a warning to financiers. From the data thus and there given, the economist is able to explain the relations of cause and effect, and understandingly, how they are and must be considered.

In short, in all the particulars we have alluded to, the JOURNAL is conspicuous for its accuracy, its diligence and its perseverance in its speciality of observation and record. That this is a well understood fact may be seen by another, that the leading and most successful bankers and stock brokers in this country as well as in the capitals of Europe, rely on the JOURNAL for information and authority. And we are assured that its steadiness of opinion and correctness of quotation have been greatly relied on, on the continent as a guide to investments in American securities; while even in England, less ready to believe in what is American, we find of late that the JOURNAL is received with a cordial acceptance as good authority.

We therefore feel that we have a perfect right to congratulate ourselves on the commencement of our 36th volume, and on our past and present success, assuring our readers there shall be no falling off on our part, and confident there will be none on theirs. There is a large field open to such exertions as ours. The railway system, extensive as it is, will yet become much more so. When the great Union Pacific Railroad is constructed, the new States which it is to pierce, will on their maps exhibit before many years, the same reticulations or net work of railways which are now to be seen on those of Illinois, or Ohio, or Pennsylvania. So too the traveller will practically find as many towns, commercial centres and stations. All this is plainly before us in no distant future; and of all this, the JOURNAL is the announcer and encourager. It will therefore be seen that we fully appreciate our duties and our responsibilities; and we accept them cheerfully, relying on the liberal support in the future that we have so long enjoyed in the past. Looking confidently for a proportional increase in the support of the public, we shall continue to perform our part of the compact of reciprocal service, and thanking our friends of to-day and former days for their adherence and patronage, we wish them a happy New Year; and to the railroad companies, whose peculiar interests are the sub-

ject of our constant consideration, renewed prosperity, large traffic and good dividends.

Debt of Philadelphia.

The following statement shows the loans bought by the Commissioners of the sinking fund, and canceled during 1865, from the sale of the stock of the Pennsylvania Railroad, held by the city:

Loans.	Amount bought.
Five per cent. loan	$33,236 79
Six per cent	225,888 70
Pennsylvania R. R. loan	135,733 90
North Pennsylvania R. R. loan	77,900 00
Hempfield R. R.	29,300 00
Total	$502,059 39

In addition to the above the City Treasurer has redeemed, during 1865, city loans, maturing to the amount of $394,223 34, making a total of $896,282 73, which is to be deducted from the funded debt of the city.

The funded debt of the city on January 1, 1865, was	$28,910,484 52	
Loans issued during 1865	5,708,100 00	
	$34,618,584 52	
Amount cancelled in 1865	896,282 73	
Actual funded debt, Jan. 1, 1866		$35,722,301 79

Loans to the amount of about $4,000,000 have been passed by Councils during the present year, in addition to the amount stated above, but they have not been issued, and will not be put upon the market unless they realize their par value. If issued during the coming year, the actual debt of the city will be about $37,000,000.

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August 31, 1864 and 1865, were as follows:

	1863–'4.	'1864–'5.
From passengers	$152,616 20	$256,366 06
" troops	20,435 67	20,057 78
" freight	260,699 74	260,286 34
" express	7,982 75	12,802 50
" mail	9,400 00	9,400 00
" rents	89 00	215 00
	$451,223 36	$559,127 68

The expenses of 1864–'65 were:

Repairs of track	$83,607 53	
" bridges	13,118 22	
" buildings, etc	9,688 36	
" locomotives	28,863 19	
" cars	23,134 56	
" tools, etc	7,629 80	
Train expenses	42,762 03	
Fuel	32,154 18	
Oil, waste, etc	7,902 63	
Station expenses	31,585 51	
General superintendence	10,218 62	
Loss and damage	9,447 95	
All other expenses	12,294 70	
		312,407 28
Net earnings		$246,720 40

The earnings, expenses, etc., of this road for the past seven years have been as follows:

	Total earnings.	Operating expenses.	Net earnings.
1858–'59	$171,048 90	$97,797 37	$73,251 53
1859–'60	206,944 27	102,970 89	103,973 38
1860–'61	222,352 13	113,362 90	108,989 23
1861–'62	244,540 43	106,954 50	137,585 93
1862–'63	334,058 10	164,196 39	169,851 71
1863–'64	451,223 36	218,539 13	232,684 23
1864–'65	559,127 68	312,407 28	246,720 40

The receipts from all sources during the year, including $28,652 59 from previous year, were $585,388 23; and the expenditures, $537,979 38—leaving a balance in cash on hand August 31, 1865, of $47,408 85. The expenditures embrace:

Construction	$17,137 23
New freight cars	27,552 29
Increase of fuel and supplies	14,496 59
Materials for renewal of White River Bridge	12,810 60
Rebuilding two bridges burned	21,840 12
Interest—balance of account	93,592 26
Taxes	21,619 84
Land purchased for wood	1,246 35
Balance floating debt	10,000 00
Open accounts—current business	5,276 82
Transportation expenses, as above	312,407 28
Total	$537,979 38

INCOME ACCOUNT.

Balance September 1, 1864	$229,121 59
Earnings, as above	559,127 68
	$788,249 27
Operating expenses	$312,407 28
Rebuilding two bridges burned	21,840 12
Interest—balance of account	93,592 26
Taxes	21,619 84
Balance August 31, 1865	338,789 77
	$788,249 27

Of this balance there has been expended for construction and equipment, (being the excess in cost of those items over amount of capital stock and bonds) $226,690 20; and for supplies and materials on hand, $47,676 94—leaving available for future expenditures in cash and accounts receivable (less accounts payable $4,562 56), $68,985 19. The report says:

The year has brought this corporation nearer to a state of actual prosperity than it has heretofore approached, but still leaves it as it found it, a non-dividend paying road.

The gross, as well as the net, earnings of the Road, are both increased over those of the previous year, but the available surplus, after payment of running expenses, ordinary and extraordinary repairs, bond interest, and taxes, has not been sufficiently large to warrant much progress in completing the construction and equipment of the line at present in operation.

It is impossible to complete and equip the line now in operation by any attempted increase of funded debt, upon that line, or from any other source than current earnings; and current earnings is the source, as our accounts will show, by which this completion and equipment have, for years past, been and still are carried on.

A railroad, tolerably complete and tolerably well equipped, and showing a respectable annual surplus after paying working expenses, and all necessary renewals of track, structure and equipment and laying by a proper sinking fund for the redemption of its funded debt, usually has credit enough to raise money for needed improvements of its property, or increased facilities, by the sale of its stock or bonds.

This, however, is a condition that this road has never yet been in. Nevertheless, if the progressive earnings of the past four years of war, and the preceding three years of peace, may be taken as any safe criterion by which to gauge our expectations of the future, we may well hope that at no very distant day, if rival lines shall not weaken our position, that we shall possess a valuable property in the capital stock of this company.

The last of the floating debt being ten thousand dollars cash borrowed, as shown in our last annual report, was paid early in the year, leaving the company now free from floating debt.

The bonded debt of the company is one million two hundred and forty thousand dollars, to which must be added one hundred thousand dollars preferred stock, all bearing an interest of seven per cent. per annum.

Of this bonded debt one million and ninety thousand dollars falls due in 1869, having less than four years to run, when arrangements must be made for its payment or extension. The other one hundred and fifty thousand dollars of bonds, being those on the Rockville extension, fall due in 1881.

Except as to our rails, which are generally somewhat the worse for wear, our property is well maintained and in fair order, and during the year we have added improvements to various parts of the line.

Having come into possession of shops and machinery affording facilities for the purpose, we have, during the year spent more than half as much money in the repair and renewal of our engines, as we had expended for this purpose in the five preceding years, and that not before the expenditure had become imperatively necessary.

We have also during the year greatly improved the condition and efficiency of our freight cars, by substituting new box and covered stock cars for old ones worn out, and also made an increase in the total number, equal to, say twenty cars.

Our expenses, in every department, have greatly exceeded those of the preceding year, chiefly owing to the high price of labor and material, which has ranged very materially above the average of rates during the previous year.

There has been a great increase in the cost of maintenance of Way, resulting in part from the foregoing cause, but also in part from the increased number of trains for the past eighteen months, and from a great increase in the number of new rails purchased and laid down.

In addition to this unusual increase of ordinary expenses, we have been put to an extraordinary expense of upwards of $20,000, by the burning of two bridges by incendiaries, on the Rockville Extension of the road, during the last winter and spring, and by repeated injury to, and destruction, by unusual floods, of temporary bridges erected in their places for the passage of our trains whilst permanent structures were being built.

These new permanent bridges are now about complete, except enclosing, which will be done before winter sets in.

In February last a contract was made for rebuilding the superstructure, including a draw to pass boats, and three stone piers, of the White River Bridge, at fixed rates for each kind of work, which will amount in the aggregate to about $50,000.

This work was, by the contract, to be finished by the 1st day of December next, but in consequence of the wetness of the whole season, which delayed the timber in the woods and the stone at the quarry, and the mechanics in the yard, and has kept the stream vacillating between a point above low-water mark and flood height up to this day, the work has been greatly retarded, and has now, with nearly all the materials prepared on the ground, but none yet on the bridge, to be abandoned until next summer. Meantime, the company will be put to extraordinary expense to make the old bridge safe beyond question till substituted by the new one.

To enable us to do the same amount of business for another year with promptness and safety, we need two additional locomotives, one of which, at least, should be purchased or ordered without delay.

It is estimated that at least five miles of new and re-rolled rails will be required for the main track, besides a small addition to sidings, during the coming year.

It is believed to be the true policy of this company to complete its road, at the earliest practicable day, to a Northern Railroad connection. Whether that connection should be made at Crawfordsville, at Attica, or at some point on the Toledo, Wabash and Western Railroad west of Attica, is a matter yet to be determined upon.

Frequent communications are received from the communities on the proposed lines of extension, tendering liberal local subscriptions, and repeated negotiations have been broached between this company and the Toledo, Wabash and Western Railroad Co., but as yet no feasible project for furnishing the ways and means has been de-

vised, and the enterprise awaits the means for its prosecution.

The company own 14 locomotives; 10 passenger, 4 baggage, 85 box freight, 14 stock, 12 coal, 30 platform, 8 construction, 24 hand, 7 push, and 3 caboose cars. The aggregate mileage of trains for the year was 246,145. Number of passengers carried, 180,067; do., troops, do., 13,267. Tons of freight transported, 99,986.

GENERAL BALANCE SHEET Aug. 31, 1865.

Construction of road	$2,312,344 43

President and Sup't.—JOHN INGLE, Jr.

Directors.—John Ingle, Jr., Samuel Orr, J. S. Hopkins, H.K. Wheeler. L. S. French, Wm. Burtch, Joshua Alsop, H. R. Wilson, Chauncey Rose, Jas. H. Turner, G. K. Steele, I. J. Silliman and J. W. Maddox.

Secretary and Treasurer.—J. E. MARTIN.

The Interests of Commerce.

We notice that public attention is turning very rapidly to the consideration of our commercial interests. The Pittsburg *Chronicle*, which we might suppose to be mainly in Western interests, takes a broad view of the subject, and in a late perspicuously written article, says openly of our foreign commerce, especially that with the South American States; "we need broader views and greater energy in this department than we have." We agree with the *Chronicle* in this. We want much larger views in regard to our trade with other nations than have prevailed for some time past. We have as much skill, as much enterprise, more energy than almost any modern nation; and until recently were successful competitors for the trade of the world. But at present, we are falling behind hand rapidly. We have very expensive foreign diplomatic relations which cost us enormous sums annually, and send large fleets to foreign ports while our trade is steadily declining. Thus with Holland our total exchanges in 1861, the latest returns to which we have access, that is to say our exports and imports, were but of the value of $6,530,000; with Spain, $5,100,000; Portugal, $460,000; Austria, $800,000; Colombia, $6,000,000; not half that enjoyed by England; Venezuela, $4,000,000; Buenos Ayres, $4,300,000; Hamburg, $11,000,000; Pacific, $2,000,000; Prussia, $42,000; Denmark, $16,000; and so on with various other countries. And yet we retain ministers and consuls there at a vast expense, and our trade is scarcely worth noticing. With British North America our present trade is $45,800,000 and we are at scarcely any expense of this kind at all. Surely something ought to be done to change this aspect of our affairs. With regard to South America, we are their nearest neighbors and the most natural friends; and yet with them we are doing little or no business. The truth is, our government has for many years past been so absorbed with local and interior politics that it has neglected our foreign interests. The management of parties at home has occupied too much of our attention; we are working along under obsolete treaties and conventions, neglecting our foreign mails, and leaving our merchants and shippers to grope along in the dark, or to run foul of regulations and restrictions which almost amount to non-intercourse. On the other hand, the British Government, with an eye that never sleeps, and a patience that never tires, is continually exploring every distant shore, and conciliating every interest, however remote, by which trade may be secured. Looking with complacency on all the difficulties of other nations, in fact rather pleased with them than otherwise, it is ever ready to send its ships and mariners to any port, open or blockaded, it makes no difference, where its industry and manufactures may secure an outlet and a profit. Thus it supports its great artificial fabric, keeps its much taxed and hard working people in good heart, piles up its wealth in ingots and influences the world. Here with vastly more area of production, natural advantages, and homogeniety of purpose we remain in the second or third rank of commercial nations, and leave the great oceans which lave our East and West coasts, to the almost exclusive enjoyment of British ships.

It is time that we were awakened to a sense of our position, and entered on a new career of trade. We should at once re-examine and modify our commercial treaties and conventions, and insist upon greater reciprocity than we now enjoy. The departments of State and the Treasury could not better employ themselves than in attending to this matter. There is no country in the world so well adapted to the construction and employment of ships as our own. No better timber or iron, no more valuable than ours, invite exertion in this direction or can anywhere be found.

In no more convenient and popular form can the revenues of the country be reinforced than by the aid of commerce. On these we desire to fall back as in past days for our Governmental expenditures, and to lessen the load of direct taxation. It is of small advantage for us to get rich out of each other by speculations, high prices, monopolies and combinations, we want to accumulate means by an open and manly contest with the people of other countries, and to deal in the standard values of the world. Profits made in paper, out of each other, are fallacious, ephemeral, and unsound. It is by commercial exchanges on a liberal scale that we should touch substantial advantages and secure a solid basis. The Pittsburg *Chronicle*, alluding to the conduct of England, says "her deficiencies are made good by energy," with a greater debt, no greater population, less territory and fewer advantages than we have. "She extends her commerce in every direction, and therein gives support to her manufacturers, interest to her capital and enables her debt to be borne with less trouble by her people. The same opportunities for similar conduct, with equal or greater returns, and less outlay, are at our doors."

Who then shall take the initiative in this neglected field. Where are the statesmen and legislators who will turn their attention to it, forgetting for a time the small political interests which are now continually thrown upon the notice of the people, in place of those of larger force. Do we appeal in vain to the sense, the experience, the ambition and the energy of our countrymen, when we call on them to pay some attention to the neglected interests of commerce? To come back to a practical view of the subject, we may say, that we pay to our ministers alone $270,000 and upwards annually for their services; about $70,000 to commissioners and secretaries of Legation, and a still larger sum to more than 200 consuls. All this expensive machinery exists, and apparently without much benefit to the country at large; and much of the expenditure occurs in places where our trade is scarcely perceptible. This is a startling view of the subject; and it is high time that we looked it fairly in the face. The idea that there should be this continuance of the theory of commercial relations, and diplomatic intercourse for their maintenance, without producing any very decided commercial result, is one which should be corrected at once.

Dry Goods Trade.

The following comparison shows the imports of the several classes of dry goods at this port for the year:

	1864.	1865.
Manufs. of wool	$31,411,965	$36,074,585
Manufs. of cotton	8,405,246	15,350,064

New Route to Montreal.

The New York *Times* says that plans are being laid for "a new railroad line from New York to Montreal. By building a branch road, of eight miles, from the Housatonic Railroad at Kent, Conn., to the Harlem Railroad at Dover Plains, N. Y., a continuous line from New York to Montreal will be secured, with the exception of a short distance between Hoosick, N. Y., and the Western Vermont Railroad. The proposed route is as follows: From New York to Dover Plains on the Harlem road, thence to Kent by the new branch, from Kent to Pittsfield on the Housatonic Road, from Pittsfield to Adams on the North Adams Railroad, from Adams to Hoosick on the Troy and Greenfield Road, then intersect with the Western Vermont Road, and then on to Rutland, Burlington and Montreal. The cost of the branch from Kent to Dover Plains is estimated at $400,000, and the money is promised immediately for both the links which are needed to complete the line. While these are being built, the cars will run over the Western Railroad from Pittsfield to Chatham, and thence on the Harlem Road to New York. The latter arrangement will be entered upon in a few weeks."

☞ The application lists for the issue of £2,771,600 Atlantic and Great Western Railway Consolidated Sterling Mortgage Bonds were closed in London on the 13th ult. The applications, which were very numerous, are for more than the total amount required.

Journal of Railroad Law.

DELAY IN CARRIAGE OF PASSENGER.—RECOVERING OF EXPENSES DURING DETENTION ON THE ROUTE.

The case of Williams *vs.* Cornelius Vanderbilt, lately decided in the court of Appeals of this State, presents some interesting features.

The action was brought to recover damages for the failure of the defendant to carry the plaintiff from New York City to San Francisco, *via* Lake Nicaragua. Three claims in the complaint charged the defendant with neglect of duty as a common carrier in not transporting the plaintiff. The fourth and fifth claims charged the defendant with fraud in not transporting the plaintiff.

The action was tried at the Cayuga Circuit, in October 1855. One D. B. Allen acted as agent of the defendant, at the City of New York. He delivered tickets to the plaintiff, about the 1st of March, 1852, for transportation to San Francisco. One entitled him to a passage to Greytown at the mouth of the Nicaragua river, in the ship Prometheus, which was to sail on the 5th of that month; another entitled him to a passage up the Nicaragua river, through Nicaragua lake and thence by land to San Juan del Sur on the Pacific Ocean; the other entitled him to a passage from the latter place to San Francisco, on the steamer North America, which was advertised to leave San Juan del Sur about fifteen days after the plaintiff would arrive there, according to the usual course of conveyances. The defendant owned the ship Prometheus, and was one of the owners of the North America. The Accessory Transit Company issued the ticket which entitled the plaintiff to a passage up the Nicaragua river and through lake Nicaragua. The plaintiff left New York in the Prometheus on the 5th March, 1852, and arrived at Greytown on the 15th of that month, where he was detained eleven days. He then started for San Juan del Sur, on steamers of the Accessory Transit Company. He arrived at a place on the way called San Carlos, on the 31st of March, 1852, where he was taken sick; and he there received news that the North America was lost or wrecked about the 27th of the previous month; which fact was not known to the defendant at the time of making the contract, nor until about the 20th day of April 1852. The plaintiff arrived at San Juan del Sur on the 4th day of April, where he remained until the 9th day of May 1852, endeavoring, but unsuccessfully, to procure a passage to San Francisco. He then returned to New York. He remained sick from the time he was taken at San Carlos until long after his return home with a fever peculiar to the climate of Nicaragua. The defendant appealed to General Term, when the following opinion was delivered by

Balcom, J.—This court decided, in Quimby *vs.* Vanderbilt, (17, N. Y. Rep. 306,) that a part owner of one of several lines for the transportation of passengers, running in connection over different portions of a route of travel, may contract as principal for the conveyance of a passenger over the whole route; and that such contract may be established by the circumstances, notwithstanding the passenger receives tickets for the different lines signed by their seperate agents. Also, that passage tickets are generally to be regarded as tokens rather than contracts, and are not within the rules, excluding parol evidence to vary a written agreement. That decision shows, that the judge properly refused in this case to non-suit the plaintiff, and that he did not err in submitting the question to the Jury, whether the defendant was not a common carrier of passengers from New York to San Francisco by way of Nicaragua, and did not contract, as such, to carry the plaintiff the entire route for the $250, which the defendants agent received of him.

The evidence that representations were made to the plaintiff, when he made the contract for his passage as to the healthfulness of the climate on the isthmus, and to show that such representations were false, was given before the Judge decided that the plaintiff could not recover for fraud, under the fourth and fifth claim in his complaint; and when he so decided and charged the jury that the plaintiff could only recover for such sickness as was caused by the defendants neglect or breach of duty, the question of fraud was out of the case. The defendant therefore, was not prejudiced by the evidence that such false representations were made to the plaintiff.

It was entirely proper for the judge to receive evidence as to how much the plaintiff was exposed to the sun and rains while crossing the isthmus, and to show that the climate there was bad and unhealthy, so that the jury could determine whether the plaintiff's sickness was caused by the defendant's negligence or breach of duty.

The appellant's counsel contends that the contract proved, did not absolutely bind the defendant to carry the plaintiff from San Juan del Sur to San Francisco, but only required him to furnish the plaintiff a passage upon the North America; and that the loss or wrecking of that vessel excused the defendant carrying the plaintiff beyond San Juan del Sur. I cannot agree to this proposition. In the first place the jury must have found that the defendant was a common carrier of passengers from New York to San Francisco, and contracted as such to transport the plaintiff from the former to the latter place, or they could not have rendered a verdict for the charge, in favor of the plaintiff. In the next place, if the loss or wrecking of the North America was the act of God, it was the duty of the defendant to exercise diligence in providing another vessel for the carriage of the plaintiff. He was bound to use all the means, in endeavoring to supply another vessel, which a diligent, careful man exercises in regard to his own affairs. He could not heedlessly leave the plaintiff upon the isthmus to die, or work his way to San Francisco, or back to New York as he best could.

The main thing the defendant agreed to do was to carry the plaintiff from New York to San Francisco. His promise to carry him in a particular vessel from San Juan del Sur, to the latter place, was a minor part of the contract; though if such vessel had not been lost, he would have been obliged to carry the plaintiff in it.

I have asserted the doctrine that the loss of the North America did not wholly absolve the defendant from all duty under the contract. The true rule touching this question is laid down by Professor Parsons. He says "The non-performance of a contract is not excused by the act of God where it may be substantially carried into effect, although the act of God makes a literal and precise performance of it impossible." (2 Parsons on Cont. 3d ed. 185; see also White *vs.* Mann, 26 Maine Rep. 361.)

The defendant notwithstanding the loss of the North America, could have substantially carried the contract into effect to transport the plaintiff to San Francisco, if he had exercised proper diligence, according to the verdict of the jury. For, according to the verdict, he could, by the exercise of due diligence, have procured another vessel and taken him to San Francisco; and that would have been a substantial performance by the defendant of the contract to carry the plaintiff in the North America from San Juan del Sur to San Francisco. The correctness of those views is so clear to my mind that I must reject as unsound whatever there is to the contrary in Briggs *vs.* Vanderbilt, (19 Barb. 222,) and Bonsteel *vs.* the same, (21 id. 26).

The remarks of the judge, which authorized the jury to award damages to the plaintiff for derangement of his plans by reason of a violation by the defendant of an arrangement which he made and which he assumed when he received the plaintiff on board his vessel," were somewhat obscure. They were interpreted by the Supreme Court to mean that the jury might award damages to the plaintiff for breaking up his journey, rendering it necessary for him to return. But this court cannot determine whether those remarks were right or wrong, because no exception was taken to them by the defendant's counsel.

The time the plaintiff lost by reason of his detention on the isthmus, his expenses there, and of his return to New York, the time he lost by reason of his sickness; after he returned home, and the expense of such sickness; so far as the same were occasioned by the defendant's negligence or breach of duty; were legitimate and legal damages, which the plaintiff was entitled to recover.

He could not procure a passage from San Juan del Sur to San Francisco, and therefore had the right to return to New York and his home. If one of the plaintiff's limbs had been broken, through the carelessness of the agents or servants of the defendant, it is settled that he could have recovered the expenses of the sickness occasioned thereby and for the consequent loss of time; and also compensation for the bodily pain and suffering caused by such breaking of his limb (15 N. Y. Rep. 415; 18 id. 534).

The principle on which a recovery, in such a case, is allowed for bodily pain or suffering, loss of time and expenses, sustains the recovery, in this case, for the plaintiff's loss of health and loss of time, and his expenses during his sickness. And that the plaintiff could recover back the $250 he paid to be carried from New York to San Francisco, and his expenses while necessarily detained upon the isthmus, and the expenses of his journey from there back to New York, admits of no doubt, if the defendant, by the exercise of proper diligence, could have carried him to San Juan del Sur; or if his long detention on the isthmus and subsequent return to New York were justly imputable to the defendants neglect of duty to him. But I will not discuss these questions further.

My conclusion is that no error was committed on the trial; and that the judgment of the Supreme Court should be affirmed with costs.

Judgment affirmed.

NEGLIGENCE, VIOLATION OF REGULATIONS BY A PASSENGER.

The case of McAuliffe *vs.* The Eighth Avenue Railroad Company, decided in the Court of Common Pleas of this City, in November last, is interesting as holding that it is not negligence on the part of a passenger to violate a rule or regulation of the company, of which he had no notice, but to which he conformed as soon as he had notice thereof. It was also decided that in an action against the company for negligence, the burden of proof is on the defendant to show that its rules were infringed, after having been brought to the notice of the plaintiff.

The opinion of the Court was delivered by

DALY, F. J.—The plaintiff testified that the car was full of people, and that there was no room for him in it; that he saw a man sitting on the box beside the driver, and that he the plaintiff, with the driver's assent got up upon the box. That while he was seated on the right hand side of the driver, the starter of the defendants told him that he was not allowed to ride there, and directed him to get down; that, in obedience to the order, he wanted to get down on the left hand side but the driver would not let him, but directed him to get down on the other side, next to the Sixth Avenue Railroad track; that he commenced to get down while the defendants' car was standing still, and was obliged to do so with his face turned inward, and that while he was in the act of getting down the driver started the horses and the car, and carried him against a car of the Sixth Avenue Railroad, which was then in the act of swinging around, by which he was almost killed, his head being split open and one of the ears severed from the head.

The starter testified that, as he went up to start the car, he saw two men on one side of the driver and the plaintiff in the act of getting up. That he ordered them all to get down. That the two men got down; that the plaintiff was standing on the edge of the car, holding on as if attempting to get up, when the Sixth Avenue car swung around and struck him on the side of the head, when he fell, was taken up and carried away, when he, the starter ordered the driver to start the car, which was not in motion when the plaintiff was struck, and that the car did not start until after the plaintiff was carried away; that he was positive that the defendants' car was standing still when the plaintiff was injured; the driver of the Eighth Avenue car testified that he saw the accident; that he saw the driver "motion" to the plaintiff to get down as he was getting up, and that he (the plaintiff,) did not hear what the driver said; that the two men on the opposite side commenced getting down while the plaintiff was getting up; that the plaintiff did not get down until the Sixth Avenue car swung around and knocked him down, and that the defendants car was not in motion at the time when the accident occurred; the defendants testified that it was against the rule of the company for any person to ride with the driver. A juror asked him if the defendants had any signs up forbidding persons to get up behind the driver, and he said that they had not.

The jury found for the plaintiff, and upon the complaint in the testimony we must assume that they found the facts to be as detailed by the plaintiff and the witnesses House and Chamberlain. Their statement shows that there was no negligence on the part of the plaintiff, and that the acoident happened wholly through the negligence of the defendants' agent. It did not appear that the plaintiff knew that it was against the rules of the company for any person to ride upon the box with the driver. He had a right to infer the contrary, as he saw a person sitting next to the driver, and he the plaintiff, was allowed to get up, as he testified, and as the jury may have believed, for that was one of the facts in conflict with the driver's assent. When informed by the starter that he was not allowed to ride there, he at once complied with the order to come down, and that he was unable to do so with safety was attributable wholly to that act of defendants' agent and not to any negligence on his part.

Before the Judge charged the jury the defendants requested him to charge four propositions. The third and fourth of those propositions were that the plaintiff's attempt to get upon the seat of the car with the driver was such an act as would preclude him from recovering, and that he could not recover without proving that he did not know the rules of the company. The judge did not charge either of those propositions, and in my judgment he was right in refusing to do so. The other propositions, were as follows: First. If the defendants' car was on the track stationary at the time of the collision and the plaintiff was attempting to get on the car against the rules of the company; or Second. If the accident was occasioned by the Sixth Avenue car while the defendants' car was stationary on the track, that the plaintiff could not recover.

It did not appear as I have already said, that the plaintiff knew that it was against the rules of the company to ride on the box by the driver. There was therefore nothing in the evidence to support the first proposition, and as respects the second, though not charged in the form in which it was submitted, it was substantially included; and the defendants had the benefit of it in the charge which the Judge made. He told the jury that the plaintiff could not recover except upon the truth of his allegation that he was ordered down from the top of the car, and was not given the opportunity to do so safely, but compelled to descend in the manner and under the circumstances detailed by him. This was in effect telling the jury that if the defendants' car was stationary when the accident occurred, the plaintiff could not recover. The defendants exception was a general one to the judges refusal to charge as requested. It extended to the three propositions which were not charged, but being general, it does not necessarily follow, that it meant to assume that the second proposition was not substantially or sufficiently charged, and that an exception was to be taken upon the ground that the Judge had deprived the defendants of the benefit of that proposition, if the jury had been of the opinion that the facts were as stated, by the defendants' witnesses. We would not be justified therefore, in granting a new trial upon that ground.

☞ The Oil City and Pithole Railroad will be finished to Oil City by the first of February. Thos. B. Porteus, Esq., has been elected President of the company.

"Railroad Interest and Taxation."

EDITOR OF THE RAILROAD JOURNAL:

Dear Sir:—In number 49 of your JOURNAL, December 9th, 1865, I notice a communication under the above caption, which seems to require some explanation.

The subject is one of great interest to all, and is suggestive of many important considerations, which need to be made clearly apparent by your correspondent. Allow me to ask the following questions:

1st. In what respect railroads are not *protected* by the *tariff*?

2d. What class of men would your correspondent send to Washington, to correct the errors of the existing tariff, when it shall come up for revision?

3d. What are the irregularities of the tariff as now enforced, and which are the "several classes" affected by them?

4th. What does he mean by the present tariff encouraging the use of *inferior* material by railway companies?

5th. What are the "peculiar features" in the case which remove it beyond the ordinary arguments of Protection and Free Trade?

6th. Wherein lies the connection between these "tariff irregularities," and their influence upon the "great branches of industry?"

It can be easily understood *why* this question should be made one of *public* rather than of private interest, though I do not see how it can be so legislated on, in view of the constitutional organization of all railway companies in the Union. Special legislation is necessary to meet the case, and yet on what grounds can such legislation be undertaken without infringing upon the spirit of our institutions?

Yours very respectfully,

LEX.

NEW YORK, December 30, 1865.

☞ The following railroad corporations have been recently organized in this State, and their articles of association filed in the office of the Secretary of State: The Buffalo and Allegheny railroad company consolidated with the Buffalo and Washington Railway Company, under the last named title. The articles of consolidation were filed in the office of the Secretary of State on the 11th inst. The articles of association of the Dunkirk and Fredonia Railroad Company were filed on the 14th inst. The road is to run from the Erie Railroad depot at Dunkirk, to the village of Fredonia, Chautauqua County. The articles of association of the Ithaca and Towanda Railroad Company were filed on the 22d inst. The route proposed is from the navigable waters of the Cayuga Lake, at Ithaca, through the Counties of Tompkins, Chemung and Tioga, to the Pennsylvania State line, near the village of Waverly, a distance of 35 miles. The capital of the company is fixed at $2,000,000.

☞ The Albany *Argus* says that the projects of enlarging the Erie Canal through its entire length, and of constructing a ship canal around Niagara Falls, and the enlargement of the canals Eastward, will be brought before the next Legislature.

☞ The Oswego and Rome Railroad is completed, and passenger and freight trains commenced running on the 1st inst.

*Some few miles ought to be added to the aggregate of Georgia and Florida for the Georgia and Florida Railroad, built during the late war. We, however, have not the figures to represent it. It commences at Station No. 12, of the Atlantic and Gulf Railroad and extends to Live Oak Station, on the Pensacola and Georgia Railroad.

Six Gulf and Southern Interior States	8,225.64	3,901.81	113,428,523	29,064	
Total United States	51,284.87	35,361.40	$1,388,555,268	$38,998	

In making the reductions to cost per mile in the above table, the aggregate cost in each State has been divided by the completed mileage. This makes a greater or less error in result, according to the activity of railroad construction in the States severally. Thus in the New England States generally the result obtained by this process is nearly accurate, since the difference between completed and progressing roads is small. In the new States, however, in which large amounts have been expended on roads as yet incomplete, the difference is necessarily wider apart. Making reductions for the actual condition of affairs in the several States, a near approximation to the truth is arrived at. The following table is based on this proposition:

APPROXIMATE COST PER MILE OF ROAD.

States.	Cost as above.	Deduct per cent.	Resulting Cost.	States.	Cost as above.	Deduct per cent.	Resulting Cost.

The following table shows the

PROGRESS OF RAILROAD CONSTRUCTION,

from the year 1827, when the only railroad in America was that belonging to the Quincy Company, extending from their quarry to tide-water in Boston Harbor, to the commencement of the present year, 1866, when the United States, in the aggregate is traversed by a longer length of track than is found in all other parts of the world together! and if the equivalent single track be measured, the whole would girdle the earth at the equator with a double track line!

Year.	Miles.	Year.	Miles.	Year.	Miles.	Year.	Miles
1827	3	1837	1,421	1847	5,336	1857	22,625
1828	3	1838	1,843	1848	5,682	1858	25,090
1829	28	1839	1,920	1849	6,350	1859	26,755
1830	41	1840	2,197	1850	7,475	1860	28,771
1831	54	1841	3,319	1851	8,589	1861	30,593
1832	131	1842	3,877	1852	11,027	1862	31,769
1833	576	1843	4,174	1853	13,497	1863	32,471
1834	762	1844	4,311	1854	15,672	1864	33,860
1835	918	1845	4,522	1855	17,398	1865	34,442
1836	1,102	1846	4,870	1856	19,251	1866	35,361

PASSENGER RAILROADS.

It is almost impossible to follow the progress of city railroad construction. All our large and many of our second or third rate cities have these accommodations, and in several instances they extend far into their neighborhoods. We have lists which, at some future time, and when more complete, we shall publish. These, incomplete as they are, sum up to more than 1,100 miles, and with their second tracks cannot measure less than 1,650 miles. If we add these to the commercial and mineral roads given in the tables as above, we find that the total length of road in the Union is 37,000 miles, or, with second track, no less than 50,000 miles, costing, in round numbers, $1,450,000,000.

CENSUS STATISTICS OF MANUFACTURES PRODUCED IN THE UNITED STATES DURING THE YEAR ENDING JUNE 1, 1860.

States and Territories.	No. of Establishments.	Capital Invested.	Cost of Raw Material.	Average No. of Hands Employed. Males.	Females.	Annual Cost of Labor.	Annual Value of Product, In 1860.	In 1850.	Per Cent. Increase.	Val. of An. Product per Capita.

American Railroad Journal.

Saturday, January 6, 1866.

Stock Exchange and Money Market.

The commerce of the port of New York for the year 1865, is ascertained by official statements to have been of the value of $221,283,391, against $215,593,666 in 1864. The amount disposed of in the market here during the last year is stated at $215,330,611, against $184,200,875 the previous one, and the customs duties paid in 1865, $104,794,945, against $66,993,842 in 1864. We also notice that the exports reduced to their gold value, were in 1865, as follows: produce and goods, $116,160,661; gold and silver, $29,963,270—total, $146,124,330. In 1864 they were: produce and goods, $97,283,897; gold and silver, $50,000,705—total, $147,284,602. Thus showing a large increase in the produce exports, and a large falling off nearly 50 per cent. in those of the precious metals. On the other hand, the receipts of these last have increased very considerably. In 1864 the amount brought in from California was $12,952,067, but in 1865 it was $20,680,164. The balance remaining in this country in the Banks and Treasury safe subject to count is estimated at the sum of $20,234,117; but if we reckon the amounts brought from the inland mining States, and territories which never pass through official bands, we may conclude that the actual sum in the country is very much larger.

The imports, estimated at their currency value for the last year at this port, are given at $221,283,391, an increase from the previous year of $5,689,725, while the exports at their currency valuation were $173,079,839, a decrease from the previous year of $40,944,734. The total exports of specie were for the year $29,963,670, against $50,010,705 the previous year, showing a decrease of $20,147,035.

The gold received for customs in 1865 was $102,794,945, against $66,993,842 in 1864, out of which the interest paid by the Government was $40,104,279, leaving a balance by this count of $62,695,666 in its favor. On the 1st inst., about $9,750,000, a farther payment of gold interest was due and payable with ample means of payment, as will be perceived. The official monthly statement for December from the Assistant Treasurer's office shows an immense amount of business promptly transacted there, with a final balance at its disposal of $75,996,841 08. A small amount of bullion has been received at the Assay Office in this city from Lake Superior.

There is a constant increase of the number of the National Banks. There are now 1,625, with a capital of $407,409,203, and a circulation of $237,371,155. The profits of these institutions under the advantages they derive from the new system are enormous as is seen by the very large dividends they are enabled to make. We certainly look forward to their being called on at no distant day to perform their duty to the public which is doing so much for them, by making their bills equal to specie, as they profess to be, and if the legal tenders were out of the way they would be compelled to do. If some attempt in this direction is not made by the Treasury department, the National Bank system, to use the words of a cotemporary will become a "serious National evil." We have on several occasions pointed out a remedy, which perhaps partakes of a rather radical character, what in medical practice would be called a "heroic remedy," yet we think it is nevertheless the surest and most effectual. It is to require of all new banks hereafter created by act of Congress to deposit greenbacks as security for their issues instead of bonds. We might then allow a large increase of banking capital at the South without danger. More than this, if the existing banks were called on to deposit greenbacks as security for their issues, and take back their bonds, exchanging them at intervals of 90 days, we could get in enough of these legal tenders to enable the Government to resume specie payments and thus compel the banks to follow its example.

The banks will of course stoutly oppose this measure; for now they have immense privileges and no responsibility; but the people of this country are under no obligations to submit to a ruinously depreciated currency, unsettled and ex-

orbitant prices, and a large diminution in their foreign commerce for the sake of these institutions. This Government and this Union do not exist for the exclusive advantage of the issuers of paper money, and it is time the system was corrected. We do not care how many banks are created, if they are compelled to redeem their bills in specie. But we do object to being weighed down by excessive prices for their benefit. We must as all admit, have a change, or the wealth of the country will fall into the hands of a very small class of persons, and this is the present tendency of things. Large accumulation in few hands, impoverishes great numbers of the people, and in this country our prosperity depends on the advancement of the many and not the gain of the few.

"Ill fares the land to countless ills a prey,
Where wealth accumulates and men decay."

The Money Market has been very easy for some time past. The rates to borrowers seem to have settled down on good securities to 6 per cent. The British Money Market on the contrary gives signs of much disturbance. Our last arrivals brought the rumors that the Bank of England was quite likely to advance its rates, and there was considerable anxiety in commercial circles with regard to it. Consols were unusually low. American securities had again advanced, of which immediate advantage was taken in this city. It is curious to note that a monetary crisis has arrived at Rome. The *Debats*, a Paris journal, says that at the last dates, there was a run upon the Government Bank for specie, and that its bills were redeemed chiefly in copper coin of the smallest values, paid out so very slowly, that crowds were compelled to wait for hours at the doors before they could get in even to take their turn, and were sent away at a particular hour, whether they had been served or not. Soldiers and policemen were present in large numbers to keep order, and the Government had prohibited the brokers from buying or selling its coined money. Paper money has run the length of its rope in the Holy City, and the people finding that prices in consequence are destroying them, have made this final attempt to convert their *billets* into coin, while the bank is doing all it can to avoid its responsibilities to the holders.

This fact reminds us of similar transactions recorded in our own history of Banking, when a celebrated financier who owned an institution in the interior of this state at Sandy Hill redeemed for a short time under a sudden call for payments, his own paper in small coin taking a goodly time for the count, much to the annoyance of his creditors. Paper issuing banks as a rule care very little for the public when they are crowded themselves, and we may fully expect at no future day to see the same kind of tactics repeated, whenever there is an attempt at the redemption of bank paper. The longer this is postponed, the greater will be the difficulty of this redemption.

We have a very easy money market attributable to the large amount of dividends now in process of being made as well by banks and private companies as the National Government. The returns of the associated banks for the week are considered favorable, and act upon the character of the market. They return an increase of legal tenders by the large sum of $17,243,476, while they also show a very light demand for discounts. They have however a less amount of specie on hand from that previously reported by the sum of $723,268. The net balance of deposits is increased by the sum of $6,202,990. The circulation has been enlarged $361,168. Among the large dividends alluded to is that of the National Currency bank, being 15 per cent. for three months, making for the year the enormous profit of 60 per cent! The stock market is reported strong with a disposition to purchase. In the leading railway shares there is an advance.

Gold shows a tendency to fall off, the price being below 145, and is chiefly in demand for duties. If prices of our principal staples were lower, it would still further decline, for there is but a small profit, if any, in shipping gold. It is never taken for this purpose, if any useful product can be substituted which will bear transportation, and pay even a moderate profit. It is only taken when nothing else will pay, or is drawn for politico-financial reasons; such, for instance, as the wants of the Bank of England, when it has to look about for a reinforcement for its specie reserves. Beyond all question this has often been the cause of the heaviest drafts upon us, made at its intimation through the heavy houses which lean upon it, and often are leaned upon. The financial policy of England is entirely controlled by the bank parlor, and its movements are often "sharp, short, and decisive."

Foreign exchange is merely nominal in its operation, though considerable amounts have the last week been sold below par, a circumstance easily explained when we know the large quantities of cotton and United States securities going forward under the effect of the late advance in both.

A curious fact is stated in the annual message of the Governor of this State, delivered to the Legislature on Tuesday last, in relation to the bonds of the state. The change produced by the abandonment of the local system for the national, has been that of retiring 193 from the former to the latter, and a consequent decrease in their circulation of $13,109,186, and an increase of cash of $90,215 39. So far then, it is evident the change has been a beneficial one to the people of this state, who have also gained in the uniformity of the currency.

We are working out many curious problems in finance, such as no other people ever had occasion to do, and could not if they tried. Our indomitable spirit, our unsurpassed boldness, and our wonderful self-reliance seem to be equal to every emergency. We pay little attention to experience, but seem willing to take all the chances in order to effect a particular purpose, nor do disasters appal, or losses discourages; when discomfitted, we try again, and growing up to our requirements we ride through every storm. With a prudence equal to our resources and real native ability, we should make progress more wonderful than ever has been made. But we have peculiar tastes and propensities.

None is more fixed than those of expenditure, in which all indulge without regard to consequences. Economists are nowhere, in the giddy throng which now leads and makes public sentiment in the world of business and the pursuits of life. But for the occasional overthrow of great and reckless operators, there would scarce be any check upon the masses who make up the business power of the country.

This is a hard thing to say, but it is the opinion and the teaching of our wisest public men, and of the most honest portions of the press.

Included in the exports from this port for the past week were 14,711 bales of cotton valued at $3,333,072. We can here see the importance of cotton in a striking manner.

The balance in the Sub-Treasury on the 2d inst. was $64,190,404 88.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—American Gold, 142½; State 7s Bounty Loan, 98¾; Georgia 6s, 90; Connecticut 6s, 95; Long Island R. R., 76; Morris and Essex, 99½; Milwaukee and St. Paul 1st mort., 85; Mariposa pref., 19¼; Central Coal Co., 53; Spring Mt., 55; Schuylkill Coal, 15; Lehigh and Susq. Coal, 7¾; Ashburton Coal, 15; Copake Iron, ¾; Western Union Tel., 50; Brunswick Land, 8; Rutland Marble, 17½; Bank of Commerce, 105; 9th National Bank, 102; Shoe and Leather Bank, 100; Central Bank, 108; 4th National Bank, 101¼; Manhattan Bank, 132; Am. Ex. Bank, 109; Metropolitan Bank, 120.

Chrome, 0.95@1.10; Bare Hill, 1.30@1.45; Atlantic Coal, 1.05@1.10; Mineral Hill, 0.60@0.70; Baltimore Coal, 140@200.

☞ We invite attention to the advertisement in this issue of Messrs. ADAMS, KIMBALL & MOORE, Bankers and Brokers, No. 7 New Street. Their resources are ample for the transaction of any business committed to their charge, and it will be seen that their references are of the highest character.

☞ The Philadelphia and Baltimore Central Railroad has been extended to Rising Sun, in Cecil Co. An excursion train passed over it on the 25th ult.

☞ The total debt of the City of Charlestown, Mass., is $1,238,300, of which $820,000 is a water debt and $134,197, a war debt. The annual interest amounts to $68,811.

Railroad and Steamboat Accidents.

The total number of casualties by Railroad Accidents in 1865, was 1,762; of which 335 resulted in death, and 1,427 in wounds. In 1864 the number of casualties was 1,890, viz: killed, 404; wounded, 1,486—a decrease in 1865 of: casualties, 128; deaths, 69; wounded, 59. These figures do not include accidents where no lives were lost, accidents to individuals which were caused by their own carelessness or design, or deaths or injuries resulting from the recklessness of persons in crossing or standing upon railroad tracks where trains were in motion.

The total number of casualties by Steamboat Accidents in 1865, was 2,053; of which 1,788 resulted in death, and 265 in wounds. In 1864 the number of casualties was 501; of which 358 resulted in death, and 143 in wounds—an increase in 1865 of: casualties, 1,552; killed, 1,430; wounded, 122.

The following table exhibits the number of Railroad Accidents, with the number of persons killed and injured by such casualties during the past thirteen years:

	Accidents.	Killed.	Wounded.
1853	138	234	496
1854	193	186	589
1855	142	110	539
1856	143	105	629
1857	126	130	536
1858	82	119	417
1859	79	129	411
1860	74	57	315
1861	63	101	459
1862	99	264	877
1853	89	264	671
1864	140	404	1,486
1865	183	335	1,427
Totals	1,551	2,438	8,852

The following table shows the number of Steamboat Accidents, and the killed and wounded during the past thirteen years:

	Accidents.	Killed.	Wounded.
1853	31	319	158
1854	48	587	225
1855	27	176	107
1856	29	358	127
1857	30	332	82
1858	27	300	107
1859	21	342	146
1860	29	597	134
1861	19	69	88
1862	16	220	70
1863	20	255	85
1864	26	358	143
1865	32	1,788	265
Totals	355	5,691	1,737

☞ A project is on foot to unite Lake Ottawasaga with Lake Ontario at Toronto, by a canal running entirely through Canadian territory, but designed as a carrier, also, to benefit the United States, by facilitating the delivery of Western produce at our seaboard. The canal is to be fed by Lake Simcoe, and to be about 100 miles long, saving a water journey by the St. Clair Flats of about 420 miles. An act of Parliament incorporates the enterprise under a liberal charter, and only forty million dollars of capital are required to execute the work.

☞ A dispatch from Leavenworth, Kansas, states that the Union Pacific Railroad has been completed to Topeka, and that the first passenger train arrived at Topeka from Wyandotte on the 2d inst.

Debt of Massachusetts.

The following is a statement of the loans outstanding November 30, 1865, the principal and interest of which is payable in gold:

	Rate.	Amounts outstanding.	Principal payable.
1856	6	$100,000	1866
1857	6	150,000	1868
1861	5	15,000	1868
1861	6	75,000	1868
1861	5	150,000	1870
1859	5	21,000	1870
1861	6	89,000	1870
1861-'62-'64	6	205,000	1871
1852	5	100,000	1872
1861	5	17,000	1872
1861	6	83,000	1872
1861-'62-'64	6	341,000	1872
1853	5	125,000	1873
1861-'62-'64	6	304,000	1873
1854	5	150,000	1874
1854	5	94,000	1874
1861-'62-'64	6	300,000	1874
1861-'62-'64	6	420,000	1875
1861-'62-'64	6	1,430,000	1876
1857	6	50,000	1877
1861-'62-'64	6	400,000	1877
1861-'62-'64	6	200,000	1878
1860-'62	5	220,000	1880
1863-'64	6	1,088,000	1883
1863-'64-'65	5	6,429,000	1894
Total		$12,556,000	

The following loans are payable at maturity, principal and interest in lawful money:—

Deposit loan, Acts 1863, Resolves 1865, 30 days notice, $2,594,736; temporary loan from banks, Acts 1863, various dates, $274,400; temporary loan, Resolves 1865, 6 to 12 months, $2,880,758; total, $5,749,894.

Debt free of interest:	Amounts outstanding.
Debt past due	$1,000
Requisitions	2,296,250
Total	$2,297,220

RECAPITULATION.

Debt, principal and interest in gold	$12,556,000
Debt, principal and interest in lawful money	5,749 894
Debt free of interest	2,297,250
Total of all debt*	$20,603,144
Less sinking funds, Back Bay lands, railroad stock and cash, applicable to the redemption of the public debt	12,888,003
	$7,715,141

* Exclusive of loans to Railroad Corporations, secured by mortgage and collateral.

☞ The first line of survey for the Alexandria and Fredericksburg Railroad has been completed. The line crosses the Occoquan at Colechester, and will connect with the Fredericksburg and Aquia Creek road some six or seven miles above Fredericksburg, making the entire length of the road something less than forty miles. One or two other lines will be surveyed, but we presume this will be found the shortest and most practical one.

☞ The St. John *News* says that the railroad, west from St. John, is assuming quite the appearance of a public work. Fourteen miles have been placed under contract, the contractors being Mr. William Davidson, and Messrs. Yorston & Ross. Grading is going on at three different points. The number of men engaged is 50, and it is Col. Pierce's intention to keep not less than 100 fully employed till Spring, when it is understood a large force will be set to work.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JULY 31, 1865.

The receipts on capital account during the half-year amounted to £674 0s. 10d., and the total receipts to 31st of July, 1865, were £5,146,349 16s. 1d. The aggregate expenditure to the same date amounted to £5,119,366 17s. 9d., leaving a balance to the credit of capital account of £26,982 18s 4d. The outlay on capital account during the half-year consists of proportion of expenditure chargeable to capital on rebuilding timber bridges in stone and iron—cost of "fish-jointing six miles of rails—outlay on new car ferry-boat for the Detroit river—expenditure on account of the extension of the line along the Toronto Esplanade, and new station at Toronto, &c., amounting altogether to £27,180 15s. 6d. The revenue account for the past half-year is as follows:

Gross receipts		£284,565
Working expenses, including the maintenance of way, taxes, insurance, and rent of suspension bridge		132,487
		£152,079
From which there has to be deducted—		
Interest on Government loan	£17,498	
Interest on bonds, &c	32,464	
Loss on the conversion of American money	54,937	
Renewal of rails, sleepers, bridges, &c.	26,317	
		131,217
		£20,862
To which may be added—		
Am't for mail service on Sarnia branch, to 31st July, 1865, not previously included in traffic amounts	£8,295	
Amount from the Montreal Telegraph Co. under agreement	3,082	
Surplus from last half-year	4,571	
		15,948
Leaving a surplus of		£36,810

From which the Directors recommend the payment of a divdend at the rate of 2 per cent. per annum. This will absorb £33,604 19s. 5d., and leave a balance of £3,205 7s. 6d. to be carried to the credit of the current half-year. The loss on the conversion of American funds during the half-year amounts to the sum of £54,937 6s. 7d. The purchases of gold have been effected at an average rate of 153½. An additional loss amounting to £4,670 14s. 6d., has been incurred by the conversion of the sum of $77,504, American funds since 31st July, and a further amount of $164,654, also in American funds, was at that date due to the Company on traffic account. The following table shows the receipts and expenses of the last five half-years:

	Receipts.				Expenses, including taxes, insurance, & Suspension bridge rent.
Half-year.	Passen. mails, and sundries.	Freight and live stock.	Rents.	Total.	
	£	£	£	£	£
July, 1863	111,671	183,772	625	293,067	136,270
Jan., 1864	129,684	171,329	621	301,634	135,879
July, 1864	125,282	189,081	577	314,940	140,189
Jan., 1865	154,125	157,874	730	312,730	137,437
July, 1865	139,821	144,028	716	284,565	132,487

The gross receipts for the six months ending July 31st, 1865. were £284,565 7s. 7d., against £314,939 19s 2d. for the corresponding half-year in 1864. In the aggregate, the passenger receipts for the half-year just ended show an increase of £14,539 6s. 7d., while the freight and live stock receipts show a decrease of £45,052 12s., leaving a total decrease of $30,513 5s. 5d. as compared with the half-year ending 31st July, 1864. Notwithstanding this large decreese the working expenses amount only to 46.56 per cent. of the gross receipts. The decrease in the receipts is entirely attributable to exceptional causes. The winter was unprecedentedly severe, and caused serious stoppages on American connecting lines. The passenger traffic was also affected by the adoption of the passport system. Immediately upon the removal of these obstructions the weekly returns began to be most satisfactory, and from the 8th of April to the close of the half-year showed an average weekly increase over the corresponding period £1,294. The abundant harvest throughout Canada, and the general improvement of business, afford reasonable ground for believing that the traffic of the current half-year will continue satisfactory. The receipts from the 1st of August to the 15th of September (the date of the last return) show an aggregate increase of £18,726 over the corresponding period, or an average increase of £2,675 per week. After long negotiation, a settlement has been arrived at with the Provincial Government as regards the payment for postal or mail service since October, 1858. By a report of the Executive Council, approved by His Excellency the Governor-General in Council on the 21st of August, 1865, the Government has allowed the sum of $100 per mile of railway per annum up to the 31st August, 1865; and from the 1st September, 1865, in consideration of additional facilities to be afforded by the Company, will increase the payment to $125 per mile of railway per annum. This arrangement is for four years. The appeal of the Commercial Bank of Canada has been argued before the Judicial Committee of the Privy Council, judgment being delivered on July 27th, confirming the decision of the Canadian Court of Error and Appeal, and dismissing the appeal with costs against the bank. The new joint-lines along the Esplanade, at Toronto, are nearly completed, and it is expected that in November the new station at the foot of Yonge street will be opened to the public. The free grant made by the Corporation of the City of Toronto, subsequently legalised by an act of the Provincial Legislature, places this Company in a position to afford greatly increased traffic facilities to that important city. The Directors have tendered their thanks to the Corporation for the liberality displayed by it, and they are pleased to state that the new station now being erected by the Company in Yonge-street is so conveniently and centrally situated as to give great satisfaction to the public. The contract for the hull of the new car ferry boat for the Detroit river has been completed, the various parts transported safely to Canada are now being put together, the boat will be ready for traffic next spring. The Directors have recently received very encouraging information with regard to the oil districts of Bothwell and Enniskillen, which are situated upon the lines of the Great Western railway. American and other capitalists have been making large purchases of land, and sinking new wells. The construction of the Erie and Niagara railway is being proceeded with by the Atlantic and Great Western Company, and it is hoped that by next spring the railway will be ready for public use. The working arrangement between the Companies will be submitted to the Shareholders for their formal approval. The Directors are happy to report that their relations with the American connecting railways continue to be upon a satisfactory footing. It is gratifying to the Directors to state that the efficiency with which the railway had been managed, the freedom from accident, and the general good condition of the rolling stock and permanent way, have made it one of the most popular routes on the American continent for both through and local traffic, and reflect much credit upon the officials of the Company. The receipts of the Detroit and Milwaukie railroad for the half-year ending the 30th June last amounted to £147,870 against £119,576 for the corresponding period 1864, showing an increase of £28,294.

Signed on behalf of the Board of Directors,

THOMAS DAKIN, President.

London, Sept. 27, 1865.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 3d week in Dec., 1865, were:

	1865.	1864.
Passengers	$7,568 13	$7,855 08
Freight	14,168 72	10,962 39
Mail, express & telegraph	1,185 00	1,079 58
Total	$22,921 85	$19,897 05
Total for the fiscal year commencing Jan. 1.	$1,192,139 53	$994,801 80

The earnings of the Michigan Central Railroad for the 3d week in Dec., 1865, were... $70,838 00
Corresponding week of previous year.. 86,099 00

Increase. $15,171 00

The earnings of the Grand Trunk Railway for the week ending Dec. 23d, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$43,720 00
Express, freight, mails and sundries..	7,500 00
Freight and live stock	72,695 00
Total	$123,915 00
Corresponding week, 1864	106,658 00
Increase	$17,257 00

The traffic of the Great Western Railway for the week ending Dec. 29, 1865, was as follows:

Passengers	$28,967 72
Freight and live stock	22,092 46
Mails and sundries	1,965 59
Total	$53,025 77
Corresponding week of 1864	58,600 87
Decrease	$5,575 10

Milwaukee and Minnesota Railroad.

The sale of the Eastern Division of the La Crosse and Milwaukee Railroad, under the foreclosure proceedings, which was to have taken place on the 4th inst., has been stopped, it is said, by the payment of the arrears of interest on the 2d mortgage, amounting to about $470,000, into the U. S. Circuit Court for the District of Wisconsin. The Milwaukee and Minnesota Railroad Company will now take possession under the mandate of the Supreme Court of the United States, of its valuable property, and all the franchises of the late La Crosse and Milwaukee Railroad Company, which includes the 95 miles of road between the city of Milwaukee and Portage, which it owns in fee, together with the right of way over the Western Division to the Mississippi River at La Crosse, and all the valuable equipment of the late La Crosse and Milwaukee Company. The Company has been organized by the election of the following board of directors: Henry M. Alexander, President; Alexander Fleming, Vice-President; John Edgar Thomson, Thomas A. Scott, Matthew Baird, Philadelphia; Ashbel Green, A. C. Gunnison, A. S. Bright, New York; Henry E. Weed, Troy.

Texas Railroad.

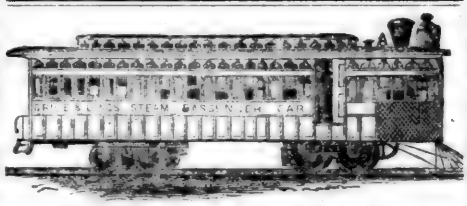
St. Louis, Dec. 27.—Mr. Lockridge, a representative of the railroad interests in Texas, has arrived in Kansas City on a mission to the president of the Kansas City, Fort Scott and Galveston railroad, with a view to the speedy completion of that road with its Texas connection. The people of Texas are fully alive to the importance of the improvement, and hope that it will soon be completed. Mr. Lockridge says that the hope of speedy railroad connections with the northwest, and the resumption of railway traffic and travel, is causing a spirit of enterprise to prevail throughout the State, and the people generally are anxiously looking forward to the restoration of the State to the Union.

The National Debt.

The National Debt on the 1st of January, as telegraphed to the Associated Press, was as follows:

Debt bearing interest in coin	$1,167,148,291 80
" " " currency.	1,179,475,235 50
" on which int. has ceased	1,166,880 32
" bearing no interest	459,519,950 37
Total	$2,807,310,357 99
Coin in Treasury	$45,735,550 69
Currency in Trea.	44,993,271 11
	90,728,881 80
Debt less cash in Treasury	$2,716,581,536 19

☞ Hartford capitalists are moving in regard to the proposed railroad between Collinsville and Van Deusenville (Great Barrington.) The length of the road will be about 39 miles, and the Hartford people anticipate a lucrative trade if the road goes through.



Portage Lake Copper Mines.

The November product of these mines was as follows:

	Tons.	Lbs.
Quincy	143	1,492
Pewabic	135	127
Franklin	114	570
Huron	42	1,797
Isle Royale	40	305
Grand Portage	34	1,302
Albany and Boston	24	340
Sheldon Columbian	14	1,467
Hancock	9	

—making the total product of the Portage District for the month 558 tons and 1,400 lbs.

☞ The product of the Central Copper Mine for the month of November was 113 tons.

American Railroad Journal.

New York, Saturday, January 13, 1866.

The Cattle Prohibition.—Commercial Blunder.

It is a very curious fact that anti-commercial legislation just now appears to be quite popular. Everything for manufacturers, nothing for commerce. Not that we are opposed to the interests of the former, on the contrary we are the friends of domestic industry in all its varied forms. But we do not ignore the fact that our country lies upon two great oceans and is traversed by very grand rivers, and that to overlook their existence is an act of gross folly.

Yet we see but little attention paid to the interest of commerce, and we are rapidly falling behind other nations in this respect. We are trading with them after the old fashion of former years as if there were no steamers, no improvements in machinery, no increase in our productive power, and no disposition to advance in this direction. In Europe during the last two years, large and important changes have been made in its commercial relations: Sweden has made nine changes, all of them on the liberal side, with one exception—namely, an increase of the duty on certain coarse kinds of cast iron wares to 3s. 11¾d. per cwt., which is about three times the previous rate. From gutta percha the duty is removed, and the other alterations consist of reductions ranging between 16½ and 60 per cent. on various sorts of wrought iron, miscellaneous articles, and cotton tissues. Hamburg has made a reduction of 50 per cent. in the whole of her import duties. Portugal has enacted that tobacco shall be allowed only to be imported by contractors authorised by the government. Italy has effected numerous modifications, all of a liberal character, chiefly consisting of reductions ranging between 13 and 74 per cent. in linen and silk goods and metals. The Papal States have reduced their duties on linen yarns and woollen drugget 60 per cent., and Switzerland has reduced her duty on arms of all kinds for private use 86½ per cent.

Our exertions appear to be made in an opposite direction. We have broken off our trade with Canada which between 1854 and 1863 gave a total balance in our favor on all goods coming and going of $46,307,275, while the total aggregate of exchanges since 1854 has been upwards of three hundred millions. But our object at this time is to remark on the spirit of our legislation. Thus Congress has recently and scarcely with any debate or discussion, prohibited the importation of cattle from all foreign countries.

This was evidently done under the idea that it would prevent the introduction of the cattle pest from abroad. One immediate effect of this law is that we cannot receive cattle from Canada from which we have hitherto obtained large and very acceptable supplies, and as it is understood none of any description whatever, though the staticians in their tables make quite a distinction between the varieties of what may be termed cattle, and enter them under different heads.

In the United States in common usage according to Webster, *cattle* means beasts of the bovine genus exclusively, oxen, bulls, cows and their young. In the local laws respecting domestic beasts the distinction is observed. In Great Britain the difference is recognised as between black cattle and small cattle, the latter including swine, sheep and goats. But since the passage of the present law, new doubts have arisen as to the real meaning and application, and the Secretary of the Treasury has already been called upon to determine its application on several occasions. Thus one of the latest and most amusing inquires made of him for his opinion, was from parties owning a menagerie, who wished to know whether they could bring their elephants, tigers and monkies from Canada to the United States. The Secretary interpreting the law according to its true intent and meaning decided that these animals were not within the prohibition enacted by Congress, and that they might cross the line without violating the law. But the law itself under any circumstances was hastily and improvidently passed, and the consequence is already seen in an advance of several cents per lb. on meats sold in the markets. It is therefore supposed by many persons, that the bill was the work of cattle speculators, and the holders of packed provisions, just as we had whiskey legislation during the last Congress, under similar impulses. Now if the law had forbidden the importation of cattle from those countries where the plague prevails, we could have seen some propriety in its enactment. Even then its necessity might be well doubted. For we do not import them from any country where the pest has existed, beyond now and then a few heads at high prices for the improvement of our stock. Who ever heard of a ship load of cattle being brought from England, or Holland, or Belgium? In those countries with humid climates and a general use of artificial *feed* it is not singular that disorders and diseases should break out among their herds, yet we doubt whether an animal in good health could carry the seeds of infection across 3,000 miles of ocean, and we doubt whether any one would attempt to export sick animals to the United States as they would assuredly die on the passage. A Roman Catholic Prelate of Ireland goes so far as to say that the *kinder pest* is a judgment of Providence on the British people for caring more about cattle than men, but we do not propose to discuss this view of the subject. The point we would make is, that the law cuts off the usual supplies from Canada, where no pest has appeared, or with its climate and natural pastoral supply of food is likely to

appear. There is no more probability of its breaking out there, than in any of the North Western States. So that the law by its generality and vagueness, is really doing mischief and cutting off a needed supply of food. If it had been left to the Secretary of the Treasury to designate the countries from which the importation was to be denied, it would have been far better, as he could easily have determined that from the facts of the case in good time. But as it is now, we have a prohibition against the importation of cattle from countries from which we do not receive any supplies, and cut it off from one which is as free from the pest as our own, and whose supplies are really a necessity to the population of the adjacent States.

It is against this sort of legislation that we feel ourselves called upon always to remonstrate.

Debt of Boston.

The total funded and unfunded debt of the City of Boston on the 23d of December, 1865, was as follows:

City debt proper	$3,572,920 38
Water debt	6,889,845 73
War debt	2,013,850 00
	$12,476,616 11
Means on hand of paying the debt.	2,065,776 51
Net debt, Dec. 23, 1865	$10,410,839 60
The consolidated debt of the city, funded and unfunded, Dec. 24, 1864, was	$11,618,232 77
Means then on hand	1,597,034 69
Net debt, Dec. 24, 1864	$10,021,198 08
The increase of the gross debt in 1865 was	$858,383 34
The increase of means in 1865 was	468,741 82
Showing the net increase of the city debt to have been	$389,641 52

Baltimore and Ohio Railroad.

The only reports published by this company since the outbreak of the rebellion are those for the fiscal years ending September 30, 1861, 1862 and 1863; and these were not presented to the stockholders until the annual meetings in November, 1863, 1864 and 1865—in each instance two years later than usual. The cause of the delay in making these annual statements is attributed "to the protracted difficulties connected with the war, and the delays in the adjustment of the accounts with the Government."

The President's reports, being a general resume, of the year's business, have been published in the JOURNAL—that for 1861, in the number for Nov. 21, 1863, that for 1862, in the number for Dec. 3, 1864, and that for 1863 in the number for Dec. 9, 1865. A comparative statement of the business of the years 1861 and 1862 was also published in the JOURNAL for March 11, 1865.

We have recently received the report of this company for the year 1863, containing the tabular statements of the Treasury, Transportation, Road and Machinery Departments. These reports embrace much matter of peculiar and marked interest, showing, in addition to the usual statistics, the continued and immense destruction of the tracks, bridges and equipment, stations and other property of the company, with particulars of the reconstruction, as far as accomplished, and of the working operations of the road.

The road operated by this company comprises three distinct parts: the Main Stem, the Washington Branch, (two-thirds of the stock of which is owned by the Baltimore and Ohio Railroad Company,) and the Northwestern Virginia Railroad, which at the date of the report was under lease to the Baltimore and Ohio Company, and in which it possessed large financial interests. The length of these several lines is as follows:

Baltimore and Ohio Railroad	379.6 miles.
Washington Branch	30.0 "
Northwestern Virginia Railroad	103.5 "
Total length of road	513.1 "

The stock of engines on hand at the close of the fiscal year 1863, numbered 221, of which 154 were 1st class; 30, 2d class; 15, 3d class and 22, fourth class. Of these 38 were passenger engines, 146 coal and tonnage, and 37 ballasting, etc. During the year six new engines were added to the equipment; and one hundred repaired and rebuilt. Owing to the embarrassments of the war and the employment of the cars of this company on various roads it was impossible to make a correct statement of cars in the service; they were, however, in proportion to the number of engines in the service.

The mileage of engines in 1862 and 1863, on the lines severally was as follows:

	1862.	1863.
Main Stem	1,953,769	2,938,010
Washington Branch	525,129	494,218
Northwestern Va. R. R.	314,322	298,035
Total	2,793,220	3,730,258

No returns are given of the number of passengers carried, and very incomplete reports of the tonnage. The through tonnage, which in 1862 amounted to 65,018, was in 1863, 120,848, showing an increase of 55,830 tons.

In 1862, the entire road was in the company's possession only a little over 4½ months, while in 1863 it was in use for some 6 months of the year as a through line.

The aggregate quantity of coal paying freight was in 1862, 160,705; in 1863 it was 307,545—showing an improvement of 146,842 tons.

The tonnage of live stock in 1862 was only 11,788; in 1863, it was 24,151.

The quantity of flour brought to Baltimore in 1863 over the Main Stem and Washington Branch was 474,168 bbls., against 390,839 in 1862. And the lumber trade which in 1862 amounted to 6,063 tons, was in 1863, 7,466 tons.

The following tables give the receipts of the last four years, those for 1860 and 1861 being inserted as a measure for comparison:

	Passenger.	Tonnage.	Total.
Main Stem—			
1860..	$967,735 44	$3,224,467 50	$3,922,202 94
1861..	889,159 05	2,324,266 65	3,211,425 70
1862..	1,769,497 13	2,712,361 85	4,481,858 98
1863..	2,332,806 37	4,177,138 69	6,509,945 06
Washington Branch—			
1860..	$361,026 57	$101,853 87	$462,880 44
1861..	327,879 03	110,260 66	438,139 69
1862..	444,262 30	334,154 37	778,416 67
1863..	500,117 08	203,006 51	703,123 59
N. W. Va. R. R.—			
1860..	$111,357 20	$227,845 92	$269,203 12
1861..	134,386 14	216,145 59	350,531 73
1862..	125,780 09	238,242 10	364,022 19
1863..	147,874 97	298,345 89	446,220 86
Aggregate—			
1860..	$1,100,119 11	$3,554,167 29	$4,654,286 50
1861..	1,349,424 22	2,650,672 90	4,000,097 12
1862..	2,339,539 52	3,284,758 82	5,624,297 84
1863..	2,980,798 42	4,678,491 09	7,659,289 51

The aggregate gross earnings of the lines separately for the last two years, give the following amounts:

	1862.	1863.
Main Stem	$4,481,858 98	$6,509,945 06
N. W. Virginia R. R.	364,022 19	446,220 86
Washington Branch..	778,416 67	703,123 59
Total	$5,624,297 84	$7,659,289 51

The expenses of operating and repairs were as follows:

	1862.	1863.
Main Stem	$1,427,205 83	$1,965,847 41
N. W. Virginia R. R.	266,670 77	404,096 07
Washington Branch..	153,827 75	273,238 32
	$1,847,704 35	$2,643,175 80

And the revenue after deducting the cost of operating and repairs as follows:

	1862.	1863.
Main Stem	$3,054,653 15	$4,544,097 65
N. W. Virginia R. R.	97,351 42	42,125 79
Washington Branch.	624,588 92	429,890 27
	$3,776,593 49	$5,016,113 71

The earnings and expenses of the Main Stem proper for the year ending September 30, 1862 and 1863, have been as follows:

MAIN STEM.

Earnings:	1862.	1863.
Passengers	$1,769,497 13	$2,332,806 37

☞ The work upon the Reno Oil Creek and Pithole Railroad is progressing favorably.

Cleveland and Pittsburg R. R.

At the annual meeting of the stockholders of the Cleveland and Pittsburg Company, the following gentlemen were elected directors:—Messrs. J. F. D. Lanier, Franklin F. Randolph and Smith Clift of New York; B. F. Jones, Springer Harbaugh and P. Geisse of Pittsburg; J. N. McCullough, T. P. Handy, W. H. Halloway, D. C. Lee and James F. Clarke of Ohio; and H. C. Kingsley of New Haven. It was at the same time resolved to recommend the board of directors to propose such modifications of the existing contract with the Fort Wayne Company as are equitable and calculated to prove mutually beneficial. The issue of a million of stock sold by the old management at 80, many months back, was at the same time ratified. There is no change to be made in the presidency of the road, Mr. McCullough retaining his position, and the transfer books here are to be removed back to the Farmers' Loan and Trust Company. The interest account is reduced to $26,000 per annum in round numbers and the amount of stock outstanding is about $5,300,000. The reported design of the new management to buy in a branch road is contradicted, the directors being pledged to make no such negotiation and none of them being interested in the property referred to.

Milwaukee and St. Paul Railroad.

It gives us much pleasure to be able to state to-day that the project of connecting this city with the Milwaukee and St. Paul Railroad is rapidly passing into that stage where its success can no longer be doubted. A corps of engineers has just been placed on the contemplated line, with instruction to make a thorough survey of the same, and it is hoped that when their labors are completed, the contract for building the road will be let without delay. We are enabled to state, in addition, that Mr. Angus Smith, of Milwaukee, in whose hands the active management of this affair rests, gives very confident assurances that the road will be finished during the coming summer. He has pledged himself, moreover—and we regard this as a most favorable indication—to prominent gentlemen of this place that, if the contract for the construction of the road aforesaid is not let within sixty days from this time, the charter will thereupon be surrendered to its original owners in Winona.

This is something definite. We, therefore, regard the construction of the road, next summer, as almost beyond question.—*Winona Republican.*

Freights over the Plains.

Freights from Kansas to Nevada, Idaho, &c., for 1865, over the plains, was 81,500,000 pounds in weight, and employed a great train of animals and wagons. The wagons brought $2,400,000 in specie in return. The freight business has grown steadily at Kansas, and is expected to double in the current year.

Northern Pacific Railroad Company.

This company was reorganized at Boston on the 5th inst. The control and management of this great interest has passed into the hands of the representative capitalists of New England, who will prepare for the vigorous prosecution of the work.

☞ The Sandusky, Dayton and Cincinnati Railroad was sold on the 5th inst., by O. Follett, receiver, under order of the Court, for $750,000, minimum valuation, to J. P. Yelverton, of New York; J. W. Pierce and Israel M. Spelman, of Boston, purchasing trustees, under plan of bonds and stockholders of capitalization for securities.

Banks of the State of New York.

REPORT OF THE SUPERINTENDENT OF THE BANK DEPARTMENT.

The passage of the act of March 9, 1865, commonly known as the Enabling Act, precipitated what, under existing conditions, could not long be delayed, the fourth, and, to appearance, the concluding era in the history of State banking in New York.

The object of the act in question was to afford to the banks of this State a means of transferring their organization and business to the national system, without the tedious process of a formal dissolution, with the attendant inconvenience of a dispersion of their capital and surplus earnings. Since its passage 173 banks have closed business as State institutions, and been received into the National fold, and though some of these had already taken steps in that direction, the passage of the act greatly facilitated their transfer. Besides these, 20 banks had received authority, and were doing business under the National system prior to the passage of the act, and of these, ten had effected the change prior to October 1, 1864. The last fiscal year, therefore, has witnessed the practical extinction of 183 State banks, and their transfer, with all their wealth and influence, to the National guardianship.

Under the provisions of the Enabling act this revolution has been effected silently and almost imperceptibly, without derangement in the affairs of the institutions, or detriment to public interests. Their relations to this Department are still maintained to the extent of the securities deposited to protect their circulation, and to the means of withdrawing these securities upon the return and destruction of their notes.

No circulation has been issued by this Department to any bank after its conversion was fully perfected, nor has such favor been solicited by any bank. The strictures of the Controller of the Currency upon the *double-dealing* of some of his proteges, do not, therefore, apply to the honored and honorable institutions of the State of New York.

It is due to the truth of history and to the reputation of the New York banking system, to say, that this *wholesale conversion* has been wrought less by the greater novelty and superior attractions of the new dispensation than by the practically compulsory policy of the General Government. The change was in most instances very reluctantly made, and only when it appeared to be the last alternative except the relinquishment altogether of the business of banking. But candor no less compels the acknowledgment that the National system is, for obvious and substantial reasons, popular with the people, and has gained a strong hold upon their confidence and good wishes, and in this fact will be found one of the strongest guarantees of its final and complete success.

So far as our State system is concerned, there is little now to do but to wait and watch the developments of National legislation, upon which the fate of what is left to us of *free banking* seems wholly to depend. Without some modification of the existing law, such as is hereafter more fully discussed, we shall be compelled to witness the rapid disintegration of a system of banking that has ministered to the prosperity of our people, worthily maintained the financial reputation of the State, and, by its success, has furnished a model from which has been constructed a gigantic monopoly to overshadow and destroy it.

Some time must necessarily elapse before we shall see the end of what is now the beginning, as under the operation of our present law it requires six years to close the circulation account of any bank, even after, by the return of 75 per cent. of its circulation, it is authorized to withdraw its bonded securities, and make a deposit of cash for the redemption of the remainder of its notes. It is evident, therefore, that the final closing of the affairs of over 100 banks is a labor that cannot be speedily accomplished.

To facilitate this, however, I would suggest an amendment of section 1, chapter 236 of the Laws of 1859, which requires the return of 75 per cent. of the circulation outstanding at the time of giving notice of closing, before a cash deposit can be made for the redemption of the balance, and the statute of limitations to be set in operation. The time at which the amount of outstanding circulation is computed, is purely arbitrary, and operates greatly to the disadvantage of banks that may have retired a large part of their circulation before giving the notice required. A further proviso, that the cash deposits might be made whenever the outstanding circulation should be reduced to $10,000, would facilitate the closing of a number of banks, and be in no respect prejudicial to public interests. Or the result might be reached by causing the circulation, of which 75 per cent. must be returned, to be estimated at the time of greatest issue, as ascertained from the quarterly statements made by the bank.

The sweeping character of the silent revolution which has been progressing in our financial system, will be more fully disclosed by an examination of the general statements.

For more convenient reference I condense from them the following brief summary:

The capital invested in banking, under our laws, on the 24th day of Sept., 1864, was.	$107,306,948
On the 30th day of September, 1854.	20,436,970
Decrease during the fiscal year.	$86,869,978
The greatest decrease in any previous years during the last ten years....	$1,951,199
The circulation returned and destroyed during the year ending, Sept. 1865, was.....	$16,728,179

which exceeds by about $2,000,000 the amount returned during the panic year of 1857, and by about $9,000,000 the average yearly amount for the last 10 years.

The circulation issued and outstanding on the 30th Sept., 1864, was.	$40,118,635
The circulation issued and outstanding on the 30th Sept., 1865, was.	27,009,449
Decrease during the fiscal year.	$13,109,186
Securities, including cash, held under general laws, to redeem circulation, Sept., 30, 1864.....	37,303,524 05
Securities held, under general laws to redeem circulation, Sept. 30, 1865	25,469,157 44
Decrease during the fiscal year.	$11,834,366 61

The decrease of the different classes of securities has been as follows:

Of United States stocks.....	$8,528,600 00
Of New York State stocks.....	2,225,706 00
Of Illinois State stocks	233,400 00
Of bonds and mortgages.....	936,876 00
	$11,924,582 00
Increase of cash deposits to redeem circulation	90 215 39
Total decrease as stated above.	$11,834,366 71

These facts convey their own impressive commentary, and they speak only of dissolution.

On the 1st of January 1866, will expire the limited charters of the remaining incorporated banks in this State. Four of these have already commenced doing business under auspices of the national system.

The bank of the Manhattan Company and the bank of the New York Dry Dock Company, with unlimited charters, still survive the decay of the system that gave them birth.

Contributions to the bank fund will cease after January 1, 1866, and the charges upon it will be liquidated, so far as presented, on the first of February following. There will then remain an estimated balance of about $86,000, for the application of which there is no legal provision. I most earnestly renew the suggestion of the Hon. H. Van Dyck, that some appropriate disposition of the balance of the fund be authorized.

The policy of the National Banking System has passed beyond the limits of legitimate discussion. Recognizing, as it does, the essential and vital principle of an amply secured currency, which in our State has proved so salutary, we may reasonably hope that it will achieve in the broader field of national operations the same beneficial results, that within a more limited range, have been wrought out by our own justly cherished system.

The report proceeds to argue at length the relations of State and National finances, and takes ground in favor of the removal of all obstructions which operate to proscribe established local systems of banking. The competition of different systems would be healthful. Justice to banks which rendered generous assistance to the Government in its perils, demands that this should be allowed. The true policy of Government is to avoid unnecessary restrictions upon individual action. A financial derangement in the circle of existing institutions, will seriously affect the revenues of the Government.

It is held that Congress has bestowed power and permission to levy taxation upon the shares in national banks, with such restrictions as present undue discrimination. The State law should have been so amended as to order taxation of shares in the hands of their holders. The highest Court in the State has disregarded the visiting incompatibility; but it is by no means certain that the United States Courts will view the subject so complacently.

An elaborate discussion is entered upon, to show that specie resumption is not an infallible panacea for the cure of currency disorders, and that the remedy is in having a currency which represents an actual value, and in which the people entertain perfect faith. The currency founded upon public stocks has a real value, and every essential attribute of a redeemable medium. These conditions secured, the chief value of coin is in promoting international exchange, and thus imparting a general mobility to capital. The only desire on the part of the Government, should be to contract the currency afloat until it no longer transcends the amount required for trade and commerce. The redundancy of this currency is the only existing cause of commercial difficulties.

Steamboats as Common Carriers.—Baggage Stolen from Staterooms.

In the case of Mudgett *vs.* The Bay State Steamboat Company, decided in the New York Common Pleas.

The plaintiff sued to recover the value of a valise, which he as a passenger upon the defendants' steamboat, running from New York to Fall River, had deposited in his stateroom. The plaintiff testified that he took stateroom No. 9, and paid for the same; that he had a valise with him, containing some clothing and other articles, which he took into the stateroom with him. A key was furnished him by the clerk of the boat. He locked his stateroom and went down to the saloon; in his absence the valise was taken from the stateroom.

The defence was that the luggage was not delivered by the plaintiff to the defendants, who had a regular baggage master to receive and care for the luggage; and consequently they were not liable.

The justice gave judgment for the plaintiff and the defendants appealed to the Appellate Court, when the following opinion was delivered by

BRADY, J.—The defendants in this case claim exemption from liability, on the ground that the plaintiff's valise was never placed in their custody. The liability of a carrier is like that of an innkeeper. Hollister *vs.* Nolan, 19 Ward, 236; Cohen *vs.* Frost, 2 Duer., 341; and it was declared in Cayle's case, 8 Co., 33, that it is no excuse for the innkeeper to say that he delivered the guest

the key of his chamber, in which he lodged, and that he left the door open, but he ought to keep the goods and chattels of his guest there in safety. This doctrine has frequently been recognized and approved. (Burgess *vs.* Clements, 4 M. & Sel., 310; Hollister *vs.* Nolan, Supra,) and cannot be questioned, as resting on acknowledged, just and reasonable duties and obligations. A distinction is admitted to exist where the traveler assumes the charge of his goods *animo custodiendi;* and the jury on the facts disclosed, find such intention to have existed. Burgess *vs.* Clements, Supra; Tower *vs.* Utica & Schen. R. R. Co., 7 Hill., 47. The innkeeper would then be excused. The mere act, however, of taking the key of the room in which the guest lodged, his goods having been placed therein, would not discharge the innkeeper.

The only case which seems to be in conflict with the rule here suggested, is Cohen *vs.* Frost, Supra. In that case the plaintiff, who was a passenger on a sea voyage, took his trunk into the steerage, and tied it with ropes to his berth. During a violent storm the ropes were cut, and the trunk stolen. The plaintiff had a verdict, but the general term set it aside, on the ground that the trunk had never been delivered to the defendants, the defendants' possession being exclusive. The Court say, in delivering the opinion, that the case is not to be distinguished from that of a guest at an inn, who when he takes his luggage to his own chamber, of which he keeps the key, discharges the innkeeper, and this is declared to be the law, on the authority of Burgess *vs.* Clements. The learned Judge who delivered the opinion in Cohen *vs.* Frost, must have confounded Burgess *vs.* Clements, with some other case, because the Kings Bench did not declare any such rule. The plaintiff was defeated because his goods were not received *causa hospitandi.* He had asked for, and obtained a room in which to show his merchandise for sale, not as a guest, but as a vendor, and his property was under the circumstances, held not to have been within the rule which required the innkeeper to protect it. The opinion, therefore, in Cohen *vs.* Frost, is not sustained by the authority on which it is based, so far as it relates to the legal effect of the innkeeper's giving the key to his guest; and the general doctrine which seems to be declared by it, that a traveller on a sea voyage must place his luggage in the special charge of the officers of the ship is disclaimed, in effect, in Van Horn *vs.* Kermit, 4 E. D. Smith, 453; the reasons assigned why a contrary rule should prevail are well settled.

So far as the adjudications which bear upon this question have been discovered, they sustain the rule that a mere supervision of one's baggage, or the means of entering the place of its deposit, is not sufficient to discharge the carrier. There must either exist, the *animo custodiendi* on the part of the traveler, to the exclusion of the carrier, or he must be guilty of such negligence as discharges the latter from his general obligation. Robinson *vs.* Dunsmore, 2 B. & P., 416; Burgess *vs.* Clements, Supra; Tower *vs.* Utica & Schen. R. R. Co., Supra; East India Com. *vs.* Pullen, 1 Strange Rep., 694.

It was not pretended in this case that the plaintiff was guilty of negligence, and so far as it may be necessary to consider the question whether the plaintiff retained the custody of his valise or not, it is only necessary to say that the finding of the justice is against the defendants upon that issue. I do not understand upon what process of reasoning it can be maintained, that giving the key of a room on board of a vessel, to a traveller, in which he is permitted to deposit his baggage, is not in fact, an assumption of the possession of all that is therein placed.

The whole vessel is in the possession, and subject to the control of the owners. The custody of the vessel, and the general government of the room given the traveller, continues with them. The use of it is a convenience for which the traveller pays, and if its employment absolves the carrier from vigilance, the security of property succumbs to the ease or pleasure of the journey. Such cannot be the law. The defendants can protect themselves if they wish, by notifying their patrons that no goods can be placed in the stateroom hired, except at the risk of the owner, and thus advise them of the consequences of the act. But as long as they permit a traveller thus to deposit his baggage without notice, the mere circumstance of his taking a key, will not be considered sufficient to relieve them from their duty to protect him against theft.

Judgment affirmed.

Failures in the U. S.

The following comparative statement of the failures, their number and amount, in the last and previous nine years, is from the Circular of Messrs. R. G. Dun & Co.:

TOTAL FAILURES IN NORTHERN STATES.

	Number.	Liabilities.
1857	4,257	$265,818,000
1858	3,113	73,608,747
1859	2,959	51,314,000
1860	2,733	61,739,474
1861	5,935	178,632,170
1862	1,652	23,049,300
1863	495	7,899,000
1864	510	8,579,700
1865	530	17,625,000
Average from 1857 to 1865		$76,473,000

Exports of Petroleum.

The following is the quantity exported from the principal Atlantic markets, from Jan. 1, to Dec. 30:

		1865.	1864.
From Boston	galls.	1,438,978	1,696,307
" New York	"	14,626,090	21,335,784
" Philadelphia	"	11,891,562	7,760,148
" Baltimore	"	973,117	929,971
" Portland	"	11,088	70,762
" New Bedford	"	50,000	.....
" Cleveland	"	81,173	80,000
Tot. exports from the U.S.		29,072,018	31,872,972
Same time 1863			28,250,721

The Phila. & Reading & Atlantic & Great Western R. Rs.

The Pottsville *Miner's Journal* says that these companies have entered into the following arrangements:

The Philadelphia and Reading Railroad Company is to lay down an additional rail to make a six feet gauge over its line and branches, and the Atlantic and Great Western is to lay down an additional rail from Milton to connect with its road so as to receive the traffic passing over the respective roads. By this means a connection will be made with Philadelphia as well as New York. One of the conditions of the arrangement is the establishment of a line of steamships immediately, between Philadelphia and Liverpool. This is an important arrangement if the rumor is correct.

American Securities Abroad.

Advices from Frankfort mention that the Bourse in that city had been extremely dull for some time in consequence of the unsatisfactory state of the money market, discount continuing at 5½ per cent., but that, as regards American stocks, since the receipt of the President's Message, a most extensive business had taken place, accompanied by a rise of 3½ per cent., from 66⅜ to 69⅞ in two days. The outstanding speculations in the shape of "options" for the end of the year had mainly contributed to this movement, which has carried prices to a point 2 per cent. above those at New York. At the same time the German public generally have resumed purchases in them for investment, and so exclusive is their partiality, that all advertisements for Turkish or other loans, or for shares in any company, prove entirely unattractive. Even for the new Austrian loan, though the price is admitted to be very low, only 10,000,000 florins have been subscribed at Frankfort; and, notwitstanding the effect of the satisfactory turn affairs appear to have taken in Hungary, the Five per Cent. Nationals are quoted 61—a price lower than they have touched since the Italian war. Money continues to pour in from the country, where the requirements for the produce markets are over, but it is absorbed by the remittances to America.—*London Times, Dec.* 21.

Kent County Railroad.

Tench Tilghman, Esq., President of the Maryland and Delaware Railroad Company, in his annual report, thus alludes to the Kent Railroad:

"A third road is projected and will probably soon be commenced, from a point on the Chesapeake Bay, opposite the mouth of the Patapsco River, through Chestertown, to the Delaware Railroad. This road, when completed, will shorten our distance to Baltimore still more."

The friends of this road held a meeting at Chestertown on the 21st, when several thousand dollars of additional stock was taken.

The Projected Railroad in the Valley of Virginia.

The Lynchburg *Virginian* gives statistics to prove that the distance from the point of intersection on the Virginia and Tennessee Railroad to the city of Baltimore is greater by the proposed route than by the roads already in operation *via* Lynchburg, Gordonsville, Alexandria, &c., and argues hence that the projected scheme will never be carried out.

The Staunton *Spectator* is evidently pleased with Mr. Garrett's proposition. It calls on the people to reflect upon the folly which, years ago, prevented the Baltimore and Ohio Railroad Company from constructing this road, and advises the Virginia legislators to countenance the opening of railroads and canals in every part of the State—the constructors, of course, to pay the expenses. —*Baltimore American.*

Finances of Ohio.

The total receipts of the State from all sources during fiscal year was $13,190,911 against $8,679,969 in 1864. The total disbursements during the year amount to $12,484,825 against $6,679,006 in 1864, leaving a balance to the credit of all funds of $756,086, against $2,000,961 in 1864. The total funded debt of the State is $12,912,014, against $13,500,751 in 1864, showing a diminution of $588,737.

☞ The estimated wagon freight across the plains during the past year is estimated at 112,000 tons, and the freight tonnage on the Pacific Railroad, when it shall have been completed, is estimated at 300,000 tons per annum, westward, and 150,000 tons, eastward. The passenger traffic is estimated at $300,000 going west and 250,000 going east, each year.

Saturday, January 13, 1866.

Stock Exchange and Money Market.

There is evidently a pause in the market, and with it a tendency to acquiesce in a general fall of prices. The universal opinion that we ought to return to a specie basis, is attended by an apparent acquiescence in all the measures which have a tendency that way; and this circumstance will of itself undoubtedly help resumption. The fact also that it is proposed in Congress to fund in long bonds, at the discretion of the Secretary, the various sorts of Government paper afloat, seems to indicate a determination to put the policy of contraction into activity at the earliest day; all which must have its effect on reflecting men of business. Nevertheless it is not yet clear how this funding will affect the price of the stocks now afloat. The plan of the Secretary is somewhat of the nature of a forced loan after all, since he proposes as a means to procure an easy conversion, that certain descriptions of legal tender notes shall cease to bear that character after they mature, so that the funding would seem to be a matter of necessity on the part of holders. This compulsory funding, for such it is, is in our opinion no more nor less than any other form of compulsion to the same end, which we have several times alluded to and favored, viz: that of changing the form of the securities now lodged by the National Banks to protect their issues. In other words, to require the deposit of legal tenders in place of bonds, returning the latter to the banks to do as they please with them. This would of course diminish their enormous profits; but it would make their operations much safer for the public.

When these institutions are compelled to do business on their actual capital, inflation will be out of the question. This is a simple, straightforward view of the subject, and if adopted would save all the risks and difficulties of funding several hundred additional millions, and the people about thirty-six millions of interest per annum. It is in reality narrowed down to a mere question, whether the people shall pay this amount annually for 40 years to come, an aggregate of nearly 150 millions of dollars, for the benefit of a favored class of institutions, whose paper is to be kept afloat by the aid of particular legislation in their favor, and whose profits are not those of a regular and equitable charge for the use of good money, but three, four and five times as much, on paper 40 and 50 per cent. below par.

Our latest advices from Europe state that there is growing up an increasing confidence in American securities. The frank, judicious and kindly tone of the President's Message has had its just effect abroad. This democracy of ours is found to be not only strong, but wise. Its movements are seen to be those of common sense and enlightened views. Our diplomacy is beginning to be better appreciated, and the honesty of our public opinion admitted. With regard to the only foreign question likely to embarrass the United States, it is now said openly in the papers of Belgium of late date, that it is certain Louis Napoleon has positively notified our Government that he will at a certain date, already designated, withdraw his forces from Mexico. This impression created by the positive assurances of parties in Paris professing to be thoroughly posted, prevails on the continent, though it has not been generally prevalent here. The London *Daily News* is of the opinion that American stocks, even in the English Market, will drive out of it the shares or loans of any other character that may be offered there.

Our local share market is at present considerably depressed, notwithstanding the rise abroad in some of the stocks of such leading companies as Erie and Illinois. Among the chief causes of this change in public opinion with regard to them, is the falling off in the business of a large number, and some discoveries recently made, as in the case of the Cleveland and Pittsburg road. By a change in the direction it has come to light, that its receipts during the last year have fallen off several hundred thousand dollars; that to keep up its coal and iron traffic, a very important

item, large expenditures will become necessary, and that dividends have been, and are still made on anticipation rather than actual profits. We are not surprised therefore at the feeling in the street in regard to this road, which has been manifested recently, though we believe that its difficulties are owing to the very class of men who are now disposed to take advantage of them.

Of the permanent prosperity of our railway system, however, we have not the least doubt, and we advise those who are able to hold on to their shares to do so, for they cannot intrinsically ever be worth less than they now are.

Our foreign business is evidently improving. For the week ending the 8th inst., our exports of domestic produce exclusive of specie were of the value of $6,054,981, against $2,596,918, for the same week last year, a very large and favorable increase. Our imports for the same week were $4,103,468, against $2,032,821 same week last year. Our exports of specie were $552,027, against $594,353 the same period in 1865. It appears that the average price of gold since 1st of July last, has been 144½ per cent., while for the corresponding period in 1865, it was as much as 231 per cent. This is equal to an appreciation in value of our Government paper afloat of about five hundred millions of dollars, or that increase of the purchasing power of our greenbacks and legal tenders, an immense gain to the holders and consumers. A return to specie payments on the same principle, would add about 250 millions to its value, if this paper were to continue afloat unredeemed.

The last weekly statement of the associated banks of this city shows the following changes from that of the previous week:

Increase of	loans	$3,730,329
"	specie	446,702
"	deposits	6,257,393
"	legal tenders	482,491
"	circulation	597,739

The capital engaged in the city banks is $80,686,200. These facts show another, that when money is plentiful the banks are liberal in discounts, and do their full share of inflation, being therefore responsible in part for the consequences.

Gold is drooping, a fall of 3 per cent. in the premium taking place in a single day at the beginning of the week, with much despondency among the speculators.

It has been ascertained at the Treasury department within a few days past, that the available stock of cotton on hand is much larger than the Secretary some weeks since had reason to suppose; the total number of bales which has entered into consumption, or yet remains for export, of the stock on hand being 2,800,000. This information has evidently reached England, as the price of cotton has declined in that country. This large supply is a most fortunate circumstance for us, and is already telling on exchange which is drooping and considerably below par. On Monday actual sales of exchange were made at 108, with gold at 139⅜. On Tuesday this last was followed by a further decline to 138.

The mercantile agency of Dunn & Co., of this city, has published its annual statement of the mercantile failures in this country during the past year. It assumes that the financial crisis so earnestly and confidently predicted during the last five years, is no nearer to all appearances than it was a year ago, and that it is difficult to see what "shape a general collapse can immediately assume." It also expresses the belief that at least a million of bales of cotton will be produced this year, and that the entire production of the country in 1866 will be quite double what it was in 1865. This opinion, from an agency whose business it specially is to examine into the responsibility of dealers, traders and manufacturers throughout the country, is worthy of consideration by our numerous foreign as well as our domestic readers.

Among the financial measures before Congress, is one in connection with that already alluded to, of giving the Secretary of the Treasury authority to contract a foreign loan of 200 millions at 5 per cent., if he should deem it advisable so to do. This most undoubtedly looks to an early resumption of specie payments. Something after the manner it was brought about on a former occasion by a loan negotiated abroad by James G. King, the Banker of this city, the circumstances of which are well known in our financial circles. If Mr. McCulloch can fund two-thirds of the Government paper in 40 year bonds, it would be an immense advantage to him, if having the other third in coin he could resume specie payments therein with this cash in hand.

As this sum would nearly all of it pass into the vaults of the National Banks in exchange for their reserves of legal tenders which they are now compelled by law to hold, they too would be enabled to resume specie payments almost immediately. Nor would they practically be called on for the redemption of their entire circulation. They would escape such a result after it was once ascertained they were ready to redeem.

We should not be surprised if this is the whole scheme of Mr. McCulloch. It is precisely such a one as would appear most practicable in the eye of a Banker of his habits and experience. For it is evident that the last legal tenders afloat after he has funded all he can, will necessarily be found in the hands of the institutions which are compelled to have them on hand, and if they are thus finally redeemed, such portion as remains unfunded, may then be exchanged for specie, and the possession of this in place of legal tenders will bring about redemption with the greatest ease; in fact there would be no great call for it on the National institutions the moment they were known to be ready. And numerous as these institutions are, their circulation is but about 50 cents on the dollar of their capital; and their capital is after all but 400 millions or thereabouts, which if it is alone to carry the future business and exchanges of the country will be found not large enough for that purpose. There would be no drain on this country for specie, if we could export as much as we import, and this is what it should be our constant effort to do. Let specie prices once again prevail, and it will soon be seen that we shall pay more attention to this than we have done under paper prices, which have been illusive and yet impoverishing. Our cotton, tobacco, sugar, rice and petroleum, should alone turn the balance of our foreign trade so completely in our favor as to reverse the current of our precious metals, from instead of sending them towards Europe.

While speaking of this we may as well notice the fact, that within the last two years such immense reductions in duties have been made in Europe, the East Indies, and some parts of South America, certainly in favor of England, that we have but to demand these relaxations towards ourselves, to double and treble our exports to the countries alluded to. Whether the politicians at Washington will lay aside their Utopian attempts at political perfection, and by acts of legislation to make all men angels and equally wise, and look a little at the material truths of life and government remains to be seen.

The receipts of internal revenue for the week ending the 9th have been ten millions of dollars, the total since 1st July last foots up $188,000,000, showing an aggregate for the whole year at this rate of upwards of 360 millions. The tax on cotton contributes largely to this result, as may be seen by the circumstance that at Macon alone within the last 90 days, this tax amounted to nearly half a million. We also notice that Tennessee, North Carolina and Louisiana have paid into the Treasury their quotos of the direct tax authorised August 5, 1865, so that the Southern States are now beginning to bear their share of the National burdens, up to this time borne entirely by the Loyal States. Indeed the Southern States have all paid something except Georgia, Alabama, Mississippi and Texas. From them all together there is due of direct tax about five millions of dollars. The balance in the Sub-Treasury on Tuesday was $68,601,069 94.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Atlantic and Great Western Railway.

The annual meeting of this company (consolidated) was held at Meadville on the 2d inst., when the following Directors were elected: S. S. L'Hommedieu, J. J. Shryock, A. W. Bernal, John Sherman, Marvin Kent, Gaylord Church, Pearson Church, William Thorp, John Dick, E. P. Brainerd, J. W. Tyler, A. F. Allen, J. Crall, Jacob Riblet, C. V. Culver, Charles Day, Henry Martin, T. W. Kennard, George R. Babcock, C. E. E. Blakesley, Samuel Wann. The Board of Control in Europe is composed of the following gentlemen:—Sir Morton Peto, Chairman, S. Goodson, Esq., W. Fenton, Esq., C. J. Kennard, Esq., Joseph Robinson, Esq., London; L. B. Mozly, Esq., Liverpool. The following were elected Inspectors:—James R. Dick, William Thorp and A. Hastings.

The Board organized by the election of the following officers: S. S. L'Hommedieu, President; J. J. Shryock, Vice President; J. C. Calhoun, Secretary and Auditor; J. M. Dick, Treasurer; D. McLaren, General Superintendent; T. M. Osborne, General Freight Agent; T. W. Kennard, Engineer-in-Chief.

Washington County Railroad.

This is to be a branch of the Baltimore and Ohio Railroad. It will run entirely through Washington Co., Md., and hence its name. The surveys have been finished, and contracts for the grading and masonry let, to be completed in one year. The road will be 24 miles in length, extending from Knoxville, on the line of the Baltimore and Ohio Railroad, to Hagarstown, and will there connect with the Franklin Railroad. The line of the road is thus described: "Leaving the Baltimore and Ohio Railroad at Knoxville, it curves into the valley of Israel's Creek, passes up this valley, (well known as Pleasant Valley,) crosses Beeler's summit to a branch of Little Antietam River, and runs a short distance along the line of this river, then passes through Leslie's Gap, in Elk Ridge, to another branch of the Little Antietam River, called Maple Swamp, and runs along this stream (crossing it in three different places) to Keedysville; it then crosses the country between Little and Big Antietam; the latter river it will cross on a bridge 75 feet above low water. It then ascends to the top of the ridge west of the Antietam, and follows this ridge to Hagerstown." Edward M. Mealey, Esq., of Hagarstown, is President, and J. L. Randolph, Esq., of Baltimore, Chief Engineer. It should be understood that this road has no connection with the Metropolitan Branch Railroad, which is now being surveyed by Mr. Randolph and his assistants from Washington City to Point of Rocks, on the line of the Baltimore and Ohio Railroad, and which will run for the most part through Montgomery County. The survey of this road will be completed in February next, when the correct route it will take will be published. Great benefits, both to Western Maryland and the City of Baltimore, are anticipated by the building of the Washington County Railroad.

Ohio Banks.

The forms of banking in Ohio, under legislative sanction, which have obtained for the past twenty years, have generally yielded to the national system inaugurated in 1863. A few of the banks only continue in active business. The bank circulation of all of them in the custody of the Treasury has been destroyed by consent of the banks. Within a year past the circulation has been reduced $1,069,277; and there remains outstanding, $444,063. If to this we add the circulation of the Ohio State Banks, reported at $978,709, will show the entire circulation of Ohio banks to be $1,422,772; all of which is being redeemed as fast as the public present it.

National Iron Armor Co.

An incorporated company has been organized at Chester, Penn., for the manufacture of iron and steel by the Bessemer process. The subscribers to the stock of this new manufacturing organization says a Philadelphia paper, are all prominent and wealthy citizens of Pennsylvania, and there is no doubt but that in the course of a very few years the company will possess a manufactory of iron second to none in the State. A site for the erection of the necessary buildings has been secured on the line of the Philadelphia, Wilmington and Baltimore Railroad, and extensive workshops will at once be commenced, and vigorously pushed to completion.

Platte County Railroad.

We learn from St. Louis that the Governor has taken possession of the St. Joseph and Atchison and Atchison and Western Railroad, known as the Platte County road, in consequence of default in the payment to the State of $300,000 and interest, according to a law of Missouri, which the Legislature passed last winter, under which the roads were sold to Stringfellow, Osborn, Carpenter and Barnes, and providing for the forfeiture of them to the State, if the above payment was not made on the 1st of January. The Governor has appointed a State agent to operate the roads until they can be sold again pursuant to law. The ejected parties have entered a protest against the action of the Governor, but the Legislature will probably indorse it.

Raritan and Delaware Bay R. R.

At a recent meeting of the stockholders of this company, the following gentlemen were elected directors for the ensuing year: H. M. Alexander, H. H. Brady, Ezra Nye, Joseph C. Potts, Ashbel Green, Wm. Torrey, Samuel G. Wheeler, Jr., Wm. Patterson, Z. Scriven, W. S. Snodon, S. W. Torrey, F. W. Downer, and Lewis B. Brown.

☞ The first ten miles of the Southern Minnesota Railroad from La Crescent was completed on the 23d ult., and there will be twenty miles completed by January 25th.

Railroad Earnings.—Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 4th week in Dec., 1865, were:

	1865.	1864.
Passengers	$11,978 50	$15,491 86
Freight	16,703 30	14,607 45
Mail, express & telegraph	1,196 13	1,234 64
Total	$29,877 93	$31,333 95
Total for the fiscal year commencing Jan. 1.	$1,222,017 46	1,026,135 75

The earnings of the Grand Trunk Railway for the week ending Dec. 30, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$37,434 00
Express, freight, mails and sundries	7,500 00
Freight and live stock	62,920 00
Total	$107,854 00
Corresponding week, 1864	123,564 00
Decrease	$15,710 00

The traffic of the Great Western Railway for the week ending Jan. 5, 1866, was as follows:

Passengers	$27,027 06
Freight and live stock	22,503 23
Mails and sundries	2,371 42
Total	$51,901 71
Corresponding week of 1865	60,388 70
Decrease	$8,486 99

The earnings of the Chicago and Northwestern Railway for the first week in January, 1866, were | $135,250 25
Corresponding week of previous year. | 115,298 05
Increase | $19,961 20

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Dec. 31, were:

	1865.	1864.
Passengers	$4,248 87	$3,692 16
Freight	8,001 87	14,727 06
Express	338 22	104 16
Mail	296 58	296 58
Total	$12,885 54	$18,819 96

Receipts from January 1 to Dec. 31:

1865	$689,383 45
1864	587,077 77
Increase	$102,305 68

Albany and Susquehanna Railroad.

The earnings of this road for the year ending September 30, 1865, were:

From passengers	$88,002 01
" freight	73,627 16
" express	9,955 98
" mails	1,737 39
" miscellaneous	2,406 39
	$175,729 13

Expenses, viz:

Maintaining road bed	$25,959 14	
Repairs of machinery	13,932 70	
Operating the road	52,897 92	
U. S. tax	4,875 56	
		97,665 32
Payments to surplus fund		$78,064 01

The road is 140 miles in length, extending from Albany to Binghamton; of which 82 miles, from Albany to Oneonta, was in operation at the close of the fiscal year. The company had 7 locomotives; 8 passenger, 4 baggage, 1 mail and express, 53 freight, and 78 gravel and other cars; and there were in process of delivery, 2 locomotives, 4 passenger, 30 freight and 20 gravel cars. The number of miles run by passenger trains was 35,524; by passenger and freight trains, 29,948—total, 67,472. Number of passengers carried, 105,878; do., carried one mile, 3,198,293. Number of tons of freight carried, 20,348; do., carried one mile, 790,633.

Capital stock authorized, $4,000,000; amount subscribed, $2,379,400; amount paid in $1,607,145 50. Funded debt, $1,016,739 55; floating debt, $173,721 81—total stock and debt, $2,797,606 86.

COST OF ROAD AND EQUIPMENT.

	By last report.	By present report.
For graduation & masonry	$805,219 47	$1,241,822 66
Bridges	46,971 65	83,623 06
Superstructures, including iron	429,198 90	823,622 43
Passenger and freight stations, buildings & fixtures	30,368 83	69,209 42
Engine and car houses, machine shops, machinery and fixtures.	44,199 86	59,191 89
Land, land damages & fences*	320,382 95	435,944 81
Telegraph	3,217 87	5,702 82
Locomotives and fixtures, & snow plows	57,854 47	92,244 10
Passenger and baggage cars	24,164 45	37,736 34
Freight and other cars.	40,827 93	68,828 40
Engineering	141,127 10	161,767 42
Contingents	86,439 20	87,404 92
Interest	4,010 78	5,342 15
" on 1st mort. b'ds	42,175 00	110,425 00
Discount " "	80,000 00	90,000 00
Total cost of road and equipment	$2,156,158 56	$3,381,865 42

* Includes land for depots and for roadway for the entire line.

Much of the line from Richmondville to Oneonta remained to be surfaced up, requiring much labor and material. The ballasting of the track had been followed up vigorously from Central Bridge west, and the line to Cobbleskill was in as good condition as other portions of the line. Between Cobbleskill and the Summit the line was being ballasted under a contract for the completion of section 16, which also embraced a portion of the filling at the trestles at the Waldorf and Kennady Creeks. Station buildings had been completed at Central Bridge, Cobbleskill, Richmondville, East Worcester, Worcester and Schenevus. Freight houses at Oneonta and Colliers had also been constructed. The other station buildings at these points were to have been pushed forward as rapidly as possible. The expenditures during the year for account of construction and equipment of the road is approximately stated by the engineer at $1,132,269, and the total expenditures up to 1st August for like purposes at $3,288,427.

The estimated expenditure necessary to complete the grading on the line between Central Bridge and Cobbleskill, including portions of the line unfinished between Albany and Central Bridge, together with the requisite ballasting is $30,000. And to complete the graduation, bridigng, fencing, superstructure and ballasting with the contemplated partial filling in of the trestle works between Cobbleskill and Richmondville, from Cobbleskill to Oneonta, $101,975. The work of graduation on the line west of Oneonta had been mainly confined to the sections between that point and Unadilla—the exceptions being section 34, extending from Unadilla west, and including the bridge masonry for crossing the Susquehanna River, the masonry for Harper's Brook Bridge, and the work at the tunnel. The estimates cost of graduation, station buildings, superstructure, etc., from Oneonta to Otego is set down at $201,413; and that between Otego and Unadilla, at $201,215—total, $402,628.

Work is progressing on the masonry at Harper's Brook, and on the tunnel. The present arrangements of the work at the latter point is such as to insure its completion by January 1, 1867, and should the balance of the grading on the line be completed, the track may be laid up to the tunnel on each side, and connected as soon as that work will permit. The contractors also engage to do so much of the arching as may be necessary, particularly through the earth drift at the west end. The expense of arching the whole work at the contract prices will be about $132,000. The estimated cost of completing the whole line from Oneonta to Binghamton, together with additional stock, is given at $2,217,894; add estimate to complete the line from Albany to Oneonta, $131,975—making the total amount required to complete the road to Binghamton, exclusive of interest, $2,349,869. Add payments to Aug. 1, 1865, $3,288,427—making the total estimated cost of the line to Binghamton when completed, exclusive of interest, $5,638,296.

The additional rolling stock embraced in the above estimate, includes 8 locomotives, 12 passenger, 4 baggage, 10 box, 20 platform, 20 gravel and 12 hand cars.

President.—JOSEPH H. RAMSEY.

Directors.—Joseph H. Ramsey, Jacob Leonard, Peter Cagger, Edward C. Delavan, Charles Courter, John Westover, John Cook, Jared Goodyear, Eliakim R. Ford, Arnold B. Watson, Louis Northup, Alonzo Everts and Daniel Drew.

Secretary and Treasurer.—W. L. M. PHELPS.

Engineer.—CHARLES W. WENTZ.

Superintendent.—GEORGE SKINNER.

Railroad System of Virginia.

The construction of the proposed railroad from Fredericksburg to Alexandria must be of prime advantage to the latter city, in that it will open up to it an extensive interior route mainly along the bank of the Potomac. In respect to the construction of this road it is stated by the Fredericksburg *Herald* that Colonel Braxton, who is at present engaged in making surveys for the Alexandria and Fredericksburg Railroad, informs us that the engineer corps completed their first line, near "Brooks'," in Stafford, to Alexandria, on Saturday evening, the 23d. The Potomac River was "hugged" as closely on this survey as practicable. The route passes by Mount Vernon. At one point, for several miles, on an elevated plateau, the prospect is charming. The cities of Washington and Alexandria are in the foreground, the broad river on the one side, and fertile valleys and high hills on the other. The route is picturesque, and such as to attract the traveller.

The distance from Alexandria to Fredericksburg by this route is just fifty miles, over a less grade than any other in the State, except, probably, one. The Winchester *Times* says:

The stockholders of the Winchester and Potomac Railroad, convened in general meeting on Saturday last for the purpose of re-organizing the Board by the election of a President and Directors for the ensuing year. Several resolutions were proposed by Mr. Duer, of Baltimore, repre-

senting many of the stockholders residing in that city, the leading objects of which were a reduction of the expenses of the company to conform to the changed condition of its affairs, which were adopted.

Mr. Andrew Hunter offered a resolution, which was adopted, declaring it to be the true policy of the Winchester and Potomac Railroad Company to encourage a connection between their road and the Alexandria, Loudoun and Hampshire Railroad, at some point at or near Harper's Ferry. The company then proceeded to the election of a President and Directors.

Mr. Hunter nominated for the office of President Mr. Joseph H. Sherrard, of Winchester, who was elected without opposition.

The following gentlemen were then elected Directors on the part of the stockholders, to wit: Robert Y. Conrad, William B. Baker, Phillip Williams and John F. Wall, who, with Edward E. Cooke, Dr. Daniel Conrad and Colonel Oliver R. Funsten, Directors appointed on the part of the State, constitute the present Board.

We learn that it is the purpose of the new Board to take immediate measures for the completion of the road from Stephenson's Depot to Winchester, and if the application which is now pending before the Legislature for a charter authorizing the extension of their road to Strasburg, to a connection with the Manassas Gap Road at that point, should be successful, and it cannot be refused but by an act of flagrant disregard of the interest of the people of the Valley, our people will be placed at once in communication with the cities of Richmond, Alexandria and Baltimore, and with our sister towns of the upper Valley.

As we understand the above, it is intended to extend the Winchester Road southward, to connect with the Manassas Gap Road leading to Alexandria, while near Harper's Ferry a connection is to be formed with the Loudoun and Hampshire Road. If this *projet* can be carried out, we shall have a short route towards the West.—*Washington Intelligencer.*

Finances of Pennsylvania.

From the Report of the Auditor General of this State, we learn that the receipts for the fiscal year ending November 30, 1865, (including $1,942,203 from previous year) were $8,162,193; and the expenditures $5,788,525—leaving a balance in the Treasury Nov. 30, 1865, of $2,373,668. The entire public debt of the Commonwealth on the 1st of December last, amounted to $37,476,258, of which sum, $24,481,066 is overdue State bonds. The loans to mature are as follows:

Reimbursable in the year		1868	$2,134,326
"	"	1870	1,710,200
"	"	1877	4,442,000
"	"	1878	376,000
"	"	1879	400,000
"	"	1882	715,000
Military loan	"	1871	2,820,750
Bank charter loans			295,069
Relief notes in circulation			97,251

The State, in August, 1842, and at various times between that date and August, 1844, issued certificates to the holders of the State loans, for interest due on the same at the several semi-annual periods intervening, to the amount of $4,502,824. Of this sum there has been funded and canceled, and paid at the Treasury, at various times, $4,360,494, leaving a balance of unfunded certificates, on the first of December last, of only $13,086. The amount of relief notes is reduced to $40,981 of the old issue, and $56,270 of the reissues—in all, $97,251. Of the $1,514,332 of scrip issued to domestic creditors there has been redeemed $1,514,186—leaving a balance of only $146. The public debt of the State on the first of December, 1864, was $39,379,604. Within the year ending on the 30th of November, 1865, there was redeemed $1,703,518 of five per cent. stocks, $20,000 of 4½ per cent. stock, $578 of domestic creditors' scrip, and $179,250 of military loan of May 15th, 1861—in all $1,903,345, leaving the debt as stated, December 1st, 1865, $37,476,258.

Winona and St. Peter Railway.

The Winona and St. Peter Railroad is now definitely located to the west line of Dodge County, and a map of the same has been filed in the office of the Register of Deeds. From the station here it curves a little to the south, but follows the southern tier of sections until it enters Claremount Township. It runs across the township in a direction considerably north of the east, entering near the north line of section 86, and reaching the western line in the north part of section 30. It passes some three and a half miles south of the village of Wasioja, and a little more than a mile south of Ashland.—*Mantorville Express.*

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund we learn that the total funded debt of the State May 15, 1865, was ... $13,060,582 45

During the six months there has been redeemed of the foreign loan of 1860	$143,068 00	
Of the loan of 1865	5,500 00	
		148,568 00
Outstanding Nov. 15, 1865		$12,912,014 45

The existing funded debt of the State consists of the following loans:

FOREIGN DEBT, PAYABLE IN NEW YORK.

Loan of 1860,	6	per cent.	interest..	$562,268 56
" 1865,	5	"	" ..	1,009,500 00
" 1868,	6	"	" ..	379,866 00
" 1870,	6	"	" ..	2,183,531 93
" 1875,	6	"	" ..	1,600,000 00
" 1881,	6	"	" ..	4,095,309 47
" 1886,	6	"	" ..	2,400,000 00
Total foreign debt				$12,230,475 96

DOMESTIC DEBT, PAYABLE AT COLUMBUS.

Stock of 1849, not bearing interest..	$1,765 00
National road bonds, not bearing interest	60 36
Union loan of 1866, not bearing int..	500 00
" 1868, 6 per cent. int...	279,213 13
" 1871, 6 per cent. int...	400,000 00
Total domestic debt	$681,538 49
Total funded debt Nov. 15, 1865	$12,912,014 45

The receipts into the sinking fund, and the disbursements therefrom, during the past six months were as follows:

RECEIPTS.

Balance in the Treasury May 15, 1865.	$398,126 09
From taxes—sinking fund	337,535 95
From taxes—war loan fund	37,464 64
From school lands, etc	38,058 70
From surplus revenue	7,144 94
From dividends, etc	12,937 15
Total receipts	$831,267 47

DISBURSEMENTS.

For redemption of foreign debt	$123,195 46
For interest on foreign debt	346,331 38
For interest on Union loan	28,896 15
For interest on irredeemable debt	113 84
For sundry expenses	4,119 53
Total disbursements	$502,656 36
Balance in Treasury	$328,611 11
Add balance in New York	25,750 00
Total balance Nov. 15, 1865	$354,361 11

The true balance to the credit of the sinking fund was $328,611 11, the added amount of $25,750, being funds left in New York for the redemption of bonds held by a foreign creditor, in accordance with the terms of a special notice given by the Fund Commissioners. If this amount, subject to the order of the said creditor, were withdrawn by the Commissioners, the State would be held responsible for the interest.

This flattering statement of the financial condition of the State, will be better appreciated by a comparison with the indebtedness Nov. 15, 1861, which was as follows:

FOREIGN DEBT.

Loan of 1856, not bearing interest.	$1,166 33
" 1860, 6 per cent	6,198,325 27
" 1865, 5 per cent	1,025,000 00
" 1870, 6 per cent	2,183,531 93
" 1875, 6 per cent	1,600,000 00
" 1886, 6 per cent	2,400,000 00
" 1868, 6 per cent	379,866 00
Total foreign debt	$13,787,889 53

DOMESTIC DEBT.

Not bearing interest	1,765 00
Not bearing interest National road bonds	60 36
Loan of 1863, 6 per cent	275,385 00
" 1865, 6 per cent	250,000 00
" 1866, 6 per cent	300,204 32
" 1868, 6 per cent	281,969 13
Amount of debt Nov. 15, 1864	$14,897,273 34
" Nov. 15, 1865	12,912,014 45
Redeemed from Nov. 15, 1861, to Nov. 15, 1865	$1,985,258 89

Thus it will be seen that the State has not only furnished the means for its own defense during the four years of war, and sustained its credit by the prompt payment of interest on its indebtedness, but has actually redeemed nearly *two millions of the principal of the public debt.*

Alexandria and Fredericksburg R. R.

We learn that the prospects for the early commencement of this important railroad are extremely encouraging. All the preliminary steps are being actively taken, and it is expected that the line will be completed by the close of the present year. The Alexandria and Fredericksburg railroad will give a continuous line of railroad from Richmond to Washington, and a saving of some two or three hours time will be realized, besides avoiding the river passage.—*Rich. Ex.*

Concord and Claremont Railroad.

A meeting of persons interested was recently held at Newport, N. H., to consult concerning the project of the extension of the Concord and Claremont Railroad to the Connecticut River, a distance of about fifteen miles. Hon. Edmund Burke presided, and speeches were made in favor of the enterprise by several gentlemen. A committee was chosen to present the claims and advantages of the proposed extension to the attention of Boston capitalists and business men, and to adopt such measures as they deem advisable to bring the scheme to a successful issue.

Maryland and Delaware Railroad.

The first train passed over this road on the 9th ult. It consisted of a house car and twelve flat cars, loaded with iron, chairs and spikes. The road is expected to be completed to Greensborough, Caroline County, Md., by the 1st of March, and to Easton by May next. Tench Tilghman, Esq., has been re-elected President of the company, and Dr. G. W. Goldsborough Treasurer, with the old board of directors. T. F. Tilghman, Esq., is Chief Engineer.

Interest and Dividends.

The Pittsburg, Fort Wayne and Chicago Railway Company have declared a dividend of 2½ per cent., payable free of tax, on the 16th inst.

A dividend of 5 per cent. free of government tax, will be paid by the Illinois Central Railroad Company on the 1st of February. The transfer books will be closed on the 20th of January, and opened on the 3d of February.

The Central Railroad of New Jersey have declared a quarterly dividend of 2½ per cent. and the government tax, payable on the 15th inst. The final installment of 30 per cent. on the new stock is payable at the same time.

The semi-annual dividend of 3½ per cent., due April 1, 1866, on the 3d mortgage bonds of the Pittsburg, Fort Wayne and Chicago Railroad, has been ordered paid in anticipation, free of tax, on the 16th inst.

The dividend of 4 per cent., free of government charge, will be paid to holders of stock in the Cleveland and Pittsburg Railroad Company, at American National Bank on and after the 10th inst.

The Vermont and Massachusetts Railroad Company has declared its first dividend (two per cent.) after an existence of many years.

The Eastern (Massachusetts) Railroad Company has declared a semi-annual dividend of four per cent.

The Cheshire Railroad Company a dividend on the preferred stock of 2½ per cent.

The Winnisimmet Horse Railroad Company a dividend of $1 per share, payable 15th inst.

The Granite Railway Company pays 3 per cent. Jan. 10.

The Norwich and Worcester Railroad Company a dividend of 5 per cent., payable Jan. 10.

The Schuylkill Navigation Company a cash dividend of six per cent. on the preferred stock of the company, and six per cent. in boat loan on the common stock.

The Mount Carbon (Pa.) Railroad Company a semi-annual dividend of 3 per cent., clear of taxes.

The Lehigh Valley Railroad Company a quarterly dividend of 2½ per cent., and an extra dividend of 10 per cent. in stock, at par.

The Philadelphia and Erie Railroad Company a dividend of three per cent. payable on the 15th inst.

The Lehigh Luzerne Railroad, a semi-annual dividend of 4½ per cent., payable on the 15th instant.

The New Castle and Wilmington Railroad Company a semi-annual dividend 3½ per cent.

The Delaware Railroad Company a dividend of 3 per cent. less government tax.

The Minehill and Schuylkill Haven Railroad Company a dividend of four per cent. clear of taxes.

The Tenth and Eleventh Street Passenger Railway a dividend of $3 per share, payable on demand, free of tax.

The Spruce and Pine Streets Passenger Railway a dividend of $1 50 per share, free of taxes, payable on demand.

The Fifth and and Sixth Street Passenger Railway a semi-annual dividend of 3 per cent., free of tax, payable on the 15th inst.

The City Passenger (Chesnut and Walnut) Railway, Philadelphia, a dividend of $2 50 per share.

The Green and Coates Street Passenger Railway a dividend of $1 50 per share, payable on the 8th inst., clear of taxes.

The Girard College Passenger Railway a dividend of $1 50 per share, payable on the 10th inst., clear of taxes.

☞ The Kalamazoo *Telegraph* publishes an article upon the project of extending the Grand Trunk from Port Huron to Chicago, in which it gives currency to the statement that the Michigan Central Railroad Company have proposed to the management of the Grand Trunk Railway to build a double track from Kalamazoo to Chicago, to accommodate trains on both roads, provided the Grand Trunk makes its line from Port Huron by way of Lansing to Kalamazoo.

☞ St. Louis people are discussing the plan of building a branch to the Missouri Pacific Railroad, running directly through the rich counties of Cass, in Missouri, and Miami, Franklin, Osage, Lyons and Chase, in Kansas, and running so centrally as to touch the county seat of every one of them. This road at its nearest point will be twenty-five miles south of the Kansas River, and at least bring St. Louis and Santa Fe twenty-five miles nearer together than by any other projected road.

☞ It is proposed to extend the Illinois and Michigan Canal from La Salle to a point on the Mississippi opposite Davenport, Iowa, and the line has already been partially surveyed. This canal will not only bring to Chicago the products of Iowa, but by this route the grain shipped for Minnesota and Western Wisconsin can be carried cheaper than by any railroad route.

☞ The Augusta and Savannah Railroad is now so nearly completed that passengers can go between the two places in one day. The trains leave Augusta at 6 A. M., and arrive in Savannah at 10 P. M. Passengers have to ride only twenty-two miles on coaches. This part of the road will also soon be completed.

☞ We learn from the Utica *Observer* that work has been commenced on the proposed railroad from Utica to Clinton. The contract for building a portion of the road from Clinton to New Hartford, has already been taken by Mr. J. E. Elliot, Esq., of the former place. This will be good news to every friend of the enterprise.

☞ The president of the Southern Pacific Railroad has issued a notice requiring that all applications for recognition of stock must be made in March, and all taxes paid by the first of April, or the applicant to be forever debarred.

☞ The large engine house of the Bellefontaine Railway, at Galion, Ohio, was destroyed by fire last week, with twelve locomotives. The loss is estimated at from three to five hundred thousand dollars.

☞ S. F. Darlington, Esq., has been appointed Superintendent of the Eastern Division of the Pennsylvania Railroad, *vice* Geo. C. Franciscus, Esq., resigned.

☞ George W. Schuyler, late State Treasurer, has been appointed Superintendent of the New York Bank Department, vice Edward Hand, deceased.

☞ The amount of specie in the banks and Sub-Treasury, January 1, 1866, was $53,630,974, against $30,054,450 in 1865, and $37,992,534 in 1864.

☞ The Oswego and Rome Railroad, from Richland to Oswego, is to be operated by the Rome, Watertown and Ogdensburg Railroad Company under a perpetual lease. It is not intended to run over the new road during the winter with reference to quick time, but mainly for freight and accommodation of local travel. In the Spring, the line intends to make the closest connection and the quickest possible time between the New York Central Railroad at Rome, and Oswego.

☞ A corps of engineers are now engaged in surveying a new route for a railroad from Freeport to Butler, under the auspices of the Pennsylvania Railroad Company. It is said the road will be completed and in running order within two years.

Central Pacific Railroad
STATE AID BONDS.

INTEREST AT THE RATE OF

Seven per Cent. per Annum in Gold,

PAYABLE SEMI-ANNUALLY,

Guaranteed and Paid by the State of California.

The Bonds are secured by a mortgage on 160 miles of road from Sacramento to the California State Line, forming part of the great Pacific Railroad Route adopted and aided by the United States Government. They are further secured by a Sinking Fund of $50,000 per annum in Gold received from the earnings of the Road, and pledged for their redemption. They are a first class Security in every respect, and a limited amount will be offered upon terms which render them a very attractive and desirable investment. For further particulars, inquire at our Office, No. 5 Nassau Street.

MANHATTAN

Life Insurance Company,

No. 156 Broadway, New York.

(New Marble Building.)

Cash Capital and Accumulation over

$1,800,000

The triennial dividend of profits of this company has resulted in a bonus or addition to a policy of more than 50 per cent. on the whole premium paid.

The dividends are paid in the life-time of the assured, thus aiding them to pay future premiums.

POLICIES are made incontestable after five years from date, for or on account of errors, omissions and misstatements in the application, except as to age.

ANNUITIES are granted on favorable terms.

HENRY STOKES, President.

C. Y. WEMPLE, Secretary.

J. L. HALSEY, Ass't Sec. S. N. STEBBINS, Actuary.

To Railroad Companies or Contractors.

THE Advertiser has several Steam Excavators, with Cars, and all the material adapted for speedily executing heavy excavations, filling of trustle work, or loading trains with material for gravelling.

Any persons having such work to do will please address, with particulars, Box 366, Clinton, Mass. 6m-36

Car Covering or Roofing.

KINGMAN'S CEMENT WITH HEAVY CANVASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.

July 19th, 1865.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, Dec. 13, 1865.

AT A MEETING OF THE BOARD OF DIRECTORS of this Company, held in this city, it was

Resolved, That a Dividend of FIVE PER CENT. in cash, free of government tax, be paid on the 1st day of February next, to the holders of the full paid shares registered on the twentieth day of January, and that the transfer books be closed on the said twentieth day of January and opened on the third day of February.

New York, Saturday, January 20, 1866.

The New York Canals.

We have read the report of Mr. Skinner, Canal Commissioner of this State, on the condition of its canals, a document which meets a favorable reception from the public. The following topics particularly attract our attention. It appears from his statement that the Eastern division of the Erie Canal is very much reduced in capacity by being clogged up with what are called *benches*, to the extent of 50 miles, so that the channel is much choked up, and the navigation greatly obstructed. He very properly recommends the removal of these without delay.

It also appears there is a serious question as to the requisite supply of water for the Erie Canal, one which has frequently attracted the attention of our State Engineers and others, who have advocated the enlargement of this canal. Mr. Skinner expresses the opinion, however, that an ample supply may be obtained from Fish Creek, even in seasons that are the dryest. Detentions have hitherto constantly occurred for the want of water. To the same end, he proposes to supersede the weigh lock at Utica by a new one at Frankfort, where the water used in weighing canal boats, could be turned again into the canal instead of being entirely lost, as it now is at Utica in the weigh lock there. The saving in this case would be equivalent to 1,375 cubic feet per minute. He discusses very freely and fairly the construction of a ship canal; which it is believed by many persons would be of immense advantage to the shippers of grain, enabling them to send it forward in the same bottoms from Chicago and Milwaukee to the Atlantic, and across it to Europe. He also hints as to its impracticability for want of water, and the proper consideration in consequence of this impracticability of the construction of a canal between Lakes Erie and Ontario, which is saying a good word for the Niagara ship canal, a project we have always approved and deem indispensable, if we are to retain our commercial command of the lakes, and to do without the reciprocity treaty, which gives us the use of the Welland Canal, and which we may lose. With regard to the main question of enlarging the Erie to the size necessary to pass sea going vessels from the lakes to the ocean, Mr. Skinner states, that it is clearly demonstrated by the report of the auditor of the canal department on the tolls, trade and tonnage of the canals, *that the capacity of the canals is by no means reached*, although the quantity of the tonnage of property seeking transit seems nearly at its height. This in our judgment is a complete answer to those who at once would proceed to the enlargement, although we have still a heavy canal debt hanging over us, the annual revenue from tolls falling off, and the expense of maintenance apparently increasing with every enlargement hitherto made. Mr. Skinner very prudently suggests, that it is at least advisable to have made "a thorough exploration" of the route, and of the supply of water to be obtained. He also alludes to the damages which would arise by its construction, to the "fine flourishing cities," and flourishing villages now clustered along the banks of the canal, which would necessarily be disturbed by such an enlargement. No doubt these would be estimated at many millions when the work was completed. Besides all this, we contend that a ship canal would be found a most dilatory and expensive channel of transportation. A vessel of capacity for an ocean voyage, propelled by steam, or rigged with masts and sails would be out of place on a long canal, would be moved with great difficulty, much loss of time, and much expense; it would be difficult to handle in passing bridges, locks and villages, and could not be moved at a rate of more than about two miles an hour. Then again the State of New York with its present debts to be increased very soon by the large recognized expenditures for the war, is in no condition to undertake such a work during the present generation, and as to obtaining the support and co-operation of other States, as Mr. Skinner suggests, it may be replied, that if New York the wealthiest of all the States is not in a condition to undertake the work for herself, it is not very likely the Western States will be able to assist her. In connection with this subject, we may remark that the auditor whose report has been alluded to, goes a step further and speaks favorably of the project to connect the St. Lawrence and Hudson Rivers by the way of Lake Champlain. This scheme often discussed in this paper, brought up at the Detroit convention, and favorably noticed by the American and foreign press, seems growing into favor as a cheap and practicable method of obtaining a further outlet for the commerce of the lakes and the far west. Within a few days past, the subject has been discussed anew by the Montreal Board of Trade and approved, and more than this, it is understood that fresh efforts will be made in Canada to construct the first link by the enlargement of the Chamblee Canal to a size sufficient to pass the lake vessels into Lake Champlain which could proceed as far at least as Whitehall. This would be an immense stride forward, giving a large business to the Eastern railways which terminate or touch there, cheapen transportation greatly, and give the Champlain Canal such an increase of business as would lead to a corresponding enlargement at no distant day. Mr. Skinner does not commit himself to the main question, but appears to refer it to legislation and farther inquiries, where we think it is destined to linger. He recommends the appointment of a commission to examine the subject and an alteration in the constitution as necessary, if the work is ever to be undertaken.

We doubt, if the people of this State, when they know the Erie Canal is not and never has been worked up to its full capacity, are quite ready to add forty or fifty millions to their present debt for any such work as the ship canal, certainly not in our time.

Reno, Oil Creek and Pithole Railroad.

The work of track laying is progressing upon this work, and all of the grading upon the entire route is completed, with the exception of two cuts. The work of erecting the bridge across Oil Creek will be commenced early next week, and it is hoped that ten days from that time will see it completed. Gen. Burnside has been here this week superintending the work in person, and the road will be opened as soon as men and means can do the work.—*Reno Times, Jan.* 11.

Philadelphia and Reading Railroad.

The receipts from operations of this road for the fiscal year ending November 30, 1865, were:

From	393,359 passengers	$1,067,847
"	846,105 tons merchandize	1,165,227
"	3,090,814 tons coal	8,627,292
"	mail	28,871
"	miscellaneous	255,282
	Gross receipts	$11,142,519
	Gross expenses	6,330,248
	Net profits	$4,812,271

The following tabular statement, in detail, for each branch of traffic, shows the comparative results of the year:

	1864—Passengers.		1865—Passengers.		Increase.
Travel	342,252	$909,882	393,359	$1,065,847	$155,966
	Tons.		Tons.		p. c.
Merchandise	807,196	953,776	846,105	1,165,277	17.1
Coal	3,065,577	7,208,775	3,090,814	8,627,292	22.2
Mail		23,497		28,871	211,501
Miscellaneous		178,411		255,282	1,423,617
Gross receipts		$9,269,941		$11,142,519	19.7
Gross expenses		4,961,191		6,330,248	5,374
					22.8
Net profits		$4,308,150		$4,812,271	76,821
Gross expenses, including renewal fund in the year 1864 were 53.52 of gross receipts.					43
" " " " in the year 1865 were 56.81 " "					$504,121
					11.7
					"
					"

The receipts and expenses per passenger and per ton, have been as follows:

	1864.		1865.		Apparent increase.... 2.29*
	Cost.	Received.	Cost.	Received.	
Per passenger	$1 13.7	$2 65.8	$1 42.5	$2 70.9	"
Merchandize per ton	63	1 18.2	79.4	1 37.7	"
Coal	81	2 35	1 06.9	2 79.1	"

* Increase in taxes 2.10 per cent., making the real increase 1.19 per cent.

The charges for transportation have not been raised above those of last year, while the expenses have increased 27.6 per cent. The increased profit of 11.7 per cent. has been mainly derived from the larger amount of business done, and the great decrease in the Government orders for coal, which was carried at rates much below those charged the public.

The result of the year's business, as condensed from transportation and income account, may be stated thus:

Receipts over cost of working the road		$4,812,270 40
From which deduct—		
Interest on bonded debt	$378,264 00	
Interest on b'ds & mort.	30,946 76	
Sinking fund, as directed by mortgages	68,600 00	
Sinking fund, as directed by stockholders	362,630 30	
Cost of machines for workshops	39,855 01	
Cost of coal and barges	56,521 09	
Cost of new engines and cars	771,696 47	
Cost of Lebanon Valley second track	55,165 80	
Cost of Schuylkill Valley and Little Schuylkill connection	70,509 00	
Cost of Reading car shops, &c	183,515 04	
Cost of sidings & tracks	162,001 63	
		2,179,705 16
Reserved fund, 1865		$2,632,565 80
Amount to credit of reserved fund, 1864	$372,050 53	
To which is added:		
Proportion of loss laterals in 1864 paid by Schuylkill Navigation Company	234,067 30	
Profit on boats, balance of interest, &c.	68,676 59	
Old debts revived and paid	26,605 02	
	$701,399 44	
From which is deducted—		
Balance of dividend of 1864, not included in account of 1864	28,225 73	
		673,173 71
Total reserved fund, 1865		$3,305,739 01
which has been appropriated as follows:		
10 per cent. dividend on $20,240,673 47 common & preferred stock	$2,024,067 34	
United States & State taxes on do	202,406 73	
		2,226,474 07
Balance of reserved fund		$1,079,264 94

These results exhibit increased traffic in each department, with net profits largely in excess of any previous year. The evidences of such prosperity cannot fail to be received by the stockholders with marked satisfaction.

The traffic other than coal steadily and rapidly increase.

The gross receipts from such sources during the past year amount to	$2,515,226 68
The expenses of conducting these branches of business as per statement	1,232,760 26
Profits on passengers & merchand'e.	$1,282,466 42

An amount sufficient to pay the annual interest on the debt, $409,210 76, and about four per cent. on the preferred and common stock.

The new works to which reference was made in the last report have been continuously prosecuted. Two large and commodious wharves at the coal shipping depot at Port Richmond are nearly completed, and will be ready for use early in the spring. Others have been enlarged.

A new workshop at Reading for building and repairing cars, seven hundred and five feet in length and one hundred and sixty-nine feet in width, has been finished.

The junction railroad tunnel, at West Philadelphia, will be completed in about two months. The construction of this road was not in advance of the necessities of the traffic.

A new railway three and three-tenths miles in length has been made, connecting the Schuylkill Valley and Little Schuylkill railroads, both of which are leased by this company. By this means very direct communication is made between Pottsville, Tamaqua, and the rapidly growing towns in the Mahanoy and Ashland coal districts. A new and short line is also thus furnished for the large supplies of timber required for mining purposes, as well as agricultural products from the Catawissa and Susquehanna Valleys. Additional double track, three and nine-tenths miles in length, has been laid on the Lebanon Valley Branch, and fifteen and forty-five hundredths miles of sidings on the main line and laterals. Numerous small branches, eight and ninety-five hundredths miles in the aggregate, have been constructed in the different coal districts for the further development of this most important branch of our traffic.

The bonded debt has been diminished by purchases for the sinking funds | $161,000
By conversion into stock | 149,000
| $310,000

The bonds now outstanding amount to $6,365,300, of which only $475,500 are entitled to the privilege of conversion into stock.

The appropriations to the sinking funds required by the conditions of various mortgages were, in 1865	$68,600 00
Created by the stockholders in 1865	362,630 30
	$431,230 30
Balance November 30, 1864	561,236 49
	$992,466 79
Deduct bonds purchased in 1865, $161,000, cost	158,556 25
	$833,910 54

At the annual meeting in 1860 the stockholders created a sinking fund ($140,000) in addition to similar appropriations required by the terms of various mortgages. The following year the board of managers recommended, and the stockholders authorized, the establishment of another sinking fund, which, with those already in existence, had for its object annual deductions from income account equal to the liquidation of the bonded debt at or before its maturity. This debt then amounted to $11,496,700, of which $5,086,500 matured in 1866. The fund so created amounted in the following year to $27,378 41, and it was expected that it would increase each year until the debt was extinguished. Since that date the bonded debt has been diminished by conversion and purchase $5,131,400. For this reason the board of managers regard so large an annual appropriation, in addition to the sinking funds created by the terms of the mortgages, quite unnecessary. They believe it to be a wise policy, and one which should be continued, to purchase the bonds when they can be had on favorable terms; but they recommend that the compulsory feature of the sinking funds thus voluntarily provided by the stockholders should be abolished, and that it be left to the discretion of the managers to purchase bonds when and as suitable occasions offer.

Several years ago it was decided to be the policy of the company to control, by lease or purchase, some of the important lateral roads in the coal region. On these branch roads, which intervened between the mines and the works of this company, very high charges in most cases then prevailed, thus giving to their proprietors an undue proportion of the profits of the transportation from the mines to market. When such roads were from time to time so leased, the charges for transporting coal were materially diminished. Pending these purchases it was not deemed advisable to state them in detail in the accounts. In former reports they have appeared in the item, "Stocks and bonds held by the company." They are now transferred to, and will hereafter appear in, the

capital account. The largest investment has been made in the Mahanoy and Broad Mountain railroad, from which one-fourth of the anthracite coal transported by this company was received during the past year. This road and its branches traverse the second coal field, from which largely increased supplies may be hereafter confidently expected. The balance of the stock and bonds, $851,928 57, are chiefly of the same class of investments.

Since the close of the fiscal year, November 30, the board of managers have also acquired a majority of the stock of the East Pennsylvania Railroad Company. The capital stock of this company is $654,400. Bonded debt $574,900.

It extends from Reading to Allentown, a distance of thirty-six miles. It should be extended to Easton, about sixteen miles. A direct and continuous line under one management would thus be formed between Harrisburg and the Delaware river. Greater facilities and, it is believed, increased profits are secured by this purchase, which was effected by an issue of stock.

The usual statements of the general superintendent and engineer are appended, to which reference is made for details.

During four years prior to May last, the consumption of coal for government purposes was very large. In consequence of the interruption by ice of navigation of the river. Delaware, during many weeks last winter, the demands of the government during the early spring months were unprecedentedly large. This, together with an equally urgent demand from other consumers, exceeded the capacity of the rolling stock. On the sudden cessation of the war, in April last, the demand of the government almost ceased, which, with other disturbing elements, were followed by a partial paralysis in both the coal and iron trade of the country. During the months of May and June, of last year, the coal tonnage from the Schuylkill region was but 316,672 tons. In the same period in 1864 it was 797,184 tons.

The total product in 1865 was about 500,000 tons less than in 1864. The coal tonnage of this company, as has been previously stated, was slightly in excess of the previous year. The largest quantity of coal transported by this company in any calender month was in September, 1865, when it reached 384,660 tons. Previous to this year the maximum quantity was in August, 1864, 320,110 tons. This exhibits an increased capacity this year in excess of any previous period, at the rate of 630,492 tons per annum. Such great irregularities in this branch of the business have developed two materials facts:

1st. That the various companies engaged in transporting coal have had facilities, on the average, fully equal to the requirements of consumers, and demonstrating that with a business approaching any degree of regularity, the producers of coal have had the means of sending to market more than they could sell.

2d. It is also established that the present capacity for production and transportation is largely in excess of the consumption. The suspension of mining operations in other coal districts for some two months created apprehension about future supplies, unduly stimulated the demand, and thus materially augmented the price of coal, and hence to a certain degree, particularly in the iron trade, diminished the consumption. It has been the well-settled policy of this company that the means of transportation should be fully equal, with any ordinary degree of regularity in the demand, to the wants of consumers. Coal is an article of first necessity. The great manufacturing and steam marine interests of the country are dependent on it. Therefore the works should be maintained fully equal to the wants of the public, and a most liberal policy in this regard is conclusively the only wise and safe one. It is not proposed, however, to procure rolling-stock equal to doing the business of a year in eight or nine months. This would be neither reasonable nor wise. It would require the charges to be unnecessarily increased, the minimum charges both in mining and transportation being attained by the greatest regularity in the trade.

Previous to the war the consumption of anthracite coal was increasing at a ratio exceeding ten per cent. per annum. During the first two years of the conflict it diminished, but during the last two the former ratio of increase was resumed. From this experience the managers deem it reasonably probable that the same rate of increase will continue, or about one million of tons per annum.

The whole financial policy of the company should be based on a determination to provide everything necessary to insure that we obtain our full share of this increase.

In pursuance of the conservative policy, which has received the general approval of the stockholders, the managers have charged to income account the cost of new property, amounting to $1,339,264 10. They do not regard any such deductions from profits as requisite to maintain and perpetuate property formerly acquired. They are aware, however, that the expenditures of the past year have been made in a currency much depreciated. For this reason it has been the intention to deduct from income such an amount as will leave the capital stock on which future dividends are to be paid represented upon a gold basis.

After making such deductions, and the sinking funds, the balance of

Income account for the year is		$2,632,565 30
Add reserved fund 1864		673,173 71
		$3,305,739 01
Deduct div. of 10 pr.ct.	$2,024,067 34	
Add tax on same	202,406 73	
		2,226,474 07
Reserved fund Nov. 30, 1865		$1,079,264 94

For reasons heretofore stated, the managers decided to give to each stockholder the option of taking the dividend in money or in stock at par. So far as is now known, nearly all of the proprietors have preferred to take stock. The company is thus placed in a position of great financial strength to meet the legitimate requirements of the public, to furnish increased facilities to the trade to purchase the bonds first maturing, should they be offered on satisfactory terms, and otherwise promote the permanent interest of the stockholders.

By order of the Board of Managers,
CHAS. E. SMITH, President.

At the annual meeting of the stockholders of the Philadelphia and Reading Railroad Company, held January 8, 1866, the following resolutions were adopted:

Resolved, That the report of the board of managers, this day presented and read, be and the same is hereby approved, accepted, and adopted; and that the action of the board in relation to the several matters therein mentioned and their action with reference to the East Pennsylvania railroad, and the issue of stock in respect thereto, are especially approved and sanctioned.

Resolved, That the board of managers be, and they are hereby, authorized, at their discretion, to carry into effect any of the measures proposed in their report, and if in their opinion needful, to enter into any contracts or agreements for that purpose.

Resolved, That the powers and authorities conferred upon and granted to the board of managers by the resolutions passed at prior annual meetings be, and the same are hereby, continued.

Resolved, That at this general meeting of the stockholders of the Philadelphia and Reading Railroad Company, the act approved the 20th day of A. D. 1865, entitled "An act to entitle the stockholders of any railroad company incorporated by this Commonwealth accepting this act, to one vote for each share of stock," be and the same is hereby accepted, and so that hereafter each share of stock of this company, subject to the provisions of charter and laws in relation thereto, shall entitle the holder thereof to one vote, as in and by said act is provided.

Resolved, That a vote of thanks be and the same is hereby presented to the president and board of managers for the able manner in which the business of the road has been conducted during the past year.

The following gentlemen were elected to serve for the ensuing year:

President, Charles E. Smith; Managers, H. P. McKean, A. E. Borie, R. B. Cabeen, J. B. Lippincott, John Ashhurst, Stephen Colwell; Treasurer S. Bradford; Secretary, William H. Webb.

Shipments of Copper in 1865.

The following is a statement of the shipments of copper from the Lake Superior regions in 1865:

	Tons.	Lbs.
Portage Lake district	4,596	856
Keweenaw district	3,234	1,673
Ontonagon district	2,140	845
Total shipments	9,971	1,374

Or within 28 tons of a grand total of 10,000 tons. In each district there has been a considerable increase over the product of 1864, the greatest being in Keweenaw District. The following are the amounts of increase, as near as can be ascertained:

	Tons.	Lbs.
Keweenaw District	775	1,593
Ontonagon District	420	....
Portage Lake District	350	1,434
Total increase	1,546	1,027

TABLE OF SHIPMENTS.

	Tons.		Tons.
1845 to 1854	7,642	1861	7,400
1855 to 1857	11,312	1862	9,062
1858	3,500	1863	8,548
1859	4,200	1864	8,472
1860	6,000	1865	9,971
Total			76,107

The Philadelphia and Reading and Atlantic and Great Western Railroads.

The agreement between the Philadelphia and Reading, and the Atlantic and Great Western Railroad Companies, has for its object the formation of a great through line to Philadelphia from all points in the West, accessible to the road of the latter company, and to give to this city all the advantages of her geographical position. When Sir Morton Peto and his party were here last autumn, they made a tour through the western part of Pennsylvania, and decided to build a railroad from Franklin, to connect at Milton with the Catawissa Railroad Company. They have also leased the Morris and Essex Railroad, from Easton to New York, and the remaining gap, between Easton and Catawissa, it is proposed to fill up by leasing the lines of road belonging to or controlled by the Reading Railroad Company. In pursuance of the terms of the agreement, all freight bound east is to be delivered to the Reading road at Catawissa, while western bound freight will be delivered by the latter company to the Atlantic and Great Western Railroad at the same place. The rates of transportation per mile, between points west and this city, are not to exceed the rates charged between the same points and New York, the intent being to give to Philadelphia the most favorable rates, and to prevent any discrimination against it. The Atlantic and Great Western Railroad is not to pro rate with any other line at lower rates than by the Reading Railroad. Other roads and connecting links are to be built, so that within four years there will be a continuous line from this city to Dayton and Cincinnati, Ohio. The companies also agree to pay half the cost of building and equipping a satisfactory line of steamers between Philadelphia and England, whenever the citizens of Philadelphia and Pennsylvania furnish the other half. The agreement between the two companies is for the term of ninety-nine years from the first of January, 1866. —*Philadelphia Press.*

Finances of N. Y.—Comptroller's Report.

In the report from the Comptroller's Office, submitted to the Legislature in January, 1865, the receipts on account of the General Fund Revenue for the fiscal year, were estimated at..$9,703,824 72
And the expenses at..... 9,314,711 15

Estimated surplus Sept. 30, 1865... $389,113 57
The actual receipts, including balances and payments on account of the same fund were..... $11,912,936 48
Payments, including deficiency ($863,814 67) from previous yr. 13,092,330 54

Deficiency Sept. 30, 1865 .... $1,179,394 00

The receipts on account of the general fund revenue for the present fiscal year ending Sept. 30, 1866, are estimated at the sum of...$10,130,064 85
Payment including deficiency at... 9,690,078 64

Estimated surplus Sept. 30, 1866.. $439,986 21

These estimates may vary widely from the actual results by reason of appropriations by the Legislatures for purposes not already provided for by law, and therefore, not taken into account in making the estimates.

The funded debt of the State, as it existed on the 30th of September, 1860, was as follows:

Canal debt..... $27,107,321 49
General fund debt 6,505,654 37

Total..... $33.612.975 85

The debt, as it existed on the 30th September, 1865, not including the Bounty debt, was as follows:

Canal debt..... $19,424,585 49
General fund debt..... 6,050,954 37

Total..... $25,475,539 86

Showing a dimunition of the debt as it existed before the war, of $8,137,435 99. But for the large Bounty loan made during the last year, the State would within a few years have been entirely free from dobt.

The certificates issued on account of that loan reached, up to the 10th day of December, 1865, the sum of..... $25,566,000 00
Add canal and general general fund debts as above..... 25,475,539 86

Total debt, Dec. 10, 1865..... $51,041,539 86

The following statements from the canal department, show the receipts and payments on account of the canals during the fiscal year 1865.

Receipts:

From tolls.....		$3,516,948 63
" rents of surplus waters		4,683 00
" interest on current revenue...		24,145 76
" miscellaneous sources		31,688 06
		$3,577,465 45

Payments:

To commissioners for repairs	$186,412 14	
Contractors for repairs.	950,033 01	
Superintendents for repairs.....	645,638 84	
Collectors for salaries, clerk hire, pay of inspectors, and office expenses	67,416 85	
Weigh-masters	9,705 70	
For salaries chargeable to annual revenue, refunding tolls, printing and other miscellaneous payments.....	68,167 05	
		1,927,373 59
"Surplus revenues"		$1,650,091 86

—which have been transferred to the working fund under article 7, section 1, of the constitution.

By comparing the receipts with those of the preceding year, which were $4,346,265 52, it will be seen that there is a falling off to the extent of $768,800 07.

Statement of the canal debt, 30th September, 1865, showing each description of stock, the amount redeemable in each year, and the annual interest on the same:

When due.	Pays no interest.	6 per cent.	6 per cent.	Total.
1837.....	$.....	$160	$.....	$160 00
1860.....	$2,000	.....	10,000	10,000 00
1864.....	.....	2,000	.....	4,000 00
1865.....	.....	158,650	.....	158,650 00
1866.....	.....	.....	.....	.....
1868.....	$.....	$702,000	$192,585 49	$894,585 49
1871.....	.....	.....	1,163,000 00	1,163,000 00
1872.....	.....	3,050,000	167,000 00	167,000 00
1873.....	.....	6,000,000	.....	6,000,000 00
1874.....	.....	2,250,000	4,500,000 00	6,750,000 00
1875.....	.....	500,000	.....	500,000 00
1877.....	.....	900,000	.....	900,000 00
Annual interest...	$2,000	$804,120	$301,129 28	$1,105,249 28
Debt paying int...	.....	168,810	10,000 00	172,810 00
" not paying int.	$2,000	$13,402,000	$6,022,585 49	$19,424,585 49
Total debt.....	$2,000	$13,562,810	$6,032,585 49	$19,597,895 49

The following is a recapitulation of the foregoing statement of the canal debt, paying interest on the 30th of September, 1865:

Under art. 7, sec. 1 of the constitution	$5,163,000 00
Under art. 7, sec. 3.....	11,677,000 00
Under art. 7, sec. 10.....	392,585 49
Under art. 7, sec. 12.....	2,200,000 00
Total.....	$19,424,585 49

The receipts and expenditures upon the canals, should attract the attention of tax-payers. While the receipts are rapidly diminishing, the expenses are still more rapidly increasing. In 1863, the receipts were $5,118,501 35, and the payment for collection and ordinary repairs, $770,882 52. In 1865, the receipts were $3,577,465 45, and the payments for collection and ordinary repairs, $1,-927,373 59. In 1863, the surplus to meet the requirements of the Constitution was $4,347,618 83, leaving a "remainder" of $981,376 17. In 1865, the amount was $1,650,091 86, leaving a deficiency of $1,716,150 80, to be provided for by taxation. In 1863, the percentage which the cost of maintenance of the canals bore to the amount of tolls was but 15.39; in 1865, it rose to the enormous rate of 54.73, being far greater than it ever was before, in any year, since the canals went into full operation. And this statement does not include the heavy payments for "extraordinary repairs," which would make it much higher. The payments of $350,000 to the General Fund Debt Sinking Fund, and of $200,000 for the support of Government cannot of course be made.

THE STATE FUNDS.

The several funds particularly treated of in this report are the following:

The General Fund; the General Fund Debt Sinking Fund; the Common School Fund; the United States Deposit Fund; the Literature Fund; the College Land Scrip Fund, and certain trust funds of small amount.

GENERAL FUND.—REVENUES.

Deficiency of the revenue.....		$863,814 67
Warrents drawn on the Treasury..		12,176,010 49
Amount transferred to the following funds for interest on money in the Treasury, belonging to said funds, viz:		
School fund.....		37,269 24
Literature fund.....		4,165 64
United States deposit fund.....		9,554 47
Railroad sinking funds.....		810 64
Tioga coal, etc. sinking fund.....		187 29
Amount of warrants drawn on the Treasury remaining unpaid Sept. 30, 1864		518 05
Total payments.....		$13,092,330 54
Amount of receipts into the Treasury during the year ending 30th Sept., 1865....		$11,911,635 82
Transferred from school fund for bonds for lands.....		740 79
Amounts of warrants drawn on the treasury remaining unpaid Sept. 30, 1865		559 87
		$11,912,936 48
Deficiency of the rev. Sept. 30, 1865		$1,179,394 06

The following statement shows the condition of the Treasury at the end of the fiscal year 1865:

Amount received into the Treasury on account of the several funds.....		$16,273,105 89
Amounts of warrants drawn and unpaid		559 87
		$16,273,665 76
Balance due the Treasury on the 30th, Sept. 1864..	$85,003 77	
Amounts of warrants drawn in the Treasury on ac't of the several funds....	16,097,574 16	
Amount of warrants drawn and unpaid	518 05	
		16,183,095 98
Bal. in the Treasury Sept. 30, 1865		$90,569 98

Statement of balances due from and to the Treasury September 30, 1865, viz:

From the general fund revenue....	$1,179,394 06
" treasurer for balance in the Treasury	90,569 78
	$1,269,968 84
To the school fund, viz;	
Capital	$603,006 32
Revenue.....	61,706 91
	$684,713 13
To the Literature Fund, viz:	
Capital..... $121,571 51	
Revenue 16,186 26	
	137,757 77
To the U. S. Deposit Fund, viz:	
Capital..... $95,131 46	
Revenue 209 81	
	92,341 27
To the Mariners Fund, viz:	
Capital..... $164 81	
Revenue 1,169 76	
	1,334 57
To the general fund debt sinking f'd	159,120 12
To railroad sinking funds.....	14,045 57
To soldiers allotment fund	54 96
To college land scrip fund	3,380 61
To the Metropolitan Police fund...	177,215 84
	$1,269,968 84

GENERAL FUND DEBT SINKING FUND.

Amount received into the treasury during the year		$950,000 00
Balance due the treasury on the 30, Sept. 1864	$209,501 55	
Amount paid from the treasury during the yr. ending Sept. 30, 1865.	581,378 33	
		790,879 88
Bal. in the treasury Sept. 30, 1865		$159,120 12

GENERAL FUND STATE DEBT.

The amount of the general fund state debt on the 30th Sept. 1865, was $6,050,954 37.

The principal of the debt is reimbursable as follows, viz:

On demand	$53,910 68
1866	385,000 06
1868	942,961 05
1870	700,000 00
1875	900,000 00
1878	800,000 00
At pleasure	2,258,082 64
Paying interest	$6,039,954 37
Not paying interest	11,000 00
Total debt	$6,050,954 37

The amount of the contingent State debt for stock issued and loaned to sundry railroad companies, in $224,000.

SCHOOL FUND.

This fund amounted to $2,765,760 77.

Amount received into the Treasury for year ending Sept. 30		$408,267 70
Amount paid out of the Treasury during the year ending 30th Sept.		326,560 79
Bal. in the Trea. on the 30th Sept.		$81,706 91

LITERATURE FUND.

This fund amounted to $270,452 12.

Amount received into the Treasury during the year ending 30th Sept.		$60,257 78
Amount paid out of the Treasury during the year ending 30th Sept.		44,071 52
Bal. in the Treasury Sept. 30		$16,186 26

UNITED STATES DEPOSIT FUND.

Capital, $4,014,520 71.

Revenue, including $697.10 balance from previous year		$256,294 81
Payments during the year		256,085 00
Bal. in the Treasury Sept. 30		$209 81
Tonawanda railroad company S. F.		$6,000 00
Long Island railroad company S. F.		8,333 39
Mariners' fund		11,334 57
Soldiers' allotment fund		54 96
College land scrip fund		64,440 00
Metropolitan police fund		177,215 84
Indian annuities		7,361 67

TAXES FOR THE ENSUING YEAR.

There is usually so much irregularity in the appropriations made by the Legislature that it is difficult to estimate with much accuracy, the amount which will be required for the General Fund. As there is no deficiency to provide for, one mill on the dollar ought to be sufficient. It will probably not be safe, however, to make it one and a fourth. The Auditor of the Canal Department, states that he will require as much as ¼. At least 2¼ will be required for the Bounty debt.

The tax levy then, even with unusual economy in appropriations, will require the following rates:

For the general fund	1¼ mills.
For schools, Chapter 180, Laws of 1856.	¼ "
For canals (probably)	¼ "
For canals, Chapter 271, Laws of 1859	¼ "
For bounty loan Chap. 325, Laws of 1865.	2¼ "
Total at least	5 "

This is a very high rate for a time of peace. It is not likely to be much less for many years to come. If any extraordinary appropriations are made, it will be necessary to increase it.

THE INCREASE OF TAXATION.

The following table gives the aggregate valuations and the amounts of the State, county, town and school taxes in each year for the last 20 years.

Year.	Aggregate valuations.	State taxes.	Town, county and school taxes.
1845.	$605,646,095	$361,309 62	$3,809,218 33
1846.	616,824,955	370,557 44	4,276,904 44
1847.	632,699 993	302,579 27	5,541,046 33
1848.	651,619,595	325,638 72	4,969,819 51
1849.	665,850,737	334,555 96	5,214,425 32
1850.	727,494,583	364,003 75	5,948,783 58
1851.	1,077,831,630	578,546 88	6,180,891 38
1852.	1,168,335,237	292,641 69	6,715,046 39
1853.	1,266,666,190	1,285,124 88	8,060,097 03
1854.	1,364,154,625	1,020,926 49	8,615,164 36
1855.	1,402,849,304	1,751,717 78	9,924,454 52
1856.	1,430,334,696	1,430,000 02	11,312,845 04
1857.	1,433,309,713	3,221,775 42	11,941,362 94
1858.	1,404,907,679	2,457,533 80	12,968,004 78
1859.	1,404,913,679	2,458,599 10	13,894,687 46
1860.	1,419,297,520	4,376,167 35	14,579,857 15
1861.	1,441,767,430	4,505,523 19	15,896,753 00
1862.	1,449,303,948	5,797,215 79	13,659,072 61
1863.	1,454,454,817	6,181,432 97	16,865,367 69
1854.	1,500,999,877	6,754,499 45	33,119,446 11
1865.	1,550,879,585	6,067,816 77	39,893,623 85

The amount of town, county and school taxes for 1855 is made up from returns which are imperfect as yet. It is more likely to exceed than to fall short of the amount stated.

Southern Share of Taxes.

Under the act of August 5, 1861, levying a direct tax of $20,000,000 on the several States, the aggregate quota of the eleven Southern States then in rebellion was fixed at $6,690,000 95. The following statement shows the amount paid by the several States named during the last quarter of the year ending December 31, 1865, upon their quotas of the direct tax:

Tennessee	$50,000
North Carolina	35,986
Louisiana	20,000
Total	$105,986

The following named States are the only ones which have not yet paid something towards the liquidation of their direct accounts with the general government:

	Quota.
Georgia	$584,367 33
Alabama	529,513 33
Mississippi	413,084 66
Texas	355,106 66
	$1,881,871 96

Since the close of the rebellion, the States named below have paid over to the Government, on account, the following sums:

	Paid in.	Quota.
South Carolina	$234,756 17	$363,570 66
Virginia	171,420 27	937,550 66
Florida	43,509 81	77,522 66
Arkansas	88,165 32	261,886 00
Lousiana	220,000 00	385,886 66
Tennessee	108,272 00	669,498 00
North Carolina	35,986 00	576,194 66
Total	$852,109 57	$3,272,109 40
Add amounts due by Georgia, Alabama, Mississippi and Texas		1,881,871 98
Total amount due the Government by the late rebellious States		$5,153,981 38

New York and Oswego Midland Railroad.

A correspondent of the *Herald*, writing from Albany under date of January 10th says:

An immense delegation of citizens attended here to-day from the towns and counties on the route of the two proposed railroads from Oswego and Syracuse to Rondout and New York, through the midland counties south of the Central Railroad. The route adopted by the New York and Oswego Midland Railroad Company, runs through the counties of Oswego, Onondaga, Madison, Chenango, Delaware, Orange and Sullivan to Hoboken. The necessary subscriptions for complying with the requirements of law perfecting the organization were paid in. The construction of a new trunk line from the West to New York, sixty miles shorter than the present roads, will thus be secured over easy grades.

The directors of the several sections of the road from Rondout to Utica also met, and organized their interests in a consolidated executive committee of twelve, under a resolution directing the building of the road. The report on a grade was adopted, also the route and the necessary payments required for the organization of the road under its charter. When completed it will run in a straight line from Rondout to Utica. A resolution was adopted recommending proper steps to be taken for the necessary legislative act authorizing the several towns along the route to issue their bonds for the construction of the road, this local aid insuring the certainty of success for any deficiency in the subscription. Regular allotments of individual subscriptions and of town bonds have been pledged in form at the meeting.

☞ The attention of contractors is invited to the advertisement in another column for proposals for the completion of the grading, masonry, etc., of the *American Central Railway of Illinois*, extending from the city of New Boston, on the Mississippi, to the Indiana State Line, in the direction of Fort Wayne. The whole length of line is about 190 miles. Proposals may be submitted until the 15th prox., to GEO. M. BRAGGIOTTA, 117 Pearl street, N. Y. Profiles, specifications, etc., may be seen at the office of the Chief Engineer, in Galva, Henry Co., Ills.

Grain Trade of Milwaukee.

The following table shows the receipts and shipments of flour and grain at Milwaukee during the years 1864 and 1865:

	1864. Receipts.	1864. Shipments.
Flour, bbls.	280,872	425,368
Wheat, bush	9,120,255	8,952,838
Oats	105,598	755,333
Corn	473,304	171,516
Rye	89,407	12,465
Barley	198,033	1,104
	1865. Receipts.	**1865. Shipments.**
Flour, bbls	372,925	508,181
Wheat, bush	11,859,245	10,080,990
Oats	649,085	341,612
Corn	276,724	65,935
Rye	137,259	51,472
Barley	149,728	7,395

☞ The Elmira *Gazette* states that "the Northern Central Railway Company have purchased the Northern Division of the Erie Railway, from Elmira to Canandaigua, and during the coming season intend laying the narrow gauge track of the road on that line, so as to enable them to send through trains from Baltimore to Niagara Falls."

☞ The Government realized $91,956,138 from the imports of dry goods at the port of New York for the year ending December 31, 1865, being an increase in receipts of $17,866,376 as compared with the exhibit of 1864.

American Railroad Journal.

Saturday, January 20, 1866.

Stock Exchange and Money Market.

We continue to notice quite an undercurrent, and a strong one, against an early resumption of specie payments. While the great majority of the people are anxious for it, there are large and influential interests opposed to it which find support in well known journals. Especially among the cotton and paper manufacturers does this feeling prevail, as well as among merchants who take credit, and are obtaining large profits on their transactions, also among those who are habitual borrowers, and like debt which is to them capital and business. On the same side, we find some ingenious writers and thinkers who fondle a truism as a mother does her infant, and seek to find in other causes than inflation and paper money, an explanation for high prices and the premium on gold. In a recent conversation with a gentleman who is the successful manager of a cotton mill, which has made extraordinary dividends, and has a surplus almost equal to its capital, we were met with this argument: If gold, and the depreciation of the currency have anything to do with prices, how comes it that these last are higher now with gold 139, than when it was 281. It is supply and demand that regulate all this! Now the answer to this statement is, that in many articles the prices *have* fallen, as in the very article of cotton prints manufactured by this very gentleman, who admitted that out of a pound of cotton he fabricated five yards of material. This would give a gross profit of at least 400 per cent. even now. But cotton fabrics have declined very materially since the fall of gold; and so, many other articles, the necessaries of life. But even if this were not so, even if everything did not fall with an even correspondence, the reason is, that inflation for a time keeps up the scale of prices, as it did in England after the resumption there. People get accustomed to pay them when paper is plentiful, without much reflection. Laborers, house servants, and employees of all kinds have their ideas raised by the habit of receiving large wages in paper, and do not willingly abandon them.

Combinations and strikes are organized to keep up wages, and they must be given, or the employers go without assistance. This state of things is likely to continue while unrestricted paper occupies the place it does, and labor is not disposed to lower its demands. Thus in this very city there are thousands of people who will not work except at the highest prices, and their conduct injurious to themselves, is equally so to employers. But there is behind all this, and before all this, a great principle on which trade, industry and real prosperity rest. It is, that promises to pay money, whether made by Governments, banks or individuals, which are not performed, and which by a forced circulation are kept afloat and pass for one-third more than they are worth, are great frauds on the public and on commerce; and money acquired by speculation in the use of these frauds is not honestly gained. It is a demoralizing condition of things. It holds out to persons of easy principles a bad example, and encourages fictitious transactions in every shape. If Governments are to be administered on sound principles, (and any Government which is not, is not worth having,) then they are bound to perform their engagements, financial especially, as these are the touch stone of commercial character, and the basis of financial stability. We therefore believe, with many others of the press, that we cannot too soon begin to redeem these obligations, and reduce them to their normal and intended character, that delay is but fastening our present difficulties upon us, and making their removal more and more difficult.

The rich may grow richer as things now are, but all other classes must grow poorer. The expenses of living are now three and four times greater than they were ever before, while salaries and fixed incomes are of far less money value than they ever were before. Properties at the old values—the values of the world—were once equal to the support of their possessors, but will now barely give them the plainest subsistence. Cer-

tainly this is a condition of things by no means to be defended.

To make these statements more practical we give a table showing the purchasing power of $1,000 of United States currency in 1864 and 1865, consequent upon and as affected by a fall of gold from 280 to 150, which power has been increased by the further recent fall in the premium of 10 per cent. The result is the same, though prices have not uniformly and correspondingly declined as we admit. But be the prices what they may, the purchasing power of greenbacks has *been increased* and is increasing; so that if prices keep up, a better currency will enable us to purchase more as the premium declines. A thousand dollars in paper would purchase:

	1865. March.	1864. Aug.	Increase.

We learn by a letter from Frankfort on the Main, of date December 17th, which we find in the Cincinnati *Commercial*, that the German merchants, while taking a most favorable view of the present and eventual resources of this country, are exceedingly anxious that we should come back to a fixed standard of values, as commerce is exceedingly depressed there by the fluctuations which attend the United States currency. Many curious facts in relation to our securities are given in this letter. We quote the following interesting passages:

"On all 'Changes the transactions in your bonds are enormous. Since the reception of President Johnson's Message they rule the market, almost to the exclusion of any other loan offered by the brokers. The Wurtemburg official paper brought out lately a long article, warning against the excessive investment in your bonds, over one millions of guilders having been invested in your securities, to the detriment of other national interests. But, to the disappointment of the Government, your bonds rose on the next day two per cent., and a long article in a liberal paper refuted the arguments of the official press by stating that Wurtemburg had no national banks, by which the commercial and industrial interests of the country were going to be promoted, and that the people could do nothing better than to invest in American bonds, the safest loan offered in our age.

"Besides, it is well and generally known that many German Princes have invested a portion of their fortune in your bonds, while others are among the bears and bulls on the various 'Changes. The blind King of Hanover has such an implicit faith in your securities that he has invested his entire cash in your Five-Twenties. The Crown Prince of Prussia and the Grand Duke of Mecklenburg Strelitz have given standing orders to a banker in Hamburg to buy or sell your bonds for their accounts, according to the price ruling at the Hamburg Stock Exchange. This Duke of Strelitz sides with the bears, and, to the great satisfaction of the Liberal party, has lost enormous sums by his awkward speculations.

"But these bonds are also the most powerful and influential emissaries you could have sent over to the Old Continent to convert the masses to republican principles. They never have heard so much talk about America, your means and resources. Your future and your prospects are discussed everywhere, and in such favorable terms that emigration is the leading topic among the sturdy masses, and the next year will bring you, for every $1,000 of your bonds taken in Germany, at least one of her industrious sons."

How important is it then, that we should seek to deserve this good opinion, by placing our financial operations on this footing of stability by an early redemption of our paper.

The averages of the associated Banks of this city for the week ending Jan. 13, show the following results: Increase in loans, $1,753,184; in specie, $1,074,097; in deposits, $2,284,745; in legal tenders, $1,402,470; in circulation, $574,489. An easy money market is predicted from this state of things, and others of a corresponding character. Money has been lent as low as 4 per cent., and is plentiful at 5 and 6. This rate of discounts on commercial papers has also generally declined.

The stock market has rallied on further inquiry by investers. The prospects of the railways are much discussed. It appears that while in some directions their business has fallen off, in others it continues good. No doubt that much of it which during the war was directed from the Mississippi, and its tributaries to the Eastern lines of railways is now finding its way over those cheap and natural channels, in part owing to the high figures made for railway transportation, and which must eventuate in a reduction of freights if they would retain their customers. It is well known that the cost of transporting cereals over these railways leaves but little for the western producers. The markets of New Orleans will however compensate them in a great degree, particularly during that part of the year when flour and grain are not so much in danger of heating in passing down those rivers! Fortunately for the great west it has such natural outlets, so that if the capitalists of the East shut off the railway routes to the Atlantic, liberal nature offers a full compensation in that by the Mississippi to the same ocean by the gulf. The freight on a barrel of flour from La Crosse, for example, to New York by rails is at least $3 per bbl., by the river to New Orleans $1.75!

Governments are firm and in demand. The confidence of the people in their own securities remains undiminished; when these become par in gold, as they will one of these days, the holders will have been amply rewarded for their faith and patriotism. This result is what we are anxious to see and to bring about, in place of the fluctuating value which our paper currency gives them from week to week.

We hear as yet nothing more from Washington as to the movements of the Secretary of the Treasury or congress in relation to the proposition and mode of bringing about contraction. It is proper here to observe that the firmness with which Mr. McCulloch has maintained his ground against all influences, brought to bear upon him to change it, has attracted the administration and obtained the commendation of the foreign press, and the most eminent foreign political economists, who look with pleased astonishment on the determination of the Government and people to return to a sound currency and discharge their debt at the earliest practicable period. The financial policy of European Governments is generally, that of borrowing or staving off payment; of ours to get out of debt, and to pay up. No other country has ever paid off two national debts as ours has done, and we have now undertaken to discharge a third, the largest we have ever had, but not really disproportioned to our enlarged wealth and resources. In connection with this determination of the country to pay off its debt, it may be here observed, that among all the plans to facilitate this object, we do not see or hear enough of that of strict economy.

We have been so successful in raising large sums of money, and have been so free in our expenditure, that we have fallen into the habit of parting with large sums without much consideration. But one of the most certain and efficient methods of discharging this national debt is to practice national economy. We translate from the French what Fould the celebrated financier and minister said to the National Assembly of France in 1848, and which has been republished there as opportune just now to its own financial condition. What is indispensable to the improvement of national finance was, he observed, "a reduction of the public expenses; a remodelling of the system of indirect imposts; of their administration; of the institutions of credit; of the methods of the treasury; and, as of the highest importance, the diminution of the charges of the military establishment disproportioned to our resources and our necessities." These are precisely the requirements of our own country at this time.

We observe a curious article from "Littell's Spirit of the Age," which contains a proposition to get rid of a large portion of the public debt by a new process. The Government to redeem at once with legal tenders all the circulation of the National Banks. The effect of this would be, according to the *Evening Post*, that when the Government paid and held these national notes, it would or could demand their redemption of the Banks, who would then be obliged to redeem them by the surrender of the Government bonds owned by them and deposited in the Treasury; and that this done, the Government could cancel them and thus save the principal and the annual interest; and the people would be relieved by just so much in taxation. It is very clear that this would not work; for after the new and large emission of legal tenders by the Government, in fact being the only currency left, it would come directly into these very Banks from their debtors and depositors; and instead of their giving up their bonds in payment of their own notes they could meet the demands of the Government by handing it back its own legal tenders, instead of the bonds which they could retain and preserve.

The proposition however commends itself to notice for this circumstance, that the impression begins to be general that the interests of the Banks should not be considered before those of the people, and if their profits are pruned down, and their privileges revised, or modified in some way, so as to lessen the public burdens, the idea will have a general support and end in a practical illustration. We therefore reiterate our own opinion, that the plan of compelling the Banks to deposit greenbacks instead of bonds with the Treasury, as security for their issues, will at once bring about all the contraction in the national currency we desire, save the delay and expense of funding, and make specie payments a comparatively easy process.

The exports from this port for the week ending January 16th, exclusive of specie, were $5,003,593.

The balance in the Sub-Treasury on Tuesday was $77,958,149 01.

It appears from official statements that the public debt on the 31st of December was less by $41,108,035 24, than it was the 31st of August, an average monthly decrease of $10,277,008 81; and the Secretary of the Treasury is confident that if congress will study economy in their legislation he can still further reduce this debt, and gradually return to specie payments.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio 6s, 1870, 93; do., 1881, 94; Illinois coupon bonds, 1879, 96; Indiana War Loan, 92; N. Y. State 7s Bounty Loan, 99¼; do., 6s, 1873@1887, 92; Louisiana 6s, 80; Tennessee 6s, 1868, 86; Chicago and Milwaukee 1st mort., 85; Peninsula 1st mort., 75; Sixth Avenue R. R., 135; Morris and Essex R. R., 100; Long Island R. R., 72½; Mariposa pref., 17¼; Central Coal Co., 45½; Schuylkill Coal, 16; Wyoming Valley, 53; Ashburton Coal, 13½; American Coal, 65; Western Union Tel., 58; Merchants Bank, 110½; Am. Ex. Bank, 111; Bank of New York, 112; Shoe and Leather Bank, 102; Central Bank, 108; 4th National Bank, 97; 9th National Bank, 104; Bank of Commerce, 103; Ocean Bank, 95; Continental Bank, 97½; Park Bank, 147.

Philadelphia.—Sunbury and Erie 7s, 92; Phila. and Reading 6s, 1843–'80, 85; Schuylkill Navigation Boat Loan, 85; West Chester 7s, 96; Girard College R. R., 25; Allegheny Co. coupon 5s, 72½; Buck Mt. Coal, 50; Preston, 20; Clinton, 1⅜; Green Mt., 4; Big Mt., 5½; Fulton, 8; North Carbondale, 2; Mahanoy, 7¾; N. Y. and Middle Coal Fields, 8¼; Shamokin, 9½; St. Nicholas, 8; New Creek, 1⅛; 1st National Bank, 140; 7th National Bank, 95; Commercial Bank, 49½; Western Bank, 80½; Mechanics Bank, 28; Bank of Northern Liberty, 92; Farm. and Mech. Bank, 120; Big Tank Oil, ⅜; Corn Planter, 1⅛; Cherry Run, ¼; Dalzell, 2½; Era, 3¾; Hyde Farm, ⅞; Jersey Well, ⅝; Keystone, ⅝; McElrath, 2⅜; McClintock, 5⅜; Maple Shade, 5⅞; Mingo, 2½; Ocean, 17½; Rock, ¼; Ross, ¼; Sugar Valley, 3¾; Spencer, 1¼; Sugar Creek, 5⅛; St. Nicholas, ½; Wm. Penn., 1⅛. The latest quotations are: City 6s, 87@87½; do., new, 92¼@92⅝; State 5s, 86¼@86¾; do., coupon, 90@91; do., 6s, W. L., 100@100; Phila., Wil. and Balt., 58⅞; Reading, 51⅛@51¼; do., 6s, 1870, 92@93; do., bonds, 85@85½; do., con., 102@107; Camden and Amboy, 126@130; Penn. R. ☞ The Secretary of the Treasury has decided that canal and ferry boats are not liable to an internal revenue tax on gross receipts.

Bridge Trusses.

We have received from C. Shaler Smith, Esq., an interesting and very valuable pamphlet on the subject of the "four leading forms of Bridge trusses," one which has engaged his attention for several years and which he fully comprehends. The pamphlet discusses the merits of the Howe truss, the lattice, the bow string, the tubular and the suspension. Without having any personal interest in the various patented forms of these, he has discussed their general principles, data, strength, strain, materials and economy, in an able manner, and we recommend his essay to railroad companies and contractors, as particularly worthy of their notice and study. It may be obtained of Smith & Latrobe, Baltimore.

American Central Railway.

We are informed that the Hon. John S. Thompson, of Illinois, President of the American Central Railway, who arrived by the "Scotia" from Europe, has succeeded in making a contract for the construction of said road with an eminent French firm, which is backed by a combination of French, English, Dutch and German capitalists; and we understand that the work is to be proceeded with actively at an early day.

New York and Oswego Midland Railroad.

A large meeting of gentlemen connected with this enterprise was held at the Delavan House, in Albany on the 10th inst. The Counties of Oswego, Onondaga, Courtlandt, Otsego, Chenango, Delaware, Ulster, Orange and Sullivan, were represented. One idea is to build a road independent of any road now in use, by the most feasible route from Oswego to Jersey City. Another plan is to connect with the present Rome and Oswego road, and *via* Utica, south to Rondout and the river. The articles of association have been filed in the Secretary of State's office, the necessary ten per cent. on one thousand dollars per mile having been paid in. The following officers were elected: President, Dewitt C. Littlejohn, of Oswego; Vice President, Homer Ramsdell, of Newburg; Treasurer, Walter M. Conkey, of Norwich; Land Agent, Samuel Gordon, of Delhi.

The Mexican Loan.

It is understood that of this patriotic and timely loan in aid of the liberal cause in Mexico, at least three millions have been subscribed, and that there is a good prospect of its being entirely taken up. We have on previous occasions recommended the people at large to subscribe to it, in sums suited to their convenience and ability; for in the present condition of affairs, money is all that is wanted by the Mexican Republican Government to put its military power into a shape which will very soon secure its independence, as well as vindicate the Monroe doctrine, without a war with the French Emperor by the United States.

☞ The revenues of the State of California, during the two years which have just closed have enabled the State to pay off and discharge $731,000 of its debt, and have a surplus of cash on hand of $193,646, making the total excess of receipts over expenditures $924,891. These sums, however, do not include the debt contracted for war purposes. The indebtedness, which is now unprovided for, the Governor recommends to be funded and made part of the State debt.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 1st week in Jan., 1866, were:

	1866.	1865.
Passengers	$8,195 00	$9,929 87
Freight	12.835 00	9,527 59
Mail, express & telegraph	1,100 00	1,086 33
Total	$22,130 00	$20,543 79
Total for the fiscal year commencing Jan. 1.	$22,130 00	$20,543 79

The earnings of the Grand Trunk Railway for the week ending Jan. 6, 1866, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$35,384 00
Express, freight, mails and sundries	7,500 00
Freight and live stock	59,953 00
Total	$100,087 00
Corresponding week, 1865	109,143 00
Decrease	$9,056 00

The earnings of the Michigan Central Railroad for the 1st week in Jan., 1866, were... $59,590 00
Corresponding week of previous year.. 61,509 00

Decrease.. $1,919 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Jan., 1866, were $75,330 00
Corresponding week of 1864 84,884 00

Decrease $9,554 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in January, 1866, were $62,232 00
Corresponding week of previous year.. 79,074 00

Decrease.. $16,842 00

The earnings of the Chicago and Alton Railroad for the 1st week in Jan., 1866.... $50,471 00
Corresponding week of previous year.. 61,830 00

Decrease $11,359 00

The traffic of the Great Western Railway for the week ending Jan. 12, 1866, was as follows:

Passengers	$23,959 03
Freight and live stock	23,142 45
Mails and sundries	4,278 50
Total	$51,379 98
Corresponding week of 1865	47,126 30
Increase	$4,253 76

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Jan. 7, were:

	1866.	1865.
Passengers	$2,878 67	$2,271 59
Freight	6,710 83	7,895 71
Express	130 22	130 22
Mail	296 58	296 58
Total	$10,016 30	$10,594 10

Corn as Fuel.

The last corn crop in Iowa was very large—far above the demand for home use; so that the superabundances of this "staff of life" is being converted to the useful purposes of fuel. It is said that a bushel of corn will produce as much heat as a bushel of coal; and those who have tried the experiment affirm that corn in the ear gives considerably more heat than the same bulk of wood. Ears of corn can be bought at ten cents per bushel, and seventy bushels will measure a cord. Wood, including sawing, costs nine dollars and fifty cents per cord, which is two dollars and fifty cents more than the cost of a cord of corn, besides the fact that the corn produces more heat. There is a mill in Muscatine, Iowa, which has for some time been using this kind of fuel, and it is found to be superior to and cheaper than any other.

Liability where one Company uses the Track of another.—Delivery beyond Route, &c.

It has been a question with the courts whether the company owning the track, or the company allowed to use it, is liable for injuries to passengers on the trains of the latter company, in a case of negligence by the former. In the case of Smith *vs.* The New York and Harlem R. R. Co., (19 N. Y. R. 127) it appeared that one of the engineers of the New York and New Haven Railroad Co., which runs its trains over the track of the Harlem Railroad was fatally injured, while running his train, by being thrown from the track by reason of a defective switch on the defendant's road. His administratrix brought an action against the Harlem Railroad Company to recover damages, under the statute, for the death of the engineer. It appeared upon the trial that the accident occurred through the negligence and unskillfulness of the switchman of the Harlem road, the switch and signal being improperly placed, and also that the switch itself was of an improper and unsafe character (a "short switch"). The Harlem Company contended that the case came within the rule that a servant cannot recover for an injury caused by the negligence of a fellow servant, employed by the same master, in the same general business. But the court held that the case of the plaintiff differed from the cases to which this rule has been applied, in this important fact; the deceased and switchtender were not employed by the same master. The former was the servant of the New Haven Company, and the latter that of the Harlem Company. The switchman could not be considered in any sense the servant of the New Haven Company, as the Harlem Company had agreed with the former, to provide switchtenders, flagmen, &c. The deceased was therefore as much a stranger to the defendant as any passenger in the train run by him. Another question presented was whether the defendant was liable to any one except the New York and New Haven Railroad Company, with which the contract to provide switchtenders, &c., was made. The court held that it was, and very pertinently applied a rule laid down in Thomas *vs.* Winchester. (2 Seld., 397.) In that case the court held that a dealer in drugs, sending poison, labeled as harmless, was liable to a party who purchased from the innocent vendee, for the injury occasioned by its use.

In the case of Sprague *vs.* Trustees of Vermont Central Railroad Company, (29 Vt. R.,) the plaintiff had employed the defendants to transport cattle from Vermont to Boston by their trains. By the custom of defendants, the plaintiff was allowed to go as a passenger, in a saloon car attached to the cattle train, without additional charge, to enable him to look after the cattle. This train in its passage went over the Northern New Hampshire Railroad, that company furnishing the motive power, with their engineer and fireman, but the defendant's conductor continuing with the train through the route. While the train was passing over the Northern New Hampshire Railroad, without any fault of those who had the management of it, but through the sole negligence of the other servants and employees of the Northern New Hampshire Railroad, the saloon car, which carried the plaintiff, was broken in by a collison with another train, going in the same direction, and the plaintiff was seriously injured. It was held that the undertaking of the defendants, in regard to carrying plaintiff, was only that of ordinary passenger carriers, and did not render them responsible for injuries which he might sustain by the misconduct of other parties; that the plaintiff being aware, from the very nature of the transaction, that he would be exposed to perils of this character, must be supposed to undertake, upon his own part, to sustain that hazard; and could not justly be allowed to throw it upon an innocent party, who was known to him at the time of entering into the contract, to have no control over the persons causing the plaintiff's injury.

In a recent case in Massachusetts it was held that a Railroad Company, which receives the cars of another company upon its track, placing them under the control of its agents and servants, and driving them by its locomotive power, assume towards the passengers the common liability of passenger carriers, and that it makes no difference in regard to the liability of the company, to passengers passing over their road, whether they purchase tickets of them or of any other railroad company, or agent authorized to sell such tickets.

CONNECTING ROADS.

It has been decided by the court of Appeals of this State (Hart *vs.* Rensselaer and Saratoga R. R. Co., 4 Seld., 57) that when three separate companies, owning distinct portions of a continuous railroad between two termini, run their cars over the whole road, employing the same agents to sell passenger tickets, and receive baggage to be carried over the entire road, an action may be maintained against one of them for the loss of the luggage of a passenger received at one terminus to be carried over the whole road.

By a statute of this State (Laws of 1847 ch. 270) it is provided that where two or more roads are connected, any company owning either of said roads, which receives freight to be transported to any place on the line of either of said roads connected, shall be liable as common carriers. It has been held that this statute applies as well where one of the connecting roads is beyond the State as where all are within it. (Burtis *vs.* Buffalo and State Line R. R. Co. 24 N. Y. 269.)

DELIVERY BEYOND ROUTE.

Where goods are delivered to a carrier marked for a particular destination, without any directions as to their transportation and delivery, save such as may be inferred from the marks themselves, the carrier is only bound to transport and deliver them according to the established usage of the business in which he is engaged. Thus in a case where the New York Central Railroad Company received at Suspension Bridge several barrels of butter from the Great Western Railway Company, marked "J. A. B., 17 Water street, N. Y.," and transported them safely over its road to Albany, and there delivered them to the Hudson River Railroad Company, according to usage, it was held that the New York Central Company could not be held liable for their loss. (28 Barb.,

485.) Persons who are engaged as common carriers between two places, do not act as carriers in forwarding beyond their route goods carried by them, where they forward them in pursuance of special instructions to forward them further, and for which they receive no compensation. The exercise of ordinary care and diligence in executing the instructions, is all they are bound to. (Ackley *vs.* Kellogg, 8 Cow., 223.) Of course a carrier may contract to deliver beyond his route, and this may be said in respect of passengers as well as of property. Thus in the case of Quimby *vs.* Cornelius Vanderbilt, (17 N. Y. R., 306;) the agent of "Vanderbilt's Line between New York and San Francisco," sold to the plaintiff at New York for a gross sum, three tickets which severally imported that he was entitled to be carried to and across the isthmus, and thence upon a particular vessel on her next voyage to San Francisco. It was held by the Court that these facts were sufficient to authorize the jury to find that the defendant contracted as principal for the prompt conveyance of the plaintiff across the isthmus, and to charge him with damages for detention.

Though an agreement to forward goods marked for a particular destination, would be discharged by shipping them by the usual or most direct conveyance, to the place designated, yet it is otherwise on an agreement to forward them to the place of their destination, the charge for the freight for the whole distance being fixed and specified in the agreement. In such case the parties making it are liable as common carriers for the safe carriage and final delivery of the goods at the place of their final destination, although it may be at a point beyond the usual terminus of the carrier's route. (Krender *vs.* Woolcott, 1 Hilton, 223.)

It has been held in this State that the agreement to carry and deliver beyond the route may be implied from the address on the package. In Foy *vs.* Troy and Boston Railroad Company. (24 Barb., 382.,) it was held that where a railroad company receives for transportation property addressed to a person at a point beyond the terminus of its road, they must be understood in the absence of any proof to the contrary, to have agreed to deliver the property in the same order and condition in which it was received to the consignee. But the doctrine of this case is contrary to that of Wright *vs.* Boughton, 22 Barb., 561, and cannot well be reconciled with the principle established by the same Court in a later case, Hempstead *vs.* New York Central Railroad Company, 28 Barb., 485, and above referred to. In the case of Dillon *vs.* The New York and Erie Railroad Company, (1 Hilton, 231,) the railroad company received goods for transportation directed to a point beyond the terminus of its route, and known to be so by the shipper. At the time of receiving the goods, the agent of the company told the shipper that it would be unnecessary for him to have any one at the terminus to receive the goods, but that they would be shipped right through to the place of their ultimate destination. It did not appear that the company was to receive freight for the entire distance. It was held by the Court that the company was not liable as common carriers for the safe carriage and delivery of the goods at their final destination. The company was liable, as common carriers, only to the terminus of its own road, and thereafter, its liability was that of a forwarder.

DELIVERY TO SECOND CARRIER AND HIS LIABILITY.

As we have already seen it has been decided, (28 Barb., 485,) that in the absence of a special contract, a delivery by the first carrier to a second carrier, releases the former from liability. The case of Briggs *vs.* The New York Central Railroad Company, (28 Barb., 515,) is also in point. In that case, the defendant undertook to carry goods from Rochester to Rome in this State, and there deliver the same to the Rome and Watertown Railroad Company, to be conveyed to S., after which delivery to the latter company the defendants were not to be liable for them.

There was a delay of twelve days in so delivering the goods; and on the day after they were so delivered, but before the same were delivered at S. by the latter company, the plaintiff commenced his action. It was held that the delivery to the Rome and Watertown Railroad Company was equivalent to a delivery to the plaintiffs, and that such delivery having been made before suit brought, no action existed, except for the delay on the part of the defendants.

It may therefore be laid down as a well settled rule, in this State at least, that where goods are delivered to a carrier for transportation beyond the terminus of his line, and they are there delivered to another carrier to be forwarded, the latter is liable for loss or damage to the goods, upon proof that such loss or damage occurred while the goods were in the latter's custody. (6 Hill, 157; 1 E. D. Smith, 234.) And it would seem to make no difference that he received freight as agent for the other lines, in addition to his own charges for transportation. (Hunt *vs.* New York and Erie Railroad Company, 1 Hilton, 228.)

It follows therefore, that an action can be maintained by the owner of goods against a carrier in whose custody they are injured, although there is no privity of contract between the owner and the carrier, and notwithstanding the contract was, in fact, made between the carrier and another carrier, who undertook the carriage of the goods for the whole distance, and received freight therefor. (Wing *vs.* New York and Erie Railroad Company, 1 Hilton, 235. See also Green *vs.* Clark, 13 Barb., 57; 12 N. Y., 343.)

Of course, where a carrier receives goods upon an engagement to deliver them to another carrier for further transportation he remains liable as a carrier, so long as he retains the custody of the goods as such. (20 N. Y. R., 259.) And to exhonerate him from liability, he must in some way clearly indicate that he renounces the relation of carrier—for example, by depositing them in warehouse. Delivering them on board a float used exclusively for goods in transportation by the carrier is not such an act. The fact that he notifies the second carrier to take the goods, and such second carrier neglects unreasonably to do so, and meantime the goods are destroyed by fire, without fault of the first carrier does not excuse him. (Goold *vs.* Chapin, 22 N. Y. R., 259.)

These rules of law have a very pertinent application to express companies and to forwarders, and we shall endeavor in some future articles to indicate the rules of law governing such persons.

The Pacific Railroad.

The report of Lieut. Col. J. H. Simpson, U. S. Engineers, addressed to the Secretary of the Interior, gives interesting information concerning the condition and prospects of this great highway to the Pacific. The following six companies have accepted the provisions of the laws of Congress, and organized to build the road and branches:

The Union Pacific—Authorized to build the road from the one hundredth meridian to the western boundary of Nevada Territory. A subsequent section allows it to build a line from the western boundary of Iowa to the one hundredth meridian.

The Central Pacific—Authorized to build the road from San Francisco, or navigable waters of the Sacramento, to the western boundary of Nevada, connecting at that point with the Union Pacific. In case either of these two roads reaches said boundary before the other, it may continue its line until they meet.

The Union Pacific, Eastern Division—Authorised to build a line from the mouth of the Kansas river, on the south side thereof, to the one hundredth meridian, where it is to meet the Union Pacific Railroad; and in case the latter is not proceeding in good faith to build its road through the territories, when the Union Pacific Railroad, Eastern Division, shall have reached the one hundredth meridian, then the last named company may make its road westward until it meets and connects with the Central Pacific Railroad: "Provided, that no bonds shall be issued or land certified by the United States to any person or company for the construction of any part of the main trunk line of said railroad, west of the one hundredth meridian of longitude, and east of the Rocky Mountains, until said road shall be completed from or near Omaha, on the Missouri River, to the said one hundredth meridian of longitude." The point on the one hundredth meridian referred to is to be fixed by the President of the United States between the north margin of the valley of the Platte River, and the south margin of the valley of the Republican Fork, these limits being about thirty miles apart. The one hundredth meridian is about two hundred and fifty miles west from Omaha, and three hundred and eighty-one miles from the mouth of Kansas River. The point where the roads must unite will probably be decided on next spring or summer.

The Hannibal and St. Joseph Railroad Company of Missouri—Authorized to extend its road, by way of Atchison, to connect with the Union Pacific Railroad, Eastern Division, or from St. Joseph, to connect with the Union Pacific Railroad; said connection must be made east of the one hundredth meridian, and no lands or bonds are to be paid this company for more than one hundred miles of road.

The Sioux City and Pacific Railroad—Authorized to build a road from Sioux City to connect with the Union Pacific Railroad. If necessary it may make this connection west of the one hundredth meridian, but in that case bonds or lands are not to be given them to a greater extent than if it had connected at the one hundredth meridian.

The Burlington and Missouri River Railroad Company—Authorized to extend its road from the point where it strikes the Missouri River to connect with the Union Pacific Railroad at the one hundredth meridian, or some point east of it. Lands, but no bonds, are to be given to aid this company.

With the exception of the last mentioned road, the rouds and branches named are to be assisted by Government bonds payable thirty years after date, bearing six per cent. interest, payable in legal currency to the United States semi-annually. In default of payment of interest on bonds by any road, the Secretary of the Treasury is to take possession of it for the benefit of the United States. These bonds are to be issued to the extent of $16,000 per mile constructed, except one

hundred and fifty miles to the Rocky Mountains, and one hundred and fifty miles in the Sierra Nevada, for which $48,000 per mile is to be granted. Between these mountains sections of one hundred and fifty miles each, bonds to the extent of $32,000 per mile are to be granted, provided that no more than fifty thousand of said bonds, of $1,000 each, shall be issued under this act to aid in constructing the main line of said road and telegraph.

In addition to the bonds thus loaned, the companies are to receive public lands to the extent of ten alternate sections on each side of the road and within the limits of twenty miles from its line, provided said lands have not already been disposed of.

These bonds and lands are to be issued by Government at the completion of each twenty or more miles of first class road, fully equipped as such, for the service contemplated by the act, of a continuous line from the Missouri River to the Pacific Ocean. The report recites the progress made on the different roads—the results being briefly as follows:

Union Pacific—Grading on first one hundred miles nearly completed; on second one hundred miles commenced; expected sixty miles of tract laid by end of January, 1866; one hundred miles by July; and two hundred miles by July, 1867; possibly will have reached one hundredth meridian by that time; expenditures already amount to $3,500,000. Since Colonel Simpson's report was written, this company notified the department that forty miles of road were completed and ready for acceptance by the Government.

Union Pacific, Eastern Division—Sixty miles completed up to November 11. In their report on the construction of the road the three commissioners agreed as to the facts, but differed as to the requirements of the law; Colonel Simpson maintaining that the law required a road suited to the great through business contemplated. The other commissioners claiming that it was good enough for present purposes. The report, with a pledge from the President of the road to supply its deficiencies, was submitted to the President by the Secrhtary of the Interior, with a recommendation that the road be accepted on condition that the company within a reasonable period make the improvements required. This recommendation was approved by the President, December 20, 1865.

Central Pacific—The work of grading commenced in February, 1863. The first shipment of iron reached Sacramento, October 8, 1862, and the track laying was immediately commenced, and steadily continued, with a few delays caused by the non-receipt of iron and ties within the contracted time, up to June 6, 1864, when the road was completed to Newcastle, a distance of thirty-one miles. The grading between Newcastle and Colfax was very difficult and expensive, increasing as the line was pushed up the mountain slope. The cuttings have been deeper, the embankments higher, and more rock work encountered, as the line has gone eastward. One cut is sixty-three feet deep and eight hundred feet long, and several others are from forty to fifty deep and from eight hundred to twelve hundred feet in length, all of which were through rock or hard cement, requiring to be blasted. Several expensive trestle bridges have been constructed across deep ravines, some as high as one hundred feet in the centre. Some of the embankments are over seventy feet high. For several months the number of laborers procured was comparatively small, but recently they have increased more rapidly, until now five thousand and eighty men are employed, with over six hundred teams, and the prospect is that the number of laborers will be increased to six thousand during this season, and during the next year not less than fifteen thousand. With this large force the company will be able to push on the work so as not only to complete it far within the time required by the acts of Congress, but so as to meet the public impatience.

Atchison Branch of Pacific Railroad—Rapidly in progress on the first section of twenty miles. The masonry and bridges are all completed, and the ties, of the best quality, all out, and the track now being laid. The contractor agrees to have the first twenty miles completed on the first day of January, 1866. The iron is on hand.

Sioux City and Pacific Railroad—No evidence in the department of work having commenced on the road.

Northern Pacific Railroad—A map showing general route has been filed, but there is nothing in the department to show that the company have done any work on their line yet.

Air Line Railroad from Washington to New York.

The following is a synopsis of Mr. Stevens' bill, introduced into the House of Representatives on the 8th inst., and referred to a select Committee of seven:

Section 1. Names as corporators Alexander T Stewart, Henry G. Stebbins, Marshall O. Roberts, Alexander S. Diven, C. G. Miller, R. B. Minturn, D. Hoadly, Charles A. Secor, Dean Richmond, H. B. Claffin, and William B. Duncan of the State of New York; Judson Kilpatrick and Marcus L. Ward of the State of New Jersey; John McManus, Isaac Eckert, C. B. McKnight, William M. Heister, G. Dawson Coleman, Simon Cameron, Henry C. Carey, C. Case, Samuel Shade, Henry Musselman, S. V. Merrick, O. J. Dickey, J. H. Orne, Joseph Patterson, Thomas E. Franklin, Joseph Black, Charles McAllister, G. W. Snyder, C. D. Forney, Charles Parrish, Asa Packer, J. G. Fell, M. McMichael, John W. Forney, Joseph H. Scranton, John S. Richards, Thomas Beaver, James D. Cameron, J. Edgar Thomson, Samuel Small, Samuel Mifflin, Phillip Gassles, Ed. Riley, and T. A. Scott of the State of Pennsylvania; George W. Riggs and H. D. Cooke of the District of Columbia; B. F. Newcomer and George Small of the State of Maryland, together with such persons as may become associated with them for that purpose, together with their successors, by the name and title of "The National Railway Company."

Section 2. The Corporation may construct a railway on a route approved by the Secretary of the Interior from Washington to the Hudson river opposite New York city, and cross the river by ferry into New York, locating its pier for the convience of the Post Office.

Section 3. Capital $10,000,000, in 100,000 shares of $100 each. Subscription books to be opened in Washington, Baltimore, Philadelphia, New York, Easton, Harrisburg, Lancaster, Reading, York and Columbia; ten per cent. to be paid on subscribing. Stockholders' meeting to be called and thirteen directors elected when $2,000,000 are subscribed; two directors to be appointed by the President of the United States; the duties of the original corporators thereupon to cease.

Section 4 prescribes the powers of the directors in the usual form.

Section 5. The company may connect with other roads by consolidation or transfer of stock, but no such arrangement shall prevent the construction of a wholly new line of road from Washington to New York.

Section 6. Gauge of the road shall be uniform, rails of American iron, construction and rolling stock first-class, running time not to exceed seven hours for first-class passenger and mail trains; fare not over three cents a mile, and freight six cents a ton—for coal, lumber and iron ore, not to exceed two cents.

Section 7. Susquehanna and Delaware to be crossed above tidewater; no grades on the road over 30 feet; no curve less than 908 feet radius.

Section 8. Company may enter on real estate, and in case of disagreement with owner as to price, proceedings shall be had to determine the same by commissioners appointed by a Justice of the United States Supreme Court.

Section 9. Injury to the property of the company shall be a misdemeanor, punishable by fine and imprisonment.

Section 10. Other roads may connect, reciprocating in traffic, selling through tickets, &c., as usual between connecting lines of railway.

Section 11. Proceedings against the company in State Courts may be transferred by petition to a Circuit Court of the United States, the original attachment surviving.

Section 12. This railway to be a national public highway and post road.

Section 12. Company to make an annual report to the Secretary of the Interior.

Section 14. Road to be begun at once, and finished within three years.

☞ A suit has been carried through the Courts of this State, having for its object, the collection of State, county, city and town taxes from the stockholders of National Banks. Our State Courts have decided such stock or shares to be taxable as personal property. On the 31st of this month the case is to be argued before the United States Supreme Court at Washington. The decision involves over 400 millions of personal to be taxed or to be exempt. This suit concerns all the National Banks in the country, and the Boston, Philadelphia and Western Banks have not employed counsel to take an interest in the argument.

Central Pacific Railroad STATE AID BONDS.

INTEREST AT THE RATE OF

Seven per Cent. per Annum in Gold,

PAYABLE SEMI-ANNUALLY,

Guaranteed and Paid by the State of California.

The Bonds are secured by a mortgage on 160 miles of road from Sacramento to the California State Line, forming part of the great Pacific Railroad Route adopted and aided by the United States Government. They are further secured by a Sinking Fund of $50,000 per annum in Gold received from the earnings of the Road, and pledged for their redemption. They are a first class Security in every respect, and a limited amount will be offered upon terms which render them a very attractive and desirable investment. For further particulars, inquire at our Office, No. 5 Nassau Street.

1m50 **FISK & HATCH, Bankers.**

OFFICE OF THE ERIE RAILWAY COMPANY,
NEW YORK, January 17, 1866.

DIVIDEND.—The Directors of this company have declared a semi-annual Dividend from the earnings of the road for six months, ending 31st December, ultimo, of THREE AND ONE HALF PER CENT. on the PREFERRED STOCK.

Also a Dividend of FOUR PER CENT. on the Common Capital Stock.

Both payable (less government tax), on Monday, the 5th day of February, at the Treasurer's office, Erie Place, to the registered holders of stock at the closing of the books.

The transfer books of both classes of stock will be closed on Saturday, the 20th instant, and be reopened on Wednesday the 7th of February.

HORATIO N. OTIS, Secretary.

COUPONS OF THE CENTRAL PACIFIC RAILroad Company of California, Due January 1st, 1866, will be paid on and after that date, less government tax, by EUGENE KELLY & CO.,
26 Wall Street.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, Dec. 13, 1865.

AT A MEETING OF THE BOARD OF DIRECTors of this Company, held in this city, it was

Resolved, That a Dividend of FIVE PER CENT. in cash, free of government tax, be paid on the 1st day of February next, to the holders of the full paid shares registered on the twentieth day of January, and that the transfer books be closed on the said twentieth day of January and opened on the third day of February.

American Railroad Journal.

New York, Saturday, January 27, 1866.

The Case of the Atlantic & Great Western Railway Company.

On the 19th inst., in Philadelphia, the legal argument appertaining to the important railroad controversy between the Pennsylvania and the Philadelphia and Erie Railroad Companies, on the one side, and the Atlantic and Great Western Railway Company on the other, was concluded in the Supreme Court of Pennsylvania. The question was on the application for an injunction by the two first-named companies to restrain the Atlantic and Great Western Railway Company from entering into an agreement with certain other companies to lease their roads. The legal points presented in favor of the injunction were as follows:

The Atlantic and Great Western Railway now runs from Salamanca, on the Erie Railway across the northwest angle of Pennsylvania, into Ohio, and thence to Cincinnati and St. Louis. They have leased the Catawissa, a part of the Reading and East Pennsylvania roads, and the Morris and Essex road, from Milton, in Northumberland Co., to New York. This leaves a gap of 225 miles to fill in from Milton to Franklin, Penn. This gap they endeavor to fill by buying up two local charters, viz: The Western Central, from Franklin to Bellefonte, and the Lewisburg, Centre and Spruce Creek, from Bellefonte to Milton. An act passed in 1861 permits roads to make leases of, and contracts with each other, "provided the same are connected with each other directly or through intervening roads." To sustain these leases the Atlantic and Great Western Co., insist, since the Philadelphia and Erie road intersects the Atlantic and Great Western at Corry, and the Catawissa at Milton, that the Philadelphia and Erie is a connecting road in the sense of the act of 1861. This the complainants deny. First, because the Philadelphia and Erie is 4 ft. 8½ in. gauge, while the Atlantic and Great Western is 6 ft. Secondly, because the face of the contract shows the connecting roads intended were those not yet built, and not the Philadelphia and Erie road.

Against the injunction, the principal points of the pleadings were as follows:

First. The right of the Catawissa Railroad Co. to make the lease of November 1st, 1865, with the consolidated Atlantic and Great Western Railway Co., and the Western Central Railroad Co.

Second. In case these parties have not this right, whether the Philadelphia and Erie Railroad Co. and the Pennsylvania Railroad Co., by the bill filed by them, have any right to contest this point; or whether Andrew Scott, an original stockholder in the Atlantic and Great Western Railway, the company originally incorporated by the State of Pennsylvania, in the bill filed by him against the Atlantic and Great Western Railway Co. and others, has any right as a stockholder, to contest the same points. A point also presented in the discussion of the case was, whether the Atlantic and Great Western was duly consolidated under the Pennsylvania act of March 24th, 1865, authorizing the consolidation of railroad companies organized under the laws of Pennsylvania, with railroad companies organizing under the laws of other States, where such companies form and operte a continuous line of railroad with each other, or by means of any intervening railroad. The Philadelphia and Reading Railroad Co. and the East Pennsylvania Railroad Co. were allowed to intervene as parties to the proceedings by virtue of a contract alleged to have been made by them for the formation of a continuous line of railroad, of the same gauge as the gauge of their own roads, with the Atlantic and Great Western and the other companies defendants in the equity suit. By the contract with the Reading Railroad Co. it will be seen that a continuous line of railroad with the narrow gauge, is to be formed from the cities of Cincinnati, Dayton and Cleveland, in Ohio, to the cities of Philadelphia and New York, traversing the central part of the State of Pennsylvania.

The decision of the Court will materially affect the relations of the carrying trade between the teeming granaries of the West and the manufacturers and merchants of the seaboard. Millions of dollars of capital and hundreds of miles of road are controlled by each party, the value of which, on either side, is asserted to be largely dependent upon the decision.

More Important Railroad Consolidation.

A NEW AND GREAT THROUGH RAILROAD ROUTE TO THE MISSISSIPPI RIVER.

The plain inaugurated by Sir Morton Peto and his friends connected with the Atlantic and Great Western Railway Company to open in connection with the Reading, Catawissa and Morris and Essex Railroads an air line to the west, from this city and Philadelphia, has waked up the parties largely interested in the Pennsylvania Railroad, to protect its interest in securing a direct connection with the Mississippi river at Warsaw, and Keokuk, and we are informed that parties largely interested in the stock have in connection with the stockholders of the "Pan Handle" Steubenville and Indiana, and Columbus and Indianapolis Railroads formed a company to build a road from *Union*, on the last company's road direct to Logansport, Indiana, a distance of 91 miles, and there to connect with the Toledo, Logansport and Burlington, and the Toledo, Peoria and Warsaw Railroads to Warsaw and Keokuk on the Mississippi River. The road in Indiana is already under contract, and is to be completed and in running order next January; and it is probable it will then be consolidated with the Toledo, Logansport and Burlington Road, forming one company in Indiana, a distance of 152 miles.

The parties interested in the enterprise have already secured the control of the road west of Logansport by purchase of its bonds, and stock, and the following gentlemen were elected directors at the annual meeting a few weeks since, viz: R. D. Barclay, J. H. Bradley and S. M. Waln of Philadelphia; W. D. Thompson and J. F. Seeley, New York; Gov. Wm. Dennison of Washington; and Benjamin E. Smith of Columbus, Ohio.

These gentlemen are well known railroad capitalists and are all more or less largely interested in the connecting lines from Indiana to New York,

and their names are a sure guarantee that the work will be vigorously pushed towards completion.

The Mississippi and Wabash Railroad Company owning the line from Warsaw to the Illinois River have recently in view of opening the "Great Midland Route," merged and consolidated with the Toledo, Peoria and Warsaw Railway Company, which connected at the state line and terminated at Peoria under the name of the Toledo, Peoria and Warsaw Railway Company, making a continuous line across the state, a distance of 230 miles, and crossing the Chicago, Burlington and Quincy Railroad at two important points, and also the Illinois Central Railroad on the main line, and branch at El Paso and Gilman, and the Chicago and Alton Railroad at Chenoa, fifty miles from Peoria.

The consolidated company have already put under contract the "Gap" between Peoria and Carthage, on the Mississippi and Wabash line, and under the patronage and influence of the roads east of Illinois, (which is to form and complete the "Great Midland Route,") it is expected that the road will be completed as soon as the Indiana Company make the connection at Logansport. The following gentlemen: Charles L. Frost, Zeno Secor, James W. Smith, of New York; Hon. John B. Brown, Portland, Maine; Henry Hill, E. P. Buell, Warsaw, Ills.; H. B. Ten Eyck, Keokuk, Iowa; John W. Chenry, and W. H. Cruger, of Peoria, Ills.; all of whom are well known in New York and the West, were recently elected the managers of the Illinois consolidated road; and being men of wealth, and of great practical business experience, and having very large personal interest in the property, the public may be assured that they will not be behind hand in their part of the work, and that the "Great Midland Route" will be opened for through business in fifteen months from this time. The distance from New York to Warsaw and Keokuk by this route is as follows, viz:

New York to Pittsburg	431 miles.
Pittsburg to Columbus, *via* Pan Handle.	191 "
Columbus to Union	86 "
Union to Logansport	91 "
Logansport to Warsaw	291 "
	1,090 miles.
By the Route *via* Chicago to New York the distance is	1,214 "
Making	124 "

—miles difference in favor of the direct route from New York to the Mississippi River.

In order to inaugurate the New Line at once, we learn that the Pennslyvania Railroad Company, and the other companies, interested in this project, will on the 1st proximo put on a line of through cars, each company furnishing its quota. Until the completion of the road from Union to Logansport, the route will be *via* the Chicago and Great Eastern from Richmond to Logansport. Agents of the Pennsylvania Company in this city will receive the freight destined for all points on this line. As the cars run through without change, greater dispatch will be given to freight than by any other route.

The building of the Pan Handle Railroad will thus prove of an immense advantage to the Pennsylvania Road and will more than compensate them for any loss of business arising from the arrangements between the Atlantic and Great Western and Reading Railroad Companies. *

The Western Union R. R. Co.

At Freeport, Ill., on the 17th of January, 1866, the Western Union Railroad Company, (organized under title acquired by purchase at foreclosure sales of the Racine and Mississippi Railroad, in the States of Wisconsin and Illinois,) was consolidated with the Northern Illinois Railroad Company, and the new consolidated corporation was organized with the name of the Western Union Railroad Company, covering the whole line of railroad from Racine, in the State of Wisconsin, to Savanna in Illinois; and from Savanna to Rock Island, and Savanna to Galena.

In terms of the articles of consolidation, upon which the Western Union Railroad Company was organized, the Directors of the company are as follows, viz: Richard Irvin, S. P. Nash, R. G. Rolston, Jacob S. Wetmore, New York; Edward P. Barton, Freeport, Ill.; William Shannon, Elijah Northey, Shannon, Ill.; Geo. A. Thomson, Henry T. Fuller, S. C. Tuckerman, Darwin Andrews, Racine, Wis.; D. W. Dame, Lanark, Ill.; H. A. Mills, Mt. Carroll, Ill.

At a subsequent meeting of the Directors, the following officers were elected, viz:

President.—Geo. A. Thomson.

Vice President.—Henry T. Fuller.

Secretary and Treasurer.—Wm. V. Baker.

The following officers were appointed by the President: Superintendent of Eastern Division, R. C. Tate, Esq., Office, Racine, Wis.; Superintendent Western Division, R. A. Knapp, Esq., Office, Savanna, Ill.; Engineer, Nathaniel Baillie, Esq., Racine, Wis.

Pittsburg and Connellsville Railroad.

We have received a copy of the Thirteenth Annual Report of this company. From this we learn that the earnings of the road during the fiscal year ending October 31, 1865, were:

From passengers		$181,453 34
" freight		203,087 19
" mails		3,650 00
" miscellaneous sources		6,172 83
		$394,363 36

The expenses were:

Conducting transportation	$65,815 07	
Motive power	82,065 31	
Maintenance of cars	17,364 22	
" road	86,981 77	
General expenses	11,775 99	
		264,002 36
Net earnings, 33.07 per cent.		$130,361 00

The gross earnings of the road for the fiscal year ending October 31, 1864, were $315,922 87; the expenses, $200,572 16; and the net earnings, $115,350 71—leaving an increase in earnings of $78,440 49; in expenses of, $63,430 20; and in net earnings of, $15,010 29.

Of the gross revenue, the main division of the road between Port Perry and Connellsville earned $256,771 38—an increase of $50,827 38, or 24.68 per cent. over the previous year; the Turtle Creek Division, $113,412 14—an increase of $24,720 81, or 21.40 per cent.; and the Fayette County road, $24,179 17—and increase of $3,343,17, or 14 per cent.

The earnings per mile run by trains this year were $1 44.62, against $1 18 last year—being 26.22 in favor of this year.

The cost of conducting transportation has been $65,815 07, or 24 cents per mile run by trains, which is $15,691 71, or 9.4 cents per mile run more than last year. The maintenance of road bed and bridges cost $86,981 77, or $1,208 per mile for seventy-two miles, the previous year it was $859 per mile. The cost of these repairs per mile run by trains was nearly 32 cents, being 7⅔ cents per mile more than during 1864. This increase is due to the large amount of new iron, ties, &c., placed in the track during the year. The motive power, including repairs of engines' fuel, oil, stores, wages, &c., has cost $82,065 31, or 30 cents per mile run, being 2.18 cents per mile more than the previous year. The maintenance of cars has cost $17,364 22, or 6.36 cents per mile run by locomotives, being 1.06 per cent. less than last year. The general expenses of administration have been $11,775 99, or 4.32 cents per mile run, which is $1,850 50, or 98 cents per mile run less than last year. The total cost of maintenance, working and administration this year has been, $264,002 36, or 97 cents per mile run by trains, against 76.64 cents per mile in 1864.

The work done in passengers and freights is, however, 10.35 per cent. greater than last year, which, with the renewal of so much of the track, will fully account for the increase.

The ratio of current expenses to gross receipts this year is 66.93, against 66.48 last year, leaving 33.07 per cent. net gain, against 33.57 per cent. last year, which is less favorable only by one-half of one per cent.

The number of miles run by locomotives has been 272,688, carrying 366,833 passengers an average distance of 15.5 miles—equivalent to 78,921 over the whole 72 miles of the road, or 5,682,294 one mile. Of these, 203,296 traveled eastward, and 163,537 westward.

The freight transportation was 220,214 tons of 2,000 lbs.; 27,527 tons passing eastward toward Connellsville, and 196,687 westward, toward Pittsburg, the westward bound freight being thus, 7.1 to 1.

The work of the previous year was 256,176 miles by locomotives, carrying 395,843 passengers an average distance of 11.6 miles, equal to 64,097 over the whole road, or 4,615,024 one mile. The freight was 199,552 tons, an average distance of 28½ miles, equivalent to 79,346 tons over the whole road, or 5,712,879 tons one mile. The proportion of westward to eastward bound freight in that year was 10.3 to 1.

As before shown, the net income for the year just passed was $130,361. This has been expended as follows:

For construction and equipment	$60,011 74
Coupons Turtle Creek Bonds	26,755 74
Right of way	1,635 87
Real estate	6,041 44
Interest on stock	67 21
Engineering	913 35
U. S., State and cities taxes	14,432 52
Interest on the floating debt	2,805 11
Profit and loss	1,194 76
Insurance	500 00
Baltimore City loan	2,823 75
Balance in hands of Treasurer	13,680 10
Total, as above	$130,361 00

The company have 12 locomotives; 11 passenger, 1 four-wheeled and 3 eight-wheeled baggage cars, 24 eight-wheeled house, 46 eight-wheeled gondola and 10 four-wheeled dumping cars.

The receipts from all sources during the year, including $5,256 61 from the previous year, were $418,980 46; and the expenditures, $412,427 80—leaving a balance on hand October 31, 1865, of $6,452 16.

The floating debt of the company at the close of the previous fiscal year was $69,233 58. In the present report it is stated at $64,207 43. Adding certain accounts payable not represented on the company's books, and deducting amounts in the hands of Treasurer and agents, together with the cash value of bonds and other assets pledged for part of the above, leaves $39,672 38 as the true amount of the floating debt of the company. The company have also $52,900 in bonds of the Borough of M'Keesport.

Nothing has been paid upon the interest debt due the City of Baltimore, except the 1st instalment of sinking fund, which, with its accumulated interest, now amounts to about $20,000. The balance of the floating debt can easily be met during the year from the current business of the road.

The Sand Patch Tunnel has been placed once more under contract, and the company hope and believe that they will be able to let the remainder of the line, and that there will be no cessation until its entire completion to Cumberland.

CONDENSED BALANCE SHEET.

Payments in capital stock		$1,774,773 43

President.—WM. ODEN HUGHART.

Directors.—Wm. Oden Hughart, G. L. B. Fetterman, John Fleming, William Phillips, William Baldwin, Joseph Pennock, Cyrus Meyers, Benjamin Deford, John A. Thompson, Johns Hopkins, Joseph R. Marston and W. W. Taylor.

Secretary and Treasurer.—JNO. H. PAGE.

Superintendent.—W. B. STOUT.

Chief Engineer.—BENJ. H. LATROBE.

☞ In the case of the second mortgage bondholders of the New London Northern Railroad against the railroad corporation, a question of demurrer raised by the railroad has been decided in favor of the bondholders by Judge Nelson of the United States Circuit Court at New York, and the case will be tried.

Montgomery and Erie R. R.

The Montgomery and Erie railroad company was organized on the 2d inst., under the General Railroad Law of this State. The following directors and officers were chosen:

Directors.—Joseph M. Wilkin, John M. Quackenbos, Daniel W. Warring, Henry Bergen, George Senior, Walter J. Mead, Henry V. McNeal, Ebenezer Van Alst, Christopher J. Mould, William E. Luquer of Montgomery, George Gouge, Bartow Wright, of Hamptonburgh, R. M. Vail of Goshen.

Officers.—Joseph M. Wilkin, President and Superintendent; John M. Quackenbos, Vice-President; Chas. J. Everett, (of Goshen,) Treasurer; H. B. Bull, (of Montgomery,) Secretary.

This company has for its object the construction and operation of a railroad to connect the village of Montgomery, Orange County, New York, with the Erie Railway, at Goshen.

The road will be almost an air line between the two points, ten and a half miles in length, of remarkably easy grades, and will be built of the broad gauge to conform to the Erie. The stock of the company is nearly all subscribed, and the road will be put under contract in a short time the engineers now being engaged in definitely locating the line.

Abstract of returns made to the State Engineer for the fiscal year ending Sept. 30, 1865.

☞ The Atlantic and Great Western Railway Company have organised a Surgical Department and appointed Dr. J. T. Ray as Surgeon-in-Chief. A surgical corps along the whole line from Salamanca to Dayton is to be immediately organized.

European and North American Railroad.

This company has applied to the Legislature of Maine for an extension of the time in which to build and complete its line of road—further aid from the State in the construction of said line—additional power to enable said company to hold, exercise and enjoy its chartered rights in other States and provinces, with authority to issue mortgage bonds with the right to hold any connecting line of railway in New Brunswick as a part of its own line; to mortgage, lease or otherwise dispose of the same; to alter, amend and improve the location of its line, with authority to foreclose or lease any other line of railroad out of this State, or to lease or sell its own line to any other railroad company within or without this State, with the right on the part of any other railroad to enter into contracts therefor with this company.

Newark and New York Railroad.

The bill to charter the Newark and New York railroad company, now before the Legislature of New Jersey, names as corporators Cornelius Walsh, A. Hardenburg, John McGregor, Theo. P. Howell, Edgar B. Wakeman, John Hall, Theo. Runyon, B. C. Miller, G. Van Horn, Robert L. Smith, Jas. W. Durand, Danl. Demarest, Geo. D. Woodruff, and such other persons as may become associated with them. The capital stock is to be $500,000, with liberty to increase it to $1,000,000, divided into shares of $25 each. No subscription is to be allowed from any railroad corporation. There are to be nine directors, who are all required to be residents of the State. The company is authorized to construct a railroad from some point in the city of Newark, through the counties of Essex and Hudson, to some point at or near the Hudson River, south of South street, in Jersey City, with as many sets of tracks and rails as they may deem necessary. The bill contains the usual provisions for taking lands and carrying out the objects of the act. They are also empowered to connect and contract with any other railroad corporation, but must not construct the road in Hudson County north of the plank road, nor within 1,000 feet thereof in that county; nor shall they sell, lease, or in any manner dispose of their charter, or any of their franchises, to any other corporation or person, nor allow any other company to directly or indirectly acquire any control over the same. The company is also required to construct bridges over or under the railroad where any public road crosses the same, and if the road crosses the New Jersey Railroad track, it shall not do so on the same level, but shall pass over or under upon such grade as will permit the cars of either company to pass without obstruction. In crossing the Passaic River they shall provide a pivot draw, no less than the widest opening of any bridge now over the river or bay, and at right angles to the channel. They are limited to 15 cents for each passenger carried over the road, and $2 per ton for merchandise. The work must be commenced within three years, and completed within five years from July next.

☞ The amount of salt inspected on the Onondaga Salt Reservation, in this State, during the year 1865, was 6,385,930 bushels, of which 1,186,759 bushels were coarse, and 4,499,171 bushels were fine. The receipts for duties and penalties were $64,090 52, and the expenditures $45,000 52.

☞ The Albany and Susquehanna Railroad has been completed to within two miles of Otsego, Otsego County. It is delayed at this point by the incompleteness of a bridge on the Susquehanna river. The bridge will, however, soon be finished, and then the road will be pushed along to Unadilla, reaching that place about the 1st of March.

Journal of Railroad Law.

PLAINTIFF'S NEGLIGENCE.—COMPANY BOUND TO PROVIDE A SAFE WAY OF ACCESS TO ITS TRAINS.

The case of Warren *vs.* Fitchburg Railroad Company, decided in the Supreme Court of Massachusetts, was brought to recover damages for a personal injury received by the plaintiff, by being run over by the defendants' locomotive engine.

At the trial before Merrick, J., it appeared that the plaintiff, John Warren, who resided at East Boston, went to Somerville upon the defendants' railroad, and in the afternoon of that day returned to the station at that place, and purchased a ticket for Boston, and waited in the station for the arrival of the train from Lexington, in which he was to be carried. There were two tracks in front of the station, and the train from Lexington was to come down upon the track which was furthest from the station. When the whistle was heard, as this train was approaching the station, Mr. Bonner the station agent, said to the plaintiff, "The train is coming we will cross over." Mr. Bonner and another passenger then did cross over to the platform upon the other side of the track, and reached there before the train arrived. The plaintiff immediately followed them, but did not come out of the station on to the platform in front of it until the train had arrived and stopped. When he was about to step upon the rail of the track nearest to the station, he was struck by the engine of a freight train from Boston, and received the injury for which he claims to recover damages. The engineer upon the freight train testified that it was going at the rate of nine or ten miles an hour, and that the whistle was blown and the bell rung in the manner usual when approaching the station.

The jury returned a verdict for the plaintiff, with damages in the sum of $5,750; and the defendants having made exceptions, the following opinion was delivered by

HOAR, J.—The plaintiff could not recover unless he was himself using due care at the time when he received the injury, even if the carelessness of the defendants occasioned it. And the burden of proof was upon him to show that he used this care. So much is clearly settled.

In several recent cases it has been held that if the whole evidence introduced by the plaintiff has no tendency to show care on his part, but on the contrary shows that he was careless, it is the duty of the Court to direct the jury, as a matter of law, to return a verdict for the defendant. Lucas *vs.* New Bedford and Taunton Railroad, 6 Gray, 64. Gahagan *vs.* Boston and Lowell Railroad, 1 Allen, 107. Todd *vs.* Old Colony and Fall River Railroad, 3 Allen, 18. Wilson *vs.* Charleston Ante, 137. We should have no doubt, if the evidence in the case at bar had disclosed nothing more than that the plaintiff crossed a railroad track, with due notice of its existence, and without looking to see whether a train were approaching, that the principle of those cases would be applicable to this. Such evidence, with nothing to explain or qualify it, would not have shown the exercise of due care, but the contrary.

But we are of opinion that the other facts which appeared in evidence had a very important hearing upon the propriety of the plaintiff's conduct, and that all the circumstances taken together presented a case which was proper to be submitted to the jury, and which the Court could not rightfully withdraw from their consideration.

It was shown that the plaintiff had purchased his ticket entitling him to a passage to Boston, and was waiting in the passenger station for the arrival of the train; that when the whistle of the approaching train was heard, the station agent employed by the defendants, said to him, "The train is coming, we will cross over." Upon receiving this information and direction, the plaintiff followed the station agent from the room, across toward the train, which had arrived and stopped before he came out on the platform. The path by which he went to the train was somewhat oblique, so that the engine which struck him came in a direction partially behind him. Whether in this condition of things, in his anxiety seasonably to reach the train, which would stop but a moment, the plaintiff, at a station with which he was not familiar, would have been likely to be thrown off his guard by the direction to cross over, given without any caution or qualification; whether he might naturally, and without subjecting himself to the imputation of want of care, have considered himself under the charge of the defendant's agent, with an assurance that it was safe and proper to go directly to the cars were questions for the jury and not for the Court. They were submitted to the jury, with instructions which were appropriate and sufficient, and to which in the opinion of this Court, the defendants had no just ground of exception.

The next exception taken was to the instruction given to the jury, "that a person who had purchased a ticket entitling him to a passage on a particular train, was to be considered, while passing from the office or place of business where the purchase was made to the train, to take his seat in one of the cars of which it consists, as a passenger; and that the defendants were bound to exercise the same degree of care in providing for him a safe and convenient way and manner of access to the train, and in preventing the interposition of any obstacle or obstruction which would unreasonably impede him or expose him to harm or injury while proceeding to take his seat in the cars, as in the subsequent transportation and carriage of him." We think this instruction, though not strictly correct as a general proposition applicable to all cases of the kind, was not erroneous, if taken with the qualifications which the particular case afforded, and which must have been obviously understood as included in it. As a general statement it was too broad, because a passenger may buy a ticket at an office which is not in the same town, or even in the same state, in which he intends to take the cars.

The railroad company have no control over his movements, and he does not, by the purchase of a ticket put himself under their charge. But if he is "passing from the office or place of business where the purchase was made to the train, to take his seat in the cars," on the premises belonging to the company, connected with the railroad and under the direction of the company's agents, given to him as a passenger with whom the company have made the contract for conveyance which the purchase of the ticket creates, as was the case with the plaintiff. We think he is to be considered as a passenger and entitled to the rights of a passenger while so passing. It is the duty of the railroad company to afford to the passengers whom they undertake to carry in their cars a reasonable and safe opportunity to pass from the room or building in which they receive passengers for transportation, to the cars when the proper time comes for them to take their seats. The purchasers of tickets are bound to comply with all reasonable rules and orders of the company or their agents, as much when going to the cars from the station house, or from the cars to a place of safety beyond the railroad track, as they are when actually on board the train, and while the transit continues. The instruction to the jury, therefore seems to have been sufficiently adapted to the circumstances of the case, and this exception cannot be sustained.

The remaining exception was taken to the terms in which the Judge who presided at the trial defined the degree of care which the law imposes upon carriers of passengers for hire. The language used was precisely that in which the rule of law was laid down by this Court in the case of Ingalls *vs.* Bills, Met., 1. Upon a full examination and review of the English and American cases, Mr. Justice Hubbard in that case declared the result to be "that carriers of passengers for hire are bound to use the utmost care and diligence in the providing of safe, sufficient and suitable coaches, harnesses, horses and coachmen, in order to prevent those injuries which human care and foresight can guard against;" and the change of phraseology in the case at bar was only that required to adapt this rule to the circumstances of the carriage of passengers by railroad.

The rule in its full extent has been recognized and affirmed in several subsequent decisions. McElroy *vs.* Nashua and Lowell Railroad, 4 Cush., 400. Schopman *vs.* Boston and Worcester Railroad, 9 Cush., 24. The carriers of passengers are not, like the carriers of goods, insurers against everything but the act of God and public enemies. But they are bound to exercise reasonable care, according to the nature of their contract, and as their contract involves the safety of the lives and limbs of their passengers, the law requires the highest degree of care which is consistent with the nature of their undertaking.

The defendants object that they cannot be held to the exercise of the utmost care and diligence which human care and foresight are capable of. But such was not the language of the Court. They were only held to the utmost care in providing suitable and proper carriages, engines, tracks and agents, in order to prevent those injuries which human care and foresight can guard against. The object is to prevent such injuries as are the subject of human care and foresight, that is, such as are not inevitable. The duty is to use the utmost care in regard to the ordinary and usual appliances and means of carrying on their business. They are not to take every possible precaution to prevent injury; for that would be inconsistent with the cheapness and speed which are among the chief objects of railway traveling. But their care is to be exercised in relation to such matters and in such ways as are appropriate to the business they have undertaken, to afford proper and reasonable securities against danger; and it is only in regard to these, from the importance of the interests involved, that they are held

to a proportionate, that is to the utmost care and diligence.

Exceptions overrnled.

Railways of the United Kingdom.

The railway system of Great Britain is under a very rigid and practical supervision by means of the Board of Trade, who are entrusted with powers of inspection and action thereafter, to such an extent as to exercise a very stringent control of the lines. Before a single mile of rails can be opened for passenger traffic, a certificate must be had from the Board that the work is sufficient.

It also takes cognizance of all accidents whether occurring on passenger or freight trains, it requires and receives annual returns from the various companies, which are given in detail and state the accidents, the amounts of traffic of all kinds, working expenses, account of rolling stock, debenture stock, ordinary and preferred capital, amalgamations if any, working arrangements, sales and leases. Every year the result of these inquiries, examinations and reports are published officially, so that the public is put in complete possession of the condition and operations of these companies. From the report of this Board for the year ending December 31, 1864, just published, we obtain the following items of information.

The number of miles of railways in use, is 12,789, viz:

In England and Wales	8,890	miles.
Scotland	2,105	"
Ireland	1,794	"
Total	12,789	"

Increase during the year:

In England	322	miles.
Scotland	92	"
Ireland	53	"
Total increase	467	"

Total authorised capital up to the 31st Dec. 1864.

By shares	£390,413,137
" loans	130,109,197
Total	£520,522,334

The amount actually paid up is: ordinary shares £214,755,479; preferred do., £104,647,626; loan debentures, £90,030,792; debenture stock, £13,049,541—total, £425,483,438, being an increase from the previous year of £21,267,636. The amount of capital authorized in the year was £45,522,789.

The traffic over the United Kingdom, small as compared with the United States, was enormous. The number of trains run in the last year was 4,969,969, divided into: passenger trains, 3,106,651; freight trains, 1,863,318—an average of over 800 trains a day through the year. Number of miles run, 129,130,943. Passengers carried 229,272,165, exclusive of periodical ticket holders or what we would call commuters. The increase of ordinary travellers for the past year over 1863 was five millions, and the character of the passenger traffic which was known by these divisions of 1st, 2d and 3d class, was in the following proportions: 1st class 12.08 per cent of the whole; 2d class 28.47; 3d class 59.45. The per centage of receipts was as follows: 1st class, 25.89; 2d class 32.66; 3d class 38.64.

The number of cattle carried was greatly decreased, being 161,714 heads less than in 1863. The coal traffic increased by 7,402,627 tons, and general merchandise 2,397,666 tons. The total receipts for passenger traffic including extra luggage, parcels, carriages, horses and dogs, with mail subventions were £15,684,040—being an increase from the preceding year of £1,162,512.

The receipts from freight of all kinds were £18,331,524—being an increase from the previous year of £1,696,655. The total gross receipts were £34,015,564—showing an increase of £2,859,167. The total working expenses amounted to £16,000,308, or 47.03 per ct., showing a reduction of 1.20 per ct. from the preceding year. In Scotland this reduction of working expenses was 2 per cent. or 45 instead of 47; and in Ireland 2 per cent., or 47 from 49 of the expenses of the preceding year.

The business of these lines was carried on by the use of 7,203 locomotives, 16,985 carriages and 219,422 wagons.

The accidents were comparatively few—15 persons were killed and 698 injured out of the whole number of two hundred and twenty-nine millions carried; showing but a fractional loss of life, and much less than by any other mode of conveyance. We notice the British journals are discussing Railway subjects with much animation. Cheap railways are warmly urged as a necessity for secluded districts; and it is contended that for these, moderate and even natural grades are quite sufficient, and that these roads may be constructed easily for $20,000 per mile. Eminent Engineers have so declared publicly.

Then again it is maintained that railways should be permitted to be laid down very generally in large cities, on the ground that the space they occupy, even when it is necessary to remove buildings for their construction, is more perfectly enjoyed by the public in easy locomotion and saving of time and money, than can be counter-balanced by the loss or inconvenience of the few who have to part with their residences to make way for the accommodation. It is asserted that if modern progress and comfort can be aided on a grand scale, the greatest good of the greatest number should be insisted upon, and that if room is wanted it must be had.

It also appears that the British railways, at least in the hands of the original holders, or first stockholders are not a very good investment, producing but about 4 per cent. while the preferred creditors in the various forms in which they gather round a company in pecuniary difficulties, get all the profits. Considerable disgust prevails in consequence, and it is a curious fact that the English railway journals of which there are a number, are filled with complaints of all kinds against the management and policy of the principal companies.

Receipts of Grain at Tide Water.

The receipts of grain at tide water by the Erie and Champlain Canals compare as follows:

1849	11,986,690	1858	23,686,374
1850	11,585,610	1859	18,049,798
1851	16,762,613	1860	41,122,100
1852	18,583,875	1861	62,274,951
1853	19,316,019	1862	74,811,877
1854	23,796,038	1863	66,713,000
1855	21,613,904	1864	47,683,270
1856	30,793.225	1865	50,900,100
1857	16,142,310		

☞ It is proposed to extend the St. Louis and Iron Mountain Railroad *via* Pilot Knob, Mo., to Belmont, on the Mississippi River, opposite Columbus, Ky., the northern terminus of the Mobile and Ohio Railroad.

Interest and Dividends.

The Erie Railway Company have declared a semi-annual dividend of 3½ per cent. on their preferred stock, and a dividend of 4 per cent. on common stock; both payable February 5, less tax.

The New York Central Railroad Company have declared a semi-annual dividend of 3 per cent., payable, free of U. S. tax, on the 20th of February.

The Delaware and Raritan Canal, and Camden and Amboy Railroad Companies, have declared a dividend of 10 per cent., free of U. S. tax, payable in stock, on the 15th of February.

The New Jersey Railroad and Transportation Company, have declared a semi-annual dividend of 5 per cent., payable, free of U. S. tax, on the 1st of February.

The Cleveland, Columbus and Cincinnati Railroad Company, have declared a dividend of 5 per cent., payable, free of U. S. tax, on the 1st of February.

The Delaware and Hudson Canal Company, have declared a semi-annual dividend of 8 per cent., payable, free of U. S. tax, on the 1st of February.

The Hazleton Railroad Company, a semi-annual dividend of 6 per cent., payable, free of tax, Feb. 1.

The West Philadelphia Passenger Railroad Company, a dividend of 5 per cent. free of all taxes.

The Baltimore City Passenger Railway has declared a dividend of 5 per cent. on the par value of the stock, free of United States tax.

Grain Trade of Buffalo.

The following will show the comparative receipts of flour and grain into Buffalo by lake and Grand Trunk Railway, for three years:

	1863.	1864.	1865.
Flour, bbls	2,978,089	2,028,530	1,788,393
Wheat, bush	21,240,348	17,677,549	12,437,888
Corn, bush	20,096,952	10,478,681	19,840,901
Oats, bush	7,322,187	11,682,637	8,494,799
Barley, bush	641,449	465,057	820,573
Rye, bush	422,309	633,727	817,676
Peas, bush	131,820	96,845	61,396
Total grain, bu.	49,845,065	41,044,496	42,478,228
Flour to wheat	14,890,445	10,142,650	8,941,965
Grand total	64,735,510	51,177,146	51,415,188

☞ A decision has been given in the Lower Canada Court of Appeals, as to return tickets. Last year a jury gave $100 damages against the Grand Trunk for ejecting a passenger who insisted on traveling with a return ticket two days old. The Judges in the Appeal Court unanimously reversed the decision—holding that, by taking a return ticket, a special contract was entered into voluntarily to use it in the time specified, the rule being printed on the ticket; not doing so it became useless.

☞ An important railroad case has been decided before the Supreme Court at Washington. A person claimed certain property of a road, which had been offered for sale at auction and then withdrawn, on the ground that he was the highest bidder. The Court holds that bids at auction are not offers, and that to make an offer there must be a mutual understanding between the parties. The case is, therefore, decided against the appellant.

American Railroad Journal.

Saturday, January 27, 1866.

Stock Exchange and Money Market.

While the leading journals of Europe are expressing the most flattering opinions of our financial policy as developed and maintained by our Secretary of the Treasury; while the *Times* in fact holds out the example of the United States as one which England herself might do well to imitate; we cannot conceal our anxiety lest it may be endangered by the conduct of a party in Congress which seems bent on a system of repression which is even now telling upon our general financial prosperity.

Although the Union is restored, and the Southern States have returned to it with an alacrity quite unexpected, the loyal States are bearing almost alone the entire burthen of taxation. All our calculations of revenue and income as yet have been tabulated with reference to them; when we speak of incomes, of the payment of the National debt, we have thus far almost entirely ignored the Southern States; and if the conduct of some of our representatives in Congress expresses their opinion—if their action indicates their meaning—then the loyal States are to be left to bear for years to come the burden of this debt, and the pressure of this taxation. By persistently closing the Halls of Congress to the representatives of the restored or reconstructed States, these legislators are in fact exempting those States from their proper share of the public burdens, depriving the Treasury of the income due it there from internal revenue, and putting off the day indefinitely of a return to a sound condition of our finances. They are not only unfairly favoring those Southern States, but they are also injuring the people of the North. The whole united resources of the Nation are required to free us from the pressure of this great National debt, and the constant irritation of indiscriminate taxation. Every energy, every effort is required to remove this load; and yet such is the fanatical and selfish conduct of some of our National politicians, that for the sake of a personal and party success, to be achieved only by a radical departure from the policy of the administration, if not a deadly opposition to it, the country is to be left in a state of paralysis, a political hemiplegia which may finally become fatal to the whole system. Mr. Guthrie a Senator from Kentucky recently took a profound view of this subject, when he declared that the conduct of these legislators was endangering the financial condition of the country, or at least lessening its vital power and impairing its natural strength. And this is our opinion. The sooner the old Union is homogeneous again as it once was, as soon as every part of it contributes its share to the Treasury, we shall see an immense and a most favorable change in our finances. The South in the course of a single year should be able to furnish its usual quota to the public Treasury. In that case we might lighten taxation, restore a specie value to our currency, and form a sinking fund large enough to secure within a reasonable period, the entire discharge of the National debt. This is an object worthy of our past fame, our past history, our moral convictions, our political faith and our American feelings. This effected, we shall have handed down to those who come after us, not only a theoretical, but a practical illustration of the value and probity of our republican institutions; a country not only without political fear but financial reproach. The future page of history would brighten with this fact, and the world as it then rolls on, would be benefitted by our example.

The Governments of Europe and of Asia, have been but wasters of the money of their people. National debts are chronic with them. The great families which direct them become rich and selfish, by the spoils they wring under official pretences from the labors of the people. After them, they care little what happens, the deluge or anything else. Thus in England, they complacently look forward to the year 2000, as that in which their National debt may be extinguished! Of course those of the present generation feel no anxiety about the proportion their estates might be called on to contribute. It is a distant shadowy period

into which they cannot look and do not care to, even if they could. But we have an entirely different feeling. We have paid off two National debts. If we have unfortunately been compelled to incur a third, those who have been driven to this necessity wish to take their full share of the consequences, and to be remembered by their children as careful ancestors who manfully exerted themselves to remove the burthen which was created by their means, though ever so unwillingly. It seems plain to us, therefore, that one of the most obvious and just of all financial measures just now, is to bring back as soon as possible every element of financial strength which a restored Union places within our control.

The remarks of the great leading foreign journals just now upon the financial condition of this country are singularly interesting. They begin to see that "we have a country," and one of some importance. After exhausting the unusual language of eulogy on our great military men, they are now praising without stint Mr. Johnson our President. So too, Mr. McCulloch comes in for a full share of admiration. The soundness of his views, the frankness of his opinions, and the resolute tone of his reports excite deserved attention. The manliness with which he accepts the situation, and the unanimity with which he is supported by the large majority of the enlightened press of the country, astonish the foreign editors. We find in the Paris *Journal des Debats* of the 2d January, a laudatory article on Mr. McCulloch's official report, from which we translate a few of the most striking paragraphs. Of this that journal says, of all the reports transmitted to the American Congress, his certainly "merits the greatest consideration on both sides of the Atlantic." After stating in full his plans of finance it says: "Such are the financial projects of Mr. McCulloch, conformable to good sense and honesty," with every assurance of success. The journal comprehends as fully as we do, the opposition he will meet to any plan of reducing paper money, that of "powerful associations," combinations financial and industrial who are benefitted by the high prices, the banks who profit by the emissions of paper money, and the speculators on change, who are strongly represented in Congress, yet having a deplorable influence "on morals and the true wealth of nations." The journal advises the American people to close their ears to all dangerous sophisms, and "after having astonished the world by exhibiting their victorious generals submissive to the laws, able Presidents without ambition, financiers intelligent and sincere, they will put the finish to these wonders by setting an example of a Nation, which after having been a borrower knows how to pay its debts."

We also observe in our foreign files some curious remarks on our foreign trade, and particularly on the character of our exports.

During the past year we sent to Great Britain 1,253,057 hundred weights of wheat and flour against 9,578,437 in 1864 and 10,812,525 in 1863. Petroleum shows a similar decline. During the past year we exported to England of this article but 5,790 tons, against 15,455 in 1864, and 29,272 in 1863. In the cereals, Russia, Germany and France are now without competition from us in the British markets. This great falling off is easily explained. Paper money has so raised the prices of everything in this country, such a false and fraudulent estimate of values has been adopted, that we cannot send any of these articles abroad to be sold at prices which the world elsewhere is willing to give; and at which they are selling their own products.

And we shall continue to be in this position till we return to a sound and honest currency, when a promise to pay a debtor is really good for what it promises. In connection with this question we may properly allude to another. It is now a positive certainty that the Reciprocity treaty will go out of existence in March next, according to the notice given by our Government. Whatever future arrangements may be made will be the result of special legislation. The Canadian Government has a representative agency of ministers at Washington to obtain some extension of time for the expiring treaty, or some new form of commercial intercourse. It is to be remarked that the Lake Cities and their Boards of Commerce have apparently ceased to take any further interest in the subject, since the time of the Detroit Convention; while on the other hand, the city of Boston exhibits a warm interest in maintaining the former commercial relations. There seems to be one way of getting over the most serious difficulties, which is direct and practicable. The fisheries and the coal are essential to the Eastern and Northern States, and these are the most important gains under the treaty of 1854. The navigation of the river St. Lawrence is practically of little advantage to the United States. The commerce of the Lakes and the products of the West prefer the outlets of the American canals and railways in preference to the stormy and ice bound channels of the St. Lawrence; they lead to a near and certain market, which is within reach of the telegraph and rapid mail service. Our Government in order to retain the fisheries has only to make an arrangement with the maritime provinces whose interests are more close with ours than with Canada, and the affair will be easily settled. These provinces are not disposed to confederate and come under the domination of the larger political power of Canada to swell its consequence and lose their own. They have a trade with Boston of 17 millions a year, a good market to buy in and to sell in, and to retain this position will give up confederation and continue us in the enjoyment of the fisheries. Our cereals and coarse grains sell there readily for gold and yielding us a large profit. We can therefore make an arrangement which will be very reciprocal in its character, and meet all the exigencies of the occasion. If Canada is left out in the cold, it is her own fault; and if the Lake cities are indifferent to the subject, a few years experience will point out the error if any has been made.

The weekly averages of the associated Banks for the week ending January 20th show an increase of loans of $41,439,533; in deposits of $1,049,249; in circulation of $1,312,795; also a decrease in specie of $1,587,196; and of legal tenders $220,065. The balance in the Sub-Treasury on Wednesday was $88,851,843 11.

Money has been very easy. The rate has been as low to a large number of borrowers as 4 per cent., while exchange is sluggish and dull. The stock of cotton in all the ports ready to be shipped is estimated at 600,000 bales of which 222,000 are in store in this city. We also learn that a good crop is after all to be expected during the present year. We have noticed some statements recently published in the South to the effect that it will be unusually large, though this does not seem to be probable.

The British money market is evidently very unquiet. The Bank of England has raised the rate of interest to 8 per cent., and the demand for American securities, with the continued supply of cotton, seem to excite an apprehension of a drain for specie.

Railway securities have recently been unsettled in the cash market. There seems to be an intention in a large party of operators to depress their values at the present moment, so that we hear from them of a temporary decrease of receipts, doubts as to dividends earned, and various other stories of a depressing character. Yet notwithstanding we perceive when the opportunity comes, these same parties can effect a sudden rise of 8 or 10 per cent.

The truth is that all the street stories are to be received with caution. If parties interested will but examine our tables, they will be much better able to judge of the business, and values of these railway companies, than they can in any other way, and with a much greater certainty. The railway interest of this country is a sound one, the companies that have not had their roads destroyed by hostile armies, have been able to reduce their indebtednsss and are out of danger; their annual receipts show an increase, in some cases very large in amount; while from the South we learn with satisfaction that the companies there are reconstructing with great vigor, and business is rapidly reviving. Holders of railway securities may therefore as a general rule hold on to their investments with confidence; and should remain unmoved by the reports of the street, or the combinations and corners announced there. Our railway system is just as sound as ever it was, and the condition of the roads just as stable; a temporary depression in the business of any of them being no more destructive to their general prospects, than a temporary derangement of the stomach would be to a man in full health. It will be perceived by our tables, that for the last year the earnings of our railways, have exceeded by very considerable sums those of the preceding year. Omitting the earnings of December those of the eleven months, exceed those of the whole of the previous year.

Gold has had another slight decline, Exchange is down again, and Governments are steady, and taken principally for permanent holders. The market is however quiet.

The exports for the week were of the value of $4,860,386 including 11,589 bales of cotton of the value of $2,945,717. The failure of the Columbian Marine Insurance Co. is announced, but is believed, the result will not be as disastrous as some persons have supposed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Vermont Central Railroad.

We understand that the Vermont Central Railroad Company have recently put upon the market a loan for $700,000, with interest at 8 per cent., payable semi-annually, free from Government tax. Already $500,000 has been taken, and the early negotiation of the balance will secure by the increase of rolling stock and other facilities such an addition to the business of the road, as will render certain the prompt payment of the interest on the first mortgage bonds, and of course greatly improve the prospects of the second mortgage bondholders. The earnings of the Vermont Central for the last five years have shown a steady and flattering increase, the receipts from December 1, 1864, to December 1, 1865, amounting to $1,565,151 09, or more than double the earnings of 1860 and 1861. The road is now in excellent condition and doing a large and profitable business, while with the increased facilities which it will shortly be able to command, its legitimate business will be greatly extended.

Central Pacific Railroad.

There is just prepared for the signature of the President a patent for some 45,000 acres, selected under the Acts of Congress of 1862 and 1864, along the line of the first section of the Central Pacific Railroad, being that part which has been finished, duly equipped, and put in complete running order. The patent or grant is elegantly embellished with the coat of arms of the U. S., surrounded by the symbols of agriculture and commerce, and is accompanied by a map of the Union, exhibiting every State and territory, and the line of route for the Central and Union Pacific, as well as the proposed line of route for the Northern Pacific.

Lehigh Valley Railroad.

The Lehigh Valley Railroad extends from Easton to Wetherly, some seventy miles long, with side lines through the Mahanoy coal region, &c. The company have in contemplation extensive connections north, into the State of New York. It will also, under a decision of the Supreme Court of Pennsylvania, extend its road into the Wyoming Valley, probably the most prolific coal region in the world.

Connecticut and Passumpsic Rivers R. R.

The earnings and expenses of this road for six months ending November 30, 1865, were as follows:

Earnings:		
From passengers		$110,332 77
" freights		153,946 58
" mails, express and rents		7,269 89
		$271,549 24
Expenses:		
For car and locomotive repairs	$36,879 59	
Road and bridge repairs	43,589 05	
Stations and buildings	5,475 27	
Fuel	13,347 26	
Oil and waste	2,940 70	
Freight expenses	10,560 46	
Passenger expenses	6,992 94	
General expenses	14,062 79	
Loss and damage to goods, &c.	1,791 28	
		135,639 34
Net		$135,909 90
Corresponding six months 1864		124,301 40
Increase		$11,608 50

☞ The Hudson *Star* says there is every reason to believe that immediately upon the opening of Spring the St. Croix and Superior road will be pushed vigorously forward. All the movements connected with this road look like business, and we hope soon to be able to announce that the work is again progressing.

☞ The State of Virginia (through her legislature) and the town of Fredericksburg (through her council) offer a bonus of $272,000, in work already done, to any party who will contract to build and equip the Fredericksburg and Gordonsville railroad, within the next five years. The road has recently been examined by an engineer, who estimates the cost of building the remaining part of the superstructure at $140,000.

☞ One hundred and fifty thousand dollars in bonds of the Eaton and Hamilton Railroad, held by the City of Cincinnati, were sold on the 20th inst. for $100,000 cash.

The Army of the United States during the Rebellion.

The following statement will show the number of men furnished by each State since April 15, 1861; also the number of men credited to each State upon the basis of three years as a standard of computation:

States.	Aggregate number of men furnished under all calls.	Aggregate number of men furnished under all calls, reduced to the 3 years standard.
Maine	71,745	56,595
New Hampshire	34,605	30,827

Totals	2,688,523	2,154,311

Railroad Earnings--Monthly.

The earnings of the Pittsburgh, Fort Wayne and Chicago Railway for the month of Dec. compared with the same period last year, have been as follows:

	1864.	1865.
From freight	$423,842 05	$350,987 70
" passengers	218,321 49	191,697 55
" express matter	8,682 52	10,753 15
" mails	7,825 00	7,825 00
" rent of railway	7,083 34	7,083 34
" miscellaneous	1,279 93	2,479 01
Total	$667,034 33	$570,825 75

Earnings from Jan. 1, to Dec. 31:

1865	$8,478,459 84
1864	7,120,465 76
Increase	$1,357,994 08

NOTE.—The profit of operating for six months, the New Castle and Beaver Valley Road is not included in the above.

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of December, 1865, were $162,694 00
Same month 1864 204,726 00
Decrease $42,032 00

The earnings of the Toledo, Wabash and Western Railroad for the month of December, 1865, were $247,023 00
Same month in 1864 265,154 00
Decrease $18,131

The earnings of the Erie Railway for the month of Dec., 1865, were $1,503,993 33
Corresponding month last year 1,334,217 10
Increase $169,776 23

The earnings of the Atlantic and Great Western Railway for the month of Dec., 1865, were $599,762 00
Corrresponding period of previous year 357,556 00
Increase $242,206 00

The earnings of the Chicago and Northwestern Railroad in Dec., 1865, were $546,609 00
Same period last year 563,400 00
Decrease $16,791 00

The earnings of the Michigan Central Railroad for the month of Dec, 1865, were $328,869 00
Corresponding month of previous year 376,470 00
Decrease $47,601 00

The earnings of the Chicago and Rock Island Railroad Company for the month of Dec., 1865, were $190,272 00
Corresponding month of previous year 321,037 00
Decrease $130,765 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Dec., 1865, were $356,912 00
Corresponding month of previous year 411,806 00
Decrease $54,894 00

The earnings of the Chicago and Alton Railroad for Dec., 1865, were $224,022 00
Dec., 1864 252,015 00
Decrease $27,993 00

The earnings of the Marietta and Cincinnati Railroad for the month of Dec., 1865. $104,587 00
Corresponding month of previous year 95,453 00
Increase $9,134 00

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 2d week in Jan., 1866, were $61,463 00
Corresponding week of previous year 65,339 00
Decrease $3,876 00

The traffic of the Great Western Railway for the week ending Jan. 19, 1866, was as follows:

Passengers	$22,551 38
Freight and live stock	30,377 21
Mails and sundries	3,511 83
Total	$56,440 42
Corresponding week of 1865	55,023 84
Increase	$1,416 57

The earnings of the Grand Trunk Railway for the week ending Jan. 13, 1866, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$31,459 00
Express, freight, mails and sundries	4,750 00
Freight and live stock	77,123 00
Total	$113,332 00
Corresponding week, 1865	97,960 00
Increase	$15,372 00

The earnings of the Marietta and Cincinnati Railroad for the 2d week in Jan., 1866, were:

	1866.	1865.
Passengers	$8,462 00	$9,070 53
Freight	9,310 00	11,802 78
Mail, express & telegraph	1,100 00	1,186 33
Total	$18,872 00	$22,059 59
Total for the fiscal year commencing Jan. 1.	$41,002 00	$42,603 88

Debt of the City and County of New York.

The following statement, prepared by the finance department, shows in detail the items which make up the aggregate of the funded and temporary debt, as it stood on the 22d of December, 1865, and the various purposes for which it has been incurred:

CITY FUNDED DEBT.

Water stocks issued on account of introducing the croton water into the city, and distributing the same		$10,485,800
Central Park stocks, issued on account of Central Park and the improvement of the same		9,494,071
Fire indemnity stock, issued for payment of damages for blowing up buildings, December, 1835		402,768
Building loan stocks, issued on account of building workhouse on Blackwell's Island		190,000
Real estate bonds, issued in settlement with State lessees of West Washington Market, for payment to the State for sundry lands filled in beyond the boundary line of the Montgomery charter, and for purchase of Fort Gansevoort property		1,133,437
Stock for docks and slips, issued for building and repairing public docks and slips		500,000
Floating debt fund stock, issued for liquidating and funding floating debt in 1859		2,748,000
Public education stock, issued for payment of debt of public school society		154,000
Public building stock, issued on account of the erection of public buildings		50,000
Stock for rebuilding Tompkins Market, issued, as its title indicates, for rebuilding Tompkins Market		68,000
Volunteer soldiers' family and fund bonds, issued to provide for the families of soldiers in the United States Army		3,766,500
Volunteer soldiers' family aid fund redemption bonds, issued to extend the time of payment of volunteer soldiers' family aid fund bonds No. 3		500,000
Volunteer soldiers' bounty fund redemption bonds, issued for redemption of a like amount of bonds for payment of bounties to volunteer soldiers		490,000
Total		$29,982,576

COUNTY FUNDED DEBT.

Harlem Bridge bonds, issued for erecting a bridge across Harlem River at McComb's Dam		$20,000
County Court House stock, issued, as its title indicates, for the erection of the new Court House in Chambers street		1,730,000
Soldiers' substitute bounty redemption bonds	$2,000,000	
Soldiers' substitute and relief redemption bonds	946,700	
Soldiers' bounty fund bonds	4,000,000	
Soldiers' bounty fund b'nds, No. 2	376,600	
Soldiers' bounty fund b'nds, No. 3	761,000	
		8,084,300
The above were issued to provide means for the payment of bounties and for substitutes for the armies of the Union.		
Riot damages redemption bonds	$1,000,000	
Riot damages indemnity b'ds	499,100	
		1,499,100
Total		$11,338,400

RECAPITULATION.

City amount payable from sinking fund	$21,656,076	
City amount payable from taxation	8,276,500	
		29,932,576
County amount payable from taxation		11,333,400
Total		$41,265,976
The Commissioners of the sinking fund hold on account of the above debt the sum of		9,508,101
Net amount December 22, 1865		$31,757,875

The foregoing debt of $41,265,976 was incurred for the following purposes, viz:

For the croton water works	$10,435,800
For Central Park	9,494,071
For purchase from the State for sundry lands filled in beyond the boundary allowed by the Montgomery charter, and in settlement with the State lessees of West Washington Market, also for purchase of the Fort Gansevoort property	1,133,437
For payment of damages incurred for blowing up buildings during the great fire in December, 1835	402,768
For the erection of public buildings, including the new County Court House	2,038,000
For building and repairing public docks and slips	500,000
For the liquidation of the floating debt of 1859	2,748,000
For the indebtedness of the Old Public School Society on the transfer of property to the corporation	154,000
For the erection of bridge at McComb's Dam, Harlem River	20,000
For expenses growing out of and connected with the war	14,839,900
Total, as above	$41,265,976

TEMPORARY CITY DEBT.

Revenue bonds of 1865, issued in anticipation of collection of taxes of 1865	1,706,800
Street improvement fund bonds, issued to pay contractors for improving the streets in anticipation of the collection of assessments therefor	1,619,200
Assessment fund bonds, issued to pay for opening, widening, &c., of streets, in anticipation of the collection of assessments therefor	400,000
	$3,726,000

TEMPORARY COUNTY DEBT.

Revenue bonds of 1865, issued in anticipation of collection of taxes of 1865	967,300
Total temporary debt city and county	$4,693,300

United States Pacific Telegraph Co.

The new proposed telegraph line across the continent, commonly known as the "Opposition," is progressing rapidly, and present appearances indicate that we shall have two telegraph lines across the plains within a year. The new company have erected the poles from Shingle Springs to Virginia City, and nearly all of them from San Jose to Sacramento *via* Stockton, while the poles are being put up on the line of the railroad from Sacramento to Shingle Springs. Beyond Virginia City the poles are nearly all up for a distance of 110 miles. The late storm has delayed the work considerably, owing to the impossibility of procuring poles which are brought from Santa Cruz in small vessels. The steamer *Golden City*, which arrived yesterday, brought 300 miles of wire with insulaters, brackets, batteries and other implements necessary to complete the line between here and Virginia City, and the wires are now being strung between Placerville and Carson City. It is expected that the line will be completed half way to Salt Lake by the 1st of January next, the contract being given for the construction of the entire line to Salt Lake to be completed by July next if the materials arrive promptly, and the company meet with no serious drawbacks. Mr. Street has gone east to make arrangements for the construction of the eastern section of the line, which is intended to meet the western section at Salt Lake, or beyond. The former portion of the line is to be completed under the contract, to Omaha and Atchison, two branches from Chicago, this Fall. With ordinarily fair weather it is expected that the line between here and Virginia City will be completed and put in operation by New Year's. Those sections of the route on the line of railroads are being left until the last, the contractors wishing to get their teaming done before winter fairly sets in.—*San Francisco Bulletin, Dec.* 1.

Debt of Baltimore.

The bonded and guaranteed debt of the city of Baltimore, and the purposes for which it was issued, is as follows:

Subscription to the stock of the Baltimore and Ohio Railroad	$3,500,000 00	
Do., Tide Water Canal	380,000 00	
Do., Northern Central Railroad	850,000 00	
Do., for the supply of water	3,900,000 00	
Do., building Court House	137,500 00	
Subscription to stock for miscellaneous purposes	48,000 00	
Do., for building new Jail	250,000 00	
Do., for building new Almshouse	400,000 00	
Do., for Bounty and Defense	2,301,666 87	
Do., for Defense and Floating Debt.	225,000 00	
Do., for purchase of the Parks	723,996 25	
Loan to the Baltimore and Ohio Railroad Company	5,000,000 00	
Loan to Pittsburg and Connellsville Railroad Company	1,608,375 00	
	$19,324,538 12	
Bonds guaranteed for N. W. Va. R. R. Co., due Jan. 1, 1873	$1,500,000 00	
Do., for York and Cumberland R. R. due Jan 1, 1877	500,000 00	
Do., Western Maryland R. R. Co., due Jan. 1, 1890	200,000 00	
Total stock and guaranteed debt	$21,524,538 12	
Ground rents paid by the city	7,457 70	
Total stock and guaranteed debt	$21,531,995 82	
Against which the city holds the following securities of undoubted guarantee, which pay their interest regularly:		
Balt. and Ohio Railroad stock	$3,500,800 00	
Water stock, secured by its entire water works, property and net work of mains, the water rents paying all expenses	3,900,000 00	
Park stock, secured by Druid Hill and Patterson Parks, interest paid by City Passenger Railway Co.	723,996 25	
Five Million Loan, secured by mortgage on Baltimore and Ohio R.R.	5,000,000 00	
Amount received from sale of N. W. Virginia Railroad claim, $1,200,000 —interest accrued $113,000	1,313,800 00	
Amount received from sale of Northern Central R. R. claim, $880,150 —interest accrued, $6,000	886,150 00	
York and Cumberland Railroad, 1st mortgage	500,000 00	
Western Maryland Railroad, first mort., less sinking fund	150,800 00	
Am't due from sale of Almsh'se land	5,500 00	
Ground rents received by the city	22,916 98	
T'l securities of undoubted guar	$16,003,163 23	
	$5,528,833 59	

Sinking funds that have accrued from each interest:

Five Million Loan sinking fund	$996,269 92
New Jail sinking fund	210,051 71
Floating and Defense Loan ditto	105,000 00
Water, No. 1, ditto	50,566 44
Water, No. 2, ditto	60,767 66
Western Maryland Railroad ditto	49,200 00
Court house ditto	53,589 40
Bounty stock ditto	30,300 00
Connellsville $1,000,000 Loan	20,963 00
Park sinking fund	39,441 20
Total accrued sinking fund	$1,625,089 62
	$3,903,743 97

Securities not productive:

Pittsburg and Connellsville R. R.	$1,608,375 00
Stock held in Tide Water Canal	380,000 00
Lots in various portions of the city, including 13 acres in East Balt.	110,000 00
76 acres of old Almshouse land in the county	76,000 00
Goldsborough farm	20,186 00
	$2,194,561 00
	$1,709,182 97

The Court-house, Bayview Asylum, City Jail, Market Houses, and other property belonging to the city, is estimated at $3,000,000. There has been expended for bounty, relief of soldiers and their families, with the fortifications of the city, $2,769,686 54. Plats have been ordered for portions of the unproductive property, and energetic efforts will be made to sell it or make it productive.

Chicago and Northwestern Railroad.

We publish the following anonymous communication which we received by the last steamer:

MR. EDITOR.—I have learnt that the managers of this railroad intend to pass the dividend on the preferred stock due December 1, upon the pretext that it is wanted to buy rolling stock.

The traffic is very great, and the dividend on the preferred stock has been fairly earned. I therefore deny that the directors have any legal right to withhold payment without consent of every individual proprietor of the preferred stock.

As to the extra profit which belongs to the common shareholders, no doubt they would consent to its being applied in a way that would advance their prospects of good dividends; but to take the preference dividend without the consent of the owners of that stock, is to sacrifice them for the benefit of the ordinary shareholders, and is making footballs of both stocks on the market.

It is praiseworthy of the directors to avoid running in debt, but this way of doing it is robbing Peter to pay Paul.

If the extra earnings are not sufficient to keep the company out of debt, let the managers postpone part of their proposed purchases—or, if they will give a pledge that the preference shareholders dividend shall not be lost to them, but only postponed to a more convenient season, no doubt they will consent, and such an arrangement may avoid litigation.

AN AMERICAN IN LONDON.

☞ The Reno *Times* states that "one of the new locomotives for the Reno, Oil Creek and Pit Hole railroad has arrived and entered upon its duties. The work of tracklaying will now be prosecuted day and night, and rapid progress may be expected."

Railroad Interest and Taxation.

To the Editor of the American Railroad Journal.

In reply to "Lex," in your number of January 6th, I would say the statement that the railroad interest had "not been protected by tariff," was *intended* for a bit of irony; as I do not think it has ever been claimed that it was.

Who shall go to Washington? is for the companies to decide by appointment in convention or at board meetings. Much may, and should be done outside of such action; by discussion, by the press, and individual correspondence and conversation with members of Congress by railroad men.

I am not competent to fully answer the third query, and would fill your space with general instead of railroad matter.

The present tariff "encourages the use of inferior material," by laying a higher (comparative) duty upon the best, thus—

The impost upon *iron* material, rails, axles, tires, &c., is specific, so much per pound; the tax upon the same articles of steel is *ad valorem*—45 per cent. upon cost; a higher percentage than the specific amounts to on iron—thus offering an inducement not only to use iron, but if steel *is* used, to get the cheapest, and of course inferior.

The policy of assessing heavy duties upon some expensive goods is sustained by the argument that they are unnecessary articles of luxury; presume it will not be claimed that steel railroad material belongs to this class.

The tariff is a subject which I think most railroad men regard themselves as but little interested in. Without going into the question of increased cost of general articles used by them, or of necessarily increased compensation paid for service and labor, in consequence of it; if they will but digest the fact, that for each hundred dollars worth of heavy steel supplies they buy, they have to pay forty-five dollars tax, I think they will come to the conclusion that *it does* concern them, and that they have a right to interfere in, and be heard in the matter.

If any great domestic interest were benefitted, there would be some excuse for it; although I cannot conceive that any class of manufacturers would have the audacity to claim that they were entitled to as much consideration as the railroads. It may be said that the Government must have revenue; if it loses here, it must gain somewhere else. Admitted, the point is: cannot the amount be raised in some way less detrimental to the country than preventing the improvement of the railroads?

The "peculiar feature" of the case is briefly as stated—the *national importance of it*—it being *really* a public, Government, or State interest. This is the text which may be enlarged upon to a great extent.

I do not see that any unusual legislation is required; waiving the national claim; admitting certain goods free, at the request of a class; will not be infringing the spirit of our institution more than has been done in other cases by putting on a high duty.

Manufacturers ask for import tax upon articles *they make*; why should not the railroads ask for the free admission of articles *they use*?

A rail is a rail, an axle an axle, &c., if it must be taxed, well and good; but if roads who can afford it buy the best, why should they be punished for so doing by being charged an extra tax? and why should poor ones be prevented from using the same, by increased cost in consequence of said tax?

Yours,

PROGRESS.

☞ We publish in our advertising columns a notice to contractors to which we would call their attention. The Springfield and Deep Run Coal Mining and Manufacturing Co., a reorganization of the Richmond Coal Company which suspended operations in consequence of the war, is preparing to deliver coal of the best quality for steam, parlor and gas use, at rates far below the present prices, and desire to construct a short railway from their rich veins to tide water in the James River.

☞ A bill has been introduced into the House of Representatives at Washington, granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, Oregon, and which will probably be soon favorably reported on by the Committee on the Pacific Railroad. The bill also authorizes the Puget Sound and Columbia Railroad Company to construct a road to unite with others on the Pacific coast. The usual grants of lands and other privileges are conferred.

☞ The Erie *Dispatch* says that M. B. Lowry had closed a contract with the Atlantic and Great Western Railroad Company, by which the latter company agree to furnish $500,000 to build the road from Erie to Miltown, equip it and put it in running order before the close of the year 1866, for which they are to receive 55 per cent. of the earnings and allow the control and management of the road to remain in the hands of the original owners of Erie parties; and that the road is not to be operated detrimental to the interests of Erie.

☞ The Monongahela Valley Railroad Company proposes to construct a line from Pittsburg up the Monongahela river to the West Virginia line, with branches into the various coal fields. The State of Pennsylvania originally constructed a slack-water navigation to open the rich mineral country along the river, but the navigation has since passed into the control of a private corporation, and the railroad seems to be required by the necessities of local trade.

Census of Spain.

The last census taken in Spain gives the population as 15,464,005. The area, of that country being 194,782 square miles, gives a density of seventy-nine to the square mile, or about one-third that of Great Britain. Madrid, the capital, has 281,170 inhabitants.

☞ The receipts into the Treasury of Minnesota for the fiscal year ending December, 1865, were $395.590 08. The expenditures amounted to $416,318 60. The Land Registry shows entries of land during the year of 138,232 acres. The population of the State is estimated at 275,000. The number of miles of railroad in operation now is two hundred and ten, with one hundred and eighty-two miles graded.

☞ The gold receipts at the ports of New York, Boston, Philadelphia and Baltimore during the first half of the fiscal year ending December 31, 1865, amount to $77,507,775 40.

Rock Island and Alton R. R.

The Directors have just returned from a railroad meeting at Winchester and report very favorably for the building of the Rock Island and Alton R. R. There can be no doubt, but the plan now adopted, and the co-operating assistance being brought to bear, will bring the road. We have no hesitancy in putting it down as a fixed fact that the road will be built at an early day.—*Illinoisian.*

☞ The accounts of the Union Steamship Company at the close of the last fiscal year stand as follows: Bills receivable, $475,000; certificates of indebtedness, $55,000; due from New York, $5,000; cash, $4,000; total, $539,000; less bills due, $2,500; net, $536,500. This sum is now drawing 7 per cent. interest.

☞ The last great railroad project that we have heard of is the one for a road from St. Paul to the settlements in the Hudson Bay Company, in British America. This proposed route is in the hands of eminent British capitalists, who propose to extend it down to the Mississippi as far as Winona.—*Milwaukee Wisconsin.*

☞ The following gentlemen have been elected directors of the Philadelphia and Baltimore Central Railroad Company for the ensuing year: S. M. Felton, J. Hinckly, P. Quigley, D. Woelpper, J. Phillips, M. Conrad, J. D. Strawbridge, S. Dickey, J. R. Ramsey, D. Stubbs, S. J. Dickey, J. Torne, S. B. Stubbs. S. M. Felton is President, and Joseph Huddell, Treasurer.

☞ The Lehigh and Wyoming interests have obtained the franchises and property of the North Branch Coal Company of Pennsylvania, extending from Wilkesbarre to Chemung, on the New York State line, and will proceed to construct a railroad between the two points. This new road is designed principally for passengers and anthracite coal, and will come in active competition with the Delaware, Lackawanna and Western Railroad, which now has a monopoly of the business.

☞ The Savannah *Republican* says that the grading on the Savannah, Griffin and North Alabama railroad is almost finished between the former place and Chattahoochee river. The track lies through the coal fields and copper mines of North Alabama. This road will complete a direct line between Savannah and Memphis.

☞ There are 12,960 public schools in Pennsylvania, attended last year by 703,930 pupils, or 6,000 less than the year before. The total cost of the school system was $3,614,238.

Central Pacific Railroad
STATE AID BONDS.

INTEREST AT THE RATE OF

Seven per Cent. per Annum in Gold,

PAYABLE SEMI-ANNUALLY,

Guaranteed and Paid by the State of California.

The Bonds are secured by a mortgage on 160 miles of road from Sacramento to the California State Line, forming part of the great Pacific Railroad Route adopted and aided by the United States Government. They are further secured by a Sinking Fund of $50,000 per annum in Gold received from the earnings of the Road, and pledged for their redemption. They are a first class Security in every respect, and a limited amount will be offered upon terms which render them a very attractive and desirable investment. For further particulars, inquire at our Office, No. 5 Nassau Street.

American Railroad Journal.

New York, Saturday, February 3, 1866.

The Mercantile Mutual Insurance Co.

This prosperous and much esteemed Company with Assets over $1,366,699, organized twenty years ago, continues its business on the most favorable terms as usual, at its New York and Liverpool offices. We refer our readers to its advertisement in another column for particulars.

Smyrna and Delaware Bay Railroad.

This road is to run from Clayton, a station on the Delaware Railroad, to the mouth of Duck Creek at the Bay Shore, a distance of nine miles. The preliminary surveys have been made, and the contract awarded to Charles B. Dungan, Esq., of Philadelphia, a gentleman widely known in railroad circles as a responsible and energetic contractor. Clayton is also the terminus of the Maryland and Delaware Railroad, and will be of the Kent County Railroad, both coming from the Chesapeake. Tench F. Tilghman, Esq., has been appointed Chief Engineer, and the work will be pushed forward with great rapidity. Mr. T, is also Chief Engineer of the Maryland and Delaware Railroad, and has been for years identified with the roads of the Peninsula.

The Financial Question.

We have received from our esteemed friend, T. W. Olcott, Esq., of Albany, a communication on the subject of making legal tenders a deposit for currency in place of bonds as now, which he considers a fallacy unless modified, in which case our views may be adopted with less difficulty. He says:

"If you have $100,000 you can invest it in commercial paper, or dispose of it in any way you please and that ends the matter. Nobody can call upon you to redeem the money thus paid out. But if you exchange it with the Comptroller of the currency for an equal amount of your own notes, how do you then stand? Why you are subject to ½ per cent. tax on the same, and when you pay them out, you are liable to be called upon the very next hour for their payment. If they were to pay out forever, you would still be the loser of ½ per cent. a year. But I think the *object* at which you aim, looms up so large, that you overlook minor considerations in your haste to grasp it. Slightly modified, however, it becomes practicable, with the promise of meeting and answering your aims. The Comptroller of the currency proposes in his decidedly able report, to have legal tenders paid in as the basis of 100 million new bank capital. The legal tenders to be destroyed and a gold stock issued in their stead to the said new banks.

"The stock thus issued is to be locked up and will not come upon the market to depress and depreciate gold obligations—possibly carrying them so much below par as to be fatal in converting the large amount of maturing obligations—and yet though the new banks can issue 90 per cent. of the legal tenders thus retired, by lessening the lawful money basis, you in fact enforce the necessity of a very considerable curtailment of the circulation and business of banks—and just in the ratio that the amount of legal tenders called in bears to the whole amount out. For if the 100 millions of new bank capital were extended to 600 millions, and it were possible to organize banks to that extent, specie payments or universal bankruptcy would follow at once, as there would be no lawful money left but gold and silver. Then too, this plan has another advantage, it is limited to a specific sum, and will be so gradual in its operation as not to destroy confidence and lead to a general crash.

"With this should be carried out Comptroller Clarke's other suggestions of removing his bureau to New York, of removing the obligation on banks to keep on hand an *unavailable reserve fund*, and obliging all banks to redeem at par in the three principal cities. The Comptroller of the currency has argued these questions so clearly and fully and forcibly, that I would refer you to his report, if you are disposed to enforce them by more extended remarks. Par redemptions I regard as fundamental in maintaining a sound restricted circulation, free from depreciation and redundancy.

"If those measures are carried out by Congress, our banks will stand upon a safer footing, National credit will be sustained by strengthening public confidence, and we shall be on the steady march to the resumption of specie payments."

Coal Production of the United States.

We give elsewhere a very full account of the anthracite coal trade of the United States, compiled from the *Miner's Journal*. While in Great Britain, the permanence of its coal supply is beginning seriously to be questioned, its exhaustion being looked for within the life time of some who are yet in being, here with the largest coal fields in the world, the working of which may be said to be only in their infancy, we can see no limit to the production, as long as the world shall last. The wealth and the utility of these vast mineral deposits, cannot be calculated by the most ardent statician. The real problem for us at the present moment is, how to cheapen this indispensable article of consumption and mover of machinery, What is wanted, is a large and economical supply. and we are thankful that we have at this moment the prospect of realizing it. High prices check consumption, and the sooner this fact is understood, practically by the producers themselves, the sooner will they find their interests advanced by a corresponding movement. It appears by the figures before us, that from 1820 to 1865, inclusive, the total anthracite mined and sent to market was 134,121,549 tons.

The supply sent to market from Pennsylvania in 1864, was 9,998,046 tons, and in 1865, it was

9,488,396, showing a decrease of 509,650 tons, attributed to a stoppage of various iron and other works, in consequence of the collapse of the rebellion, and the sudden falling off in the military and naval wants of the Government. But it is ascertained that a fresh increase in the supply is beginning to be seen and felt. It also appears, that though the demand for anthracite was thus affected, that for the bituminous and semi-bituminous was on the increase. From the semi-bituminous mines the decrease in 1865, was 93,128 tons, and from the bituminous, or Cumberland, the increase was 237,890 tons. The total supply in 1864, was 1,238,724 tons, and in 1865, 1,383,486 tons. The amount of foreign coal imported in 1864, is given at 510,708 tons, and in 1865 at 685,052, the increase being 174,344 tons.

The supplies of the anthracite came especially from the Schuylkill, Lehigh, Wyoming and Lackawanna, and the Shamokin regions making their total deliveries from 1820 to the close of 1865, 134,121,569 tons, as follows:

	Tons.
Schuylkill Region	60,422,057
Lehigh "	28,656,599
Wyoming and Lackawanna Region	42,050,008
Shamokin "	2,992,885
Total anthracite	134,121,549

From 1820, the commencement of the trade, up to 1866, the supply sent to market for 46 years was as follows:

	Tons.
1820 to 1830	359,190
1830 to 1840	6,261,197
1840 to 1850	19,373,429
1850 to 1860	56,954,864
1860 to 1866 (6 years	52,172,869
Total anthracite	134,121,549

According to the above statement, the annual increase was as follows:

From 1830 to 1840 was about	164	per cent.
From 1840 to 1850 "	21	"
From 1850 to 1860 "	19¼	"
From 1860 to 1866 "	8¼	"

It is understood that a foreign market for our anthracite coal is beginning to be sought by shippers. It bears long sea voyages without injury, an advantage it largely possesses over the soft bituminous, and we are not surprised to learn that it is finding sale in South America, and the islands of the Pacific. Easy and cheap transportation to market, and moderate prices are all that are now necessary to give our coal interests entire stability and much profit. As we have already remarked, cheapness especially is requisite to a large consumption. These coal mines properly managed will contribute to the National wealth more surely than even our gold mines, and may be very properly put down in the National inventory as one of our most indestructible and valuable properties.

It is proper here to remark before dismissing this subject, that the Coal Exchange of Philadelphia have been taking very intelligent views of it. It appears that at the largest meeting of the trade ever held in that city, on the 23d inst., consisting of gentlemen whose mines produce more than five millions of tons per annum, the connection in progress between the Atlantic and Great Western Railroad, and the East Pennsylvania and Reading Railroads, making a through line from the West through the coal regions of Pennsylvania to the cities of New York and Philadelphia met with entire approval. They recognized the advantage of cheapened fuel, whether for domestic or manufacturing purposes, the increase of commerce by the increase of consumption, and the activities of transportation, particularly in this instance as the rates are to be those of New York, and charged only for the actual distances traversed. They wisely concluded that a reduction in price of even 50 cents per ton, would itself be of vast importance to Philadelphia, and that it would among other things, enhance its importance as the great coal market of the United States. We are pleased to see this liberal spirit prevailing among the Philadelphia dealers. They will find it is their true policy to increase all these facilities of transportation.

Our Western Connections—Marietta & Cincinnati Road.

We have from time to time called public attention to the value and importance of the Parkersburg line, connecting us, through the Baltimore and Ohio road, with the West, by means of the Marietta and Cincinnnti Railroad, two hundred miles in length between Belpre, opposite Parkersburg, on the Ohio River and Cincinnati.

From various causes this line has not as yet assumed the importance which its admirable location and its very extended connections would warrant us in expecting for it. It is now, however, about emerging from its difficulties, and bids fair to prove very soon all that its friends have hoped.

The Marietta and Cincinnati Railroad is one of the many similar enterprises in the West that encountered the financial storms of 1857, at a period of its advancement, which proved fatal to its credit, and forced it into a process of capitalization. By this process its entire indebtedness was converted into stock—former creditors becoming owners—thus uniting with the original stockholders in fixing a permanent basis of credit.

Upon this basis the company, as reorganized, have been able to raise means necessary to finish the road, and supply it with equipment sufficient for its large and increasing business. During the past three years over three million dollars have been expended in various works of completion and improvement. Two long tunnels, at points where the line was thrown over the hills upon high temporary grades—much of it supported by trestle work—have been completed: All the bridges on the line are new, and of the most excellent character. Passing over the rugged surface of Southern Ohio, several miles of its track, when just opened for public use, rested upon trestle work. These have been nearly all displaced with solid masonry and permanent embankment. Temporary grades, resorted to at first to save expense, have been cut down and the track ballasted with gravel or broken stone. The allignment of the road is remarkably favorable—nine-tenths of it being either straight line or curve of 2,865 feet radius. The maximum grade will be 55 8-10 feet to the mile. Next in importance to the completion of its main track is the fact that it has constructed an independent line, under its own charter from Loveland (its present point of intersecting the Little Miami road) to the city of Cincinnati. This new route sweeps around the city on the north and west, entering it by Mill Creek Valley. By this route the Marietta road is brought in direct connection with the entire railway system of the West, Northwest and Southwest, centering in Cincinnati. It has the use, in common with the Indianapolis road, of the new and splendid passenger depot recently built by that company on Pearl street. Ample grounds have also been secured in the same vicinity for the accommodation of an extensive freight traffic, and buildings for that purpose are now being erected. The very central position of these facilities in the city of Cincinnati afford most decided advantages for the vast amount of traffic now concentrating at that point, while the close connection with the other Western roads afforded by this line must give it a decided preference for *through* business.

By the first of February next the trains of the Marietta road will enter the city upon this new line. The public will then be offered a continuous uniform gauge, from the seaboard to the Mississippi River (over which traffic may be passed without change of cars,) extending from Baltimore westward so directly that for the whole distance to St. Louis the entire route will not vary one degree from an air line.

The ferryage of the Ohio River at Parkersburg presents the only break in the continuity of this rail line. This will soon be supplied with a permanent railroad bridge, now being constructed by the Baltimore and Ohio and Marietta Companies. The traffic of the Marietta road has steadily increased from an aggregate of $386,275, in 1857, to $1,222,000 in 1865. Of this traffic, eleven-twelfths is derived from *local sources*, composed of the minerals of the coal and iron district of Southeastern Ohio, and the agricultural products of the Scioto and Miami Valleys.

The company is now prepared to enlarge its operations in the direction of *through traffic*, and to this end have secured a good supply of new freight cars and new freight and passenger engines. Two daily passenger trains are now run in close connection with the Baltimore and Ohio road at Parkersburg. One of these trains is provided with new and elegant sleeping cars, not excelled by any in the West.

In a word, the Marietta and Cincinnati Railroad is now prepared to assume its proper geographical position as the *central link* in the great railway line, stretching from the Atlantic to the Pacific seaboard, across the Continent.

In connection with this subject, we learn that the necessary and important work of arching the tunnels on the Northwestern Virginia, or Parkersburg road is successfully progressing under the authority of the Baltimore and Ohio Company, which has also lately made much improvement in the track of the road between Grafton and Parkersburg, and are in other respects effectively working that section of their great line between the East and West.—*Baltimore American.*

☞ The Atlantic and Great Western Railway Company, under the terms of their agreement with the Morris and Essex Railroad Company, of New Jersey, have already contracted for the grading of the whole of the branch road from Denville to Bloomfield. The line will pass through Boonton, Little Falls and the Great Notch in First Mountain, and will be some twenty-three miles long. A corps of engineers are now engaged between Bloomfield and Paterson in staking out the proposed new road, preparatory to commencing work. The grading on this part of the route is to be finished during the present year, and also that portion between Denville and Boonton. At the same time the work, on the entire line of the road, is to be pushed forward with all possible despatch, and the contractors hope to have the whole completed within twelve months.

☞ The Senate of Virginia has adopted a resolution that the committee on roads inquire into the expediency and propriety of authorizing the Baltimore and Ohio Railroad Company to construct a railroad from Winchester to Salem, Va., a point on the Virginia and Tennessee railroad, 60 miles southwest of Lynchburg, and 229 miles southwest of Washington city. The object of the company being undoubtedly, to occupy the Shenandoah valley with a long Southern branch, to be operated as a part of the great Southern mail route to Baltimore, Philadelphia and New York.

Product of Portage Lake Mines for 1865.

The following from the Portage Lake *Mining Gazette*, gives the product of the Portage Lake Mines for each month of the year:

The total shipments of copper from this port during the past season were as follows: Ingot copper, 3,438 tons, 1,357 lbs.; mineral, 298 tons, 160 lbs.; total, 3,736 tons, 1,517 lbs.; showing an increase of 278 tons, 1,987 lbs. of ingot copper over the shipments of last year.

Custom House Receipts.

The gold receipts for customs at New York during the past four years are reported as follows by the *Journal of Commerce*. The receipts for the year 1861 were only $21,714,981 30. The gain in 1865 over 1864 is not owing so much to increased imports, or even a higher tariff on some articles, as to the fact that a greater proportion of the imports were thrown upon the market:

United States.....	.....	2 90	4,340 60
	$1,373,159 08	$1,381,140 82	$1,388,706 43

From the foregoing statement it appears that the increase in earnings in the past over the previous year, has been $93,220 71, and the increase in working expenses $33,374 97, in United States taxes $8,649 92, and in taxes paid the State of Massachusetts $5,050 01; making the total increase in expenses and taxes $47,074 90.

The directors congratulate the stockholders upon being the owners of a railroad that is virtually out of debt, having the means to pay the balance of their bonds, all of which are due on the first day of May next, leaving a balance of cash assets in the Treasury amounting to $53,567 18, and $72,482 22 in iron, fuel, &c., for carrying on the business of the company, making the total of assets $126,049 10. Since the road was opened in December, 1848, there has been paid in dividends to stockholders $1,007,364 13, and $296,236 53 of the earnings have been used in payment of debts created on account of construction of road and equipment. Since the construction account was closed by a vote of the stockholders in March, 1856, more than forty thousand dollars has been paid from the earnings, and charged to working expenses, for new engines, cars, &c., making the amount of earnings actually used in payment for road and equipment, more than three hundred and thirty-five thousand dollars.

The net earnings the past year, after payment of State and National taxes, amount to twelve dollars per share, or 16 per cent. on the whole amount of the capital stock, and they average from the opening of the road to the present time more than 7 1-2 per cent. on the whole amount of capital stock.

In June, 1850, the debt of the Co. was.	$467,419 97
And is now.....	35,500 00
In 1851 the int. paid on the debt was.	21,550 28
" 1865 " received was.....	3,059 91

In consequence of the large increase in the business, it has become necessary to increase the rolling stock of the company, and one new freight engine, two new passenger cars, and 20 eight-wheel freight cars have been ordered, to pay for which a large portion of the reserved cash assets will be required; and should the business continue to increase a further outlay for cars will be necessary.

President.—Geo. S. Rice.

Directors.—Geo. S. Rice, Stephen Salisbury, Alexander DeWitt, Jacob Fisher, Thomas Chase, Asa F. Lawrence, Francis H. Dewey, F. H. Kinnicutt and A. H. Bullock.

Treasurer.—T. W. Hammond.

Superintendent.—George W. Bentley.

Journal of Railroad Law.

CITY RAILROADS, RIDING ON THE PLATFORM.—PLAINTIFF'S NEGLIGENCE.

The late case of Meesel *vs.*. The Lynn and Boston Railroad Company, lately decided in Massachusetts, is an authority for the doctrine that riding upon the outside platform of a horse railroad car is not such conclusive proof of a want of ordinary care as to prevent a recovery for an injury sustained by being thrown therefrom.

The action was brought to recover damages for an injury sustained by being thrown from a car of the defendants.

It appeared upon the trial that the defendants were a corporation authorized to run cars drawn by horses over a street railway from Boston to Lynn. The evidence tended to show that the plaintiff was a passenger, having paid his fare, upon one of the cars, which was constructed in the usual manner, with a door and platform at each end; that the car was full, and he was told by the conductor to go upon the front platform with the driver, which he did; that five or six other persons were upon that platform; that the plaintiff was holding on to some small irons placed across the windows for their protection; and that in turning a corner from one street to another, the horses were driven at an unsafe rate of speed, and the wheels left the track, and were thrown back upon it with a violent jerk by coming into contact with a side track, and the plaintiff was thrown from the car, and received the injury complained of. There was upon the car an iron rail, running up the side and across the front of the car, for the purpose of assisting passengers in getting in and out. There was no notice forbidding passengers to ride upon the platform, and the defendants were in the constant habit of permitting persons to ride there, for pay, without objection. The defendants requested the court to instruct the jury that upon the evidence the plaintiff was not in the exercise of such care as would entitle him to recover; that if he chose to ride upon the platform, under the circumstances stated, he rode there at his own risk; and that as a matter of law, he was not entitled to recover. The judge declined so to rule, but submitted the case to the jury, upon the whole evidence, under instructions which were not excepted to.

The jury found for the plaintiff and assessed the damages $3,500. To the above refusal the defendants alleged exceptions.

Chapman, J.—Upon the evidence which is reported, the defendants requested the court to rule, as matter of law, that the plaintiff was not in the exercise of such care as would entitle him to recover. The court refused to make such ruling but submitted the case to the jury; and to this refusal the defendants except.

There are cases in which the plaintiff's evidence is held to be insufficient in law to establish the fact that he exercised ordinary care; and in such cases the court rule upon it as matter of law, without submitting it to the jury.

In Garrett *vs.* Manchester and Lawrence R.R. Co., 16 Gray, upon a train drawn by a locomotive engine. He went out upon the platform, and attempted to leave the car while the train was in motion. There being no dispute in respect to these facts. The court held that his conduct was careless. In Todd *vs.* Old Colony and Fall River Railroad, 3 Allen 18, and 7 Allen, 207, the plaintiff was riding in a car, which belonged to a train drawn by a locomotive. He sat upon a seat near an open window, with his elbow resting upon its base, but projecting beyond its external surface. As the train was in motion the part of his arm which projected beyond the window was struck by a substance which was outside the car. It was held to be careless to place his arm in such a position. In Gahagan *vs.* Boston and Lowell Railroad 1 Allen, 187, the plaintiff attempted to cross a freight train drawn by a locomotive engine while it was in motion, by passing between two of the cars, and this was held to be a careless act. The same doctrine was decided in Lucas *vs.* New Bedford and Taunton Railroad, 6 Gray 64. In all these cases the principle decided was, that the evidence was insufficient in law to prove that the plaintiff exercised ordinary care.

It is true that these decisions involved the consideration of facts as to which no evidence was offered. But they were well known facts in respects to the power, speed and management of railroad trains.

The rule of law on this subject is well stated in 1 Greenl, Ev. § 6, as follows: "Courts will generally take notice of whatever ought to be generally known within the limits of their jurisdiction." In the cases above cited, it ought to be known by all persons who have anything to do with railroad trains, that it is hazardous and inconsistent with the exercise of ordinary care to leave the seats provided for passengers, and stand upon the platform or attempt to leave the train while it is in motion, or to sit with an elbow projecting beyond the external surface of a window or to cross a moving train by passing between the cars.

But in respect to the facts stated in this report there is no such general knowledge as enables the court to say that the plaintiff did not use due care. On the contrary it is well known that the highest speed of a horse railroad car is very moderate, and the driver easily controls it, and stops the car by means of his voice, his reins and his brake. In turning around an angle from one street to another, passengers are not required to expect that he will drive at a rapid rate; but on the contrary might reasonably expect a careful driver to slacken his speed. The seats inside the cars are not the only places where the managers of the train expect passengers to remain, but it is notorious that they stop habitually to receive passengers to stand inside till the car is full, and then to stand upon the platform till they are full, and continue to stop and receive them even after there is no place for them to stand except on the steps of the platforms. Neither the officers of these corporations nor the managers of the cars nor the travelling public, seem to regard this practice as hazardous, nor does experience thus far seem to require that it should be restrained, upon the ground of its danger. There is therefore, no basis upon which the court can decide upon the evidence reported, that the plaintiff did not use ordinary care. It was a proper case to be submitted to the jury upon the special circumstances which appeared in evidence, as was done in Spofford *vs.* Harlow 3 Allen, 176.

Exceptions overruled.

Wilmington and Reading Railroad.

The Wilmington and Reading proposes to leave the Reading railroad at Birdsboro, forty-nine miles from Philadelphia, and will reach Wilmington in a distance of fifty to fifty-three miles—fifty miles if the route by Unionville is taken, and fifty-three if the route is down the Brandywine.

The difference in grades will add six cents to the cost of transporting a ton of coal to Wilmington over that of carrying it to Richmond wharves.

When we take into consideration that Wilmington is thirty-seven miles below Richmond, is below the Horse-shoe Bend, and generally below the point of ice blockade, is it unreasonable to expect, in view of a continued increase in the anthracite trade, that Wilmington will become in a few years a shipping port of some importance, both for anthracite and bituminous coals?

It is argued by some that the tendency of trade is to concentrate the coal shipping about large cities, by others that State and city pride will prevent the coals of Pennsylvania from being shipped at any point except Philadelphia.

Why should this be so? Wilmington is emphatically a tributary of Philadelphia, and the growth of Wilmington is the growth of Philadelphia.

By a comparison of distances from Pottsville, by way of the Reading railroad and Philadelphia (the present route of supply), and by way of the Wilmington and Reading railroad, it may be shown that our road must furnish anthracite coal to all consumers on the different roads it will intersect, both eastward and westward, as follows:

On the whole extent of the East Brandywine railroad from Waynesboro to Downington, and thence eastward on the Chester Valley railroad to a distance of twelve miles before being met by the supply coming westward from Norristown; on the Pennsylvania Central railroad from a point twenty-nine miles east of Downington to twenty-three miles west of Coatesville, or fifty-eight miles. By means of a short branch connecting with West Chester and the Media road we must furnish coal to West Chester, and as far east as to within six miles of Philadelphia, or twenty-three miles.

On the Baltimore Central railroad the range will be from its eastern end westward to within three miles of Port Deposit; in fact making Port Deposit almost as good a shipping point for the coal of Schuylkill county as for that of the Susquehanna region. On the Philadelphia, Wilmington and Baltimore railroad, coal will be carried eastward to Chester, and westward a distance of twenty-eight miles before it can be met by the supply coming from the Susquehanna.—*Wilmington (Del.) Republican.*

Finances of Massachusetts.

From the Report of the Auditor of the State of Massachusetts, it will be seen that the total receipts into the Treasury, for the year ending December 31, 1865, were $24,876,163 77, of which $1,534,985 22 was a balance from the previous year, and the disbursements for the same period were $23,916,790—leaving a balance of $959,373 67.

The receipts for 1866 are estimated at $1,400,000, and the disbursements at $4,400,000—leaving $3,000,000 to be provided for by taxation or otherwise. In this estimate no provisions has been made for the expenses of the Hoosac Tunnel, and the Troy and Greenfield Railroad; during the last year these expenses were met by a temporary loan of $800,000.

Of the total receipts, $7,268,661 96 accrued on account of ordinary revenue; and $16,072,516 59 on account of trust and other funds, including deposit and temporary loans. Of the total payments, there was disbursed on account of expenses payable from the ordinary revenue, $6,604,127 91, and on account of various funds, $17,312,662 09. It should be understood that of the total amount of revenue received, upward of $1,000,000 is to be refunded to the cities and towns on account of the corporation tax.

The total debt of the State on the 1st of January, 1866, was $23,047,873, an increase of $1,582,468 during the year.

The total military expenditure of the State was $6,244,933 68, of this $5,863,188 69 was used in the payment of bounties and other expenses. The amount chargeable to the United States is $3,545,023 48, of which $1,934,314 has been reimbursed, $621,435 is awaiting draft, and $989,273 remains unadjusted. This account, though large, is less than a sixteenth part of the expenditure of Massachusetts, including that incurred by her municipalities in the payment of bounties and and other war expenses, that of the latter amounting to full twenty-four millions, and that of the former to thirty millions, making the expenses actually paid on account of the war to have exceeded fifty-four millions.

The amount expended for charitable purposes in 1865, was $370,957.

All the banks originally organized under the general banking law of this State have now ceased to exist, *de facto*, having become National institutions under the laws of the United States. Their State circulation has been called in and destroyed with such rapidity that the amount outstanding, Jan. 1, 1866, was only $142,950, for which the Auditor's Department held first class securities amounting to $174,500.

The expenses for reformatory and correctional purposes amounted to $216,092.

Railways of the United Kingdom.

The Board of Trade returns present the following details relative to railways during the last sixteen years. The mileage calculations of the number of passengers and money receipts as here given by the Board of Trade are not strictly accurate, as the number of miles open at the close of the year are used as the divisor, while the traffic figures relate to the whole year:

	Length of Lines open at the end of each Yr.	Total Capital Paid up (Sh's, Loans, &c.) at the end of each Yr.	Number of Passengers conveyed (including season ticket holders.)		Total of Traffic Receipts.		Total of Working Expenses.	Net Receipts.
	Miles.	£	Total. No.	Per Mile. No.	Total. £	Per Mile. £	£	£

NOTE.—The total Capital includes subscriptions by some of the railway companies to other undertakings, and was in excess of the sum paid up by £13,095,985 in 1863.

Southern Pennsylvania Railroad.

The Southern Pennsylvania Railroad, is now, we believe, located and ready for allotment of work to contractors. The road will be built east to the Cumberland Valley Railroad, which latter, we hope, it will absorb by merger, and thereby, whilst carrying the Southern Pennsylvania Railroad east to Harrisburg, will at the same time infuse new ideas, new vitality, new usefulness into the Cumberland Valley Railroad, which, for the interests of the Cumberland Valley, ought to be absorbed by consolidation with the Southern Pennsylvania Railroad, which would then have its eastern terminus on the Susquehanna river and its western terminus at Connellsville or the Ohio river. —*U. S. R. R. & Mining Reg.*

☞ A branch of the Baltimore and Ohio Railroad, from a place near the Point of Rocks to Washington county, Maryland, is about to be constructed. This will open the rich valley of the Cumberland to the Baltimore market, and give increased supplies of wheat and flour. There are now three hundred locomotives and four thousand cars on the Baltimore and Ohio road, and still the amount of freight offering is far in advance of the means of getting it forward. The company is making exertions to meet this enormous demand. The bridges over the Ohio at Parkersburg and Bellair are making rapid progress. The Parkersburg branch is daily improving, so that the oil of West Virginia will find an easy outlet eastward.

☞ The Philadelphia and Erie and the Pennsylvania Railroad Companies have applied for a special injunction to prevent the Catawissa railroad Company from crossing the road of the Philadelphia and Erie Company to connect with Oil Creek Railroad at one terminus thereof, and at the other terminus with any road chartered by the State of New York. The bill also charges that the purpose of the defendants is to construct a road by which the trade of the oil regions is to be deflected from Philadelphia to New York.

☞ The total indebtedness of the State of Delaware is $110,000, except 170,000 in bonds issued to the Delaware Railroad Company, as security for which there is a mortgage on the road, guaranteed by the Philadelphia, Wilmington and Baltimore Railroad Company. The total amount of tax paid by the Philadelphia, Wilmington and Baltimore Railroad for eleven months, ending with October was $19,782 60. The Governor recommends that the Legislature grant authority for converting the state banks into national banks.

☞ In the Maryland senate bills have been reported favorably authorizing the County Commissioners of Washington county to subscribe to the capital stock of the Western Maryland Railroad Company, and also authorizing the Mayor and City Council of Baltimore to subscribe to the capital stock of the Western Maryland Railroad Company to an amount not exceeding $200,000.

☞ The supplement to the Morris and Essex Railroad Company's charter, ratifying the lease of that company to the Atlantic and Great Western Railway Company, was taken up on its third reading, in the New Jesey State Senate, on Thursday, and after being amended so as to provide that no act heretofore performed by the Morris and Essex Company, of an unlawful character, by way of contracts, should be ratified by this act, passed unanimously.

☞ The Indianapolis *Journal* says that the Louisville, New Albany and Chicago Railroad Company offer at private sale the unfinished line of the branch road, commenced to be constructed by said company from the town of Gosport, in Owen county, toward that city. The right of way has been procured, and about twenty miles of the line between Gosport and Mooresville is in a great part graded and bridged.

☞ Mr. J. H. POTTER has been appointed Superintendant of the Sandusky, Dayton and Cincinnati Railroad.

American Railroad Journal.

Saturday, February 3, 1866.

Stock Exchange and Money Market.

The most interesting topic in our financial circles the past week has been the panic in the British money market, and the characteristic attempt of the London *Times* to make American commerce responsible for it. It openly asserts that our importers have taken more goods from the English work shops than they have been able to pay for, and that our defalcation, for it is nothing more nor less than this, is at the bottom of this foreign difficulty. We have good reason to believe that this story is made out of whole cloth. The *Times* has in fact had its statements refuted by its own correspondents, and our own information derived from the best home authorities, is to the effect that the charge is groundless. During the war there was a very great shyness displayed by British merchants towards all American transactions, except where they were of a contraband character, and our own, were equally cautious, not to go largely into transactions, the result of which the wisest could not foresee. Our markets were become quite bare of foreign goods, and it is preposterous to say that in the last ten months we have over-traded to such an extent as to endanger our solvency, or impair that of the English dealers. On the contrary, our shipments of specie have been large and constant, and more recently, if these have fortunately diminished, we have remitted in their stead very large quantities of cotton in a legitimate way, and quite enough to make up any deficiency in our cash remittances. Besides, our exports have for some months past been largely on the increase. If we were so deeply in debt as the *Times* alleges, gold and exchange would have risen rather than fallen, a fact which speaks volumes. But what do the well informed of the British journalists themselves say on this subject. In addition to the denials of the London *News*, we find in the Iron Trade *Circular* of Birmingham, a periodical thoroughly posted in the financial and manufacturing interests of its own country and ours, some interesting statements bearing on this question, and in reply to the *Times*. It publishes a table showing the iron exports from Liverpool to the United States for the last twelve years, proving most conclusively there has been no over-trading on the part of the Iron trade. On the contrary it is now and recently has been below the average. It goes further; it says. "It is not just to impute the present difficulty, for such it is, in money, to a speculative overplus of consignments to the United States. Of what could they consist! Not of cotton goods certainly, for our manufacturers had no stock on hand, not of hardware, nor of iron, pig, or manufactured, for of the first the rise has been distinct, progressive and moderate; and as regards the latter, the figures we have given, contradict the statement that we have in any way exceeded or even reached the average supplies of the last 12 years. Since every supply sent out, as far as our knowledge goes has been distinctly justified by the demands of the American markets, recorded in their own Trade reports." After such an admission as this, we think the assertions of the *Times* may be dismissed without hesitation, as being entirely groundless.

It is well to notice that while in England American credit and securities are constantly assailed by these cavillers, on the continent they are growing in favor. The same Circular from which we have already quoted, says "it will be hardly credited that within the last two months only, Germany has bought ten millions of the National debt of the United States, and the investment is still proceeding. It is supposed that the bills lately drawn on Frankfort on account of these bonds amount to 70,000,000 florins, a total never before reached. The claims on the Frankfort Bank have been extensively heavy, amounting on an average to almost a million of florins daily."

As long as "the mania for American bonds continues, we shall experience a constantly increasing pressure." "Already mortgages on houses for which 4 per cent. was a full rate, are now not freely taken at 5 per cent." "This is a matter of serious importance to our Money Mar-

ket." It is Frankfort then, the *Times* shall assail and not the United States. The truth is, American securities are rising in the estimation of the financial world. All we have to do is to keep them in a sound condition, and they will take precedence of all others.

In connection with this requirement, we have to notice the recent report of the United States Revenue Commission, made to the Secretary of the Treasury by Messrs. Welles, Colwell & Hayes, the former best known for an excellent pamphlet on the burden and resources of the country. The report is considered an able one, examining all the present and future sources of revenue, the defects of the present system, the remedies, and the probable result of an improved one. It proposes the abrogation of many kinds of taxation which are extremely offensive, and produce but little revenue, and looking to simplicity in the choice of taxable products, and the application of sound principle to transactions which can best bear taxation, predicts a very large increase to the annual receipts of the Treasury, as much in the total as $435,000,000. The report gives a very unfavorable picture of the practical working of the Treasury Department, and recommends a wholesale change in its internal arrangements. We highly approve of the practice of referring the consideration of such questions as these to special commissions. Congressional committees are rarely competent to the task, or willing to give it their deliberate attention. In Great Britain the ablest reports of this character are obtained in a similar manner, and it is to be hoped the practice will obtain with our Government.

The weekly return of the New York associated banks to January 27, shows the following result: Increase of loans, $1,070,110; in circulation, $490,176; decrease in specie, $2,158,613; in deposits, $3,803,794; in legal tenders $2,480,746. The decrease here stated is attributed to the flow of temporary deposits into the Sub-Treasury with how much truth, however, we are unable to say, except in the instance of specie, it being known that the customs receipts for the last week amounted up to $3,226,000.

Government stocks are firm, and in fair demand. Railway securities and shares generally are chiefly under the control of "professional operators," the outsiders choosing to remain outside at present. A very large number of persons have turned their attention to the purchase and sale of stocks, and when we consider the enormous amount on the market, and the fortunes made even by the handling of them, we do not wonder at the liveliness of the street, nor the activity of the dealers. The present system of inflation, loans and currency affords golden opportunities to the quick-witted habitues of the street, and they are not in favor of any financial policy which would narrow and check their operations. We notice that some of the most prominent, occasionally venture into print to sustain the present system, but their opinions are too much the result of self-interest to be authoritative.

We notice from the Price Currents a general decline in prices, as in the case of flour, which in the last week has fallen off nearly a dollar per bbl. If our paper dollar can be made to appreciate, we can bear a more gradual return to old prices, for it is evident that 100 cents to the dollar will buy more even of a high priced article than 70 cents. This fact seems to escape the attention of many writers on the subject of the currency, though it is one of the greatest importance to consumers.

The gold market is rather drooping, though it had a spasmodic rise of about 1 per cent. at the beginning of the week. It is now pretty well understood that the next crop of cotton is to be a much better one than was anticipated. The freedmen have in many of the cotton States returned to the "shovel and the hoe," which they in the end will find their best friends, and lead to independence and respectability much sooner, than idle, dreaming and foolish talk. The question of suffrage may very well be postponed until food and clothing are certain; it is one which made no issue in the war, was not decided by it, and should not be interpolated and thrust in now as any incident of the conflict, or offering a conclusion to be drawn from it. Any new question raised at this time will have the effect to postpone the financial recovery of the reconstructed States, whose aid is now wanted for the support of the National credit, and should not be postponed for abstractions, however plausible.

We have to remark that the stock of our city banks continue to bear a high price in the market. We notice that some institutions stand at high figures; the 1st National at 210–15, others at 140–50, and a large number at 110 and upwards. It is evident that these institutions are prospering greatly under the present condition of affairs.

Foreign exchange is dull, and two per cent. below par for 60 day commercial bills, a pretty conclusive evidence that our importers are not pushed by their foreign creditors if they have any. The gold receipts for customs at this port for the last four years are thus stated: 1862, $52,254,116 32; 1863, $58,880,054 42; 1864, $66,937,127 11; 1865, $101,772,965 94. It is believed that this increase in the last year is owing considerably to withdrawals from warehouse of imports of a previous date.

One of the remarkable sources of our mineral wealth is the Lake Superior copper region. About five thousand four hundred tons of this valuable metal have been produced there during the past season. The difficulties in Chili have considerably enhanced the price of this article in Europe and this country.

It is perceived as we have already mentioned, that gold has slightly advanced in the market. It has got up to 140, and if things continue as they are, we may expect a still further rise. The most vigorous efforts are being made wherever they can be of effect to prevent an early return to specie payments, or in other words giving our currency an increased purchasing power and more value. Two months time has been passed by Congress without making the least progress toward this desirable object, the Secretary instead of being cheered on in his policy, is kept on the defensive by the advocates of inflation and high prices, and has to bear the unpopularity of doing nothing when it is not his fault that action does not take place at once. If gold is to go up again to anything like its old prices, the sufferings of the people at large will be intense. They must in a large majority of cases do without many of the necessaries of life, for prices will go up again. Every per cent. rise in gold is followed by 5 and 10 per cent. rise in currency prices. From this oppressive state of things we were beginning to escape, and the talk of resumption, a coming event, cast its friendly shadow before it. But if we are to be tied up by the influences of paper money, and delivered up to the mercies of speculators and money changers, we see before the people of this country a fate of which they do not even dream. We may see them at last in two classes only, the rich, made so without labor or industry, but by our financial embarrassments, and the poor, whose whole efforts will be necessary to obtain food. The enormous fortunes made in the last four years by contracts, stock gambling and other methods which a redundant currency generates, are already seen to influence very badly the tone of American society, if not to sap its morals. When we therefore advocate a return to a sound currency, we are perhaps without knowing it, advocating the best interests of the State and of individuals, we are in fact talking religion itself in its most practical form.

The exports from this port for the week ending January 30, exclusive of specie, were $3,449,470.

The business of the Sub-Treasury was something on the same scale, the balance on Wednesday having swelled to $7,620,030.

For the weekly changes in prices, we as usual refer our readers to our tables.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Management of Switches.—Ball's Safety Patent.

It is well known that most of the serious accidents which occur to railway trains are owing to the neglect of the switches, and the forgetfulness of those in charge of them.

Mr. Milton Ball, of Canton, Ohio, has invented a very simple and economical plan by which these dangers may be avoided, and perfect attention on part of the switch tender secured. It consists of a small enclosure at the side of the track in which a vertical lever is placed and by which the track is changed.

The same motion of the lever which produces this change, by an ingenious arrangement closes the place or structure in which the switch tender is obliged to be, and at the same time shuts him in. He cannot get out without moving the switch back again to its ordinary place, a positive and practical demonstration of the alteration it is impossible not to perceive. In this way he is in fact compelled to do his duty, and entire safety to the train and passengers is obtained in a purely mechanical way.

The expense of the arrangement is very trifling, as it is applicable without the least difficulty to the ordinary switches in use.

Improvement of the Hudson River.

The navigation of the Hudson river has from time immemorial, even during the days of the first settlers at Albany been interrupted by the creation of bars below that city. Even the small sloops of 80 tons were some times unable to get up to the town. Every few years spasmodic efforts have been made by the State Legislature to improve the navigation, and considerable sums have been expended for this object. Within the last three years, the attempts under a commission have been more persistent and successful. Liberal appropriations have been made by the Legislature, and the funds have been prudently expended. The Commissioners have performed their duties in the most faithful and satisfactory manner, and the improvements made have been really very great. Their report for 1865 has just been published. The expenditures for the year are stated to be $116,072 24, of which $67,365 07 were for the dyke at Cuyler's bar. The Commissioners recommend the following means for the improvement of the river:—

"The experience of the past has demonstrated that an increased depth of navigable channel can be had to almost any desirable extent, by use of means as stated in the report of the Commissioners appointed under act chapter 122, Laws of 1863, as follows: 'To cut through the shoals by dredging, to narrow and straighten the channel by constructing parallel piers or dykes, increasing its velocity by confining the water, and to depend on its downward flow, thus accelerated, to scour out the channel and prevent the formation by deposit of new shoals. By this means the flood-tides are caused to flow upward with less impediment and friction, and consequently with increased velocity and volume. By these processes the navigation is aided not only by deepening the bed of the river, but also by the water rising faster and higher."

If the Clyde has been deepened so as to admit ocean vessels we do not see why the Hudson can not be equally improved.

New York and New Haven R. R.

It having been finally decided by the courts that the New Haven Railroad Company must pay the bonds fradulently issued by Schuyler, the Directors have voted to increase the capital stock of the road to $5,000,000, which will raise enough funds to meet the amount required. On the 27th ult. the subscription books were opened, and all who were stockholders then will be allowed to subscribe for the new stock by surrendering two and a half shares of their old stock for one of the new, and paying for the new stock seventy-five dollars per share. The capital stock of the company was formerly $3,000,000. The amount of fraudulent bonds was $2,100,000. A large part of these were bought up by compromising with the holders, the capital stock being increased to accomplish it. The present increase will now pay up all the liabilities caused by the fraudulent issue. The road is considered worth $10,000,000.

Texas Railroads.

The railroads in Texas complete and in operation, are from Galveston to Houston 40 miles, from Houston to Millican 80 miles, from Harrisburg to Alleyton 80 miles, from Houston to Columbia 45 miles, from Hempstead to Brenham 30 miles, from Houston to Beaumont 75 miles, and from Marshall to Shreveport 40 miles. Total distances, 390 miles. Besides these, a road from Indianola to Victoria, 40 miles, has been long contemplated and partly graded, and one from Brazos Santiago to Brownsville, 30 miles, is in progress. But the great railroad enterprise, which is beginning to eagage the attention of the people, is the Kansas City and Galveston Railroad.

☞ Articles of incorporation of a new railroad company called the "La Crescent, Rochester and Yankton Railroad Company," has been filed with the Minnesota Secretary of State. The object is to construct a railroad from the Mississippi River through the Southern tier of Minnesota counties to the Missouri River. The capital is $10,000,000.

☞ The earnings of the Philadelphia and Erie Railroad for the six months ending December 31, 1865 amounted to $1,333,471; corresponding period of 1864, $648,939—showing an excess of $684,532 for last six months of 1865 over corresponding period in 1864—an increase of nearly 106 per cent.

Anthracite Coal Trade of the United States.

The following table will show the number of tons of coal sent from the different coal regions in 1864, and 1865:

	1864. tons.	1865. tons.
Schuylkill Region:		
By Reading Railroad	2,763,374	*2,813,176
" Schuylkill Canal	1,000,500	1,022,740
From Pinegrove	24,534	†18,485
By Mahoning and Lehigh	132,808	218,378
Total	3,921,216	4,072,779
Less Lehigh, Shamokin and Lackawanna	272,153	336,977
	3,649,063	3,735,802
Lehigh Region:		
By Lahigh Valley Railroad	1,295,419	1,402,277
" Canal	758,087	888,784

Imported—foreign	510,708	685,052
Total	1,749,432	2,068,538
Add anthracite	9,998,046	9,488,396
Total tons	11,747,478	11,556,934

CENTRAL NEW JERSEY RAILROAD COAL TONNAGE.

The quantity of coal transported over the Central Railroad of New Jersey from 1861 to 1865, was as follows:

	Lehigh tons.	Lackawanna tons.	Total tons.
1861	254,367	568,869	823,935
1862	311,296	502,375	816,571
1863	435,729	613,254	1,049,683
1864	474,221	675,743	1,149,964
1865	579,619	494,687	1,004,306

Of the above quantity 87,217 tons Lehigh, and 10,895 tons Lackawanna, in all 98,111 tons, were used on the line; the balance reached Elizabethport.

* The whole coal tonnage of the Philadelphia and Reading Railroad, including the Lebanon Valley Branch, was in 1865, 3,090,814 tons. Only the coal carried from Schuylkill County is embraced in this table.

† The whole trade from Pinegrove was 157,840 tons. The balance is embraced in the railroad report.

‡ Of this quantity 47,025 tons were sent *via* Delaware and Hudson Coal Company's Canal, and 530,457 tons by rail to Newburg.

SCHUYLKILL REGION.

The quantity of coal sent to market from the Schuylkill region in 1865 was 3,735,802 tons.

MAHANOY COAL TONNAGE.

The number of tons of coal sent from the Mahanoy region in 1865 was 1,823,655
In 1864 1,501,518

Increase in 1865 322,137

Nearly half the coal mined in 1865 came from the Mahanoy and Locust Mountain Regions.

LATERAL RAILROADS.

The following is the tonnage of the different lateral railroads in Schuylkill County, in the years 1864 and 1865:

	1864.	1865.
Mine Hill and S. Haven	1,517,357	1,579,494
Mill Creek	436,163	326,367
Mahanoy and Broad Mt.	776,670	802,885
Schuylkill Valley	230,961	222,629
Mount Carbon	115,637	101,826
Little Schuylkill	537,396	585,535
Lorberry Creek	164,381	111,773
Swatara	46,835	46,067
	3,826,400	3,776,575
Union Canal	212,216	157,840

The coal that passed over the Union Canal Railroad is received from the Lorberry Creek and Swatara roads. The Mahanoy Coal also passed on the Mill Creek Railroad, making the tonnage of that road in 1864, 1,212,833 tons, and in 1865, 1,129,252 tons.

MORRIS CANAL COAL COMPANY.

The following is a statement of the amount of coal which entered the Morris Canal since 1861:

	Lehigh coal from Canal	Railroad	Total	Scranton Coal	Total
Years.	tons.	tons.	tons.	tons.	tons.
1861.	272,616	1,401	274,017	140,922	414,939
1862.	106,431	45,738	152,169	172,128	324,297
1863.	208,397	48,234	256,631	145,815	402,446
1864.	194,097	37,644	231,741	151,122	382,866
1865.	217,814	74,171	291,985	124,204	416,189

EAST PENN. RAILROAD COAL TONNAGE.

The coal trade of the East Pennsylvania Railroad from the Lehigh Region, was:

	tons.		tons.
In 1860	11,030	In 1863	9,526
" 1861	10,622	" 1864	9,341
" 1862	6,667	" 1865	8,845

NORTH PENN. RAILROAD COAL TONNAGE.

Quantity transported over their road from the Lehigh Region in the following years:

	tons.		tons.
In 1858	73,124	In 1862	103,947
" 1859	80,432	" 1863	113,680
" 1860	91,327	" 1864	123,475
" 1861	98,389	" 1865	129,695

PHILADELPHIA AND READING RAILROAD.

Amounts of coal received from various lateral railroads in Schuylkill coal Region:

Schuylkill Valley Railroad	95,294
Mill Creek Railroad	228,286
Mahanoy and Broad Mt. R. R.	702,926
Do., from Shamokin and Pottsville R.R.	9,895
Total at Port Carbon	1,036,401
Mt. Carbon R. R. at Mt. Carbon	38,911
Minehill and Schuylkill Haven R. R. at Schuylkill Haven	1,072,836
Schuylkill and Susquehanna R. R. at Auburn	143,078
Little Schuylkill R. R. at Port Clinton	521,950
	2,813,176
Bituminous and anthracite from Harrisburg and Dauphin	277,638
Total of all	3,090,813

SCHUYLKILL NAVIGATION COMPANY.

The number of tons of coal transported by this company in 1865, was 1,022,740 against 1,000,500 in 1864. The supply for the line in 1865 was 87,250 tons, and sent south of Philadelphia, 46,893 tons.

COAL TRADE OF THE LINE.

The trade of the line between Pottsville and Philadelphia and on the Lebanon Valley Railroad was as follows in the last five years:

Years.	Railroad.	Canal.	Total.
1861	278,647	156,673	435,320
1862	416,856	129,060	545,916
1863	548,755	122,834	671,589
1864	634,074	114,364	748,448
1865	659,379	87,250	746,629

Of the above tonnage 620,275 tons were delivered at the following points on the line where there are iron works.

	Railroad.	Canal.	Total.
Leesport	4,843	12,912	17,755
Reading	147,697	28,369	176,566
Birdsboro'	11,216	2,036	13,252
Pottstown	12,626	919	17,545
Phœnixville	67,567	252	69,819
Norristown	109,019	1,883	110,901
Conshohocken	8,157	1,824	10,081
Spring Mills	....	15,256	15,256
Swede's Falls	4,756	.....	4,756
Manayunk Falls, Nicetown & Germant'n.	113,616	5,713	119,329
Robeornia, (Leb. Val.)	15,345	.....	15,345
Lebanon (")	49,670	.....	49,670
Supply in 1865			620,275
Supply in 1864			655,798

Decrease at these points in 1865 35,523

—Caused by the stoppage of the iron works a considerable portion of the season.

QUANTITY SENT TO PHILADELPHIA.

The following is the quantity of coal sent to Philadelphia in the following years by railroad and canal:

	Railroad.	Canal.	Total.
1861	273,473	473,965	747,438
1862	316,631	290,583	607,214
1863	388,352	237,563	625,915
1864	373,070	307,430	680,500
1865	380,238	296,925	677,158

The quantity of Schuylkill Coal consumed on the line of the railroad and canal, exceeds the quantity delivered at Philadelphia for consumption.

The receipts of coal at Port Richmond were as follows since 1861:

	Tons.		Tons.
1860	1,886,447	1863	2,128,154
1861	909,112	1864	2,058,423
1862	1,825,400	1865	2,051,202

The loss and gain for 1864 and 1865, at the following points we sum up as follows:

	1864. Loss.	Gain.	1865. Loss.	Gain.
On the line	.....	76,859	1,819	.....
At Philadelphia	.....	54,587	3,842	.....
At Richmond	69,731	.....	4,221	.....
Eastern trade by canal	.....	53,560	.....	12,966
	69,731	185,006	9,882	12,966
		69,731		9,882
Gain in 1864 and 1865		115,275		3,584

LEHIGH VALLEY RAILROAD.

The number of tons of coal distributed on the line of the Lehigh Valley Railroad in 1865, was 1,402,277; in 1864, 1,295,419—increase in 1865, 106,858 tons.

LOCUST MOUNTAIN COAL AND IRON COMPANY.

The quantity of coal mined and sent to market by this company in 1865, was 366,997 tons.

DELAWARE AND HUDSON CANAL COMPANY.

The number of tons of coal mined and forwarded on the railroad of this company for the year ending December 15, 1865, was 812,094
Same period last year 886,841

Decrease in 1865 74,747

CONSUMPTION OF COAL ON THE LINE.

Of the total supply of anthracite in 1865, 9,488,396 tons, about 2,205,109 tons were consumed on the lines of the different avenues to tide water and the interior. There were consumed on the line of the Schuylkill 746,629 tons, and on the Lehigh 505,858 tons.

LEHIGH COAL TRADE.

The quantity of coal sent to market from the Lehigh Region by the different operators in 1865, was: by railroad 1,046,626 tons; by canal 723,669 tons—total, 1,770,295 tons; and from the Schuylkill, Wilkesbarre, etc., 520,766—making a total of 2,291,061 tons.

LEHIGH NAVIGATION COMPANY.

The following is the distribution of coal carried by the Lehigh Navigation Company in 1865:

	Tons.
Consumed on line of Lehigh Canal	82,235
Entered Morris Canal at Easton	217,813
Entered Delaware and Raritan Canal	399,067
Consumed on line of Delaware Division	28,930
Arrived at Bristol	160,739
Total shipments in 1865	888,784

SHAMOKIN COAL TRADE.

The number of tons of coal sent from the Shamokin Region, by the different operators in 1865, was 457,162; in 1864, 333,478 tons—increase in 1865 of 123,684 tons.

Of the 457,162 tons of coal from the Shamokin Region in 1865, 283,875 tons passed over the Minehill and Schuylkill Haven Railroad, against 210,360 in 1864—making an increase in 1865 of 73,515 tons; the balance was sent *via* Sunbury to market.

LITTLE SCHUYLKILL RAILROAD.

The quantity of coal transported over this road during the year ending November 30, 1865, by the different operators, was 585,534 tons.

DELAWARE, LACKAWANNA & WESTERN RAILROAD COMPANY.

The coal business of this company in 1864 and 1865, was as follows:

	1864. Tons.	1865. Tons.
Amount sold at mines	2,984	923
" shipped North	342,382	271,519
" " South	957,747	734,445
	1,303,113	1,006,887

The total shipments since the opening of the road have been 9,620,700 tons.

BLOSSBURG COAL TRADE.

The following is the quantity of coal transported over the Blossburg and Corning Railroad since 1860:

	Tons.		Tons.
1860	96,918	1863	235,848
1861	112,712	1864	384,977
1862	179,334	1865	394,632

BARCLAY COAL TRADE.

The quantity of coal sent to market in 1865 from the Barclay Region was 68,463 tons.

SCHUYLKILL AND SUSQUEHANNA RAILROAD COAL TRADE.

The following is the quantity of coal transported over the Schuylkill and Susquehanna Railroad in 1865, and the following years:

1865.	East.	West.	Total.
From Pine Grove	143,502	18,458	161,987
" Dunphin, West	.....	.....	20,625
" Auburn, West	.....	.....	4,169
			186,781
In 1864	191,391	24,534	240,057
In 1863	189,254	48,449	237,703
In 1862	146,095	53,842	199,937
In 1861	101,523	91,820	193,343
In 1860	94,975	14,718	109,693

The road is now owned and worked by the Reading Railroad Company.

COAL TRADE OF ELIZABETHPORT.

The quantity of coal received at Elizabethport, New Jersey, by the different companies and shippers in 1865, was 906,195 tons. Of which 422,402 tons were from the Lehigh, Schuylkill and Wilkesbarre Regions, independent of that sent from Scranton by the Delaware, Lackawanna and Western Railroad Company.

CUMBERLAND COAL TRADE.

The quantity sent to market in 1865 from the Cumberland Region was as follows:

By railroad	560,293
By canal	343,202
Total	903,495
In 1864	665,605
Increase in 1865	237,890

The above is for the year ending September 30, 1865, and corresponds with the other reports. The full supply sent to market for the full year of 1865, by the Baltimore and Ohio Railroad is as follows:

Quantity sent through to Baltimore	502,689
Delivered on line of road	51,539
Transported for use of company	175,277
Delivered at Baltimore for use of three steamships	16,000
Total quantity transported in 1865	745,505

This is the heaviest quantity of coal ever transported over the road in a single year, and it would have been larger if the trade had not been retarded in the early part of the year by Government transportation of troops, &c. They expect to increase the coal shipments considerably in 1866.

BELVIDERE DELAWARE COAL TONNAGE.

The number of tons of coal transported over this road in 1864 and 1865, is as follows:

	Through.	Way.	Total.
1864	161,278	13,095	174,323
1865	202,781	11,585	214,345

CATAWISSA RAILROAD COMPANY.

The coal tonnage of this road has been as follows:

	Lacka. tons.	Lehigh. tons.	McCaully Mt. tons.	Bitu. tons.	Total. tons.
1861	6,553	6,220	1,997	1,029	15,799
1862	46,689	85,539	3,282	1,536	137,046
1863	101,934	43,887	7,477	308	153,606
1864			No Report.		
1865	22,286	3,367	546	6,004	32,203
Total	177,462	139,013	13,302	8,877	340,654

IMPORTATIONS AND EXPORTATIONS OF COAL.

The quantity of coal imported into the country and exported during the years 1864 and 1865, was as follows:

Imported.	1864. Tons.	1864. Value.	1865. Tons.	1865. Value.
Paying duty	246,117	$764,311	219,116	$568,106
Under Reciprocity Treaty	264,591	885,677	466,036	1,210,004
	510,708	$1,649,988	685,052	$1,788,110

Exported.	1864. Tons.	1864. Value.	1865. Tons.	1865. Value.
Domestic	173,021	$1,207,802	*133,438	$1,348,371
Foreign	2,018	31,456	.....	.....
	175,039	$1,239,258	132,438	$1,348,371

* No returns were received from New Orleans, or San Francisco for the 1st and 2d quarters of 1865.

Interest and Dividends.

The Milwaukee and Prairie du Chien Railroad Company has declared a dividend of 4 per cent. on the first preferred stock, and 3½ per cent. on the second preferred, for the six months ending January 22, 1866, both payable Feb. 1; after which date the mortgage bonds can be converted into 1st preferred stock.

The Northern Central Railway Company have declared a quarterly dividend of 2 per cent, clear of National and State taxes, payable 20th Feb.

The Pennsylvania Railroad Company have declared a semi-annual dividend of 5 per cent. clear of all taxes. It is understood that after declaring this dividend the company have left in the treasury a reserved fund of $3,000,000.

The Wyoming Valley Railroad and Coal Company will pay a dividend of 5 per cent. Feb. 17.

The Long Island Railroad Company will pay a quarterly dividend of 2 per cent., February 26, at the National Bank of North America.

☞ The earnings of the Middleboro' and Taunton railroad for the past year were: from passengers, $11,408 07; freight, $9,496 73; mail, $600; total, $21,504 80. Expenses, $21,453 41. Profit, $51 39. The following list of Directors was chosen: J. B. Tobey, E. Tucker, P. Tillinghast, W. A. Crocker, C. Robinson, Albert Field. President, J. B. Tobey; Superintendent, A. E. Swasey.

☞ Major Gen. Burnside having been elected President of the Reno, Oil Creek and Pithole Railroad, Major J. L. Wilson of Indiana, and one of the Directors of the Reno Oil and Land Company, has assumed the position of Superintendent. About eight miles of track are laid upon this road and the work is progressing at the rate of half a mile per day.

☞ The Senate of Maryland has unanimously passed the bill authorizing the Mayor and City Council of Baltimore to subscribe to two hundred thousand dollars of the capital stock of the Western Maryland Railroad Company. This bill had previously passed the House, and is therefore a law.

☞ The Directors of the Oil Creek Railroad at a recent meeting, elected S. W. Steward, Esq., of Corry, President, and H. F. Sweetser, Superintendent.

☞ The Tideoute *Chronicle* reports three hundred hands at work, grading the new road from Irvine to Oleopolis.

☞ The Baltimore and Ohio Railroad Company have assumed the management and control of the Winchester and Potomac Railroad.

☞ Only four miles of the Norfolk and Petersburg Railroad remain to be repaired, when the connection by rail between Norfolk and Memphis, Tenn., will be unbroken, save at Lynchburg. This break in the great chain of railroads will be filled by the 1st of February.

☞ The bridge over Difficult Creek, Va., on the Loudoun and Hampshire Railroad, has been completed. This completes the repairing of the road for a distance of about twenty-two miles.

☞ The bridge over Neuse River, on the North Carolina Railroad, has been repaired, and the cars are now running through to Goldsboro.

European and North American Railroad.

Notwithstanding the disinclination of the public to invest in the stock of new railroads, the *International* Railway Company, as our Provincial neighbors call this line, which is to connect the maritime Provinces with New England, seems to be in a fair way of success. We have before us an official note from the Premier of New Brunswick certifying to the fact that the entire line from Truro, in Nova Scotia, to Moncton, in New Brunswick, is under contract to the International Contract Company of London, which secures the completion of the road between Halifax and St. John in four years.

From St. John to the boundary of Maine, a distance of 86 miles, the work is under contract to the European and North American Railroad Co., of Maine, who have sub-let the New Brunswick portion to Messrs. Pierce & Blaisdell of this city, under whom the construction is now being carried forward, commencing at the Suspension Bridge. Should anything interfere to delay the work on this side the boundary, the New Brunswick line will go forward, connecting with the Woodstock Railroad, and making all the upper St. John country tributary to the city of St. John.

The distance from St. John city to the line of the St. Andrews and Woodstock Railroad is 80 miles; from thence to Houlton, Maine, 47 miles, from thence to Little Falls, on the St. John, about 100 miles, the point which the American line is designed to reach, by the same route from Houlton.

The people of Bangor are alive to the importance of this road to them and their city. They have subscribed handsomely to the stock of the American company (or a large portion of them have,) and in their zeal for the road have asked the city to extend further aid by a loan of credit.

The Railway Company rely on aid from Massachusetts by a sale of land bonds, and some of the leading men of this State urge the necessity of State interposition for a portion of these bonds. The State 5 per cent. bonds are worth par in the market, or nearly so, and it would aid the company if she should exchange her bonds, 5 per cents, for the 6 per cent. land bonds of the company. A petition with the name of ex-Governor Andrew at the head of it is largely signed, favoring this plan.

Aid is confidently expected too from Congress. The claims of Maine and Massachusetts on the United States assigned to the company will no doubt receive attention from this Congress—and it is a favorable circumstance that the Chairman of each Committee on Foreign Affairs in the Senate and House, are from this State—for to these committees the question of paying these debts will naturally be referred.

We are glad to notice in circulation a petition to Congress for the payment of these claims, and in support of the memorial of the railway companies, signed at the head by His Excellency Gov. Bullock. The bill reported by Hon. John H. Rice on the 3d of March, 1865, was unanimously concurred in by an able committee, of which Hon. Mr. Alley of this State and Hon. J. W. Patterson of N.S. Hampshire were members. The purpose of a bill, including the claims of Massachusetts and Maine, jointly, on the principles of Mr. Rice's bill, will give the railway companies material aid sufficient to ensure the entire line from Bangor to St. John.—*Boston Journal, Jan. 22.*

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Jan., 1866, were.... $56,509 00
Corresponding week of previous year.. 72,705 00

Decrease.... $16,196 00

The traffic of the Great Western Railway for the week ending Jan. 26, 1866, was as follows:

Passengers $22,391 57
Freight and live stock.... 31,117 77
Mails and sundries.... 2,056 31

Total $55,565 65
Corresponding week of 1865 .... 45,244 90

Increase.... $10,320 74

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Jan., 1866, were.... $54,289 00
Corresponding week of 1865 .... 78,501 00

Decrease $24,212 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in January, 1866, were.... $55,976 00
Corresponding week of previous year.. 84,018 00

Decrease.... $28,042 00

The earnings of the Chicago and Alton Railroad for the 3d week in Jan., 1866.... $48,970 00
Corresponding week of previous year.. 69,500 00

Decrease.... $20,630 00

The earnings of the Chicago and Northwestern Railway for the third week in January, 1866, were.... $115,710 22
Corresponding week of previous year. 136,367 48

Decrease $20,657 26

The earnings of the Grand Trunk Railway for the week ending Jan. 20, 1866, were:

Passengers $27,685 00
Express, freight, mails and sundries.. 4,750 00
Freight and live stock.... 69,807 00

Total $102,242 00
Corresponding week, 1865 .... 103,179 00

Decrease.... $937 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Jan. 14, were:

	1866.	1865.
Passengers	$2,484 27	$2,248 60
Freight	6,673 03	8,360 39
Express	130 22	130 22
Mail	296 58	296 58
Total	$9,584 10	$11,035 79

Receipts from January 1 to 14:

1865 .... $21,629 89
1866 .... 19,600 40

Decrease $2,029 49

The earnings of the Western Union Railroad for the week ending Jan. 21, 1866:

	1866.	1865.
From freight	$6,854 41	$8,281 15
" passengers	2,230 50	2,286 87
" express	130 22	228 00
" mail	296 58	296 58
Total	$9,511 71	$11,092 60

Receipts from Jan. 1, to Jan. 21:

1866 .... $29,112 11
1865 .... 32,722 49

Decrease $3,610 38

☞ A meeting was held in Frederick, Md., on the 15th inst., for the purpose of maturing measures for building a railroad from the District of Columbia to the Pennsylvania line, by way of Frederick. A committee was appointed to memorialize the Legislature for the passage of an act of incorporation.

☞ The New Jersey Legislature has passed a law extending the Raritan and Delaware Bay railroad, from its present junction with the Camden and Atlantic road, across the country to a point on Delaware bay, opposite Wilmington, Delaware.

James River and Kanawha Canal.

We are informed that an agent deputed by the French company to negotiate with the James River and Kanawha Canal Company for the completion of their work may be soon expected in Richmond. Everything in this State and in West Virginia promises well for harmonious and united action in a work which is manifestly of common interest to both.—*Lynchburg Republican.*

Central Pacific Railroad
STATE AID BONDS.

INTEREST AT THE RATE OF

Seven per Cent. per Annum in Gold,

PAYABLE SEMI-ANNUALLY,

Guaranteed and Paid by the State of California.

The Bonds are secured by a mortgage on 160 miles of road from Sacramento to the California State Line, forming part of the great Pacific Railroad Route adopted and aided by the United States Government. They are further secured by a Sinking Fund of $50,000 per annum in Gold received from the earnings of the Road, and pledged for their redemption. They are a first class Security in every respect, and a limited amount will be offered upon terms which render them a very attractive and desirable investment. For further particulars, inquire at our Office, No. 5 Nassau Street.

MERCANTILE MUTUAL
INSURANCE COMPANY.
OFFICE, 35 WALL ST., - - NEW YORK.

ASSETS, Jan. 1st, 1866.....$1,366,699

ORGANIZED APRIL, 1844.

Losses paid to Consumers in Cash, over Eighteen Million Dollars.

For the past nine years the cash dividends paid to Stockholders, made from ONE-THIRD of the net profits, has amounted in the aggregate to

One Hundred and Twenty-one and a half per Ct.

Instead of issuing a scrip dividend to dealers, based on the principal that all classes of risk are equally profitable, this Company will hereafter make such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the net profits remaining at the close of the year will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, including Risks on Merchandise of all kinds, Hulls, and Freight, on the most favorable terms.

Policies issued making loss payable in Gold or Currency, at the office in New York; or in Sterling, at the office of Rathbone Bros. & Co., in Liverpool.

ELLWOOD WALTER, President.
CHAS. NEWCOMB, Vice-Presideet.
C. J. DESPARD, Secretary.

American Railroad Journal.

New York, Saturday, February 10, 1866.

Northern Pacific Railroad.

Two very important meetings have recently been held in Boston, in reference to the central and far western portions of the United States, and to the plans which are under consideration for securing the speedy construction of railroads which shall unite together the Atlantic and Pacific slopes. At one of these meetings addresses were made by Capt. Mullan, late of the United States army, who has spent many years in the mountainous country of the Northwest, and who built the military wagon road between Fort Benton on the Missouri River and Fort Walla-Walla on the upper waters of the Columbia; also by the Hon. Mr. Holbrook, delegate in Congress from Idaho, and the Hon. Mr. Driggs, Member of Congress from Michigan. These gentlemen confined their remarks to the route of the Northern Pacific Railroad, which will traverse Minnesota, Dacotah, Montana, Idaho, Washington and Oregon. Their testimony was remarkably conclusive and emphatic in reference to the entire feasibility of the proposed line, and to the inducements which are to be found in the rapid settlement, now going forward, of that part of the Union, and in the wonderful wealth, both mineral and agricultural, which is there manifesting itself, for its construction without loss of time. The great river system to which it will penetrate will not only prove of the utmost value in facilitating the transportation of supplies while the road is building, but by means of it, the completion of one section of the line, from the head waters of the Missouri to those of the Columbia, a distance of only two hundred and fifty miles, will, without further delay, secure steam communication by rail and vessel from ocean to ocean. Either this will be first attempted, or the distance of three hundred miles over the prairies, from Crow Wing, in Minnesota, to some point on the Missouri River will be spanned; and this, with the line soon to be opened from St. Paul to Crow Wing on the east, and the steam navigation on the Upper Missouri, Mullan's wagon road and the Columbia River on the west, will, by a moderate investment of capital, and within two or three years, furnish a direct, quick and reliable route across the continent. The completion of about seven hundred miles will connect the wagon road through the Rocky Mountains with all the railroads of the Northern and Eastern States. Independently, therefore, of the immense local traffic which the Northern Pacific Railroad will enjoy as fast as its line is extended, it will, by means already existing, be able to open up a through traffic between the Atlantic and the Pacific long before it shall be finished in its entire length.

The second meeting was addressed by Lieut. Governor Bross, of Chicago, in reference to both the Central and Northern Pacific Railroads. Although Mr. Bross spoke more particularly of the former, he insisted that the immediate construction of the Northern was of equal importance, and that so far from either being likely to injure the other, they will be of essential advantage to each other mutually. In speaking of the Northern, he confirmed what has been so often said, that it is admirably supplied with wood and water, and that coal beds, with deposits of iron and the precious minerals, lie along its path. He gave it as his opinion that the Northern is the only projected route across the continent capable of sustaining population through the entire distance. He said also that in the construction of either the Northern or the Central, no greater obstacles will be encountered than were overcome in building the Western Railroad of Massachusetts.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Jan. 1, 1866.	Feb. 1, 1866.
Debt bearing interest in coin	$1,167,148,291 80	$1,167,149,741 80
Debt bearing currency interest	1,179,475,235 50	1,197,295,881 00
Matured debt not presented	1,166,880 32	1,099,330 32
Debt bearing no interest.	459,519,950 37	458,846,547 52
	$2,807,310,357 99	$2,824,391,500 70
Coin in Treasury	$45,735,550 69	$51,443,161 84
Currency	44,993,271 11	56,050,186 23
	$90,728,821 80	$107,493,848 07
Debt less cash in the Treasury	$2,716,581,536 19	$2,716,898,152 63

The aggregate debt shows an increase of $317,081,142 71. The balance in the Treasury also shows an increase of $17,764,526 27. Deducting the amount on hand from the aggregate debt both on the 1st of January and the 1st of February, the increase of debt would be $316,616 44. An accurate description of the Government Debt is given on page 136 of this week's issue, under head of "Federal Securities."

American Central Railway.

The *Stark County News*, published at Toulon, Ills., contains the following in relation to the prospects of this road:

The completion of the road is now secure as any future event in the hands of men can be, for the money has been raised—nearly or quite double the amount that the most sanguine anticipated, and the company have obligated themselves to build the road on the present line.

We could give many interesting details with regard to the situation of affairs, but shall only add that Judge Thompson was successful in Europe beyond his most sanguine expectations, and has, by his indomitable energy, foresight and

perseverance, removed the last obstacle to a speedy completion of the road. The company to whom he sold the bonds, took an immense amount of stock in the road besides; consequently they will need to be represented in the Board of Directors, for which purpose an election of Directors will be held in March, after which work will commence in earnest. The iron is to come from Belgium, and be shipped to Lacon and New Boston, by way of New Orleans.

North Pennsylvania Railroad.

The earnings of this road for the year ending October 31, 1865, were:

From freight		$527,207 00
" passengers		337,137 78
" mails		3,215 00
" rents		3,268 00
" sundry receipts		4,236 72
Total		$875,064 50
Expenses, viz:		
Maintenance of way	$115,871 67	
Motive power	150,497 40	
Maintenance of cars	42,826 35	
Conducting transportat'n.	129,460 79	
General expenses	24,054 83	
		462,711 04
Net earnings		$412,353 46

The interest and taxes chargeable to the year, were:

Six per cent. coupons	$150,000 00	
Ten " "	36,000 00	
Interest on scrip	14,747 10	
Ground rents and interest on mortgages	9,171 72	
National and State tax	18,967 51	
	$228,886 33	
Less interest earned	886 55	
		227,999 78
Excess of earnings over expenses, interest and taxes		$184,353 68

The annual statement immediately preceding this covered a period of only 11 months—during which time the earnings were $689,605 33; the expenses, $357,703 11; and the net earnings $331,902 22. Compared with the above, an increase in earnings is shown of $185,459 17; in expenses of $105,007 93; and in net earnings of $80,501 24. A comparison with the twelve months of 1863-'64 would show an increase in earnings of $134,142 68.

The permanent accounts have been increased during the past year as follows:

For locomotives and cars	$147,629 32
" construction	34,405 73
" real estate	581 10
Total	$182,616 15

During the last four years there has been expended—

For construction	$126,947 65
" equipment	269,517 59
Total	$396,465 24

In the same time, the surplus earnings over expenses, interest, taxes, etc., amounted to $397,051 26, being but $586 02 more than the amount paid for equipment and construction. The track is in good order, and has been well kept up. Since the first opening of the road, about three-fourths of the cross-ties have been renewed upon the main line, and about half of those on the Doylestown Branch. About 20 per cent. of the rails have been renewed, mostly with re-rolled iron, in lengths of 30 feet.

The cost of transportation over the city tracks by horse and mule power, has amounted in the past year to $46,321.

The length of the Main line from Willow street to Bethleham, is 65 miles; and of the Doylestown Branch, 10 miles—making 65 miles. The gross earnings of the year are therefore equal to $18,462 53 per mile.

The company have 22 locomotives. The number of miles run has been: with passenger trains, 197,233; with freight trains, 121,628—total, 318,861. Cost of repairs, $24,766 37. Cost of fuel, $59,657 76. Cost of stores, $4,674 10. Average cost per mile for passengers, 18.9 cents; for freight 39.9 cents. Number of passengers carried, 637,781; do., carried one mile, 11,813,302—equal to 218,765 through passengers. Tons of freight carried one mile, 11,223,167.

The following statement will show the earnings, expenses and net earnings for eight years:

Year ending	Gross earnings.	Current expenses.	Net earnings.
Nov. 30, 1858	$296,893 99	$134,823 55	$162,070 44
" 1859.	347,301 96	158,903 94	188,398 02
" 1860.	389,622 23	176,668 31	212,953 92

Oct. 31, 1864			
11 months	689,605 33	357,703 11	331,902 22
Oct. 31, 1865	875,064 50	462,711 04	412,353 46

The amount expended for construction purposes during the year was $34,405 73, of which $17,624 54 was for Berks street depot; $2,048 32 for new engine house; $5,037 87 for new water stations; $3,261 88 for new sidings; and the remainder for various small items.

Four coal-burning locomotives; seven passenger cars and one express car have been added to the equipment the past year at a cost of $168,259 32. One engine has been sold for $9,750. Another exploded which cost when new $10,880. Equipment account has thereby received a credit of $20,630. The report says:

The new passenger Station-House, at the corner of American and Berks streets, has been pushed towards completion as fast as circumstances permitted. The principal building, containing the offices and waiting-rooms, has been finished, and the tracks laid in upon the lot, and it is contemplated to transfer the passenger business to that point early in the coming summer. A substantial brick engine house is now in the course of erection, at a cost of about $17,000, on the ground bought for that purpose at the south-east corner of Third and Berks streets.

The Lehigh Coal and Navigation Company is now constructing a railroad bridge across the Lehigh River at Bethlehem, for the purpose of connecting its new road and that of the Lehigh and Lackawanna Railroad Company with the North Pennsylvania Railroad. The Lehigh Coal and Navigation Company are building a railroad from Easton to White Haven, and the Lehigh and Lackawanna Railroad Company are building a road from Bethlehem to the Slate quarries, near Bath, and propose extending it through the Wind Gap to Stroudsburg, or some other point on the Delaware, Lackawanna and Western Railroad; both of these roads, when completed, will act as feeders to the road of company.

The Chestnut Hill and Cheltenham Railroad Company are about to construct a road from Chestnut Hill to connect with the North Pennsylvania Railroad at a point near Edge Hill Cut. The surveys and location have just been made, and a large portion of the money subscribed necessary to build the road. When completed, it will furnish an additional outlet for Lehigh coal, and relieve this company of the expense and delay incident to hauling cars, by mule power, over the City tracks to Ninth and Willow street.

Condensed Balance Sheet.

White Mountains Railroad.

Several railroad projects are now under consideration in New Hampshire; among them is: the building of a line from Manchester to Keene, and one from Suncook to Pittsfield; also the extensions of the Contoocook River Railroad from Hillsboro' to the southwestern part of the State, the Concord and Claremont from Bradford to the Connecticut River, and the White Mountains road to Lancaster, and in time, to the Grand Trunk line. The extension of the White Mountains road is regarded as a matter of great importance. There is considerable encouragement given that this extension may possibly be pushed forward to Lancaster the present season. Three routes are proposed, with Littleton as a starting point. The first is *via* Dalton, distance 20 miles; the second, *via* Jefferson, distance 22 miles; and the third, *via* Bethlehem Hollow, distance 27 miles. Still another route is mentioned, where the idea is entertained of leaving the White Mountains road at North Lisbon, five miles below Littleton, thence up the valley of the Gale River, which is the south branch of the Androscoggin, to a point distant three miles from the Proule House, and six from the Fabyan Stand; thence through the towns of Carroll and Whitefield to the "Jefferson Meadows," and from there forward to Lancaster, the whole distance being about thirty miles.

☞ At a town meeting in Essex, Mass., on the 5th inst., it was voted to pledge the credit of the town in a sum not exceeding $100,000 (subject to the approval of the Legislature) for the purpose of building a railroad to connect Essex with some railroad now in operation.

Marine Disasters for the year 1865.

The number of disasters during the past five years—complied from a record kept by Captain I. H. Upton, Secretary of the American Shipmasters' Association—have been as follows:

	Steamers.	Ships.	Barques.	Brigs.	Schooners.	Total
1861	49	232	182	168	322	953
1862	44	233	219	189	325	1,010
1863	71	340	217	206	474	1,308
1864	46	280	119	165	290	900
1865	75	197	260	357	351	1,490
Total	285	1,282	997	1,085	2,002	5,651

The loss during 1865 is $20,000,000, distributed in great part between New York, Boston, Philadelphia and other American Underwriters, whilst a portion will fall on owners and foreign Underwriters.

The following is an estimated value of the losses each month for five years:

	1861.	1862.	1863.	1864.	1865.
January	$2,930,600	$1,825,600	$1,430,200	$1,650,000	$960,000
February	2,403,700	1,529,200	1,175,000	2,350,000	673,000
March	2,618,500	2,340,800	1,340,000	1,460,000	1,947,000
April	1,617,550	1,416,300	1,950,000	1,830,000	944,000
May	2,825,600	1,735,700	2,100,000	960,000	740,000
June	923,500	960,000	2,280,000	650,000	560,000
July	932,500	647,000	1,800,000	1,850,000	620,000
August	576,600	428,000	1,250,000	1,370,000	1,950,000
September	956,450	616,000	1,560,000	753,000	940,000
October	700,850	1,412,000	1,075,000	1,280,000	2,375,000
November	1,314,500	1,716,000	950,000	1,660,000	4,620,000
December	1,100,000	1,964,000	1,750,000	1,956,000	2,960,000
Total	$18,930,650	$16,590,600	$18,610,200	$17,766,000	$19,289,000

The total for each month of the five years is as follows:

January	$8,796,400	July	$5,849,500
February	8,130,900	August	5,574,900
March	9,736,300	September	4,822,450
April	7,757,850	October	6,842,850
May	8,361,300	November	10,260,500
June	5,823,500	December	9,730,000

Grand total for the five years $91,186,450

Imports at New York.

The *Journal of Commerce* gives the following table of a few of the leading articles of general merchandise at New York, showing the comparative imports during each of the last four years:

	1862.	1863.	1864.	1865.
Books	$376,607	$371,430	$327,716	$488,977

	$3,840,377 48	$3,925,882 36	$4,218,927 34

The funded debt of the corporation has been reduced as fast as it fell due; the whole amount now is $21,500. The company has no floating debt. The rate of dividend paid in 1863 was 8 per cent.; in 1864, 9 per cent.; and in 1865 10 per cent.

The increase of expenses has arisen in part from the increased price of labor, fuel, and all materials used for railroad purposes, but principally from the increase of taxes, both State and National, and from the cost of new engines and cars, charged to expenses. The additions to the rolling stock for the past two years have amounted to $160,334 00, or about 5 per cent. on the capital, which has all been charged to current expenses, as has the large outlay for the enlargement and repairs of stations, amounting, in the two years, to the sum of $195,523 74.

During the year a second track has been laid from Mansfield to Pawtucket, thus completing the double track through the length of the road from Boston to Providence. For this purpose two thousand new shares of stock were created under the authority of the Legislature. The cost of the new track was $210,197 98. The premium upon the new shares amounted to $47,832 00. The new track stands charged at $200,000 00. The balance of its cost is charged to the income account, and the remainder of the premium, $36,-634 02, carried to the credit of income account and left for future disposition.

The company have 28 locomotives; 39 passenger, 11 baggage, 218 house, 37 platform, 48 coal and 50 gravel cars.

The number of passengers carried during the year 1865, was 2,032,342.

President.—CHARLES H. WARREN.
Superintendent.—DANIEL NASON.

Trade and Commerce of Montreal.

From the Report of the Board of Trade of Montreal for the year 1865, we have prepared the following statement:

The total value of exports from Montreal, including Rouses' Point and St. Albans, the products of Canada, in 1865, were	$5,361,184
From Coaticook	2,928,727
" St. John	3,286,827
	$11,576,738
Not the products of Canada	2,302,330
Total	$13,879,068
Against in 1864	11,993,575
Increase in 1865	$1,885,493

The total value of agricultural products of Canada exported from Montreal in 1865, was $1,-965,560, against $2,581,143 in 1864. The value of exports of Canada wheat, was $25,250, against $500,183 in 1864. The value of exports of oats was $238,780, against $118,599 in 1864. The value of exports of manufactured tobacco, was $13,680, against $86,661 in 1864.

From the following statement of the increased circulation of the banks, the years of prosperity and adversity in Canada may be estimated:

1856	$3,200,000	1861	$3,500,000
1857	900,000	1862	1,200,000
1858	1,800,000	1863	2,500,000
1859	2,700,000	1864	1,100,000
1860	5,000,000	1865	6,100,000

The following statement will show the value of articles imported and remaining in warehouse at the port of Montreal for the years ending December 30th, 1864 and 1865:

	1864.	1865.	Remaining in wareh'se Jan. 1, '66. Value.
Specific	$39,796	$46,515	$5,555
" & ad val.	3,727,153	4,344,267	953,710
30 p. ct. "	135,626	108,408	16,389
25 p. ct. "	80,953	40,136	189
20 p. ct. "	13,490,132	9,719,203	411,475

10 p. ct. "	1,595,857	1,076,369	34,085
Coin & bullion	1,448,013	913,541	.....
Other free g'ds	5,133,561	3,599,738	.....
Total	$25,651,738	$19,843,448	$1,421,408
Duty	$396,299,227	$337,868,654	.....

Statement showing the value of exports of the growth, produce and manufacture of Canada for the year ending 31st December, 1865, also showing to what country the same were exported:

	Total Value.	Great Britain.	North American.	United States.	France.	Other Count's
Produce of the mines	$3,288	$600	$291	$2,392	.....	.....
Produce of the fisheries	13,406	.....	1,458	11,917	.....	31
Produce of the forest	913,530	664,111	5,015	235,732	$5,347	8,325
Animals & their products	2,172,498	971,651	85,802	1,122,280	.....	2,365
Agriculture	1,965,560	1,080,316	468,547	405,527	.....	11,170
Manufactures	283,758	144,679	64,905	60,978	1,614	11,580
Other articles	9,140	124	935	8,090	.....	.....
Total value of exports	$5,361,184	$2,851,501	$626,953	$1,847,296	$6,961	$28,473

NOTE.—United States includes only what went by Rouses' Point and St. Albans.

The value of the exports not the growth, produce, nor manufacture of Canada, was $2,223,-585, of which $1.058,468 went to Great Britain; $6,107 to the North American Colonies, and $1,-164,010 to the United States.

The following is a statement of the annual receipts for customs for seven years:

1865	$3,378,686 54	1861	$2,391,819 84
1864	3,963,992 47	1860	2,452,248 91
1863	2,988,620 92	1859	2,335,190 10
1862	2,400,026 38		

The following table shows the total value of dutiable goods, and amount of duty paid at the port of Montreal during the past eight years:

	Value of imports.	Value of Dutiable goods.	Duty collected.
1858	$1,158,072	$9,698,191	$1,673,503
1859	15,690,340	12,025,690	2,335,190
1860	15,479,453	12,305,910	2,452,249
1861	16,814,161	12,459,496	2,391,820
1862	20,529,893	12,492,741	2,490,025
1863	18,841,485	12,803,793	2,988,621
1864	25,751,788	19,010,164	3,290,464
1865	19,843,448	15,330,169	3,378,686

ARRIVALS OF VESSELS FROM FOREIGN PORTS.

	No.	Tonnage.
1862	567	254,949
1863	480	197,577
1864	278	141,897
1865	268	132,012

In this are included the arrivals from lower ports, viz:

	No.	Tonnage.
1862	102	15,538
1863	92	14,027
1864	67	9,230
1865	116	13,916

RIVER CRAFT.

	No.	Tonnage.
1862	4,358	523 991
1863	4,697	534,740
1864	4,509	420,694
1865	4,771	626,550

STEAMSHIP TONNAGE OF THE PORT.

	No.	Tonnage.
1862	53	62,912
1863	54	56,460
1864	51	59,071
1865	63	78,015

The imports at St. John were of the value of $217,081; of which $203,468 were free goods. The exports were $3,286,827; articles not produce of Canada, $78,745—total, $3,365,572. The imports at Coaticook were: Goods, $281,097; bullion, $111,134—total, $392,231. The exports at same were $2,928,727.

REVIEW OF THE MARKETS.

Flour.—A larger business has been opened in flour with the lower ports, and some firms have established branch houses. The total receipts were 755,256 bbls. in 1865, against 824,774 in 1864, and 1,088,193 bbls. in 1863.

Wheat.—The business in wheat has been chiefly in Milwaukee and Chicago Spring, and for the most part confined to the millers, the range of prices through the season being altogether too high for shipments. The high prices paid in Canada West by millers greatly lessened the receipts in this market. The total receipts have been 2,664,702 in 1865, against 4,125,152 bushels in 1864, and 5,136,212 bushels in 1863.

Indian Corn.—The receipts and transaction in corn were light in the early part of the season. In the Fall large shipments arrived, and an extensive trade sprung up with a demand for shipment to England. The receipts were 860,154 bushels—160,430 bushels in 1864, and 788,969 bushels in 1863.

Oats.—In the early part of the year a large demand for oats from United States buyers existed in all sections of Canada, which came through speculators and army contractors. Later in the season a demand for England existed, and several cargoes were taken for shipment to Liverpool and London. This new trade in oats has so far resulted profitably to the shippers, and contracts for shipment next May have been made. The crop was quite large, and has paid the farmers handsomely.

Barley.—Much of the trade in this article during the year has been in the hands of buyers for shipment to the States, and the result to them has not been profitable. The price here has been very regular, and has averaged from 68c. to 73c. per 50 lbs.

Peas.—The demand from the States not extending to this article, Montreal has received the usual average quantity of peas in the past year. The demand for export to England was good, especially in the early part of the season.

☞ The officers of the Columbia and Post Deposit Railroad Company are: C. S. Kauffman, President; George F. Breneman, Secretary, and A. J. Kauffman, Treasurer.

Cincinnati Passenger Railroads.

Returns made by Street Railroad Companies of Cincinnati to the Assessor of the First District, for the year 1865, of the gross receipts, on which two and a half per cent. tax is paid:

June	2,935 58	December ..	7,104 28
Total			$62,308 82

Minnesota Railroads.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

The following table, based upon information obtained from sources that are deemed reliable, presents the condition of eight of our railroads now in process of construction:

	Miles completed and in operation.	Miles graded in addit'n to the portion now in use.	Est'd no. of miles to be completed by July, '67.
Winona & St. Peter.	66	..	100
Minnesota Central..	56	40	112
1st div. St. Paul and Pacific main line.	..	10	40
1st div. St. Paul and Pacific Upper Mississippi Branch ..	50	24	74
St. Paul and Pacific Winona Branch..	..	10	30
Minnesota Valley ..	22	20	48
Southern Minnesota.	16	5	40
Lake Superior and Mississippi	..	23	30
Total	210	132	474

Our railroad interests have received a new impetus during the past year, and if no financial revulsion shall interfere with the companies that have them in charge, we may safely calculate upon a speedy development of our great system of intercommunication, which at no distant day will very materially add to the wealth and population of the State.

The Lake Superior and Mississippi and Minnesota Valley Railroads will form intermediate and important links in the great central thoroughfare between the Atlantic and Pacific oceans.

The Chicago and Northwestern Company have given assurances that their road shall be completed to Winona at an early day, thus by means of the St. Paul and Pacific and Winona and St. Peter lines, forming a continuous railroad communication from almost every populous district of the State to Chicago and other Eastern markets. The city of St. Louis will be reached by the Minnesota Central Railway and its connections; while the Iowa line will be equally well cared for, by the completion of the Southern Minnesota road.

The Northern Pacific route, extending from Lake Superior to Puget's Sound, has received a magnificent donation of lands from the General Government, and the Western end of the road is already being located. It is also proposed to place a corps of engineers upon the line, within our own State, as early next spring as practicable, and to vigorously prosecute the work to completion.

I am informed that the people of Oregon and Washington are subscribing liberally to the stock of this company, and Minnesota should not lag behind her sister States in aiding in the construction of this great national highway.

I cordially recommend any additional legislation, consistent with your duties as representatives of the people, which may assist in the early completion of our railroads, all of which are material to the progress and development of the State.

New Jersey Railroad and Transp. Co.

The following is an abstract of the report of this company for the year ending December 31, 1865:

RECEIPTS.

From passengers		$1,451,773 35
From freight		262,437 91
From U. S. mail, rents, express, freight and other sources		161,770 04
		$1,875,981 30

EXPENSES.

Maintaining road, bridges and buildings	$227,109 55	
Repairs of locomotives, cars and machinery ..	212,960 59	
Fuel—cost and labor in preparing	199,815 27	
Operating the road and transporting passengers and freight	416,696 36	
Office expenses, salaries and contingencies ...	16,076 01	
		1,072,657 88
		$803,323 52
Interest on bonds		$51,086 09
Transit duty on passengers & freight.		53,629 85
State tax on capital stock		23,019 59
Government tax		68,305 41
Sinking fund		20,000 00
Dividends in cash, Aug. and Feb.....		469,887 50
Profit and loss to surplus earnings...		117,395 08
		$803,323 52

The number of passengers transported over the road during the year was as follows:

Over the whole road	963,109
Between Jersey City and Newark	1,619,482
" " Elizabeth	187,873
" " Rahway	139,373½
" " Uniontown...	14,991½
" " N. Brunswick.	124,582
" all intermediate places	635,581½
Total not including commuters and free passengers	3,684,992½

The number of tons of goods, wares and merchandise transported over the road during the year was as follows:

Over the whole line of the road	36,633½
Between Jersey City and Newark.....	39,487½
" " Elizabeth	8,314
" " Rahway.....	9,617½
" " N. Brunswick..	22,597
" all intermediate places	113,630½
Total	230,280

The number of miles run by passenger, freight and other trains was 654,192.

GENERAL STATEMENT.

Capital stock	$5,000,000 00
Funded debt	805,000 00
Profit and loss, being surplus earnings represented by permanent improvements, and the property and cash stated below	379,401 37
Dividend, 1st January, payable 1st February, 1866	249,997 50
	$6,434,398 87
Cost of road and equipments:	
For graduation and masonry, bridges superstructure, iron, passenger and freight stations, buildings and fixtures, engine and car houses, workshops, machinery and fixtures, engineering, land and land damages	$3,903,171 03
Locomotives, tenders & snow plows.	400,250 00
Cars—passenger, freight & baggage	337,914 00
Property, viz:	
Bridge, ferry, turnpike and other stocks, real estate, ferry boats, privileges and fixtures (including the property and privileges purchased of the Jersey associates for $485,000)	1,574,548 37
Cash in bank, cash items and balances due.....	218,515 47
	$6,434,398 87

President.—ALFRED L. DENNIS.
Secretary—F. W. RANKIN.
Treasurer.—H. J. SOUTHMAYD.
Gen'l Superintendent.—F. WOLCOTT JACKSON.

Whitehall and Plattsburg Railroad Co.

A meeting of the citizens of Clinton, Essex, Washington and Warren Counties was held at Plattsburg on the 30th ult., to promote the construction of a railroad south from Plattsburg, through Essex Co., to Whitehall, and to be so constructed as to harmonize as far as practicable, the business interests of Essex and Clinton Counties. A committee was appointed to draft articles of association for the organization of the company; which, after being prepared, were received and adopted. The following gentlemen were elected directors: Chas. Bliven, New York, Edward Beck, Poughkeepsie, John A. Griswold, Troy, C. F. Norton, M. K. Platt, Plattsburg, Mathew Hale, Elizabethtown, John G. Wetherbee, Port Henry, John Hammond, Crown Point, H. G. Burleigh, Ticonderoga, John H. Reed, Boston, Timothy Hoyle, Champlain, James Rogers, Ausable Forks, Michael J. Myers, Whitehall.

At a subsequent meeting of the Directors Michael J. Myers was elected President, John Hammond, Vice President, and Andrew Williams, of Plattsburg, Secretary and Treasurer.

The capital stock of the proposed road will be $1,250,000, which is considered amply sufficient.

☞ The contract for the railroad from Stockton to Copperopolis, Cal., has been let, and the road will be completed in three years. The latter is the centre of the great copper region and not far from the Big Tree Grove.

American Railroad Journal.

Saturday, February 10, 1866.

Stock Exchange and Money Market.

It is contended in some influential quarters that the financial prosperity of the people, as distant from that of their nationality, is yet to be endangered by the continuance of the National banking system as established during the administration of Mr. Chase; that the right they have to issue bills guaranteed by the Government, and their currency legalized in the payment of taxes, are a loss to the public; and that, in fact, it would be better to have no notes in circulation but legal tenders, to the exclusion of all other kinds.

This policy would make the Government a banker, and invest it with functions not at all in harmony with the objects of Government. It would make all borrowers and credits subject to its control, and place the whole enterprise of the people at the mercy of the Treasury Department. Besides, how could legal tenders be put in circulation except by the two methods of payment to office holders, and to contractors for supplies? We see no other method by which circulation could be effected. On the other hand, well regulated banks seek the usual outlets of business for their issues, and follow the law of demand and supply. Their accumulated capital, held in properly and conveniently located reservoirs, is let out in streams where they are wanted, and in volumes adequate to the pressure of business necessities. Their numbers also secure competition and fairness; and they are always within the reach of the law and the control of public opinion. In our judgment, therefore, a well arranged banking system is better for the country than any which can be substituted for it by departmental authority. The financial operations of the Government should be strictly confined to the collection and disbursement of revenues; this is its only legitimate financial employment. Capital, industry and enterprise should be left free to employ themselves unchecked by the policy of the department, and subject to the laws only which regulate commerce, and with the corresponding responsibilities which attach to it. We therefore conclude, that the best thing the Government can do, and what it ought to do, is to withdraw from the business of issuing money, take up its bills as rapidly as possible, and leave this field of operations for that particular class of persons who are best fitted to carry it on. These last, being held to redeem their promises strictly, may be safely left to the management of their own affairs; and will supply all the reasonable demands of trade and circulation. The very number of our National banks, their location and their distribution, are some of their greatest advantages; while a central agency, as at Washington, a Governmental creator and issuer of currency, would be a ponderous machine crushing out of place thousands of commercial centres, and the best marts of the interior.

Meanwhile the country itself is getting into a strong position. We are exporting largely of cotton every week, worth, according to the estimates of sound merchants, $3,500,000 in gold. Our National revenue since 1st June, has been running up to the enormous figures of $500,000,000 per annum; and by a judicious change in excise and duties, it may be swelled to $600,000,000. The expenses and disbursements of the Government may be set down for interest at $150,000,000; current expenses, $100,000,000—with an available balance of $350,000,000, applicable to the debt, and which is certainly margin enough for every possible contingency before us. This estimate is considered a perfectly safe one in commercial circles, and we do not dispute it.

We question whether there is a stronger Government at this moment in its finances than ours; and we have not yet shown our full strength, for nearly one-half the old Union is as yet untaxed and unproductive of revenue for National purposes. And we owe this condition of things to the folly of politics and partizanship. The one great necessity of the country is financial disembarrassment, and a return to a sound currency. To bring this about in the best and earliest way is the declared policy of the Treasury; but that it will if possible be thwarted, there is little doubt;

and much depends on the firmness of the Secretary, a quality in public men of the greatest importance at all times, but especially just now.

We shall therefore continue to trust the Secretary as a man who will not quail before clamor, nor fear interested opposition, when he has a great duty to perform and a great principle to vindicate. Not until a dollar is worth 100 cents shall we have substantial and permanent prosperity.

The report of the Associated Banks for the week ending February 3d, shows an increase in loans of $2,102,546; increase in circulation, $528,351; a decrease in specie of $2,169,276; in deposits of $4,000,759; and in legal tenders of $1,522,896. The market however is easy, the rates being very prevalent at 5 and 6 per cent., a striking contrast to those ruling on the British Exchange.

Gold dropped again in the beginning of the week in the face of a considerable demand for customs which are expected to prove large during the present week. There is but little demand for export, as there is cotton enough to remit for all immediate demands; and the probability is, that the supply will be very large at the close of the season.

Our accounts from the planters generally are growing better every day.

Government securities are in good request, there being a healthy demand for them, without excitement. These cannot be *cornered* and made the basis of any street combination, the amounts being too large for the operators to manage. In this respect they are happily beyond the reach of speculation.

Railway shares are still depressed, but as we continue to think, without cause. The principal roads are continually effecting a reduction in expenses, while the earnings keep up to a good figure. It is said that the Western roads are reducing freights with a probability of increased business, and all look forward to large transactions in the spring. We perceive that this conviction is beginning to prevail in the street, a recovery in prices being noticeable early in the week.

Public attention is turned to the action of Congress in regard to the wants of the Treasury, and the propositions before it emanating from that department. One of these, which looks to the possibility of a future foreign loan, has been much discussed. The popular feeling, it must be confessed, is rather against this measure; but there is something to be said in its favor. The State of Massachusetts has found it a good policy to issue 5 per cent. sterling bonds payable abroad, and its 5s are quoted higher than New York 6s. If we are ever to resume specie payments, it may become necessary to obtain large amounts of specie at some one time, just as it was a few years ago when Mr. King, by a personal visit and negotiation abroad, succeeded in getting a supply that enabled our banks to resume. In the present case, the amount wanted may be so large as to make a loan of the kind projected absolutely indispensable. The financiers of Massachusetts seem to agree on the propriety of the measure, after a full experience of the plan for themselves.

It is also believed that the changes recommended by the revenue commission will be considered carefully by Congress, and adopted in many particulars. How far the present Congress will be governed by pure and patriotic feelings remains to be seen, with some apprehension of disappointment. If ever there was a time when every feeling of party should be laid aside, it is now. All our trouble, all our sacrifices, all our blood and treasure will have been wasted, if we are not ready and willing to restore and rebuild our National temple. It is to have the same inhabitants as of old; and it would be pleasant, nay it is indispensable that they shall dwell together in unity. That this is the sentiment of a large majority of the people of the United States we have not the least doubt; and that at the next Congressional election it will most manifestly appear we also do not doubt. The people of this country will not submit to have its prosperity jeoparded by any political arrangements whatever.

Every man who wishes to earn his bread desires to see our institutions as free from all future disturbance as possible; and it is our material interests which underlie our political ones, and for which we make constitutions, and governments, and laws. If these are being continually endangered and disturbed, neither life nor property is safe.

We have had excitement, anxiety and trouble enough for the last four years to answer for a thousand years, and we want no more of them.

All disturbing questions should be laid aside, and our whole energies be directed to the question and the business of recuperation and of peace.

The most important news of the week is that of the determination of the French Government to withdraw its troops from Mexico, and as is stated in order to conciliate American opinions.

Thus happily is removed from us one of the greatest embarrassments in our path. For it cannot be denied that the nation was in a manner pledged to what is called the Monroe doctrine, and in this country as in all others there is a class of persons who are always in favor of disturbance, and have everything to gain by it. Another war would have suited these persons exactly; but the people at large would have been immense sufferers. An increased national debt, perhaps beyond our power to pay, increased taxation, more paper money, and the loss of all our foreign commerce would have been pretty certain events for us to have encountered. But the change in French policy lifts the veil which hung over our future and leaves us free to act, and clear to see, so that if we make any mistakes we shall bring down our misfortunes on ourselves by our own folly. We trust that our public men will appreciate the advantages of our present position, and act accordingly. American securities are advancing abroad and must now maintain that advantage, since peace is once more a settled fact.

The exports from this port for the week ending the 6th, exclusive of specie were $5,917,607, against $4,808,182 the same week last year.

The balance in the Sub-Treasury, after rising to nearly one hundred millions, has been depleted by remittances to Washington, and stood on Tuesday at $86,395,837.

We notice the arrivals of small amounts of specie the past week at this port, viz: from Vera Cruz and Havana $12,000; St. Domingo, 1 package (amount not stated); Bermuda, $3,000; and Belize, $350.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Pacific and Central American Coast Trade.

We call the attention of our readers to the advertisement in another column of WELLS, FARGO & Co., the sole freight agents of the Pacific Mail Steamship Company, who are receiving and forwarding with dispatch, and at greatly reduced rates, all kinds of goods destined for the Pacific and Central American Coasts. Office 84 Broadway.

The City of Montreal.

We give in another part of this week's issue a very interesting analysis of the report of the Montreal Board of Trade for the year 1865. The character and proceedings of this Board entitle it to high consideration. Its members are first class merchants, move admirably in concert, are quick to perceive and prompt to carry out measures of a favorable commercial tendency; and their reports, and official papers generally, are of a very superior order.

We therefore always give room for the results of the Trade and Commerce of Montreal made up with care, as they furnish valuable data by which many important questions may be weighed and considered, just at this moment. Montreal occupies a peculiar position. It is about to lose its advantages whatever they have been, under the Reciprocity treaty, which will expire in March next. Whether this is a real or only a temporary evil remains to be seen.

Montreal has wonderfully prospered within a few years past. In 1851 its population was 57,715. In 1861 it had become 101,982, and is now estimated at 120,000. Its position gives it an outlet to the Ocean, an artificial connection with all the lakes for steamers of a large size, and it to a certain extent commands the trade of Lake Champlain and the Canal of that name, with the Northern trade dependent upon them. It has magnificent stone wharves such as no other city in America possesses; and an improved channel for incoming sea vessels, of about the same depth as that on our own bar at Sandy Hook. Under the influence and example of eminently wise and persevering merchants and public men such as John Young, and others like him, Montreal now stands where she does.

It is admitted that the business of Canada for the last year has been unusually prosperous and profitable, the crops have been more than abundant, and have been turned into money at remunerating prices. Canada has been thronged with American buyers who have followed up the holders of property to their own doors, shops and granaries. Thus it is stated in the report alluded to, that two-thirds of the whole products of Canada have been sold and exported to the United States during the past year. This is an admission which shows at a glance what the future of Canada may be or may not be. The natural market of the province is undoubtedly the United States. If the loss of the Treaty is to be attended with a loss of this great and convenient market, no possible compensation can be had by any attempts in any other direction. The agencies dispatched to Brazil, to the West Indies or any where else, may draw what hopes they please of a future remunerating foreign commerce for Canada, to replace that lost in the United States, but it will be entirely a baseless fabric. The immense amount of American business i also appears fro m this report, gave large employment to the Banks of Canada which had an active circulation on the 31st December last of $13,388,598 which in 1864 was but $8,947,721. The Banks of Montreal furnished alone half this amount.

The report states one curious fact in relation to this trade, which is quite apropos of the discussion of the influence and tendency of paper currency. This is, that goods in Canada were relatively and actually so cheap, that the Americans could turn their currency into gold, expend it in Canada in purchasing goods, and then resell them at a profit in the United States. This is an explanation as well, of the large increase of our foreign imports. Gold has been the cheapest commodity in our market for the last year. The ridiculous prices asked in paper for the commonest necessaries of life have been several hundred per cent. above their real and normal value by the gold standard. And there is a large class of operators who wish to keep up this state of things not only in Canada but the United States.

The report gives us a very good idea of the ocean commerce of Montreal, but it shows just as clearly that the transit of Lake vessels to the sea by the St. Lawrence is as yet of no account. But nine went to sea the past year, though as many as twenty did so, the year previous. The navigation of the St. Lawrence has been held up for years as a bug bear, to compel the State of New York to enlarge the Erie Canal; but the fact is, it is in no way a rival to our great work, and never can be. The Canadians understand this perfectly, and propose other outlets. Should the canals of Canada ever be enlarged to the greatest extent proposed the St. Lawrence would never endanger the value of the Erie Canal, as may be easily demonstrated.

It is thought that the future of Montreal will depend on its being made a free port; that this done it will command all the business of the Lake ports for foreign merchandize, which can be afforded much below the cost ruling in New York, where the charges are increased by the variety of interests attaching to every import, with corresponding commissions. All these may be saved and avoided by the Western merchants by a single transaction at Montreal. The duty will be the same to the consumer whether the goods are landed at Chicago, direct, or at New York to be transferred to Chicago, but the manipulations will be very different. Montreal as a free port is very likely then to compete with New York for the Western traffic, and it is quite possible that in this character she may suddenly rise to a grandeur of which as yet we have no clear conception.

C. Powell, Green & Co.

We invite attention to the advertisement of this firm in another column. This new house has been established in the banking business at No. 38 Broad street, N. Y., and will give their prompt attention to the purchase and sale of stocks, bonds, Government securities, etc.

Hatch & Phelps.

The advertisement of this new banking house is given in another column. These gentlemen have established themselves as Bankers, Brokers and General Purchasing Agents at No. 9 Wall street. Mr. Hatch has been for twenty years cashier of the Mechanics Bank, Augusta, Ga., and Mr. Phelps has been for six years agent and cashier of the Southern Express Co. Their references are to the very best houses in this and other cities, as well as to the leading banks, express companies, etc.

Kent County (Md.) Railroad.

The location of this road has been permanently fixed upon by the Legislature of Delaware. It will run from Smyrna to Chestertown, and from there to the bay.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway for the week ending Feb. 2, 1866, was as follows:

Passengers	$23,420 43
Freight and live stock	35,033 44
Mails and sundries	1,828 49
Total	$60,282 36
Corresponding week of 1865	51,673 42
Increase	$8,608 93

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Jan., 1866, were $106,862 00
Corresponding week of 1865 111,112 00

Decrease $4,249 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in January, 1866, were $69,704 00
Corresponding week of previous year 57,948 00

Increase $11,756 00

The month shows a loss of $55,980.

The earnings of the Chicago and Northwestern Railway for the fourth week in January, 1866, were $160,589 49
Corresponding week of previous year. 150,647 27

Increase $9.942 22

The earnings of the Grand Trunk Railway for the week ending Jan. 27, 1866, were:

Passengers	$26,081 00
Express, freight, mails and sundries	4,750 00
Freight and live stock	84,584 00
Total	$115,415 00
Corresponding week, 1865	98,557 00
Increase	$16,858 00

The earnings of the Western Union Railroad, for the week ending Jan. 31, 1866:

	1866.	1865.
From freight	$12,145 83	$7.480 41
" passengers	3,200 90	2,988 25
" express	346 22	228 00
" mail	296 58	296 58
Total	$15,989 53	$10,993 24

Receipts from Jan. 1, to Jan. 31:

1866	$45,101 64
1865	43,715 73
Increase	$1,385 91

The Mauritius Railways.

Two sections of the system of railways in course of construction in the Mauritius have now been completed and opened for traffic—viz., the Northern and Midland. With the exception of some trifling additions required to complete the terminal works in Port Louis, the whole undertaking is now complete. The traffic upon the line is reported to be highly satisfactory, and considerably in advance of the expectations which had been formed. The Northern line is 36½ miles, the Midland 34 miles long. The estimated cost of the whole system was £1,300,000. Of this sum £600,000 has been raised by loan, on debentures of 7 per cent., in this country. A sum of £300,000 of accumulated surplus of the colony was also applied to the cost of the railways. A further sum of £400,000 was authorized to be raised by loans on debentures. Of this sum the Crown Agents for the colonies are offering £100,000. The security offered is most undoubted. It is, in fact, a twofold one—the railway itself, and the general revenue of the colony. There is probably not one of the British colonies which at the present time is in a more prosperous condition than the Maurities. The quantity of sugar produced in the island is enormous, and the value of its trade exceeds £5,000,000 per annum, or much larger than the trade of some of the States of Europe. The engineer to the line is Mr. Hawkshaw, and the contractors are Messrs. Brassy and Wythes. The works have been constructed in a thoroughly sound and substantial manner.—*Railway News.*

Journal of Railroad Law.

RIGHTS OF FOOT PASSENGERS.—WHAT IS PRUDENCE IN CROSSING STREETS.

In a very late case decided by the Superior Court of this city, (Ann Baxter *vs.* The Second Avenue Railroad Company,) the questions of negligence, and of the amount of care and prudence required of a person in crossing a public street, are very ably discussed. The opinion is by

MONELL, J.—In an action to recover damages for an injury to the person, occasioned by the negligent act of another, the plaintiff must be free from any fault which may have contributed to the injury. I had occasion, in writing the opinion in Williams *vs.* O'Keefe, (9 Bosw., 536,) to state the result of all the cases on this subject. In one case only do I find any attempt to define the nature or quality of negligence, (Wilds *vs.* Hudson River Railroad Co., 24 N. Y. R., 430,) and in that case, a distinction, which some of the cases have made, between gross negligence and common care or prudence, is rejected as inapplicable to actions for personal injuries. It is undoubtedly correct to say there are no degrees in negligence, for whether it be great or small, if it can be seen that in any measure, without it, the injury would not have happened, there can be no recovery. We are nowhere given the criteria or essence of negligence, nor can any be given. There are so many different elements which of necessity must enter into it, and vary it, that no general principle can be established.

It is prudent for a man possessed of all his senses and faculties to do many things it would be highly imprudent for a person deaf, or blind, or lame to perform. An adult may go in safety, where an infant of tender years would be exposed to great peril.

In all cases, therefore, whether a want of care is imputable to a person, must always depend upon facts which in each case essentially determine the question. Courts never decide what is, or is not abstract negligence. They sometimes put a construction upon the evidence intended to establish it, and say that the verdict of a jury is not or would not be supported by it, but they do nothing more.

In getting at some rule, general as far as may be, of what would be negligence or want of proper care, neither of the extremes can be adopted. One man with a high degree of caution will avoid the possibility of danger. Another more reckless or confident will rush into any kind of peril. Hence it is that the medium of the two extremes will come nearer to, and conform closer with common sense and justice. What would persons ordinarily do under the circumstances? How would most persons act? Not the most prudent, nor the least careful, but what amount of care would the majority of persons exercise?

In the case before us, the exception to the charge was, in limiting the plaintiffs negligence to "a want of common ordinary care or prudence."

What amount of care or prudence is required of a person crossing a public street? If more than ordinary care, then what standard shall we adopt? We cannot require the highest degree of caution, nor can we admit the lowest. Therefore the common or ordinary degree embraces the middle and only safe standard.

In Munger *vs.* Tonawanda Railroad Company (4 N. Y. R., 349,) it is said (page 358,) "the result might have been avoided by the exercise of ordinary care on the part of the defendants." Again "a person injured by an obstruction placed unlawfully on a highway, has been denied a right of action for damages where it appeared that he had failed to use ordinary care." The cases cited in the opinion in Wilds *vs.* Hudson Railroad River Co., *Supra*, all use the same or equivalent words. In Tose *vs.* Town of Glastenbury, (29 Conn., R., 208,) the rule is said to be that the party injured must have acted with ordinary prudence, and in Gahagan *vs.* B. & L. R. R. Co., (1 Allen, Mass., 187,) it is affirmed that the party must be in the exercise of due care.

In Johnson *vs.* Hudson Railroad River Co., (20 N. Y. R., 65,) the Court say, (p. 76,) the party "must have conducted with ordinary care and prudence."

The charge of the Judge to the jury was therefore, strictly in conformity with authority, and it seems to me also in conformity with common sense. Had he attempted to form any standard of negligence he must have failed, or run into the error of requiring a greater or less degree of care and prudence than is observed by mankind in general.

There was no error, therefore in the charge. The refusal to charge as requested, and the motion for a non-suit, involve the consideration of other propositions.

The motion for a non-suit was on the ground that the verdict was owing to the plaintiffs imprudence and negligence.

A party seeking redress for personal injuries must satisfy the jury that there was no fault imputable to him; and unless the evidence of negligence is of such a nature as to require the reversal of a verdict if found against it, it would be improper to take the question from the jury. (Johnson *vs.* Hudson River Railroad Co.; Williams *vs.* O'Keefe, *ubi Sup.;* Wilds *vs.* Hudson River Railroad Company, 29 N. Y. R., 315.)

The plaintiff was a woman of fifty-four years of age, healthy, and in possession of all her limbs and senses; she had with her a grocer's basket which was not heavy. It was midday and a clear day. There was a little snow and a great deal of ice on the ground. She had passed down on the east side of the avenue from Thirty-fourth street to the lower side of Thirty-first street, where she attempted to cross on the cross way. As she began to cross she looked and saw a four horse car coming up the hill, (the grade being ascending;) she felt perfectly sure she could cross with safety. The car was then above the upper side of Thirty-first street, about half way the block between Thirty-first and Thirty-second streets; she looked long enough to make up her mind it was safe to cross, and concluded the horses were so far off she could safely do so; in crossing, her heel caught in the westerly rail of the easterly track; it took her whole strength to extricate her foot; in pulling her foot out the iron sprang up, and pitched her over upon the westerly track, and

it being slippery she fell; before she could recover herself the horses and car were upon her.

The only negligence that can be charged to the plaintiff is, in attempting to cross the avenue while the defendants' horse car was ascending a grade, nearly two hundred feet away. The catching the foot in the rail, and subsequent falling were accidents.

There was ample time to cross; the car was distant, and she had the free use of her limbs. In considering the matter, time was the important thing. She could not anticipate what befel her before the car was upon her, and she felt sure there was time sufficient for her to reach the opposite side in safety.

And such I think would have been the reasoning and conclusion of any person.

Had she not fallen on the track she would undoubtedly have escaped the peril that was upon her.

Upon all the facts, I am clear that the plaintiff was justified in attempting to cross the street, and that the motion for a non-suit was properly overruled. (Brown *vs.* the N. Y. C. R. R., 32, N. Y. R., 597.)

The request to charge is involved in the question I have been discussing. The Judge was desired to charge the jury, "that if there was danger of the plaintiff's slipping or falling, while crossing in front of the car, she ought not to have attempted to cross till after the car had passed."

There is always more or less danger of slipping on ice, but the sure-footed seldom fall. I do not however, think, that for any reason suggested in the request to charge the plaintiff was bound to await the passage of the defendant's car. It was snow ice, which at most is never smooth, and under the facts of the case no jury would be justified in a verdict against the plaintiff on any such ground.

The proposition of the appellants' counsel in its scope and meaning, comes to this; that a foot passenger has no right upon a public street, as against a railroad corporation. And I regret to say that such seems to be practically the belief of drivers of most public conveyances, and of many private vehicles.

There is often a reckless disregard of human limbs and life; and pedestrians are compelled at the peril of broken bones or death itself, to keep out of the way. The right to travel upon a street or highway is common to all. They do not belong exclusively to the drivers of vehicles. Foot passengers have the right to walk upon them; and except for the greater difficulty of guiding and arresting the progress of vehicles, it is, as a matter of law, as much the duty of the vehicles to keep out of the way of the foot passengers, as it is for the latter to escape being run over by the former.

The use of the streets of cities and villages and of highways for railroads is allowed, only because it is considered not to be a substantial interference with their free and unobstructed use as highways for passage. So long therefore as there is no interference with the public right of passage, railroads are lawful structures. But if operated upon the theory of exclusive right to their track, they become usurpers and wrong-doers.

I make these observations that the practice of drivers, not of railroad cars only, but of omnibuses, carts, express wagons, &c., of disregarding the rights of foot passengers may, if possible be checked.

In our over crowded city it is of vital importance that the greatest caution and care should be observed by the drivers of all kinds of vehicles. It is to the drivers we must look for a remedy for this great and growing danger. The railroad companies and the omnibus proprietors cannot control their servants, and are not therefore morally responsible for their acts.

The request to charge was properly overruled. If there was time for the plaintiff to pass I do not think she was bound to wait, even though there may have been danger of slipping or falling, until the car passed.

Not having discovered any error in the trial, I am in favor of affirming the judgment and order.

Receipt and Consumption of Coffee.

The following from the *N. Y. Shipping and Commercial List*, shows the total receipts of coffee at all the ports, from Foreign countries, with the annual consumption in the United States, for the last ten years:

	Receipts.	Consumption.
1865 ..... lb	133,574,397	128,146,356
1864	145,304,957	109,086,703
1863	75,269,417	79,719,641
1862	98,558,680	88,989,911
1861	182,244,627	187,045,786
1860	185,779,689	177,111,922
1859	248,527,306	222.610,300
1858	227,656,186	251,255,099
1857	217,871,839	172,565,934
1856	230,913,150	218,225,490

For an article of such general use, an interest may be felt in regard to the sources from which the supplies are furnished, and we herewith insert the import table of New York, which comes within a million six hundred thousand pounds of the entire amount:

From Brazil	93,510,912
St. Domingo	4,480,710
Java and Sumatra	178,056
Singapore	9,070
Manilla	154,613
Ceylon	1,039,360
Maracaibo	3,435,636
Laguayra and Port Cabello	1,811,370
Jamaica	1,332,210
Cuba	1,143,105
Porto Rico	249,515
Bolivar City	74,140
Costa Rica and New Grenada	291,760
Rotterdam	770,530
Other ports in Europe	4,242,300
Other foreign ports	255,630
Total direct	112,978,917

Milwaukee & Northern Illinois R. R.

This company was organized at Milwaukee on the 27th ult., by the election of the following gentlemen as a Board of Trustees: Edward Roddis, Lester Sexton, John Plankinton, Giudo Pfister, John Nazro, J. H. Van Dyke, Philo Belden, E. D. Holton and R. W. Pierce. The arrangements for the construction of this road are such, as to warrant the assurance that it will be completed during the present year. At Savanna it will form a connection with an important railway through Southern Iowa. It is understood that the Racine and Mississippi railroad will form such a connection with this road, as will make it a great trunk line to Southern Iowa and Central Illinois. The length of line to be built is about thirty miles.

Lawrence Railroad.

This road is the connecting link between the New Castle and Beaver Valley Road at Mahoningtown, and the Cleveland and Mahoning road, two miles East of Youngstown. The whole length of the road is 16 miles. On its completion, of which six miles of track only remains to be laid, a continuous railroad will be had from Pittsburg to Cleveland *via* the Mahoning Valley and Youngstown. The distance by this route between the two cities is 133 miles, which the Chief Engineer G. W. Darley, Esq., says is the shortest route that can be obtained, and of the easiest grade.

Shipments of Iron Ore from Lake Superior.

The shipments of iron ore from the several Lake Superior companies during the year 1865 were 178,708 gross tons, against 248,000 gross tons in 1864, being a decrease of 69,292 tons. The receipts over the Bay de Nocquet and Marquette railway for 1865 were 170,912 gross tons. The products of the New York and Iron Cliff mines were nearly all shipped by way of Escanaba, Green Bay. The furnace product of pig iron was as follows:

Furnaces:	Gross tons.
Morgan, for year ending Dec. 1st	3,724
Northern " "	3,045
Bancroft " "	1,045
Collinsville " "	1,471
Greenwood, May 1st to December 1st	1,530
Total	11,674
Total product, 1864	12,951

Montreal and Vermont Junction Railway.

A meeting of the Directors of this railway was held at Stanbridge on the 25th ult., when the Hon. P. H. Moore was elected President of the Board, the Hon. G. Gregory Smith, Vice President, and J. C. Baker, Esq., Secretary and Treasurer. The Hons. J. G. Smith, Joseph Clark and A. B. Foster were also elected Managing Directors.

The Patuxent Railroad.

The Maryland Legislature has passed a bill to incorporate a company to construct a railroad from Washington to Point Lookout. This enterprise seems to attract considerable attention in Prince George's, St. Mary's, Charles and Calvert Counties. The St. Mary's *Gazette* is in favor of the county subscribing at once for $50,000 of the stock of the company.

☞ The depot of the Alleghany Valley Railroad at Laurenceville, near Pittsburg, including the round house, carpenter shop, engine shop and blacksmith shop, with eleven locomotives, was totally destroyed by fire on the 5th inst.. There is no insurance, and the loss is very heavy.

☞ The Montreal Board of Trade have resolved that no adequate means exist enabling Canada to compete with the Erie Canal, and that the Welland Canal must be enlarged, the Great Lawrence locks lengthened and deepened, and a new canal built between Lake Champlain and the St. Lawrence.

☞ The Philadelphia and Reading Railroad Company have leased the Branch Union Canal from the Big Dam to Pinegrove, and the canal Company's road from Pinegrove to the Swatara Junction. This insures the construction of a railroad from Lebanon to Pinegrove, and the improvement and enlargement of the Union Canal for a tonnage of 125 tons.

New Jersey War Debt.

The entire debt of New Jersey on war account, on the 30th of November, 1865, was as follows, viz:

State bonds issued during the last fiscal year	$271,800
Previously issued	2,599,600
Amount of bonds issued from commencem't of the war to Nov. 30, 1865	$2,871,400
Add loan from State fund for war purposes, loans from Banks, &c.	370,319
Amount of bonds issued and debts unpaid up to Nov. 30, 1865	3,241,719
From above deduct bonds due Jan. 1, 1865, and redeemed by Commissioners of sinking fund	99,600
Liabilities of war fund Nov. 30, 1865	$3,142,119
Toward paying the above debt, there was in sinking fund on Nov. 30, 1865, not needed to pay interest	324,000
War debt, Nov. 30, 1865	$2,818,119

Debt of Michigan.

The indebtedness of this State, according to the recent report of the State Treasurer made to the Legislature, is as follows:

	Int.	Due.	Amount.
Renewal loan bonds	6	1878	$216,000 00
Two million loan bonds	7	1868	250,000 00
" "	6	1873	500,000 00
" "	6	1876	500,000 00
" "	6	1883	750,000 00
St. Marie Canal Bonds	6	1873	100,000 00
War Loan Bonds	7	1886	1,122,000 00
War Bounty Loan Bonds.	7	1890	345,000 00
Total funded debt			$3,783,000 00
Adjusted bonds, past due			$4,000 00
Full paid $5,000,000 loan bonds, past due			12,000 00
War loan bonds ($100 and $50) called in			400 00
Unrecognized $5,000,000 loan bonds, $140,000 adjustable for			80,999 80
Total funded and unfundable debt			$3,880,399 80
TRUST FUND DEBT.			
Primary school fund			$1,444,239 50
University fund			264,871 47
Normal school fund			39,204 23
Railroad deposits			2,157 32
Total liabilities			$5,330,872 32

Consumption of Molasses.

The consumption of Domestic and Foreign Molasses, in the United States, for the last ten years were as follows:

	Gallons.			Gallons.
1865	35,185,038	of which	Foreign	34,335,038
1864	32,410,325	"	"	28,582,325
1863	37,569,088	"	"	26,569,088
1862	62,668,400	"	"	25,650,400
1861	40,191,556	"	"	20,383,556
1860	47,318,877	"	"	28,724,205
1059	54,260,970	"	"	28,293,210
1858	45,169,164	"	"	24,795,374
1857	28,508,784	"	"	23,266,404
1856	39,608,878	"	"	23,014,878

☞ The bill to incorporate the Chesapeake Bay and Potomac Tidewater Canal Company, has passed both houses of the Maryland Legislature, and is now a law. The purpose of this bill is to extend water communication from Cumberland, by way of Washington to a point on the Severn River, twelve miles above Annapolis, thus making the latter place a great depot for the shipment of Maryland coal.

Russian Railways.

The Russian *Invalids* gives the following statistics of Railways in Russia: The lines constructed by the Great Railway company have an aggregate length of 1,617 wersts (about 1,080 English miles), and cost 169,183,420 silver roubles, thus averaging 104,628 roubles per werst. The Riga and Dunaburg Railway (204 wersts long) cost 13,561,231 roubles, or 66,476 roubles per werst. The Moscow and Ryasan Railway (185 wersts in length) cost 15,000,000 roubles, or 81,081 roubles per werst. And finally the railway connecting the Wolga with the river Don (73 wersts in length) cost 4,591,748 roubles, or 62,240 roubles per werst.

☞ The completion of the bridge of the Adirondack Railroad Company across the Sacondaga was celebrated at Luzerne, on the 2d inst. This bridge, Howe's Patent Truss, is ninety-eight feet from the water, and spans a chasm five hundred and seventy feet wide. It was commenced the 15th of November last, and completed February 1st. The builder is Mr. H. L. Lacey.

New York, Saturday, February 17, 1866.

Our Trade with Colombia.

It is a circumstance quite familiar to persons long engaged in business with Colombia, formerly known as New Grenada, that our commerce with that country is rapidly declining. Though naturally and politically inclined to close relations with the United States, it is preferring a commercial intercourse with a more distant nation, and purely because it has regular and frequent postal communications with Great Britain. Three times a month the Colombian ports are visited by British mail steamers; and this regularity of communication is drawing after it an increase of traffic, at the expense of our own. There seems no immediate remedy for this, but in an early establishment of new postal communications, a policy recently recommended by the Postmaster General in his report to Congress. As the service by steam would be too costly at present, he is in favor of employing sailing vessels, which, departing regularly from this port as often as twice a month, would convey letters to the lower ports, as Savanilla, Santa Marta and Cartagena, more rapidly than they can be taken at present.

A letter addressed to either of these places, now gets no farther than Aspinwall; for there is no arrangement, by treaty or otherwise, to secure the transmission of these letters beyond the Isthmus, there they must remain unless specially forwarded and prepaid to destination. Months elapse consequently before they are received or answered; and the result is, that all business transactions with the United States and the interior are of a most uncertain character. For months past but little has been transacted at this port with Colombia. The aggregate value of this commerce was in 1860, about six millions annually; now it is reduced to a mere nominal sum, while that of Great Britain amounts to thirteen millions per annum. The products of Colombia are hides, cotton, tobacco, cochineal, gums, cocoa, india rubber, &c.; in exchange for which we have been sending petroleum, furniture, stationery, wines, spirits, candles, soap, clothing, machinery, agricultural implements, medicines, &c. Houses with capital have been established in Colombia for the express purpose of enlarging the American trade; yet, for lack of mail facilities, it is becoming impossible to succeed in the enterprise.

We have had for years past diplomatic relations with Colombia, which seem to be entirely without results. A postal treaty has been under negotiation for a long time at Bogota, but as yet without any conclusion.

It is, however, believed that the accession of Gen. Mosquera to the Presidency, about to take place, will give a new impulse to our declining trade with Colombia. He has just returned from a foreign mission to take upon himself the reins of Government; and his administration bids fair to be the most successful and intelligent which has as yet been the lot of his country. He has devoted his year's absence abroad to economical and administrative questions with great diligence. We know that he has caused inquiries to be made in the United States with direct reference to a modification of the tariff and commercial system of his own country, and has taken back with him two steamers for the National service. The present Colombian tariff is principally levied by weight of the articles imported, instead of their values; even the boxes and cases of goods are charged a duty by weight. This barbarous system most effectually retards the introduction of a large number of articles of primary importance; and, in fact, is equivalent to a prohibition of many of the necessaries of life. We expect from the administration of Gen. Mosquera, a radical change in these particulars.

It is also reported that the new President will again urge the removal of the capital—substituting Panama for Bogota. There is little doubt but that this change would be highly beneficial to the country. Bogota is high among the mountains, far in the interior, and almost inaccessible. The Government is quite isolated, and has but infrequent communication with other countries. On the other hand, Panama is a port of consequence, and in constant *rapport* with Europe and America. The removal of the seat of Government to Panama would give great commercial importance to the republic, a position it does not now hold. This place would rise rapidly to the rank of a great city and reflect back its prosperity on the Government. The objection as to climate is gradually disappearing, as it is ascertained since the opening of the railway, the clearing up of the country, and the increase and influx of travelers, that the sanitary condition of the port has almost entirely changed for the better.

We may therefore hope, that our commercial and political relations with Colombia are soon likely to be placed on a better footing than ever; and hope our own Government will do its full share to bring them into perfect accord.

Oshkosh and Mississippi Railroad Co.

A bill has been introduced into the Wisconsin Assembly to incorporate a company, to construct a road from Oshkosh, running southwest through the Upper Fox River Valley to some point on the Mississippi River to Grand County. The corporators named in the bill are: Joseph Stringham, Gabriel Bouck, David Atwood, S. D. Hastings, Wm. Taggart, John A. Parker, Henry Hewett, D. J. Seelye, Harmer Robbins, Isaac Hodges, S. S. Wilkinson, Joseph P. McGregor, J. H. Palmer, M. M. Davis and R. J. Mason.

☞ The rebuilding of the Railroad bridge over the Roanoke river on the Welden railroad, is progressing rapidly. It will be 1,750 feet in length of 11 spans.

Sale of the Union Canal Branch to Pine Grove.

On the 4th June, 1862, a disastrous flood swept the line of the Union Canal from Pine Grove to the Susquehanna, a distance of 52 miles, destroying two large reservoirs, all the bridges, and seriously damaging the embankments on the main line. The main line, however, from Middletown to the Water Works, and thence to Jonestown on the branch, was reopened to navigation on the 20th August, 1862; but the branch canal from Jonestown to Pine Grove, about 15 miles, including the big dam in the Swatara Gap in the Blue Mountain, was not rebuilt.

The rights of the Union Canal Company with their property and appurtenances, between Jonestown and Pine Grove, including, we believe, about five miles of railroad, have been conveyed to the Philadelphia and Reading Railroad Company for the sum of $200,000, which will enable the canal company to enlarge their main line between Middletown on the Susquehanna to Reading on the Schuylkill, a distance of 77½ miles, to a capacity for boats of 150 tons burden, in lieu of boats of 100 tons as at present. And on the basis of this enlargement negotiations are progressing, having in view increased facilities and accommodations to the Broad Top coal trade, which languished last year only because of inadequate transportation between Huntingdon and tidewater. The Broad Top region contains twenty-seven producing collieries, and could double its tonnage and its profits, if there were a canal line from Huntingdon capable of bearing to tidewater boats of 150 tons capacity. And with the Union Canal and also that portion of the Juniata Canal between Millerstown and Huntingdon enlarged, sanguine expectations are cherished of most satisfactory results.

On the part of the Philadelphia and Reading Railroad Company, their purchase gives them a route in a water gate through the Blue Mountain for the Pine Grove and Lebanon Railroad, whereby a coal route will be opened from the Pine Grove region to Lebanon, with extensions and connections to Lancaster City, Columbia and elsewhere.

Pockets will be built at the pool at Jonestown for the transfer of Pine Grove coal from cars to boats; so that the Pine Grove and Lebanon Railroad will be a feeder to the Union Canal, as well as a distributor to other points in the teeming towns and townships between the Schuylkill and the Susquehanna Rivers.—*U. S. R. R. & Mining Register.*

Eastern Shore Railroad.

The following bill, which is intended to secure the completion of the Eastern Shore Railroad, has passed both branches of the Maryland Legislature, and is now law:

Be it enacted by the General Assembly of Maryland, That the lien held by the State of Maryland on the property of the Eastern Shore Railroad Company, to secure the payment of six per centum interest out of the profits of the work on the shares of the capital stock of the said company held by the State, shall not be construed to give a preference to the said State over the bondholders of the said company, and the said lien is hereby expressly waived, postponed and deferred in favor of the holders of bonds of the said company, which may be issued for the construction and equipment of the said railroad to an amount not exceeding, in the whole, five hundred thousand dollars.

Sec. 2. *And be it enacted*, That the said company has full power to issue its bonds or other securities on the pledge of its property, estate and franchises, bearing interest at a rate not exceeding six per centum per annum, redeemable at any time within twenty years, and not exceeding in amount the sum of five hundred thousand dollars, in addition to its bonds already issued, and dispose of the same for the objects aforesaid; and no bonds of the said company, issued in good faith for the construction, completion or equipment of the said railroad, shall be annulled or abated because the same may have been disposed of by the said company at less than its par value.

Sec. 3. *And be it enacted*, That in the election of directors on the part of the private stockholders, the stock of the State shall not be voted, nor shall the same be counted in ascertaining the presence of a quorum necessary for such election.

Sec. 4. *And be it enacted*, That this act shall take effect and operate from the day of its passage.

Connecticut River Railroad.

The earnings and expenses of this road for the years ending November 30, 1864 and 1865, have been as follows:

Earnings:	1864.	1865.
From passengers	$253,106 43	$264,805 54
" freight	206,486 02	254,266 93
" mails	6,140 40	6,094 99
" express	4,200 00	5,550 00
" rents	2,388 00	2,391 50
	$472,320 85	$533,108 96
Expenses, viz:

Balance—surplus	148,881 52	171,980 13
	$303,633 00	$365,232 59

Compared with 1864, the gross earnings of 1865 show an increase of $80,788 11; with an increase in expenses of $45,884 05—making the increase in net earnings, $14,904 06. The ratio of operating expenses to gross income in 1865 was 59.4 per cent.; in 1864 it was 56 per cent.; and 1863, 50 cent.

The company have 12 locomotives.

Miles run by engines:	1864.	1865.
With passenger trains	131,792	128,161
With freight and other trains	91,536	95,587
Totals	223,318	221,748
Number of pass. carried	601,523	614,785
Do. carried one mile	7,600,172	8,059,866
Tons of freight carried	151,183	152,066
Do. carried one mile	4,095,011	4,103,795

The maintenance of the track has required 615 tons of new rails and the removal, repair and replacing of some 2,600 old bars. The number of new ties put into the track is reported as 21,623.

The Commissioners of the Sinking Fund report the present value of the fund at $45,224 59, of which sum $43,000 is invested in the company's bonds and the balance in government securities.

In pursuance of the action of the stockholders at their last meeting, the directors have entered upon the construction of a second track between Springfield and Chicopee, and the progress already made with the work is such as to warrant the expectation that it may be completed early the present season. In grading for the new track it has been found practicable to improve the line of the road in two places at a very small expenditure compared with the advantages to be gained.

The office of the company is at Springfield, Mass. The officers and directors are:

President.—Daniel L. Harris.

Directors.—Ignatius Sargent, I. M. Spelman, Edward A. Dana, Chester W. Chapin, John Chase, J. H. Buttler, Henry W. Clapp and Roland Mather.

Treasurer.—Seth Hunt.

Sup't and Engineer.—W. B. Brinsmade.

Master Mechanic.—John Mulligan.

Chesapeake Bay & Potomac Tidewater Canal Co.

The act incorporating this company recently passed by the Maryland Legislature, and to which we briefly alluded last week, recites that "a line of canal, river and bay communication now exists from New York to the city of Annapolis of sufficient capacity to pass boats of about three hundred tons burthen, and it only requires a link to be added of about twenty miles to connect the city of Washington by canal with New York." The capital of this company is fixed at $3,000,000 in shares of $100 each. It is the purpose of the corporators to cut a canal from a point on the Severn river to the Potomac, or to any branch or tributary thereof. The canal is to commence at Round Bay, a point some twelve miles above Annapolis, on the Severn river, and will run a distance of twenty miles over an almost perfectly level country, to the headwaters of the eastern branch of the Potomac at Bladensburg. It is designed for the accommodation of the Cumberland coal trade, reaching the District of Columbia by the Chesapeake and Ohio canal, which may thence be brought, without transhipment, across to Annapolis.

☞ The opening of the Whitewater Valley Railroad to Brookville, Ind., was celebrated at that place on the 8th inst., by a banquet, at which the managers of the railroad and other guests were finely entertained by the citizens.

Fitchburg Railroad.

The income and expenses of this road for the fiscal years ending November 30, 1862, 1863, 1864 and 1865 were as follows:

Income:	1862.	1863.	1864.	1865.
From passengers	$227,746 25	$270,778 10	$339,087 73	$393,828 04

At the close of the fiscal year 1862, the company had on hand, $250,562 66, less $65,795 59 held for future disbursements, and $109,484 54 appropriated for January dividend—leaving a balance to commence the year with of $75,282 53.

At the close of 1863, the funds on hand amounted to $327,115 64, of which $42,926 75 was for future disbursement, and $145,979 88 for January dividend, leaving thereafter a surplus of 138,209 51; besides $7,391 42 in real estate, and $68,000 in fuel, iron, lumber, etc.

On the 30th of November, 1864, the cash and funds equivalent thereto, amounted to $355,957 74; leaving, after the payment of the January dividend and other indebtedness, a real surplus of $150,732 76, besides property and material valued at $89,108 34.

The assets and liabilities of the corporation on the 30th of November, 1865, were as follows:

Notes receivable	$226,933 16	Balance due connecting roads	$2,018 95
Cash and cash funds	93,359 95	Unclaimed dividends	4,488 00
Freight uncollected	9,191 22	Surplus, Nov. 30, 1865	324,762 34
U. S., for mail service	1,784 95		
	$331,269 29		$331,269 29

—leaving after the payment of the January dividend and the U. S. tax thereon, $175,709 71 in cash, or funds equivalent thereto. In addition to this, the corporation owns real estate valued at $7,071 50, also fuel, iron, lumber and other materials necessary for working and repairs, which, at a low valuation, are worth $107,920 60. This property, amounting to $114,992 10, has all been paid for, but is not included in the assets enumerated above. It may also be stated that this corporation is absolutely free from debt.

TRIAL BALANCE, NOVEMBER 30TH.

	$3,829,340 85	$3,915,546 14	$3,947,476 08	$3,950,961 39

The equipment of the road consists of 27 locomotives, 26 passenger, 10 baggage, 319 eight-wheeled, and 298 four-wheeled merchandize cars and 37 gravel cars.

President.—WILLIAM B. STEARNS.

Directors.—William B. Stearns, Alvah Crocker, W. E. Faulkner, P. Brigham and W. A. Brigham.

Treasurer.—M. D. BENSON.

General Superintendent.—C. L. HEYWOOD.

Delaware and Raritan Canal and Camden and Amboy R. R. Co's.

The following statement of the condition of these companies January 1, 1866, is taken from their report filed in the office of the Comptroller of the Treasury of New Jersey, in pursuance of law:

Capital stock—Canal		$2,298,400
Railroad		4,543,800
Joint stock		$6,842,200
Funded debt	$10,169,472	
Other indebtedness	175,000	
		10,344,472
Total stock and debt		$17,186,672
Receipts on canal and railroad, 1865		$6,274,657
Expenditures for same period		4,572,303
Net current		$1,702,354

To the above capital of the joint companies $6,842,200, is to be added the 10 per cent. dividend, payable in stock—making the total capital from and after the 15th instant, $7,368,220. The net revenues of the companies are given at $1,702,354, from which, if the sum of $620,688 is deducted for interest, at 6 per cent., on $10,344,472 of debt, there is left a balance of profits to the stockholders of $1,081,686, or rather more than 15 per cent. The reason of the stock dividend just made, in lieu of the usual cash dividend, is not that the company's receipts did not warrant it, but because a large amount of those receipts have been expended by the company in the construction of new road. An additional track has been laid on the Philadelphia and Trenton section, making it a double track, and several miles of new road have been made on the Jersey side of the river, beyond Trenton, by which the passenger trains are removed from the old and somewhat dangerous position on the banks of the canal. Altogether the company have now in number of miles, equal to a double track between Philadelphia and New York.

Saratoga & Hudson River R. R.

This road is 40 miles in length, commencing on the New York Central Railroad, three miles east of Schenectady and terminating at Athens on the Hudson river 30 miles below Albany. In May next, or upon the opening of the Hudson river to that point, the Saratoga and Hudson River railroad, on which the track is now laid, and the ballasting in progress, will be opened for business.

☞ An act has passed the Maryland Legislature authorizing the commissioners of Somerset county to subscribe $50,000 to the capital stock of the Eastern Shore Railroad Co., and another law waiving the State's lien on said road in favor of the holders of the bonds of the company, and allowing them to issue additional bonds to the amount of $500,000. The intention is to extend the road during the coming summer, to the Little Annamessox river.

Pacific Railroad Convention.

On the invitation of the Secretary of the Interior, given early in September last, a convention of the Commissioners and Directors of the different branches of the Pacific Railroad was held at Washington on the 1st of February inst. The following gentlemen were present:

GOVERNMENT COMMISSIONERS.

Lieutenant Colonel J. H. Simpson, Corps Engineers, United States army, Commissioner on Union Pacific Railroad and Union Pacific Railway, eastern division.

Major General S. R. Curtis, of Iowa, Commissioner on Union Pacific Railroad and Union Pacific Railway, eastern division.

Hon. William M. White, of Connecticut, Commissioner on Union Pacific Railroad.

Hon. P. H. Sibley, of California, Commissioner on Central Pacific Railroad.

Hon. William P. Smith, of Maryland, Commissioner on the Union Pacific Railway, eastern division.

GOVERNMENT DIRECTORS OF UNION PACIFIC RAILROAD.

Hon. George Ashmun, of Massachusetts.

Hon. Jesse L. Williams, of Indiana.

Hon. Springer Harbaugh, of Pennsylvania.

Hon. Timothy J. Carter, of Illinois.

Hon. Charles T. Sherman, of Ohio.

REPRESENTATIVES OF RAILROAD, PRESENT BY INVITATION.

C. P. Huntington, Esq., Vice President Central Pacific Railroad.

Hon. S. C. Pomeroy, President Atchison Branch Pacific Railroad.

Hon. Wm. B. Allison, Vice President Sioux City and Pacific Railroad.

Hon. Oakes Ames, Sioux City and Pacific Railroad.

R. M. Shoemaker, Chief Engineer Union Pacific Railway, eastern division.

Hon. J. P. Usher, Attorney Union Pacific Railway, eastern division.

George W. McCook, Esq., Attorney Union Pacific Railway, eastern division.

Hugh L. Jewett, Director Union Pacific Railway, eastern division.

After a full discussion of the objects of the meeting, the necessity of a standard gauge and a good road, to build which and its branches not less than six companies are chartered, the following reports from the business committee, and that on legislation were unanimously adopted:

The various locations through which the Pacific Railroad and its branches are destined to run occupy such a variety of country as to render a specific style of work suited to all localities extremely difficult. The topographical features of the surface, the great variety of soils and lower strata of the earth, the singular variety of climate as to cold and heat, wet and dry, all have to be considered in determining details of location, material, and form of the work. It was, probably, because of these difficulties the laws of Congress authorizing the construction give only general or very meagre specifications as to the details of the Pacific Railroad.

But your committee, after availing themselves of the views expressed by the several engineers to which they have referred, and in contemplation of the reasonable construction of the law of Congress, recommend to the board the adoption of the following general rules as those which should govern all parties engaged in directing, constructing, or accepting the work:

1st. Every step taken in the work, and especially in the location of lines and grades, should be adapted to ultimate perfection, whatever may be immediate interests or necessities, so as to secure to the nation a grand and complete structure, every way worthy of our country and honorable to the distinguished men who involve their capital and energies in so vast an enterprise.

LOCATION.

Great care should be observed in the determination of the general and detailed location of the main line and branches, so as to secure the shortest lines consistent with economical grades to the most desirable passes of the mountain ranges. The law names but few points; still it is clearly the interest of the Government and not prejudicial to the companies to determine such points as a great general line should have, so as to unite, as far as possible, all the great ultimate purposes of a central and convenient channel for the commerce of nations that is likely to traverse the road.

With this general view of the work, careful and extended surveys should be made and well considered.

GRADES AND CURVES.

While the law makes the grades and curves adopted on the Baltimore and Ohio Railroad a standard, this is only to be considered as a limit to be adopted in mountain districts. To introduce grades of 116 feet per mile, or curves as sharp as 400 feet radius, on other parts of the road, would manifestly violate the spirit and intent of the law. Grades and curves should be settled upon principles of true economy and adaptation, based upon careful scientific and practical investigations, having due regard both to cost of construction and future working of the road.

It is safe to say, in advance, that on the Platte and Kansas Valleys, and on similar smooth valleys or level plains, no grade should exceed thirty feet elevation per mile.

EMBANKMENTS AND EXCAVATIONS.

In all parts of the main line of road or branches, embankments should not be less than 14 feet wide at the grade line. Excavations, if the cuts are lengthy, should be 26 feet wide, and in shorter cuts at least 24 feet; thus leaving in all cases room for continuous side ditches of ample depth and width, so as to secure that most essential requisite, a well-drained road bed. Rock excavations should be not less than 16 feet wide, and all tunnels should be excavated for a double track. Slopes of earth embankments should be one and a half base to one rise, depending upon the material, or if steeper, then to have increased width at grade, so as to remove the same quantity of earth contained within the slopes.

MECHANICAL STRUCTURES.

Culverts and abutments for bridges and drains should be of stone, whenever a durable article can be obtained within a reasonable distance—say from five to eight miles, depending upon circumstances. Provided that temporary trestles may be adopted upon assurances, to the satisfaction of the commissioners, that stone abutments will be substituted immediately after the line shall be opened, so that stone can be transported thereon. But if good stone be too remote, then hard burned brick or wooden trestle work may be adopted. The wood to be of the most durable character the country will afford; and the wood or brick to be replaced by stone when that material can be conveyed conveniently by rail. Bridges of stone or iron or wood, (such as the Howe truss, or other equally good structure,) should be used at the discretion of the company.

BALLASTING.

A railroad cannot be considered complete until it is well ballasted. If composed of gravel or broken stone it should be from 12 to 24 inches thick, depending on the lower material. In view of the settling of new enbankments, which requires time and rains before ballasting can be properly placed, and also in view of the number of miles required by the law to be constructed annually, the perfect finish of the roadbed in this respect must be progressive and the work of time. Yet it is the opinion of the board that such work of perfecting the ballast must proceed as usual on first-class railroads; otherwise subsequent sections should not be accepted, because the whole work is not then being carried forward as a great Pacific railroad, such as the law contemplates.

CROSS-TIES.

Oak or other suitable timber should be used, where it can be obtained with reasonable transportation. When such timber cannot be had for all the ties at reasonable cost, then the best the country affords may be adopted; but if it be cottonwood, or similar soft material, it must be Burnettized or kyanized thoroughly so as to increase its durability. But in all cases the joint tie should be of oak, or other suitable timber, the better to hold the spikes at these points. There should be at least 2,400 ties to the mile. They should be eight feet long, six inches thick, and if hewn, six inches on the face. If sawed, they should not be less than eight inches wide and not less than 2,400 per mile, or such number as will have the same bearing surface, provided that if any sawed ties have been already delivered or contracted for only seven inches wide, they may be laid down.

RAILS.

These are to be of American iron, as required by law, of the best quality, and should weigh sixty pounds to the yard. But in consideration of the great cost of transportation from the present location of rolling mills to the remote sections of this road, iron may be adopted which weighs only fifty-six pounds to the yard. In mountain districts, however, where heavier engines will be used, not less than sixty pound rails should be adopted; provided that if any of the companies have on hand or in transitu, or contracted for, any rails of different weight from that herein specified, and not under fifty pounds per yard, such rails may be used. The rails should be attached to each tie by spikes driven on both sides of the rail. As the nearest approximation to a continuous rail, the so-called Fish joint is preferred and recommended, but if found that it will retard the progress of the work, the common American wrought-iron chair may be used.

SIDINGS.

The length of side tracks should be at least six per cent. of the line completed, to be increased as the number of passing trains shall demand. Side

tracks should be laid eight feet apart in the clear between the rails. Wherever cattle-guards and road crossings are necessary, they should be made.

ROLLING STOCK.

Locomotive engines and cars must be provided in liberal proportions to the traffic and the convenient construction, to be increased from time to time as the completion of additional sections and the increase of business seem to require.

BUILDINGS.

Engine houses repair shops, and station buildings should be adapted to the wants of the service.

At the opening of business, the extent and capacity of buildings may be only such as to provide liberally for the existing rolling stock and the business of the road, and such probable early increase as may seem likely; yet the plans in all cases, both as to the buildings and grounds, should be arranged for prospective enlargements and extensions, equal to any future business of the road; the buildings at first erected forming appropriate parts of a complete and systematic whole.

Engine houses and repair shops at the principal stations must in all cases be of stone or brick, with good stone foundations. The covering should be slate and metallic, to guard as far as possible against fire.

Water stations should be erected at convenient distances to suit the wants of the trains.

Extensive and convenient locations of ground should be procured to accommodate a future large business, and the proper titles should be carefully secured. All this is the more desirable, as lands are now easily obtained at moderate prices.

In these specifications it is believed that nothing is required which may not be regarded as essential to a commodious and complete railroad. Nothing is proposed to retard the progress of the companies. The importance and public desire for accelerated movements have been fully appreciated, and the board earnestly desires to favor and foster the energy and fidelity which now seems to animate those engaged in the construction. But while guarding against delay on one hand, the public interests require, on the other, a substantial and complete work, and the highest perfection of track reasonably attainable on a new road is expected and projected as the standard to which the workmen are to arrive. The argument in favor of speedy construction must be subordinate to the substantial objects of the road, and the Government must be certain to have a work that will convey her mails, troops, and munitions of war, and commerce of the country with entire certainty, celerity, and convenience. It is the aim of this board to secure all these objects, and it is also our belief that they are not incompatible, it being only necessary on the part of the Government to insist upon the reasonable requirements embodied in this report to hasten the completion of the great work, and at the same time adapt it to the high public interest which it is intended to subserve.

REPORT OF COMMITTEE ON LEGISLATION.

"The committee to whom was referred the subject of legislation on the matters under consideration by this board respectfully report:

"That the results arrived at cannot properly be enacted in the form of a statute, and we therefore do not deem it advisrble for us to ask any legislation from Congress at the present time.

"We, however, deem it proper to suggest that it is possible legislation may be proposed hereafter, and, in that case, this committee should be charged with the duty of giving its attention to the proposed action."

The convention then called in a body on the Hon. Secretary of the Interior to pay their respects. After stating to him that their labors had been ended in a manner mutually satisfactory, and his expressing gratification at the result, the convention adjourned *sine die*.

A Coal Route by Rail from Carbondale to Albany.

At the beginning of the present year, 82 miles of the Albany and Susquehanna Railroad were in use from Albany to Oneonta, leaving 58 miles, on the heavy sections of which work is progressing, yet to be completed, to put in operation the line to Binghamton; making the whole distance from Albany to Binghamton 140 miles.

In 1856, John C. Trautwine, Civil Engineer, of Philadelphia, surveyed a route from Hyde Park, opposite Scranton, on the Lackawanna, to Lanesboro on the Susquehanna river, a distance of 54 miles. From Lanesboro a road was projected to the Albany and Susquehanna Railroad at Nineveh, 23 miles from Lanesboro and 118¼ miles from Albany.

The intent was to open from the Lackawanna coal field a continuous line of railroad northeast across New York to Albany. And this plan, changed and modified to fit it to existing circumstances, will, we understand, be carried out through the co-operation of the Delaware and Hudson Canal Co. with the Albany and Susquehanna Railroad Co. whereby a coal route will be opened from the Lackawanna at Carbondale to the Hudson at Albany. The route is through a populous section of New York, which will soon be intersected with roads that will derive their coal tonnage from Carbondale and its vicinity.

The three New York companies in the Northern Anthracite Coal Field are now all parties in rail outlets to tidewater: The Delaware, Lackawanna and Western Railway Co. has rail outlet east to the bay of New York and north into western New York. The Pennsylvania Coal Co., over the Erie road, has outlet to Jersey City and Newburgh. The Delaware and Hudson Canal Co. will have outlet to Albany over the Albany and Binghamton Railroad.

The three New York companies, in fact, are arranging with a view to facilities for competition in western and northern New York as well as in the tidewater market.

The distance from Carbondale to Lanesboro is 38 miles. The distance from Lanesboro to Oneonta we do not know. But the fact that the Delaware and Hudson Canal Co.—an opulent and powerful corporation—is in combination with the Albany and Susquehanna Railroad Co. is surety that the link needed between Carbondale and Oneenta will be built.—*U. S. R.R. and Mining Register.*

Railroad from Peoria to Rock Island.

Some years ago a charter was obtained for a railroad from Rock Island to Peoria. Under this charter the work was commenced on the Rock Island end of the route. In course of time the road was put into operation a few miles to a place called Coalville, and then passed out of the hands of the company. Since then it has been used for the purpose of transporting coal to Rock Island. The owner of this road thinks if the charter of the road is revived and the road built through, no difficulty will stand in the way of an arrangement whereby the part finished can become a portion of the whole. Whether the plan of building the road be carried into effect at this time or not, the fact is still plain that in time we shall have a road from here to Rock Island, and this much be done in order to give an outlet and market to a large extent of rich country that is not accommodated by the roads now running from the Mississippi River to Chicago.—*Peoria Transcript.*

Ohio and Lake Superior Railroad Co.

This is a new corporation organized under the laws of Michigan. The road is to be built from Toledo to Saginaw, and thence on an air line to Mackinaw, passing the straits by bridge or tunnel, if practicable (?) thence westward through the Peninsula and Wisconsin, and connecting with the Northern Pacific Railroad at or near the head of Lake Superior. Branches will be built to Marquette and Ontonagon, if the main trunk does not take in those points; another branch will run from the Straits to Sault Ste. Marie, and still another, from Saginaw to Detroit, making that city the eastern terminus, while the Southern traffic will pass on to Toledo. The total length will be 700 miles.

The main object is to secure the traffic of the Northern Pacific Railroad and the Lake Superior region. It is intended to be a distinct and entire project, unconnected with any other road proposed or existing, unless it should be consolidated with the Northern Pacific.—*Western Railroad Gazette.*

Susquehanna and Tide Water Canal Co's.

A bill has passed both branches of the Maryland Legislature authorizing the Governor, Comptroller and Treasurer to relinquish the arrearages of interest and exchange due from the Susquehanna and Tidewater Canal Companies on the 1st of January, 1865, and to settle with said companies upon the terms of the law passed at the last session of the Legislature, except as to said arrearages; *provided*, that in case of any default in the payment of the interest on the renewed bonds in accordance with the act of Assembly of the last session, the arrearages shall be revived, and again become due and payable as fully and completely as if this act had never been passed. Hereafter on all merchandize passing to or from Columbia through the outlet lock at Bell's Ferry, and loaded in or to be discharged at Port Deposit, the tolls shall be one-twelfth less than the tolls charged on articles of the same class from Columbia to Havre de Grace, and at all future elections for managers, six of the number shall be residents of and chosen from Maryland, and the principal office of the companies shall be continued in the city of Baltimore as heretofore. The companies are also required, on the completion of the enlargement of the canals with which they are in connection, to make their canal of corresponding depth.

☞ The New Orleans and Opelousas Railroad, which extends from Algiers (opposite New Orleans) to Brashear City, a distance of eighty miles, will be turned over to the company in a few days. The government has had charge of the road from its seizure to the present time, as a pecuniary difficulty had arisen with the directors regarding the terms of the transfer. The affair has been settled.

☞ The Alexandria *Gazette* says: "We understand that $750,000 is the estimated cost of the Manassas Gap and Winchester and Potomac Railroad connection, and that this sum is to be subscribed by the Baltimore and Ohio Railroad Co. Of this amount, $400,000 will complete the proposed connection, leaving $350,000 to be expended in rebuilding and refurnishing the Manassas Gap Railroad."

☞ The Kentucky Legislature have passed a bill authorizing the Louisville and Lexington Railroad Company to build a branch road from Smithfield to Covington.

American Railroad Journal.

Saturday, February 17, 1866.

Stock Exchange and Money Market.

The market is evidently under the influence of considerable doubt. The Treasury Department is of necessity so large an operator, that its movements and its policy must have a powerful effect on all other dealers in money, and all who rely upon this in their business. Contracts are therefore entered into with considerable caution, a position the safest to be occupied by those who wish to get safely through their transactions. Our large National debt and our inflated paper currency have given an anomalous aspect to business generally. We are carrying all sail, and any accident would be disastrous. There are prudent navigators, however, who would if possible lessen the spread of canvass, while others seem willing to keep on at every hazard. Thus we find a curtailment of our paper currency, now selling at a large discount, seriously objected to, as disastrous "to all the debtor classes," and as paralyzing the operations of the "productive classes." We had supposed the debtor classes had been sufficiently favored during the last four years. Those who owed money in coin value, as all debtors did at the beginning of the war, had the rare opportunity of paying their debts at one time at an immense advantage, particularly when gold was 285 in currency, and currency was a legal tender at par, even at that enormous discount. Those persons, on the other hand, who have run into debt on paper valuations, have done so against the light of experience, the teachings of history, and the advice of the prudent, and are not entitled to special consideration, when sound principles of finance demand to be restored to their former place in our political economy. And as to our productive industry, it has had unexampled prosperity in the high prices which our debt and currency have created, and is known to have enjoyed profits hitherto unexampled in this or any other country. Scarcely a fabric of American origin has been manufactured or produced without enormous gains to the producers. Cottons, woollens, leather, metals, food and fuel are higher in the United States on the average than in any other part of the world. To advocate a continuance of a system which is to perpetuate high prices and profits, is a gross injustice to that larger and struggling class of people known as consumers, always a majority of any population, and the largest contributors to taxes, and the firmest support of a Nation. And though by the appreciation of the paper dollar, as is contended, the holders of the National securities will gain very largely, this expectation was one foundation of their investments, and they have a just claim to demand its realization. What they will eventually gain by the appreciation of their securities will be an actual addition to the wealth and capital of the country, and be felt in all its industrial and commercial pursuits. Besides, what kind of morality must that Nation or Government practise which avows its intention to deal perpetually in a depreciated currency, and seeks to keep its securities below par in gold, that its creditors may be cheated out of their money. For this is the plain English of any plan which looks to any other event than payment in full according to the "nomination of the bond." We therefore hope, the judgment of the American people will not suffer itself to be misled from the path of rectitude by any considerations such as we have alluded to. Our duty is plain and should not be evaded or ignored.

One of the financial projects of the day is an export duty on cotton, say 5 cents per lb. The constitutional prohibition of export duties has been often considered and discussed. It is the better opinion that it was intended to apply only to articles exported from one State to another. At all events the effect of an excise duty would be precisely the same.

As a general rule, it is considered injurious to the interests of a country to lay export duties on its own products, as tending to check demand, and of course production. But on the other hand, where any country has an exclusive article

to part with, an export duty may be safely laid upon it, as the charge falls on the foreign consumer. Thus it is that Russia derives a considerable duty on tallow, which it exports in large quantities, and for which the demand continues constant. So, too, of late years an export duty on rags has obtained in many countries of Europe. The total amount of cotton produced within the 36 years preceding 1860, is known to have been upwards of 76 millions of bales, the annual production being at one time, 1859–'60, as much as four millions six hundred and seventy-five thousand bales. It is very evident that a moderate excise or export duty on such production would be of immense relief to the finances of the country. That the production of cotton is to continue on a large scale no one can doubt. It is one of the most inviting of all our agricultural pursuits; and we believe we are to see the labor of our freedmen cheerfully applied in that direction. Northern capital is already turning its attention South; and of all the products of the earth, there is none more in demand, more useful, or convertible into money so readily, so conveniently or so pleasantly as cotton. It is one of those remarkable natural gifts to this country which gives it pre-eminence over all others, and is an element of strength that cannot be too highly appreciated.

The trade of this port the last week has been quite active. The imports and exports being nearly equal in amount, rose in the aggregate to twelve and a quarter millions. The gold customs alone exceeded the sum of three millions. It is understood that the disposition of dealers at present is not to give long credits, though these have been asked to a considerable extent. This action it is hoped will be persistent in. It is inexpedient to have large commercial debts at present pressing upon the business of the country. Individual freedom from responsibilities is just now an indispensable element of the public welfare. Short credits and prompt payments are the only safe forms of business at the present moment. Let these be adhered to, and the country will be able to pass successfully through inflation to a sound condition of currency.

Gold has again declined, and in the face of a large demand for customs. This special and local demand does not seem to affect its price to any great extent, which we attribute to the general confidence which is growing up as to the final and complete extrication of the country from its financial difficulties, in the belief that it is competent to meet all its engagements, and that its promises to pay will be fully and honorably discharged. This feeling induces a general disposition to wait with patience for the expected return to resumption; and the creditor who is not alarmed and willingly gives delay, may be said to be already almost paid. The certainty of a resumption of specie payments, though the exact hour when it is to occur is not known, has its effect on the price of gold. The fact is, that as this price declines, and paper appreciates, there will be less and less alarm about our large currency, and less trouble in managing it.

Government securities, under this aspect, naturally improve. The quotations in London for the 5-20s are very favorable; and here those for 1862, 1864 and 1865, are all within a fraction of each other. This has not happened before, and shows the general conclusions in favor of these securities, rather than a close discrimination as to their form and tenor.

Exchange continues dull, remaining considerably under par, although some small shipments of specie have been made within the previous week. There will always be shipments of specie to England, no matter what may be the rate of exchange, for reasons entirely independent of commercial considerations. There are always parties who desire their returns in hard cash, whether they made a profit on it or not; and they will have it sometimes even if it involves a loss. The mere shipment of specie just now as a commodity is unquestionably a losing operation, for exchange is the cheaper mode for the remitter at present rates.

Meanwhile money continues easy and plentiful with us, though dear in England. The rate is still low, and the supply greater than the demand. This would ordinarily give a strong impulse to enterprise; but just now impending doubts interpose their influence. High prices hold out their attraction to manufacturers; but there is no knowing when these may fall. At this moment it is really cheaper to import a large proportion of the fabrics in ordinary use, than to pay the current home prices. Everything is dearer, for example, in the City of New York than in the City of Paris. Our countrymen who have been living abroad in that city, and have returned to New York, express their astonishment at the prices which rule here, and wonder they are submitted to. They have not had the experience of paper money as we have, and its effects on men and things.

The more we reflect on the subject the more we are satisfied that the true interests and the real prosperity of this country are bound up in the re-establishment of a sound specie paying currency.

We notice a change in the street with regard to railroad securities. It is now admitted that the roads are doing better than was predicted a few weeks since, though the published returns of the earnings in this JOURNAL disproved the apprehension, or might have done so. A rise in the quotations in the early part of the week was quite significant. The returns of the associated banks of this city for the week ending the 10th, showed the following results: increase of loans, $98,499; increase of circulation, $746,235; decrease of specie, $807,668; decrease of deposits, $2,310,232; decrease of legal tenders, $360,236. The movements in cotton for the week havebeen large.

The New York exports, exclusive of specie, for the week ending February 13, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$4,808,182	$3,777,267
Prev. reported	20,317,172	23,322,613
Since January 1	$25,125,354	$27,099,880

The New York imports compare as follows:

	1865.	1866.
Dry goods	$757,549	$4,741,870
Gen. merchandise	1,829,420	1,833,066
Total for the week	$2,586,969	$6,574,936
Prev. reported	9,757,918	25,170,072
Since January 1	$12,344,887	$31,745,008

The balance in the Sub-Treasury on Wednesday was $98,882,959 21.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 1879, 96; N. Y. State 7s, Bounty Loan, 99⅞; do., 6s, 1872, 93; Ohio 6s, 1886, 97; Tennessee 6s, 1868, 89; Brooklyn 6s, Water Loan, 92; New Jersey Central, 114; do., 1st mort., 100¼; Milwaukee and St. Paul 1st mort., 80; Chicago and Milwaukee 1st mort., 85; Indianapolis and Cincinnati R. R., 70; Norwich and Worcester, 98; Morris and Essex, 100; Stonington, 110; American Coal, 58; Wyoming Valley, 49; Butler Coal, 14½; Schuylkill Coal, 19; Maryland Anthracite Coal, 15; Mariposa pref., 17½; Pacific Mail scrip., 170; Western Union Tel., 57½; Union Navigation, 100¼; Ocean Bank, 92; 9th National Bank, 108; Metropolitan Bank, 122; Bank of North America, 110; Central Bank, 109; Phœnix Bank, 98; Bank of Republic, 108; Bank of Commerce, 105; 4th National Bank, 97¾; Am. Ex. Bank, 115; Shoe and Leather Bank, 102; Continental Bank, 97; Bank of New York, 112.

Philadelphia.—Phil., Wil. and Balt. R. R., 55¼; Vermont Central 2d mort., 25; 13th and 15th streets R. R., 31¼; Union Passenger R. R., 24; Union Canal, 2½; Huntingdon and Broad Top Mt., 19½; do., 1st mort., 80; Coal Ridge, 8; Green Mt. Coal, 4⅛; New Creek Coal, 1¼; Big Mt. 5⅜; Clinton Coal, 1⅞; Fulton Coal, 7; N. Y. and Middle Coal Fields, 6¾; Buck Mt. Coal, 48; Preston Coal, 20; Swatara Falls Coal, 2; Mahanoy Coal, 6; Lehigh Zinc, 31; Commercial Bank, 52½; Girard Bank, 52; Philadelphia Bank, 142½; National Bank, 94; Mechanics Bank, 28⅝; Kensington Bank, 100; Penn Township Bank, 53; Corn Exchange Bank, 62; Farmers and Mechanics Bank, 122; Corn Planter Oil, ⅞; Curtin, 1; Dalzell, 1¾; Feeder Dam, ⅞; Junction, 1; Maple Shade, 4½; McElrath, 1⅛; McClintock, 1½; Mineral, ¼; Ocean, 15⅝; Oak Shade, 2⅝; Spencer, 2; St. Nicholas, ⅜; Wm. Penn., 1. The latest quotations are: City 6s, 87@87¼; do., new, 91½@91¾; State 5s, 86⅛@86¼; do., coupon, 86@86½; do., 6s, W. Chrome, 0.45@0.50; Bare Hill, 1.05@1.15; Atlantic Coal, 0.98@1.10; Mineral Hill, 0.50@0.75; Baltimore Coal, 150@200.

Western Union Telegraph.

The directors of this company at a recent meeting rescinded the action of a former meeting of the board authorizing the issue of $3,000,000 of guarantied stock, and substituted therefor seven per cent. bonds, to mature in ten years for the same amount, to retire bonds falling due, such bonds convertible at any time in the first nine years into the common stock of the company at the option of the holder.

Two millions of these bonds are at once to be offered; the stock and bondholders to have the preference in purchasing. As an evidence of the confidence of the Directors, though there was a bare quorum present, over half a million of the new bonds was taken in the meeting.

New Baggage Checks.

We have had our attention directed to the invention of Mr. G. C. Thomas of this city, in the form of a new baggage check, which must supersede all the other kinds hitherto in use. It is in the form of a disk of brass, with an opening at the bottom, through which is read the place of destination, and engraved on an interior disk and which is fastened permanently there by the passage of the leather strap through another opening above the lower one. When thus adjusted the check is immoveable, and distinctly shows the place of destination. It is so constructed that the name of the place is presented at the pleasure of the baggage agent through the lower opening, and is secured there as long as the strap remains in the check. It will be seen at a glance that one check on this principle will answer for many stations, just as many as are marked on the inner revolving plate, so that a large saving is effected by its use, and the traveler has at the same time the direction of his route, and destination in his pocket. In addition, the check bears on its face the names of the lines of road over which he is traveling. The simplicity of this invention is only equalled by its usefulness. It entirely changes the present system, doing away with the large expense of those now in use, as well as the confusion, and giving to the transmission of luggage a certainty and security hitherto unknown. Mr. Thomas is the Editor of *Appleton's Railway and Steam Navigation Guide*, and has made a worthy change of his labors in that direction by insuring to our millions of travelers a check on the delivery of their luggage, which relieves them from every fear of loss. This reversible check is indeed a boon to all railways and all railway travellers.

Chicago and Great Eastern Railway.

Subscriptions will be received at the office of this company, No. 37 William street, for $1,350,000 of their 1st mortgage sinking fund convertible seven per cent bonds, due April 1, 1895, interest payable April 1 and October 1, of each year—being the entire balance of the $5,000,000 authorized. These bonds are secured by a mortgage on 224 miles of finished road, extending from Chicago, Ills., to Richmond, Ind., and all its present and future acquired property. A copy of the mortgage may be seen at the office of the company. The proceeds of these bonds will be applied the extinguishment of the floating debt, and the purchase of additional equipment. The earnings of this road for a series of years may be found on page 161 of this week's issue.

☞ A correspondent of the Philadelphia *Ledger*, writing from Middletown, Bucks Co., Pa., says: "It is perhaps not generally known to many of your readers, that it is contemplated to construct a railroad from the northern part of Philadelphia to Attleboro', in Bucks Co., a distance of about 19 miles. A charter has been obtained and a company organized, who have made surveys of three routes through that beautiful, productive, and thickly settled agricultural district, commencing near the Episcopal Hospital, passing a little west of Frankford, east of the Fox Chase, west of Bustleton and Somerton, and east of Easterville, to the north side of Attleboro', with the prospect of a railroad being extended thence to the Delaware River."

Chicago and North Western Railway.

The gross earnings of the Chicago and Northwestern Railway Company for seven months of the present fiscal year ending December 31st, 1865 were $5,400,045 22; operating expenses and all other expenses, except taxes, for the same period $2,818,795 34, or 52.19 of earnings. The increase of earnings for same period, over the preceding year was $1,155,741 29.

☞ *The Chicago and Northwestern Railway Company* will receive offers until March 1st, for $350,000 of their 7 per cent Consolidated Sinking Fund Convertible Mortgage Bonds, having 50 years to run, interest payable quarterly in New York. These bonds are secured by a mortgage upon all the company's lines of road and equipment in the States of Illinois and Wisconsin, about 650 miles in length, 100 miles of which are subject to no other mortgage. For further particulars see their Advertisement in another column.

☞ The time for receiving proposals for the grading, etc., of 190 miles of the *American Central Railway*, as will be seen by the advertisement in another column, has been extended to the 5th March prox.

☞ The Directors of the New York Central Railroad have resolved that the Sleeping Car Company shall hereafter pay forty per cent. of their gross receipts to the railroad for the transportation and privileges which heretofore they have enjoyed free of cost.

☞ The Secretary of the Treasury has ordered that on and after March 1st, 1866, all Southern manufactures in possession of the manufacturer shall be held subject to the present rates of duty. No exception is to be made in any case on account of the date of manufacture.

☞ It is said that under the provisions of the act authorizing the Allegheny Valley Railroad Company to borrow money, etc., which recently passed the Pennsylvania Legislature, the Atlantic and Great Western Railway Co., Sir Morton Peto, Mr. McHenry and others, have, or can, accomplish all they desire.

☞ The completion of the Memphis and Charleston Railroad to Memphis, and the New Orleans and Jackson Railroad between Grand Junction and New Orleans, opens to travelers and shippers an all rail route from the Northern cities to Memphis, Vicksburg, Mobile and New Orleans.

☞ A bill to allow passenger railroad cars to run on all days of the week, was recently introduced into the Pennsylvania State Senate, and referred by the Speaker to the Committee on Vice and Immorality, because the bill had reference to the morality of the community.

☞ A bill is before the Legislature of Pennsylvania incorporating the Northern Coal and Railway Company. This company is to build a railroad from their lands in Luzerne county to the Delaware river, through or near the Water Gap or any point above.

☞ The Houston, Texas, *Telegraph*, says that the railroad is completed and running between Lavacca and Victoria.

Railroad Earnings--Monthly.

The following is a statement of the business done by the Illinois Central Railroad for the month of Jan., 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	5,670.93 for	$63,540 77
Acres Int. Fund Lands sold	40.00 for	501 60
Acres Free Lands sold	526.28 for	6,473 12
Total sales during month of Jan., 1866	6,237.21 for	$70,515 49
To which add Town Lot Sales		580 00
Total of all		$71,095 49
Cash collected in January		$113,561 47

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$192,116 10
do.	Freight	370,354 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	10,000 00
Total Receipts in month of Jan., 1866		$582,828 43
Total Receipts in month of Jan., 1865		546,051 29
Increase		$36,777 14

The earnings of the Erie Railway for the month of January, 1866, including Buffalo Division, were $1,187,187 72
Corresponding month last year 1,070,890 90

Increase $116,296 82

The earnings of the Ogdensburg and Lake Champlain Railroad for December, 1864 and 1865, was as follows:

	1864.	1865.
Earnings	$47,577 06	$73,891 43
Expenses	54,382 79	50,032 74
Net	$.....	$23,858 69
Loss	6,805 73	.....

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Jan., 1866, were $314,598 00
Corresponding month of previous year 363,996 00

Decrease $48,398 00

The earnings of the Rome, Watertown and Ogdensburg railroad for Jan., 1866, were $70,701 64
Corresponding month of 1864 ..... 51,491 54

Increase $19,210 10

The earnings of the Pittsburgh, Fort Wayne and Chicago Railway for the month of Jan., compared with the same period last year, have been as follows:

	1865.	1866.
From freight	$427,067 40	$352,920 93
" passengers	236.772 07	176,397 50
" express matter	9,346 87	9,928 12
" mails	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	2,049 52	1,333 60
Total	$690,144 19	$555,488 48

The earnings of the Toledo, Wabash and Western Railroad for the month of January, 1866, were $226,059 00
Same month in 1865 ..... 144,084 00

Increase $81,975 00

The earnings of the Chicago and Alton Railroad for Jan., 1866, were $210,171 00
January 1865 ..... 261,903 00

Decrease $50,732 00

The earnings of the Milwaukee and Prairie du Chien Railway for the month of Jan., 1866, were $121,776 00
Corresponding month of previous year 98,183 00

Increase $23,593 00

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway for the week ending Feb. 9, 1866, was as follows:

Passengers	$23,381 46
Freight and live stock	35,243 13
Mails and sundries	2,606 03
Total	$61,230 62
Corresponding week of 1865	46,777 72
Increase	$15,452 89

The earnings of the Chicago and Northwestern Railway for the first week in Febuary, 1866, were $109,927 67
Corresponding week of previous year. 112,934 73

Decrease 3.38 per cent $3.007 06

The earnings of the Michigan Central Railroad for the 1st week in Feb., 1866, were $66,397 00
Corresponding week of previous year .. 68,131 00

Decrease $1,734 00

The earnings of the Chicago and Alton Railroad for the 1st week in Feb., 1866 ..... $53,638 00
Corresponding week of previous year .. 59,312 00

Decrease $5,674 00

Journal of Railroad Law.

The case of Thomas Gillett *vs.* Western Railroad corporation, lately decided in Massachusetts, decides that a railroad company which so constructs its track at the crossing of a highway as to render the highway dangerous or inconvenient to travelers thereon, is liable for an injury sustained by a traveler upon the highway, in consequence of the defect, although he might also have a remedy against the town which was bound to keep the highway in repair. It also decides that in an action to recover for injuries to a horse, sustained in consequence of a defect in a highway, the plaintiff is entitled to recover the diminution, occasioned by the injury, in the market value of the horse at the commencement of the action, and, in addition such sums as the plaintiff has paid out in reasonable attempts to cure him, and a reasonable compensation for his own services in attempting to cure him, and a reasonable sum as compensation for the loss of the use of the horse while under such treatment; provided that the whole damages allowed do not exceed the value of the horse.

The declaration alleged that there is in Springfield a public highway called Main street, which is owned by the railroad of the defendants, and the defendants have so constructed and maintained their railroad, at the crossing, as to obstruct the highway and render it unsafe and inconvenient for travelers, whereby the plaintiff travelling on the highway and across the railroad, with his horse and wagon, and using due care, sustained an injury to his horse, &c., and was put to trouble and expense.

The case was tried in the Superior Court, before Morton, J., and it appeared in evidence that, at the crossing in question, the defendants, for the purpose of facilitating travel across their tracks, had caused the whole space between the rails to be planked, except about two inches in width next to the inside of the rails, which was left open to accommodate the flanges of the wheels of the cars and engines running thereon; that the edges of the planks next to the rail were plated with a strip of iron; and there was evidence tending to prove that the horse of the plaintiff, while the plaintiff was driving across the tracks with ordinary care, was injured by catching its shoes in the space between a plank and rail, and in attempting to move forward, its feet were firmly held between the rail and the iron plate upon the plank. The defendants objected that the action could not be maintained against them, but should have been brought, for the alleged injury, against the City of Springfield, but the judge overruled the objection.

Upon the question of damages, the judge instructed the jury that the plaintiff was entitled to recover the diminution of the market value of the horse occasioned by the injury, and in addition, such sums of money as the plaintiff had paid out in reasonable attempts to cure, with reasonable compensation for their own services in attempting to cure it, with a reasonable sum as compensation for the loss of their horses while under such treatment.

The jury returned a verdict for the plaintiff, finding specially the amounts which they allowed for the care and expenses of trying to cure the horse.

The defendants alluged exceptions.

Bigelow, C. J. The defendants were clearly liable for damages to the plaintiff, if they caused an unlawful obstruction to public travel in the highway, whereby injury was occasioned to the plaintiff's property. This liability exists notwithstanding a party may also have a remedy against the town or city where such obstruction is permitted. Snow *vs.* Housatonic Railroad, ante., 434. By returning a verdict for the plaintiffs, under the allegations in the declarations, the jury must have found that the acts of the defendants rendered the highway unsafe and inconvenient to travelers. No question appears to have been raised at the trial as to the right of the defendants to construct their tracks across the highway. If they had this right, then it was their duty to construct them in such a manner as to be reasonably safe and convenient, in order to adapt them to the public travel passing on the highway, as well as to fit them for their own convenient use. Beyond this, no duty was imposed on them by law. They could only be required to exercise their legal right to construct their railroad across the highway in such a manner as to create no unnecessary obstacle or hindrance to public travel. By a compliance with this requirement, no unlawful or unauthorized obstruction would be occasioned in the highway. The way might be less safe and convenient for the travelers than it would have been if the railroad had not been constructed over it, but it would not be unsafe and inconvenient in a legal sense. Jones *vs.* Waltham, 4 Cush. 299 Davis *vs.* Leominster 1 Allen, 182. It does not appear that these familiar principles were overlooked or disregarded at the trial. There is nothing in the exceptions to show that full and appropriate instructions were not given as to the rights and duties of the defendants in constructing their railroad across the highway at the place where the

alleged accident happened. In the absence of any statement of the instructions, it is our duty to presume that the jury were properly advised on this part of the case. Commonwealth *vs.* Kneeland, 20 Pick. 206, 223. Same *vs.* Byce, 8 Gray, 461.

It does not appear that the rule of damages was incorrectly laid down at the trial. As we understand the instructions, the jury was told that the plaintiff was entitled to recover a sum equal to the diminution of the market value of the horse, caused by the injuries, to be ascertained, not by its condition immediately after the occurrence of the accident, but by that in which it was shown to be at or about the time of the trial, and after it had been partially restored to health and soundness by restorative means which the plaintiff had reasonably used in the relief and cure of the injuries which it had received. Thus construed, the instructions were clearly right. The plaintiff was entitled to recover his reasonable expenses incurred in curing the horse because thereby he had diminished the extent of the injuries, and the amount of damages which the defendants would otherwise have been liable to pay.

It does not appear that the expenses of curing the animal was unreasonable, or that it exceeded in amount the benefit which was thereby done in diminishing the injurious effects caused by the negligence of the defendants.

Exceptions overruled.

Eastern Lumber Trade.

The stock of lumber now on hand in Albany is estimated at 25,000,000 feet, which is less than the usual amount wintered there. It is pretty well sorted, though consisting mostly of thirteen feet lumber.

The quantity of sawed lumber received in 1865 in Albany by canal was 258,997,965 feet, and the value of the lumber and shingles exceeds $8,000,000.

The following table shows the receipts by the canals at tide water during the years named:

	Boards and Scantling, feet.	Shingles, M.	Timber, Cubic feet.	Staves Pounds.
1860	377,688,600	63,400	1,299,800	292,910,000
1861	301,607,000	45,200	1,190,000	264,288,000
1862	412,105,800	49,800	2,506,800	357,030,000
1863	466,304,600	86,100	6,560,600	282,478,000
1864	495,287,400	80,832	4,121,000	286,250,000
1865	492,535,065	34,094	3,722,549	223,273,929

The value in 1865 was: Boards and scantling, $14,776,042; shingles, $170,470; timber, $1,302,892; staves, $1,562,917.

Exports of Petroleum.

The following table is furnished by the *U. S. R. R. & Mining Register*, giving the comparative exports of Petroleum to foreign countries in 1864 and 1865:

	Gals.—1864.	Gals.—1865.
Philadelphia	7,760,148	12,714,585
New York	21,332,974	14,393,586
Boston	1,096,307	1,438,978
Baltimore	929,971	973,117
Other places	142,261	100,000
Total	31,261,661	29,720,266

It will be seen that Philadelphia increased in the quantity of her export in 1865 over 1864, 4,954,437 gallons; Boston increased, 342,671; Baltimore increased, 43,960 gallons; New York decreased, 6,939,388 gallons.

American Central Railway.

Our readers are already aware that President Thompson, of the American Central Railway, has succeeded in the purposes of his mission to Europe, by securing iron and money for the completion of the road from the Mississippi river to the Indiana State line. He has entered into contract with the well-known firm of Bellot Des Minieres Brothers & Co., of Paris, whereby iron and money are by them furnished to the road in amount nearly sufficient to complete the grade, laying the ties and iron, bridge the road, and furnishing the rolling stock through the whole State. Active operations are to commence in March. These facts are placed beyond doubt by letters from President Thompson, now in the hands of Col. W. B. Sweet, Secretary of the road.

Early last spring Hon. John S. Thompson, on behalf of himself, James S. Thompson, Wells Willits, and L. W. Thompson, of Mercer county; Wm. B. Turner, of Warsaw; Oloff Johnson and W. B. Sweet, of Galva, and Wm. F. Thomas of Wyoming, proceeded to New York and caused a legal sale of the road to be made upon the first mortgage bonds, executed upon the road by the old Company to satisfy bonds owned by some of those gentlemen; and in May last the legal title to the road passed to the company since organized, and of which Judge Thompson was duly elected President, and Col. W. B. Sweet, Secretary. The sale relieved the new company from the embarrassments and obligations of the old, and gave them nearly a hundred miles of graded road bed and right of way through the State.

The new company in July last issued $3,242,000 of first mortgage bonds upon its road, and sent President Thompson, with George M. Braggiotti, of New York, one of the Directors, with $1,225,000 bonds, to Europe, to buy iron and raise money.

The American Central Railway is destined to become an important link in the most important railroad thoroughfares on this continent.—*Galva Union.*

Northwestern Virginia Railroad Coupons.

The case of the Baltimore and Ohio Railroad Co., *vs.* D. J. & M. J. Foley, recently tried in the Superior Court, Baltimore, was an action to recover for freight and tolls due by the defendants. The plaintiff submitted two prayers for the Court to instruct the jury that by the true construction of the contract, entered into between the Baltimore and Ohio Railroad Co., and the Northwestern Virginia Railroad Co., the gross revenue of the latter company from the 1st of January, 1857, to January, 1862, was to be applied, after the payment of taxes and office expenses, as provided for in the second clause of the agreement, to the payment *pari passee*, and without preference or priority, of the interest mentioned in the first and second items, and that if on the 1st of July, 1861, the Baltimore and Ohio Railroad had paid more on these several accounts than the gross revenue aforesaid had produced, they had the right to deduct such excess from the gross revenue of 1861, when any balance that remained would be applicable to the payment *pro rata* of the interest mentioned in the first and second items aforesaid. Also, that on the 20th June, 1861, the gross receipts of the Northwestern Virginia Railroad was $1,049,333 28, and that the Baltimore and Ohio Railroad Co. had paid interest on the mortgage debt mentioned in the agreement to the amount of $970,507 50, and that the interest due to the Baltimore and Ohio Railroad Co. on its own claims against the Northwestern Virginia Railroad Co., also mentioned in the second item of clause second of said agreement, amounted to $394,993 18, and that it had paid taxes amounting to $2,357 58, and office expenses of $5,990 90, by which there was left a balance of $324,524 88, and that the gross receipts from the Northwestern Virginia Railroad for the year 1861 was $358,613 90, then the Baltimore and Ohio Railroad Co. are entitled to deduct from the revenue of 1861 aforesaid the said balance of $324,524 58.

The defendants submitted contra prayers, which, after the Court had rejected those of the plaintiff, were by them withdrawn. The jury, under the instructions of the Court, rendered a verdict in favor of defendants, thus establishing a greater value on the interest coupons attached to the bonds of the Northwestern Virginia Railroad Co., to the payment of which the revenue of the latter company, which is worked by the Baltimore and Ohio Railroad Co., is by the agreement to be applied, and showing that they should be received in payment of freight and tolls due the latter company.

Railroad Land Grants.

The bill introduced into the United State Senate by Mr. Conness, granting land for the construction of a railroad from San Francisco Bay to Humbolt Bay, in the State of California, was referred to the Committee on Public Lands.

The House passed the Senate bill providing that in case the Burlington and Missouri River Railroad Company shall complete the section of twenty miles by the 1st of December, 1866, it shall be entitled to the proportion of land provided by law.

Australia R. R. and Telegraph Lines.

In Australia the total length of the railroads measure 478 miles, viz.: In New South Wales 139 miles; in Victoria 256 miles; in South Australia, 58 miles, and in the new province, Queensland, 25 miles. Besides these, New South Wales has 158 miles, and Queensland 40 miles, in course of construction. Sydney and Melbourne have street and neighborhood railroads on the American principle. Of telegraph lines there are about 10,000 miles, including those projected, and in a short time the Australian system will be connected with the Asiatic lines, and by way of the Indian and Russian lines westward, and the Amoor and American lines eastward.

☞ Work on the Memphis and Ohio Railroad is being rapidly pushed forward to completion. The bridge over the Hatchie, five miles beyond Brownsville, will soon be finished, when the cars will run through to Humboldt, connecting with the Mobile and Ohio Railroad to Columbus, Kentucky.

Cherrystone and Delaware Railroad.

A bill to charter this railroad has been introduced into the Delaware House of Delegates. The road will commence at Cherrystone, on the Chesapeake, nearly opposite Norfolk, and extend to Georgetown, Del., where it will connect with the Junction and Breakwater Railroad. It will form part of a continuous line to New York across the States of Maryland, Delaware and New Jersey.

Gettysburg Railroad.

At the annual meeting of the stockholders of this company, held on the 8th ult., the following gentlemen were elected directors for the ensuing year: W. G. Case, President; David Wills, Robert McCurdy, C. S. Maltby, F. W. Northrop, Howard S. Case, Robert Crane, John B. Bachman, William McConkey, Henry Kauffelt, Philip Small, Peter Deihl, Wm. Bittinger.

☞ The branch of the Cleveland and Toledo Railroad from Elyria to Oberlin, will be completed by the 1st of June next.

☞ The par value of the Chesapeake and Ohio Canal shares has been reduced from $200 to $50.

Imperial Mexican Railway.

The directors of this company report that "most satisfactory progress has been made in completing the working plans and sections and laying out the line, and also by the contractors in its construction. Colonel Talcott has just returned from a general inspection of the entire line, and reports that nearly all the plans were in the hands of the contractors. Between the Barranca de Metlac and Orijava, a distance of ten and a quarter miles, the earthworks were completed, with the exception of a heavy rock cutting adjoining the Barranca, which is in active progress. From Orijava to the head of the Encinal Valley, and thence to the end of the Maltrata Valley, a length of thirteen miles, the line is laid out, with the exception of sections of 19 and 20. The works on this portion of the line were commenced on the 1st of November, and a large force of men is now employed on the earthworks and masonry. On the Maltrata division, which embraces the great Orijava incline, twenty-three miles in length, sections 1 and 2, and others, are under construction. From Boca del Monte to the city of Mexico, a distance of 155 miles, the setting out of the main line is completed. The contractors are at work on the eight miles from Santa Isabel, in the direction of Puebla. From Santa Isabel northwards to Molina and San Diego the line is set out. The total quantity of rails shipped to this date is 8,065 tons, and the quantity manufactured 9,224 tons, with the corresponding amount of fastenings. Contracts have been entered into for the supply of locomotives and rolling stock, which will all be of the best construction, embracing every improvement which the experience of English, Indian, and European railways justifies. All the iron roofing and other materials, tools, and machinery for the stations, workshops, etc., are in course of construction. The line from Mexico to Puebla Junction will be completed and ready for traffic by the end of May, and to the city of Puebla by August. The entire line from Vera Cruz to Mexico and Puebla will be completed in the time named in the contract."

Interest and Dividends.

The Naugatuck railroad company have declared a semi-annual dividend of seven per cent., payable free of United States tax, Feb. 15th.

The Wyoming Valley Railroad and Coal Company a dividend of five per cent., payable Feb. 15th.

The Oswego and Syracuse railroad company, a semi-annual dividend of four per cent. payable, free of United States tax on the 20th inst.

The Morris and Essex Railroad Company a semi-annual dividend of 3½ per cent., payable Feb. 15th.

The Delaware Division Canal Company, a dividend of 3 per cent. free of tax, Feb. 15.

The Morris Canal and Banking Company of Jersey City a semi-annual dividend of 5 per cent. on the preferred stock and 6 per cent. on the consolidated stock free of Government tax.

Russian Railways.

The Emperor of Russia has confirmed a concession to Sir Morton Peto, on behalf of Messrs. Peto, Petts and Waring Brothers, of a railway, in prolongation of the one from Riga to Dunnabourg and Witebsk, and from the latter place to Orel, a distance of five hundred miles.

☞ The Brodhead *Independent* says there is every prospect of an early resumption of work on the Sugar River Railroad.

Jamestown and Franklin Railroad.

The work on the Jamestown and Franklin Railroad is progressing as fast as the weather will permit, and it is confidently expected that the cars will be running to Franklin next summer.

☞ Further facilities for the movements of travelers in Central Italy have been afforded by the opening to the public of the railway from Rome to Foligno, and from thence to Fabriano and Ancona the line will soon be ready also, giving Rome uninterrupted steam communication with all Europe, minus the Alpine Gap on the Mont Cenis.

☞ The receipts of the East Boston Ferry Co., for the year ending December 31, 1865, were $120,843 81. The expenditures amounted to $117,877 82. Gain over expenses, $2,965 49; liabilities of the company, $82,916 77; assets, $19,323 41.

☞ Richard Ivers, Esq., of San Francisco has in connection with G. D. Nagle, taken the contract to build the Stockton and Copperopolis Railroad. The contract price is $1,250,000. The road will be completd within three years; the cars will probably be running on a portion of the track by next September.

☞ The Legislature of Tennessee has recently passed a bill loaning the Memphis and Ohio Railroad Company $400,000, to enable it to rebuild the bridge at the Cumberland and Tennessee Rivers, and put the road in thorough repair to Paris.

☞ The gauge of the Piedmont Railroad is to be altered to five feet, so as to correspond with that of the Richmond and Danville Railroad.

☞ The Saratoga, Whitehall and Troy Railroad earned in 1865 $1,194,147, as against $1,010,082 in 1864.

☞ The total indebtedness of the State of New Hampshire is $4,258,470.

☞ The Delaware railroad has been completed to Princess Anne, Somerset Co., Maryland.

COLUMBIA COUNTY
Iron Mining Company,
OFFICE, 77 Cedar St., N. Y.

This Company, having completed a Railroad, connecting their Mines with the Harlem Railroad at Boston Corners, are now prepared to deliver Hematite Ore of the same character and quality as the well-known Salisbury Ore, at short notice, and in large or small quantities, at the lowest market price, either at their Mines at Hudson, or at Port Morris. An examination of their Ore, and their facilities for cheaply delivering the same, is respectfully solicited. All orders will receive prompt attention.

BIRDSALL CORNELL, President.
EDWARD D. WEBB, Sec. and Treas.

NOTICE TO CONTRACTORS.

RAILWAY CONTRACTORS are invited to submit to GEORGE M. BRAGGIOTTI, 117 Pearl Street, New York, Agents for Messrs. BELLOT DES MINIERES BROTHERS & Co., of Bordeaux, France, between now and the 5th of March next, proposals for the completion of the grading, bridging, &c., of the **AMERICAN CENTRAL RAILWAY OF ILLINOIS**, about 190 miles in length, from the City of New Boston, on the Mississippi River, to the Eastern Illinois State Line in the direction of Fort Wayne, Indiana. Contracts will be granted in Sections, and proposals must be accompanied with first class references as to competency, otherwise they will not be considered. For further particulars apply to the Chief Engineer of the Road, at his office in Galva, Henry County, Illinois, where profiles and specifications can also be inspected. 7t3

THE
Chicago and Great Eastern
RAILWAY COMPANY.
OFFER FOR SALE
$1,350,000

of their First Mortgage Sinking Fund Convertible Bonds, due April 1, 1895, bearing seven per cent. interest, payable in the city of New York on the first days of April and October in each year; being the *entire balance* of the Bonds which the Company is authorized to sell under the provisions of a mortgage to George N. Titus and James D. Fish, trustees, for $5,600,000, covering the whole line of the Company's road from Chicago, Illinois, to Richmond Indiana, 224 miles, with the franchises, equipment and appurtenances, and all other present and future acquired property.

The proceeds of these bonds now offered will extinguish the whole existing floating debt of the Company, and provide for the purchase of a large amount of additional rolling stock.

For copy of mortgage and further particulars apply at the office of the Company, No. 37 William street, New York, where subscriptions for the bonds will be received.

New York, February 13, 1866. 4t7

OFFICE OE THE
Chicago and Northwestern
RAILWAY COMPANY,
No. 8 Wall Street.

OFFERS WILL BE RECEIVED UNTIL THE FIRST day of March proximo, for **$350,000** of the CONSOLIDATED SINKING FUND CONVERTIBLE MORTGAGE BONDS of this Company. These bonds are a portion of **$2,000,000**, issued for the purpose of providing additional rolling stock required to accommodate the growing business of the Company, and for the equipment of the additional road now in course of construction to Omaha on the Missouri, and the mortgage provides for the further issue of **$500,000** more of said bonds (**$2,500,000** in all) hereafter, for the same purpose, if such issue shall be found necessary.

The bonds bear date January 16, 1865, carrying seven per cent. interest payable quarterly in New York, have fifty years to run, and are secured by a deed of trust to Samuel J. Tilden, esq., upon all the Company's lines of road and equipment in the States of Illinois and Wisconsin amounting to about 650 miles of road, more than 100 miles of which are subject to no other mortgage. This mortgage, together with all other liens, amount in the aggregate to only $20,000 per mile upon said roads.

Provision is also made in the mortgage for the absorption, at the discretion of the Board of Directors, of all prior liens into this class of bonds, in the expectation that eventually all the other bonds of the Company will be exchanged for these, leaving this class of bonds the only mortgage lien upon the Company's entire lines of road.

These Bonds are convertible into the Preferred stock of the Company, at the option of the holder, any time prior to January 1, 1870. For further particulars, inquire at the Company's Office.

By order of the Board of Directors.
H. H. BOODY, Agent.
New York, February 14, 1866. 2t7

RARITAN AND DELAWARE BAY R. R.

ON and after Monday 12th February, 1866, the Express Train for Camden will be discontinued.

The Steamer will leave Pier No. 3, North River daily (Sundays excepted), at 4.00 o'clock P. M., connecting with train for Manchester, Toms River, Long Branch, &c.

FREIGHT for CAMDEN and intermediate stations, will be taken at LOW RATES on the 4.00 o'clock line, reach-Camden the next morning.

J. N. POTTER, President.

Car Covering or Roofing.

KINGMAN'S CEMENT WITH HEAVY CANVASS, used by many roads as a substitute for Car Duck. WILLIAMS & PAGE, Boston.

New York, Saturday, February 24, 1866.

East Pennsylvania Railroad.

We invite attention to a Notice published in our advertising columns (page 198,) of a sale to take place at the Exchange Sales Room, No. 111 Broadway, this city, on the 28th inst., of 290 shares of the capital stock of this company, or so much thereof as may be necessary to pay the indebtedness for which the said stock was hypothecated.

Pennsylvania Railroad.

We have the report of this company for the year ending December 31, 1865, presented at the annual meeting of the stockholders held in Philadelphia on the 20th inst. We shall publish it entire in our next, but have only room for the following brief abstract in our present issue:

The earnings of the Main Line and branches worked by it, except the Philadelphia and Erie Railroad, were $17,459,169 49; and the expenses, (including $2,388,128 50 for additional second track, equipment, etc.,) $13,270,058 54—leaving a balance of $4,189,110 95.

The earnings of the canals were $181,015 38; and the cost of maintaining, enlarging and operating, $279,843 51—showing a loss of $98,828 13.

The earnings of the Philadelphia and Erie Railroad were $2,074,140 79; and the expenses, (including $598,708, due on lease to meet interest on bonds, taxes, etc.,) $2,344,760 28—showing a loss of $270,619 49.

The whole revenue of the Pennsylvania Railroad Company from its several lines, as above, was $19,714,325 66; and the exponses, $15,894,671 33—leaving, after the payment of two semi-annual dividends of 5 per cent. each, the balance of interest and coupon accounts, the lease of Harrisburg and Lancaster Railroad, taxes on dividends and coupons, ($515,433 01,) and the annual sum due to the State ($460,000,) for the purchase of the main line, amounting in the aggregate to $3,597,496 98, a surplus of $222,157 35. The estimated specie value of the company's property is $55,000,000; its liabilities are stated at $40,000,000—an excess of $15,000,000.

Vicksburg, Shreveport and Texas Railroad.

This road, commencing at a point on the Mississippi river, opposite Vicksburg, running westward through the northern part of the State of Louisiana, by way of Monroe, to the eartern line of the State of Texas, was organized under the laws of the State and incorporated by an act of the Legislature of Louisiana, approved April 28th, 1853; under its charter the road was finished from Vicksburg to Monroe on the Ouachita river, a distance of seventy-five miles, and was in complete running order at the commencement of the war; but unfortunately for the company, the military authorities waged a war on the road from the beginning. The bridges and trestle works were burnt, the culverts destroyed and the engines dismantled. The overflow from the Mississippi destroyed a great deal of the road-bed, and finally, to complete the work of destruction, the Federal forces, in 1864, in the gun boat expedition up the Ouachita, burnt the depot, the car house, the office and the engines, the cars and rolling stock, broke open the safe and carried off a large amount of bonds, books and papers valuable to the company alone.

It being considered impossible in the present condition of the country, to raise the sum necessary to put the road in running order between Vicksburg and Monroe, and to pay the matured interest coupons on the 1st mortgage bonds and other debts of the company, it was decided, at a called meeting of the stockeolders, held at Monroe in October last to sell the entire road, its property and frauchises, rights and credits for cash to pay the interest warrants then due, amounting to $168,160. Accordingly, upon the petition of one of the bondholders, the Judge of the District Court issued an order for the seizure and sale of the road under the executory process. Acting under this order, the Sheriff of Ouachita, seized the road and advertised it for sale on the 3d of February, 1866. At this sale John T. Ludeling bid $50,000, that being two-thirds of the appraisement, and there being no other bid, the property was adjudicated to him and his friends.

The purchasers include Messrs. Fannin, Grant & Co., and some of the most reliable, responsible and energetic citizens of that portion of the State, whose names as directors are given below. The new company are said to have ample means to put the road in running order between the Ouachita and the Mississippi, and have already commenced work. The following gentlemen compose the board of directors: J. U. Horne, of Ga.; Jno. T. Ludeling, W. R. Gordon, W. M. Pinckard, F. P. Stubbs, John Ray, W. J. Q. Baker, J. F. McGuire, H. M. Bry, R. C. Strother, John A. McGuire, J. P. Crosley, C. H. Dabbs, R. Ray, C. W. Phillips, of La. John T. Ludeling, President; Wm. R. Gordon, Superintendent; Jos. F. McGuire, Treasurer and Secretary.

Southern (Mississippi) Railroad.

We learn from M. Emanuel, Esq., President of the Southern railroad company, Vicksburg, that every effort is being made to thoroughly repair and re-stock the road. A new iron bridge (built by Albert Fink, Esq., of Louisville) over Big Black river, to supply the place of one destroyed during the war, will be completed by the 1st of May next; and in connection with the bridge upwards of 3,000 feet of new and expensive trestle will be erected. Daily passenger and freight trains are now running with regularity and punctuality between Vicksburg and Meridian—140 miles—having excellent arrangements at Big Black for transporting to the trains on either side of the river. Close connections are made at Meridian, with

the Mobile and Ohio railroad; and passengers leaving Vicksburg for the Northern and Western cities, reach Cairo in 50 hours. The officers of the company are: President, M. Emanuel; Vice President, T. Rigby; Engineer and General Superintendent, R. C. Leaughten; Secretary and Treasurer, N. G. Boyson; Master of Transportation, G. D. Lawrence.

Boston and Worcester Railroad.

The gross income from operations of this road for the years ending November 30, 1864 and 1865, have been as follows:

The gross rsceipts have exceeded those of last year by $225,179 02; the expenses by $175,586 02 and the net receipts by $49,593 00. The increase on local business was $161,078 28; on joint business $64,100 74. Total income per mile of road, $24,596 58; expenses do., $16,813 14. Income per mile run, $2.53; expenses do., $1.73. Cost of road repairs per mile, $2,252 92; do., per mile run, 23.10 cents. Per cent. of main track relaid with new rails, 12.15; do., with repaired rails, 7.95; do., with new sleepers, 9.78; cost per car per mile run, 2.50 cents. Cost per mile for fuel, 19.70 cents. Cost of transportation per ton and per passenger per mile, without distinguishing between them, 2.052 cents.

Miles run by passenger trains, 433,359; by freight trains, 217,598; by other trains, 18,277—total miles run, 669,234. The number of passengers carried in the cars has been 2,386,186; do., carried one mile 40,499,466; do., carried one mile to and from other roads 15,432,410. Tons of merchandize carried, 427,404; do., carried one mile, 16,050,097, do., carried one mile to and from other roads, 12,065,111. Increase in passengers carried 244,988; increase in passengers carried one mile 598,214. Decrease in tons of merchandise carried 30,916; decrease in tons of merchandise carried one mile 1,773,628. The report says:

Early in September, the roof of the Inward Passenger Station, in Boston, was nearly destroyed by fire, which originated in the upper rooms occupied as furniture ware-rooms. We have now nearly completed a new and substantial depot (at a cost of $21,560 78), to be used in future exclusively for the purposes of the corporation.

We have received $7,200 insurance for this loss; to which we have added $12,800, to make a fund of $20,000 to meet future losses. Improvements, including additional tracks, cattle yards, &c., at Brighton, have been made at considerable expense. Nine new cars have been added to the equipment of the New York Line—our proportion of which was $10,327 39. We have built fifteen new platform cars in place of twelve box and nine platform cars taken down as not worth repairing. Twenty thousand dollars to pay for new merchandise cars now under construction, have been taken from the earnings of the year. We have added to our equipment of passenger cars, three new ones, built in our own shops, of the best materials, and in the most substantial manner. We have also three new locomotive engines, one built by Hinckley & Williams, of Boston, and two by William Mason, of Taunton, at a total cost of $51,832 86.

The gain on local passengers, as compared with last year, has been 13 per cent; on local freight, 22 per cent.; on passengers to and from other roads, 5 per cent.; on freight to the West, 6¼ per cent.; but the freight from the West has fallen off, in the aggregate, 18¼ per cent., while in the month of October there was a gain of 16 per cent., and in November of 71 per cent. The increase was so great that the Western Railroad Corporation was unprepared to meet the demand upon it. This occasioned an accummulation of freight at Albany, and was followed by such action on the part of the New York Central Railroad as diverted business from Boston during its continuance. The "Red Line" cars, however, which are owned by the line, and so constructed as to run through from Chicago to Boston without transhipment, continued to bring all the freight offered at Chicago, in six days.

The injurious effects of this delay and diversion, were common to the line and its patrons. We feel confident that the cordial co-operation of all, aided by the advantages to be derived from the approaching completion of the bridge at Albany, will prevent the recurrence of these difficulties.

Had the Western Railroad Corporation brought the freight to us at Worcester in such quantities as to prevent any delay at Albany or other stations on their road, it would have been difficult to dispose of it readily in Boston, where there is not sufficient available storage-room to receive it.

This road and all the roads connecting with this, or terminating on this side of Fort Point Channel, as well as this city and the Commonwealth itself, are interested in securing a common terminus at deep water, where they can receive and deliver water-borne freight with elevators and storehouses, sufficient for any emergency.

With a view of doing our part to bring about this desirable result, we have purchased, with the approval of your committee, 252 of the 350 bonds of $1000 each, secured by a first mortgage on the Grand Junction Wharf property, at East Boston. But in the present condition of the title adequate improvements cannot yet be safely made. Additional legislation is also desired to secure satisfactory arrangements.

Proceedings are now pending in the Supreme Court, which will, it is hoped, soon enable those interested in the wharf property, to make it available for the public benefit; and application has been made to the Legislature for authority to use the old Grand Junction Railroad. A bill passed the Senate last winter, providing for its common use by the connecting roads, but was lost in the House at the close of the session.

The Old Colony and Fall River Railroad having changed its location over Fort Point Channel, directly in front of our wharves, materially interfering with their use, and having at the same time purchased the adjoining wharves, above and below them, we find ourselves in urgent want of more wharf room. For this and other reasons we must apply to the Legislature for authority to extend our freight tracks to South Boston, so as to obtain this accommodation. Water borne freight for our local stations is crowded into a few months of the year. This class of freight is important, both to the road and its patrons, who rely upon us for it; but our present wharf room is not sufficient to meet their demands, without unreasonably delaying the vessels. Whatever accommodation may be obtained elsewhere, an extension of our tracks in this locality is extremely desirable to obviate this difficulty.

It is a gratifying circumstance that the corporation is able to provide for its constantly increasing business, from its constantly increasing net earnings, and the following exhibition of its financial condition cannot fail to interest its stockholders.

FINANCES.—ASSETS.

Freight department	43,291 66	53,337 21
Passenger "	24,443 82	29,317 31
Miscellaneous	67,092 56	100,696 65
	$311,860 16	$403,866 12
Net earnings	$159,118 34	$140,129 33
Balance of interest	754 72	.....
Net income for the year.	$158,363 62	$140,129 33

The gross earnings of 1863, were $384,511 86; the expenses, $215,366 86; and the net earnings, $169,145; showing an increase in gross earnings in 1864, of $86,466 64; and in expenses of $96,493 30—making a decrease in the net earnings of $10,026 66. These were enough, however, to pay semi-annual dividends of 4 per cent., after paying for 50 new coal cars, one new locomotive, a new stationary hoisting engine, new boilers and engine for repair shop, and applying upwards of $24,000 to new wharf improvements. At the same time everything appertaining to the road was kept in the best possible condition. In 1863 the company came into possession of nearly 1,000 continuous feet of the best wharf property in the city of Providence. This in 1864 was much increased in its area, by extending and filling it to the harbor line. To cover the purchases of this property, the capital stock was increased 500 shares, and sold at a premium of 46¾ per cent., yielding a net sum of $73,375. The improvements, amounting to $40,000 more, were to be met from the current earnings of the road.

The gross earnings of 1865, as compared with those of 1864, show an increase of $73,016 95; with an increase in expenses of $92,005 96—making the decrease in net earnings, $18,981 01. In their report for 1865, the directors say:

It will be observed that the earnings of the road have largely increased as well as its expenses; the latter consequent upon the increased cost of materials and labor, increased taxation and some extraordinary expenses not likely to occur hereafter.

The road bed has been widened to Valley Falls, preparatory to laying a double track to that point; a new brick station house has been built at Whitins station to replace the wooden one destroyed by fire; extensive improvements are in progress at the Worcester Junction, that the large and increasing business at that station may be better accommodated, the expense of which will be borne equally by the Western, Norwich and Worcester, and this corporation; the wharf and its improvements are completed or nearly so; the equipment has been increased by the addition of 20 merchandise cars, and 10 eight-wheel lumber cars; a new bridge has been built at Sutton, at a cost of $3,000, and the road and equipments have been kept in good condition. All of the above are included in the current expenses, besides which semi-annual dividends of four per cent. have been earned and declared.

It should also be borne in mind that the stock of this corporation, unlike personal property corporations, is not subject to be taxed as personal property, for the reason that it is fully taxed as real estate, and paid by the corporation. In this State, and in Massachusetts, the road is taxed on more than two millions of dollars, exceeding its capital stock more than $300,000. The stockholder is thus benefited on his investment to the amount of city and State taxes, also on his Government tax for income to the extent of five per cent.

Notwithstanding the increased facilities for discharging coal, the road has been unable for some months past to do as promptly as is desired this portion of its business. This has arisen from a prevailing opinion in the early part of the season among purchases that coal would be lower, hence omitting to make their contracts, and from the numerous strikes at the mines, thus compressing into three or four months a business which to do comfortably the whole season is required.

To obviate this hereafter a large amount of new equipment has been ordered, which is building at the company's and other workshops, and will be ready for the early spring business. The cost of this additional equipment of cars and locomotives will be more than $100,000, to pay for a portion of which the board have ordered the sale of five hundred shares of the capital stock of the company. The remainder of the cost can undoubtedly be paid for with the current earnings of the road, and its usual dividends be continued and perhaps increased.

The subject of a double track to the State line at Blackstone, and for a part of the way beyond that point to Worcester, is frequently agitated, and there is no doubt the increasing business of the road will soon require it. With the cost of materials and labor the same as they were two or three years since, all this could be done by increasing the capital stock to two millions of dollars, but, at the present high cost of these, the board feel themselves warranted in withholding, for the present, this large outlay, particularly, as with proper caution, the business of the road can for some time to come be safely done with the present tracks.

The income account of the company for the year ending November 30, 1865, is as follows:

Net earnings as above		$140,129 33
Materials on hand, Nov. 30, 1864		56,277 58
Notes on hand, Nov. 30, '64	$11,896 00	
Less notes payable	5,000 00	
		6,896 00
Cash on hand, Nov. 30, 1864		23,254 11
Real estate sold	$9,581 40	
Less for real estate purchas'd	1,330 00	
		8,251 40
Total		$234,808 42
Accounted for as follows:		
Dividends paid Jan. & July, 1865, 4 per cent. each		$136,000 00
Dividends unpaid Nov. 30, 1864		4,996 00
" " Nov. 30, 1865		3,616 00
Materials on hand, Nov. 30, 1865		45,974 48
Notes receivable	$10,746 00	
Less notes payable	5,000 00	
		5,746 00
Cash	$70,962 64	
Uncollected earnings	56,580 79	
	$127,543 43	
Less due connecting roads, etc	81,835 49	
		47,707 94
Total		$234,808 42

The equipment of the road consists of 14 locomotives; 14 first class and 4 second class passenger cars; 89 eight-wheel and 46 four-wheel merchandise cars; 58 eight-wheel, and 255 four-wheel coal cars.

Miles run by passenger trains, 124,420; by freight trains, 91,004; by other trains, 23,088—total miles run, 238,512; an increase over the previous year of 2,104 miles. Number of passengers carried, 990,886; do., carried one mile, 8,755,384. Number of tons of merchandise carried, 201,223; do., carried one mile, 6,515,990. Length of road, 43.41 miles. Length of single track, 37 miles Length of double track, 6.41 miles. Length of branches, 1 mile. Aggregate length of sidings, 8½ miles. Weight of rail, 56 to 63 pounds.

GENERAL STATEMENT, Nov. 30.

Milwaukee and St. Paul Railway.--Horicon Division.

Considerable talk is now being indulged in, in regard to a new railroad project for our city, which, if true, will be a very material addition to our railroad facilities. The matter may be stated thus: The St. Paul Railroad Company, whose road extends from Milwaukee to La Crosse *via* Watertown, also owns the Horicon and Berlin road, which at present is of little value to the company, from the fact that they are unable to get their cars into Milwaukee, without running them over another company's road at an expense greater than they can stand, as may be judged from the fact that the Berlin cars are now taken over the Northwestern road from Burnett Junction to Watertown at a cost of twenty-eight dollars for each car. To remedy this state of affairs the St. Paul Company propose to connect the Berlin road with their main line, either by continuing the road from Horicon to Oconomowoc, or by taking up the road from Horicon to Waupun, and extending it from Waupun to Reeseville in this county through this city and Lowell.

We understand that the company regard the latter plan, of running through this city, as the most feasible from several considerations. In the first place the distance is considerably shorter; secondly, the grading is a great deal lighter; thirdly, they would strike points of greater importance; and besides, by taking up the track from Horicon to Waupun, they would save iron enough to lay half of the road.—*Beaver Dam (Wis.) Argus.*

☞ The Grand Trunk Railway Company of Canada has issued a circular notifying agents that in consequence of the abrogation of the reciprocity treaty they have decided in the meantime to give preference to freight for the United States.

☞ The work of signing the bonds of the Atlantic and Great Western Railway Co., for $30,000,000, has just been completed by J. C. Calhoun Esq., Secretary.

Norwich and Worcester Railroad.

The earnings of this company for the three years ending November 30, 1863, 1864 and 1865, have been as follows:

Quicksilver.—New Almaden Mines.

The following statement of the Quicksilver Trade for 1865, is from the San Francisco *Mercantile Gazette and Price Current:*

Our exports during the year are considerably in excess of 1864, showing an increase of 5,551 flasks. China is by far the largest consumer, in fact taking nearly one-half of our entire shipments. Europe, Mexico, Peru and Chili are next in order, and the balance is generally distributed throughout the markets of the world. The export price is fixed at 55 cents, and for home use 65 cents per pound is demanded. Heretofore, as now, the New Almaden mines have furnished the bulk of our supplies; but it is proper for us here to state that the Lake Manufacturing Company, situated in Sonoma County, and belonging to Reddington & Co., of this city, has produced in the aggregate—since its opening in September, 1862—6,755 flasks, the bulk of which is sold by the owners to their regular customers. The yield of the New Almaden mine, during the year 1865, was 47,194 flasks. The total receipts for each month during the year were as follows:

	Flasks.		Flasks.
January	3,768	July	3,710
February	3,512	August	4,500
March	3,427	September	4,606
April	4,050	October	3,010
May	4,501	November	3,839
June	4,000	December	4,271

Total, flasks 47,194

The exports to the different countries for 1865, and also for the five previous years, have been as follows:

To	1860.	1861.	1862.	1863.	1864.	1865.
New York & Boston	400	600	2,265	95	1,495	6,800
Great Britain	..	2,500	1,500	1,063	1,609	10,400
Mexico	3,886	12,061	14,778	11,590	7,483	2,789
China	2,715	13,788	8,725	8,889	18,908	14,218
Peru	750	2,804	3,439	3,376	4,300	5,500
Chili	1,040	2,059	1,746	500	2,674	2,000
Central America	...	110	40	40	30	8
Japan	...	50	25	..	262	500
Australia	100	1,850	800	300	100	200
Panama	130	57	424	120	45	..
Victoria, V. I	326	116	5	42	21	24
Total, flasks	9,418	35,995	33,747	26,014	36,918	42,469

And our exports previously have been:

In 1859, flasks	3,390	In 1856, flasks	23,740
In 1858, flasks	24,142	In 1855, flasks	27,165
In 1857, flasks	27,262	In 1854, flasks	20,963

California Treasure Shipments.

The receipts of gold and silver at San Francisco for the year 1865, were $55,467,573. The disposition of this was as follows: To New York and the east, $20,583,390; to England direct, $15,432,639; to China direct, $6,963,522; to other foreign ports, $2,328,677—total shipments, $45,308,228, leaving in California $10,159,345. The receipts of 1864, were $55,227,807; and of 1863, $52,459,961. The following table shows the value and destination of treasure shipments from San Francisco during the past twelve years —1854 to 1865, inclusive:

Years.	Eastern Ports.	England.	China.	Totals.
1854	$46,533,166	$3,784,080	$965,887	$52,045,633
1855	38,730,564	5,182,156	880,675	45,161,731
1856	39,895,294	8,666,279	1,308,852	50,697,434
1857	35,531,778	9,347,743	2,935,264	48,076,692
1858	35,891,236	9,265,739	1,916,007	47,548,026
1859	40,146,437	3,910,930	3,100,756	47,640,462
1860	35,719,298	2,072,936	3,374,680	42,325,916

Liability of Railroad Companies for Fires Communicated from Locomotives.

The rule of law as to the liability of railroad companies for damages done by fire communicated by their engines, is far more favorable to the companies in this country than in England. The current of decisions in this country seems to establish the rule that the mere fact of fire being communicated from an engine does not raise a presumption of negligence on the part of the company. But in England, it seems to be well settled that the fact of premises being fired by sparks emitted from a passing engine is *prima facie* evidence of negligence on the part of the company, rendering it incumbent on them to show that some precautions had been adopted by them, reasonably calculated to prevent such accidents. The Chief Justice in rendering the opinion of the Court in the case of Piggott *vs.* Eastern Counties Railway, (3 C. B., 229,) said: "The defendants are a company entrusted by the Legislature with an agent of an extremely dangerous and unruly character, for their own private and particular advantage; and the law requires of them, that they shall, in the exercise of the rights and powers so conferred upon them, adopt such precautions as may reasonably prevent damage to the property of third persons, through or near which their railway passes." All the cases upon this subject in this country, hold that railroad companies are bound to exercise care, skill and diligence, to prevent fires being communicated in this mode, and make them liable in a case of damage through their negligence; but the company may always bring proof to show that there was no negligence of their part.

Thus when the company can show that their engines were properly constructed, in good order, and had the usual apparatus for preventing the escape of sparks, and were managed by discreet persons, they cannot under ordinary circumstances be held liable. (Burroughs *vs.* Housatonic Railroad Company, 15 Conn., 124.)

The case of Rood *vs.* N. Y. and Erie Railroad Company, (18 Barb., 80,) was brought to recover damages for the burning of the plaintiff's woods and fences by sparks from the defendant's locomotive while running upon their road. The Court held that damages could not be recovered except upon strict proof of negligence. Also that where a person conveys a certain definite parcel of land for the purpose of constructing a railroad, out of a much larger parcel retained by him, the grant is subject to all the consequences necessarily attendant upon such a use of the same; and particularly such as would result from the running of engines, and the consequent exposure of property on his adjacent land, to such injury and loss as would naturally result therefrom.

As it was held in the case of Moshier *vs.* Utica and Sch. R. R. Co., (8 Barb., 427,) that an authority to use a steam engine for the purpose of propelling cars upon a railroad, is an authority to make *a noise*, whether it awakens fear or not, so upon the same principle, an authority to use a steam engine for that purpose, is an authority to emit sparks therefrom; and if the most approved means, which science and skill have invented are applied to prevent sparks from causing injury, it is difficult to see upon what principle the company can be made liable. In the case of Rood above mentioned, the Judge remarks:

"It can hardly be expected that the defendants can provide men of sufficient speed to chase up every engine that passes over their road, and see that every spark of fire which may escape from the engine is caught and extinguished. It would be a herculean task to arrest them all, prone as are sparks to fly upwards. Such a rule, imposed upon these corporations, would be a burthen greater than they could bear. Running as do their engines at all hours of the day and night, with trains of cars almost constantly passing and repassing, with a speed that defies and baffles all human efforts to keep pace with them, it would be impossible for them ever to escape liability, under such a rule.

"Most certainly if negligence is to be imputed to a section master who has nine miles of road to look after, and a dozen men to superintend; or if negligence is to be imputed to the watchman who has four miles of a road to watch and guard, and with five trains a day passing over the road, and with varied duties to perform, then most certainly, negligence in the present case should be imputed to the plaintiff for not discovering and extinguishing this fire and preserving his property."

In some of the States, as Massachusetts for instance, railroad companies are made liable by statute for all damage in this way. If one whose property is insured, suffer loss in this way, and the insurers pay him his entire loss, they may recover in his name against the company. (Hart *vs.* Western Railway, 13 Met., 99.) And in this last case, it was decided, under the Massachusetts statute, that where sparks from the engine communicated fire to a shop, and the wind drove the sparks from the shop sixty feet across the street, and set fire to a house, this second fire must be regarded as "communicated" by the company's engine within the statute.

It has been attempted by legislation in some of the States to bind companies to greater liability than they have been held to by the Courts, and in favor of placing the risk upon the party in whose power it lies most to prevent such injuries. But in this State, and we believe in most of the States, the principle upon which the company is held liable is that stated by us above, as distinguished from the more rigorous rule of the English Courts.

It certainly would not be just or right to make railroad companies insurers of the property along their line.

The degree of care which a company is bound to use in this respect is governed sometimes by circumstances. Thus a company is bound to use more care in regard to fires in a dry time, as was held in the case of Huyett *vs.* Phil. & R. R. R. Co., 23 Penn., 373; or where property is very much exposed. So a railroad company running an engine through a village where wooden buildings are so near the track as to be exposed to fire from the sparks, is bound to a higher degree of care than when running in the open country. And when the exposure of the buildings is increased by reason of a wind blowing towards them from the engine, which is standing at rest upon the track, the corporation is responsible for the utmost vigilance and care.

A much higher degree of care, both in respect to the rate of speed and the watchfulness to prevent casualties, should manifestly be required when trains are passing through or remaining stationary in the streets of a city, or densely populated village; and it is not stretching the rule unduly in such a case to say that, under such circumstances, the railroad company is bound to use the utmost care to guard against the dangers which obviously attend such a condition. Care must be proportioned to the danger of accidents, and where there is great danger, there must be a corresponding degree of care.

This is the rule declared in the case of Kelsey *vs.* Barney, (2 Kern., 425,) and applied to the case of a collision of boats. The principle is there stated to apply to all persons traveling upon highways or navigating public waters, and in speaking of the qualifications and the extent of the rule, Judge Johnson says, in his opinion, that under some circumstances a very high degree of vigilance is demanded even under the requirement of ordinary care. "Where," he says, "the consequences of negligence will probably be serious injury to others, and where the means of avoiding the infliction of the injury are completely within the party's power, ordinary care requires *the utmost degree of human vigilance and foresight.*"

The same principle is substantially held in the case of Johnson *vs.* Hudson River Railroad Company, (20 N. Y., 65.) The cars of the defendant were driven in the night time in one of the streets of the City of New York without any lights upon them, and the plaintiff's testator was run over while upon, or crossing the track, and killed. In giving the case to the jury, the Judge charged, among other things, that, considering the nature of the defendants' business and the hazard attending the running of cars in the streets of the city, and particularly on a dark night, "they were bound to exercise the utmost care and diligence; and for the purpose of avoiding accidents, endangering property and life, were bound to use all the means and precaution that the highest prudence could suggest, and which it was in their power to employ." Language stronger than this can hardly be employed to indicate the extreme degree of care which is to be exacted of railroad companies under circumstances where prudence and watchfulness are required. This charge was excepted to, but on an appeal to the Court of Appeals it was sustained. In giving the opinion of the Court, Judge Denio remarks, that in his judgment, the charge did not overstate the obligations which attach to persons running cars in the night over a course which is also a public street, in requiring them to exercise the utmost care and vigilance, and to use all the means of precaution which the highest prudence could suggest. (22 N. Y., 209.)

☞ The Reno, Oil Creek and Pithole Railroad is now open to Oil Creek, Pa. Another new locotive has just been added to the rolling stock. Major Wilson is Superintendent, and A. W. Hines, Esq., Assistant. The bridge at McClintockville is completed. Much of the track between Rouseville and Plumer has also been laid.

☞ The following gentlemen were elected on the 8th inst., Directors of the "Oil Creek Lake Titusville Mining and Transportation Company:" E. H. Chase, Esq., President; R. D. Fletcher, Oliver Keese, P. G. Strannahan, Ezra Cooper, R. H. Frisbee, Joseph Sill. This is the line from Union Mills to Titusville; the route being a trifle longer than the name of the company.—*Reno Times.*

American Railroad Journal.

Saturday, February 24, 1866.

Stock Exchange and Money Market.

The financial policy of the Secretary of the Treasury appears to be as simple in purpose as clear in its arrangements. Those most familiar with it are confident of its entire success, if no bad legislation and no foreign difficulties occur to make it necessary to increase the debt of the country. These last might prove damaging to our financial prosperity through several coming generations. A war with France, for example, would be conducted at immense disadvantage. The French have nothing that we could attack to any purpose. It has no commerce and no foreign possessions we could assail, her own coast is well defended, and her iron clads are formidable and numerous. On land or at sea, the contest would be a difficult one for us to maintain with results, and the results would amount to nothing great in our favor, however gallantly we should carry ourselves. Then again, it is very doubtful whether any such menace to our republican institutions has yet been offered in Mexico, as to make the application of the Monroe doctrine a necessity and a duty. About this there is a *real doubt*, and it is worth while to consider whether if there be no actual danger, we should rush into one whose extent no one can foresee, when the rubicon (our Rio Grande) shall be once passed.

Our material interests lie at the bottom of all our political arrangements. Life, liberty and the pursuit of happiness are the objects for which we have formed this Government, sustained it, fought for it and conquered for it. It is questionable whether any political axiom, or abstract political principle, with remote consequences should be allowed to check the current of ordinary events, when it is flowing steadily and smoothly. Certainly our debt and taxation are as heavy as a prudent people can get along with, and an expensive foreign war would not improve our credit or resources. The Secretary of the Treasury even now, has a taste of Mexican expenditure. The army on the Rio Grande, which it is thought necessary to maintain there, a very doubtful necessity in our judgment, costs even now many millions per month, and keeps up the war expenditure on a pretty large scale. The army supplies at that distance from the ordinary sources of supply cost the Government three and four times more than they would at almost any other point, and if the public debt is not lessened more rapidly by the means of retrenchment, we can justly lay it to the Mexican difficulty. We have even now the foretaste of expenditure, and can see how even a doctrine, if merely maintained by an army of observation, can cost more than it comes to.

If then we can escape foreign war through this question, we can assume the following to be Mr. McCulloch's policy. And here we would observe, that while all admit his skill as a practical banker, the breadth of his views on general subjects has been somewhat questioned. But those who are best acquainted with the Secretary assure us, that he is really up to his position in all respects, and that in his knowledge of finance, of banking as a system of currency, exchange, revenue and credit, he is in advance of any of his predecessors. His careful and reticent conduct with regard to the gold market, the steadiness which he has given it, his entire independence of the interests of Wall street, (we mean its private interests,) his large balances, and means on hand which keep him out of the hands of eager capitalists, are not accidental displays of judgment, but their result.

And with regard to the powers asked for him of Congress, while it is very likely some of them may never be exercised, yet their mere possession will be of great service. The Fort Wayne speech has had a large effect on the public mind. It has even done much to increase the value of our currency, and gave it a new purchasing power of many millions.

So if the Secretary has the option of a foreign loan at a low rate of interest, it may be considered as equivalent to an actual addition of just so much specie to the country, if it should require it at the critical moment of resumption. This is all

there is about this loan. With regard to other features of his policy, they are very well understood, to be funding of the immediate debts in a long loan at a cheap rate, and the application of the surplus revenues to the gradual discharge of the debt and retirement of the currency, though it is believed it will never be necessary to withdraw the whole of the legal tenders, as in all probability they will be at par or so near par, as to be retained in circulation by the people of their own accord to a considerable amount. Mr. McCulloch is understood to have said that the *currency* does not give him the least anxiety.

The upshot then of the whole matter is this, that if the Government keeps out of war and fresh loans, our financial career will be a splendid success. A curious fact as to the reproductive power of the country is mentioned to us. One of the Western States which was the victim of the ravages of war two years ago, presented such a spectacle of waste and abandonment, as to make it appear a hopeless task to recover it from ruin. But at this moment it presents a very different aspect. Its last crops, have been so abundant, that all traces of loss appear to be effaced. It is productive labor that must now be carried on; paper money will not make the country rich, but only what the generous earth gives back to earnest toil.

We may confidently expect that the whole agricultural area of the Southern States will be put to use within the next two years, and the waste of war will be fully replaced by the products of industry. It is the conversion of labor into material forms, valuable, marketable, and exchangeable, which makes the real values by which the country is to grow wealthy, and not by the creation of the forms of wealth such as promises to pay, which are either irredeemable or greatly depreciated. The sooner the country understands this, and acts upon it, the sooner we shall be out of danger.

There is another interesting view of our financial system quite worthy of consideration. It is believed that the customs revenue at the present moment is less by at least twenty millions a year than it should be. The cause of this is two-fold; one, the low invoicing of the goods imported, with fraudulent intent, and the other is the incapacity of most of our Consuls at the places of production and export. These persons most commonly have received their appointments as political rewards, and as a general rule are totally unfit for their places. A Consul, if he is capable is a most important commercial agent, and can do his country most valuable service. Not the least necessary is the understanding of the character, and value of the articles sent to his own country for sale. It is said that in consequence of the general incapacity of the American Consuls abroad, the foreign trade is almost entirely leaving our own houses, that it is difficult for these to make any purchases in a direct way, that prices are much higher to them than to the foreign merchant, and that in fact these persons are making large profits and fortunes at the expense of the American dealers.

French wines and Belgian cloths are said to be brought to this country and sold upon invoice, below the real value, and the revenue is materially injured by the system.

As we have for some time supposed, the opinions unfavorable as to the strength of railway securities, has been undergoing a change. A re-action appears to have set in with some spirit.

The New York exports, exclusive of specie, for the week ending February 20, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$7,078,813	$4,928,307
Prev. reported	25,125,354	27,099,880
Since January 1	$22,204,167	$32,078,187

The New York imports compare as follows:

	1865.	1866.
Dry goods	$827,866	$4,792,474
Gen. merchandise	638,600	3,340,821
Total for the week	$1,516,466	$8,133,295
Prev. reported	12,344,887	31,745,008
Since January 1	$13,861,353	$39,878,303

The balance in the Sub-Treasury on Wednesday was $103,046,488.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Louisiana 6s, 85; N. Y. State 7s, Bounty Loan, 100; do., 6s, 1873, 93; Illinois coupon bonds, 1879, 96¼; Tennessee 6s, 1868, 90; Milwaukee and St. Paul 1st mort., 80; Peninsula 1st mort., 75; New Jersey Central, 114; Norwich and WorcesterR. R., 100; Indianapolis and Cincinnati, 70; Morris and Essex, 100; Butler Coal, 16¾; Maryland Anthracite Coal, 15½; American Coal, 60; Schuylkill Coal, 18½; Central Coal, 43; Mariposa pref., 17⅜; Pacific Mail scrip., 190; Western Union Tel., 57; Ocean Bank, 93; Central Bank, 110; Bank of Commerce, 107; Mechanics Bank, 113½; Union Bank, 120; Bank of America, 140; Merchants Exchange Bank, 106; Leather Manuf. Bank, 180; Corn Ex. Bank, 115; Importers and Trades Bank, 100; Bank of Commonwealth, 101; 4th National Bank, 97¾; Park Bank, 145.

Philadelphia.—Allegheny Co. coupon 5s, 72¾; Reading mort., 6s, 86½; Philadelphia and Trenton R. R., 113; 13th and 15th streets R. R., 22½; Union Canal, 3; St. Nicholas Coal, 8⅛; Hazleton Coal 56; New Creek Coal, 1⅛; Fulton Coal, 7; Preston Coal, 20; Green Mt. Coal, 4⅛; Big Mt. 5⅜; Lehigh Zinc, 31; Girard Bank, 52; Commercial Bank, 55; Consolidation Bank, 41; Mechanics Bank, 28¾; Manuf. and Mechanics Bank, 31¼; Bank of Northern Liberties, 92; Corn Exchange Bank, 62; Big Tank Oil, ¼; Corn Planter, 1; Caldwell, ⅜; Curtin, ⅞; McClintock, ¼; Maple Shade, 4⅝; McKean, 8; McElrath, 1⅛; Mingo, 1½; Ocean, 15½; Oak Shade, 2⅝; Phila. and C. R., ½; St. Nicholas, ⅜; Spencer, 2; Sugar Creek, 2½; United Windsor, ¼; Wm. Penn., ¾. The latest quotations are: City 6s, 87@87¾; do., new, 91¾@91⅞; State 5s, 86½@86½; do., coupon, 85½@86; do., 6s, W. European and North American Railway.

A dispatch, dated Augusta, Me., Feb. 20, says: All the bills in aid of the European and North American Railway Company have passed the Legislature in a form satisfactory to its friends. The chief interest has centered upon the enabling act, so called, which extends all the rights of the Company, preserving to it its land grants and the claims on the United States; sanctions the contract for absorbing the line in New Brunswick, from the boundary to the City of St. John; authorizes the consolidation of the lines between Portland and Bangor, and the purchase of the lines east and west to Halifax. The Bangor Loan Act of 1864, accepted by the city, is extended two years, authorizing a loan of $500,000 to the Company. A new loan act authorizing a public loan of $500,000 by the City of Bangor, gives two directors to the city, elected by the City Council. The City of Bangor is to hold a first lien on the railway to Union—57 miles. The lands granted amount to 873,112 acres. To the claims of Maine on the United States assigned to the Company is to be added those of Massachusetts, held jointly with Maine, granted in 1865 which, are expected to secure from Congress an appropriation of $15,000 per mile to the mail line and branches.

Baltimore and Ohio Railroad.

At the regular monthly meeting of this company held in Baltimore on the 14th inst., the President stated that the surveys for the Metropolitan Branch Railroad, from Point of Rocks *via* Bladensburg to Washington had been completed, by which a saving of distance (as compared by the route *via* Relay House) of forty-six miles could be effected, and also that the location of the line from Point of Rocks directly into the city of Washington, in the vicinity of the present station of the company, was nearly perfected, and that by this line the distance would be but forty-two miles, thus securing a reduction of the distance from the West, and all intermediate points, of forty-nine miles. He added that the Mayor of Washington had proposed, on behalf of that city, to obtain the necessary legislation and make satisfactory arrangements, so as to secure to that city the latter route.

The Committee on Construction recommended the acceptance of a proposal for a portion of the heaviest work on the Metropolitan branch road. The engineer, by the unanimous action of the Board, was authorized to close the contract for this difficult part of the line upon the Summit Cut, through Parr's Ridge, so that the work upon this important enterprise will be immediately commenced.

The supplement to the charter of the Baltimore and Ohio Railroad Company, passed at the recent session of the Legislature of Maryland, giving it power to alter the location of its road, for the purpose of straightening and improving the line between Camden Station, in the city of Baltimore, and the Western boundary of the State of Maryland, was submitted to the Board and accepted. A resolution was also adopted requesting the President to cause such examination of the line to be made as would show where the location of the same can be altered advantageously so as to dispense with unnecessary curves, and that such work and alterations as are authorized by the act be progressed with as rapidly as may be deemed necessary. Under this action it is designed to proceed promptly in improving the line in the vicinity of Baltimore, and at other points upon the road.

Communications were presented from the leading steamship company upon the European Continent (North German Lloyd) in relation to the establishment of a line of first class steamships to run between Bremen and Baltimore, which communications were referred to the Committee of Finance, with the object of securing such arrangements as will aid in securing the establishment of the line.

Limbert and Leland Brothers.

Messrs. Limbert and Leland having admitted into their firm Mr. Francis L. Leland, the business will be continued as hitherto under the firm name of Limbert and Leland Brothers, at No. 17 Nassau street, New York. These gentlemen offer their services for the purchase and sale of government and other securities, and specie. Four per cent. interest allowed on daily balances. Particular attention given to orders for the purchase and sale of Bills of Exchange on Europe, Negotiation of Commercial paper, and collection of coupons, dividends, etc. Their references are of the best character.

New Railroad between Louisville and Cincinnati.

The Kentucky Legislature have passed the bill authorizing certain amendments to the charters of the Louisville and Lexington Railroad Companies, that will confer upon those corporations the franchise necessary for the construction of a new railroad from this city to Cincinnati. The route has already been surveyed, and commences at Smithfield, in Henry County, on the line of the Lexington road, crosses the Kentucky River at Drennon, then passing up the valley of Eagle, in Owen, enters Boone, and terminates at Covington, a distance of 110 miles.

The Little Miami and Louisville and Nashville Railroad Directories have offered to guarantee a sufficient subscription of stock, and indorsement of bonds, to insure the immediate completion of this important work. These companies consider it of the highest moment that a direct and rapid route should be established as a connecting link between the North and the South. The present one is embarrassed by great length, and the difficulty of transit at the river, between the city and Jeffersonville. All ferriage will be obviated by the new road, as the great suspension bridge at Cincinnati will soon be finished.

We understand that it is the intention to commence work upon this road as soon as the spring opens, and prosecute it to an early completion.—*Louisville Democrat.*

Dighton and Somerset Railroad.

The Dighton and Somerset Railroad is being rapidly pushed to completion. The rails have been laid for some weeks from the junction in Braintree to Randolph, and other parts of the road are in an equal state of forwardness. The ledges in Easton and Stoughton are the only remaining obstructions to the immediate completion of the road, and these are being overcome as rapidly as the nature of the circumstances will admit. It is expected that cars will be running over the entire length of the line some time in April.

☞ The *Times* says that "the Atlantic and Great Western Railroad Company have purchased the Richmond and Chicago Road, and intend laying a double track from Dayton, Ohio, to Richmond, Ind."

Mexican Railroads.

We are informed that the track laying on the New Line beyond Gaudaloupe has commenced, and is now progressing finely. Mr. Jacob Camming, who is now engaged upon this line, says that the utmost efforts will be used to complete the road as soon as possible.

The project of the horse car railroad between Vera Cruz and Puebla, passing by Jalapa, Perote and San Juan de los Llanos, has been approved by the Emperor.

The road between Vera Cruz and Jalapa must be completed in January, 1867, and to Puebla at the end of the same year.

New Castle and Franklin Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: R. W. Cunningham, A. G. Egbert, Geo. W. Cass, S. M. Kier, A. L. Crawford, James C. Shaw, D. M. Courtney, Wm. Stewart, Samuel Griffith. President, R. W. Cunningham, Vice President, A. G. Egbert; Secretary and Treasurer, J. H. Robinson. It is the intention of the company to have the road built as speedily as possible.

☞ The Board of Trade of Philadelphia has memoralized the Legislature of Pennsylvania to fix the legal rate of interest in that State at 7 per cent. A suggestion is also before the Finance Committee of the Ohio Senate for consideration as to the propriety of advancing the legal rate of interest in that State. Several rates have been named—7, 7.30 and 8 per cent. The Boston papers are also agitating the subject of an increase in the rate from 6 to 7 per cent. in Massachusetts, complaining that much capital is transferred from that State and city to New York, in consequence of the higher rate obtained here.

☞ The seven per cent. 1st mortgage bonds of the Terre Haute and Richmond (now Terre Haute and Indianapolis) railroad company, which mature March 1, 1866, will be paid in full of principal and interest on that day at the office of the Farmers' Loan and Trust Company this city, after which date interest will cease, as also the privilege of converting said bonds into the capital stock of the company.

☞ A locomotive passed over the Hudson River Bridge for the first time on the 15th inst. On the 21st another loaded locomotive with two loaded lumber cars passed over. On the 22d the formal opening of the Bridge was to have taken place.

☞ The Marietta and Cincinnati Railroad Com have completed their track from Loveland to Cincinnati. The first train passed over the road on the 17th inst.

☞ The Franklin and Warren Railroad is being pushed downward from Irvine towards Tideoute, which place it will probably reach about May next.

☞ The Buffalo Branch of the Atlantic and Great Western Railway from Buffalo to Randolph, is to be continued down the Conewango to Warren, Penn.

☞ The Danville Railroad bridge, across James River, at Richmond, will probably be completed by the 1st day of March next.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway for the week ending Feb. 16, 1866, was as follows:

Passengers	$23,278 66
Freight and live stock	35,461 99
Mails and sundries	2,395 29
Total	$61,135 94
Corresponding week of 1865	22,963 72
Increase	$38,172 21

The earnings of the Chicago and Northwestern Railway for the second week in Febuary, 1866, were $109,902 38
Corresponding week of previous year. 124,587 74
Decrease $14,685 36

The earnings of the Grand Trunk Railway for the week ending Feb. 10, 1866, were:

Passengers	$28,390 00
Express, freight, mails and sundries	4,750 00
Freight and live stock	84,793 00
Total	$117,933 00
Corresponding week, 1865	102,128 00
Increase	$15,805 00

For the week ending Feb. 3d the earnings were $111,113, against $100,515 in 1865—an increase of $10,598.

The earnings of the Western Union Railroad, for the week ending Feb. 7, 1866:

	1866.	1865.
From freight	$6,488 21	$4.874 27
" passengers	2,465 45	2,680 10
" express	130 22	162 80
" mail	296 58	296 58
Total	$9,380 46	$8,013 75

Receipts from Jan. 1, to Feb. 7:

1866	$54,482 10
1865	51,729 48
Increase	$2,752 62

The earnings of the Michigan Central Railroad for the 2d week in Feb., 1866, were. $66,273 29
Corresponding week of previous year.. 67,094 17
Decrease. $820 88

Tennessee Bonds.

It is announced that the interest payments on all the bonds of the State of Tennessee will be resumed on the 1st of July next, the arrearages on which, from 1861, to January 1, 1866, shall have been funded into new 6 per cent., due in 1892. The railway companies to whom the bonds of the State were originally advanced, as a first mortgage lien of $10,000 per mile on the roads, nearly all of which have been repaired and put in full operation again, are required to provide the next interest by the 15th of June, and the mortgage lien upon them is increased to the extent of the funded coupons in arrear. The new arrangement extends to the endorsed mortgage bonds of the Chattanooga and one or two other roads, and the endorsed bonds of the City of Memphis loaned to the Little Rock road. These endorsements amount together to $2,550,000, the State holding itself responsible to see the interest paid. The railways are also released from the arrearages, 2½ per cent. a year, to the sinking fund since 1861. but are required to pay 4 per cent. a year, by way of sinking fund, after the 1st of January, 1867. The old bonds of 1890–'92, now selling in New York at 88@89, carry interest coupons in arrear, and the holders will receive new bonds of the same tenor to this extent. The Legislature has provided a system of taxation to meet the expenses of the State Government, and any default of interest which the roads themselves may hereafter throw upon the State. The Treasury holds about $700,000 in United States 7-30's, of which sum it is proposed to invest half a million in the bonds of the State, though this has not become an act of the Legislature.

The Union Pacific Railroad and Connections.

We have received from Silas Seymour, Esq., Consulting Engineer of the Union Pacific Railroad, a communication fully describing the various organizations and projects known as Pacific Railroads, which at the present time are no less than seven in number. The following is his description of them taken in geographical order:

1. The Pacific Railroad of Missouri, a State organization, extending from the city of St. Louis to the east line of Kansas, at or near Kansas City, a distance of 283 miles. This road is now completed and in operation.

2. The Union Pacific Railway, Eastern Division, extending from the western terminus of the Missouri Pacific Railroad, at the eastern boundary of Kansas, to an intersection with the Union Pacific Railroad, "at a point on the one-hundredth meridian of longitude west from Greenwich, between the south margin of the Republican River and the north margin of the valley of the Platte river, in the Territory of Nebraska, at a point to be fixed by the President of the United States after actual surveys." The total distance is about 360 miles. This is also a State organization, and was formerly known as the "Leavenworth, Pawnee and Western Railroad Company of Kansas;" but the company, in 1863, assumed the name of "Union Pacific Railway, Eastern Division," by which title it has since been recognized. This company receives the same amount and kind of aid from the general government as the Union Pacific Railroad, which, to avoid repetition, will be described in connection with that road. The laying of track was commenced in 1863, since which sixty-two miles have been completed, and the road is now open for public use to Topeka, the capital of the State.

3. The Union Pacific Railroad, extending from the western boundary of the State of Iowa, at Omaha "to the western boundary of the Territory of Nevada, there to connect with the line of the Central Pacific Railroad Company of California," a distance of about sixteen hundred miles. The capital stock is one hundred million dollars. This organization is entirely the creation of Congress, and being located within the Territories, is not subject to any State or municipal regulations. To aid in its construction the government grants "every alternate section of public land, designated by odd numbers, to the amount of ten alternate sections per mile, on each side of said railroad on the line thereof, and within the limits of twenty miles on each side of said road, not sold, reserved, or otherwise set aside by the United States, and to which a pre-emption or homestead claim may not have attached at the time the line of said road is definitely fixed." The law further provides that "said company shall designate the general route of said road, as near as may be, and shall file a map of the same in the Department of the Interior, whereupon the Secretary of the Interior shall cause the lands within twenty-five miles of said designated route or routes to be withdrawn from pre-emption, private entry and sale; and when any portion of said route shall be finally located, the Secretary of the Interior shall cause the said lands hereinbefore granted to be surveyed and set off as fast as may be necessary for the purposes herein named."

To aid further in the construction of this road the law provides that as certain portions therein specified are fully completed and equipped, the Secretary of the Treasury shall "issue to said company bonds of the United States of one thousand dollars each, payable in thirty years after date, bearing six per centum per annum interest, (said interest payable semi-annually,) which interest may be paid in the United States Treasury notes, or any other money or currency which the United States have or shall declare lawful money and a legal tender," as follows: "For three hundred miles of said road, most mountainous and difficult of construction, to wit: one hundred and fifty miles westwardly from the eastern base of the Rocky Mountains, and one hundred and fifty miles eastwardly from the western base of the Sierra Nevada Mountains, said points to be fixed by the President of the United States," forty-eight thousand dollars per mile; "and between the sections last named of one hundred and fifty miles each," thirty-two thousand dollars per mile; and for the entire balance of the road, sixteen thousand dollars per mile. These bonds constitute a second mortgage upon the whole line of the railroad, rolling stock and fixtures, and "one-half of the compensation for services rendered for the government shall be required to be applied to the payment of the bonds issued by the government." The company is also authorized to "issue their first mortgage bonds to an amount not exceeding the amount of the bonds of the United States, and of even tenor and date, time of maturity, rate and character of interest," with the government bonds, "and the lien of the United States shall be subordinate to" these first mortgage bonds; and it is also authorized to issue these bonds "to the extent of one hundred miles in advance of a continuous completed line of construction." The work of construction has been materially hindred during the past year by the delay of the President of the United States in deciding upon a question of location near the eastern terminus. The laying of track was commenced in July last, and forty miles were completed and examined by the government commissioners on the 6th instant. Since that time the track has been extended to Fremont, fifty miles from Omaha. The grading of the first one hundred and ten miles is now completed, and arrangements are perfected for opening one hundred miles to the public before the 4th of July next. The progress of the work is very much retarded and embarrassed by the want of an easterly railroad connection; but it is hoped that this will be remedied in the present year. Large and commodious brick shops, engine and station houses have been constructed by the company at the Eastern terminus of the road, and these will be repeated as often as may be necessary to operate the road successfully.

The surveys of several routes have been extended as far west as the meridian of Salt Lake City, and of one line to the Humboldt Valley; but the location cannot be regarded as definitely fixed beyond the first two hundred miles.

4. The Central Pacific Railroad of California, extending "from the Pacific coast, at or near San Francisco or the navigable waters of the Sacramento River, to the eastern boundary of California." This is a State organization, but it receives from the general government the same aid as the Union Pacific Railroad. It has also been authorized by Congress to extend its road one hundred and fifty miles eastward into Nevada, in case the Union Pacific Railroad is not completed to the State line, when it arrives there. This company has transferred to the Western Pacific Railroad Company the right to construct the road to the Pacific coast, and is now engaged in the construction of the line easterly from Sacramento to the State line, a distance of 164 miles. The laying of track was commenced in June, 1864, and 56 miles of road have since been completed and accepted by the government. Seventeen additional miles of grading are now completed, and the balance of the grading is well under way. The line, as established by the company, intersects the easterly boundary of California in the valley of the Truckee River.

5. The Western Pacific Railroad of California, extending from Sacramento to San Francisco, by way of San Jose a distance of 170 miles. This is also a State organization, and receives through an assignment from the Central Pacific Railroad Company (which has received the sanction of Congress,) the same aid from the government as the Union and Central Pacific Companies. The line from San Jose to San Francisco, a distance of 50 miles, is completed. From San Jose eastward, 20 miles is about completed, and the iron for the balance of the distance to Sacramento is already purchased and going forward. The grading is entirely out of the way.

6. The Southern Pacific Railroad of California, extending from the bay of San Francisco to the port of San Diego, and thence to the east line of the State of California, a distance of about 420 miles. Capital, $30,000,000. This is a State organization, and receives no aid from the general government. Very little if any work has been done up to the present time.

7. The Northern Pacific Railroad Company, extending from the head of Lake Superior to Puget Sound, "with a branch *via* the valley of the Columbia River to a point at or near Portland, in the State of Oregon." Capital stock $100,000,000. This company was chartered by Congress in 1864. The company receives from the government "every alternate section of public land, not mineral, designated by odd numbers, to the amount of twenty alternate sections per mile on each side of said railroad line, as said company may adopt, through the Territories of the United States; and ten alternate sections per mile on each side of said railroad whenever it passes through any State, and whenever on the line thereof the United States have full title, not reserved, sold, granted or otherwise appropriated, and free from pre-emption or other claims or rights at the time the line of said road is definitely fixed, and a plat thereof filed in the office of the Commissioner of the General Land Office; and whenever prior to that time any of said sections or part of sections shall have been granted, sold, reserved, occupied by homestead settlers or preempted or otherwise disposed of, other lands shall be selected by said company in lieu thereof, under the direction of the Secretary of the Interior, in alternate sections and designated by odd numbers, not more than ten miles beyond the limits of said alternate sections."

I am not aware that anything further than an organization of the company has been effected up to the present time.

In addition to the above it may be proper to mention the old organization known as the Southern Pacific Railroad, which was intended to run from Memphis to San Diego, about which very little has been heard for some years.

Flint and Holly Railroad.

This road was opened for business November 1, 1864. For the eleven months ending September 30, 1865, according to a recent report of the directors, the gross earnings were $90,967 37. The ordinary expenses of operating the road, including repairs, &c., were $23,777 98; miscellaneous expenses, including an interest dividend to stockholders, $28,286 25—making the total outlay, $51,764 23, and leaving a balance of $39,203 14. The total cost of the road with franchises appurtenances, &c., was $430,423 06. Besides the interest dividend, before mentioned, a dividend of four per cent., exclusive of Government tax, has been declared. The report says:

It will be necessary to increase our rolling stock as the business of the road increases; and even now great inconvenience as well as loss of business is sustained in consequence of the limited supply of such stock.

But the directors are clearly of the opinion that all our future wants can be supplied from the earnings of the road, and that a sufficient sum will be left to pay the stockholders very liberal and satisfactory semi-annual dividends, until the road shall be thoroughly completed and equipped with all necessary and requisite appurtenances.

In regard to the cost of the road, the directors would add that, although the sum has very much exceeded the original estimates, yet, all things considered, the company can have no just reason to complain. The enterprise was undertaken during the prevalence of a terrible civil war, when labor of all kinds was scarce and very high; and when the prices of everything were inflated to a degree never before witnessed in this country. By entering into contracts for all the materials and labor immediately upon the organization of the company, which could at that time be made the subject of contract, the prices paid by us were far below their actual value at the time of their delivery to, or use by us; and which lessened by so much the cost of the road to the company.

Central R. R. Co. of Penna.

A bill has been introduced into the Pennsylvania Senate having for its object the construction of another road through the interior of the State. The company is to be known as the Central Railroad Company of Pennsylvania, and it is to build a line of railroad from a point on the Atlantic and Great Western Railway on or east of the western State Line to Northumberland Co. The right is to be accorded to connect anywhere with other roads, and to equip and use any unfinished railroads extending through the counties through which the road may pass. It is provided in one of the sections that Franklin and Mercer boroughs are to be points on or near the line. The following persons are named as incorporators: H. B. Wright, Galusha A. Grow, Jacob Black, Wm. Reynolds, J. M. Fleming, A. W. Owens, A. Plumer, C. V. Culver, Jas. S. Myers, Wm. Stewart, Samuel Griffith, W. C. Trout, G. W. Arnold, Jno. S. McCalmont, J. Patton Lyon, K. L. Blood, Isaac Gordon and John Patton.

Fox and Wisconsin Rivers Improvement Company.

The heaviest and most important transaction which has occurred in this region for many years, has been the sale at auction at Appleton on the 1st, 2d, 3d and 5th instants, of the unsold lands, works of improvement, water power and other property of the Fox and Wisconsin Rivers Improvement Company, by the Trustees (Messrs. Butler, Spaulding & Davis) appointed on the part of the State under the act of October 3d, 1856. The property was purchased by the construction creditors and cash subscribers to the purchase, all represented by Hiram Barney of New York, for $410,000—an amount sufficient to pay all the State indebtedness, so called, upon the work, and to complete the improvement according to the plans approved by the State authorities. The money for the completion of the work will be applied at once. The State indebtedness is canceled by the sale.

It is understood that all investments heretofore made in this work by Eastern capitalists have been a total loss.

This looks to us like a decided step toward the long desired consummation of the hopes of all the Northwest—the opening of this great water route from the Mississippi to the Lakes. The sale of last week clears the great work of all embarrassments and complications, and puts it into the hands of a fresh company made up of able and energetic men, who buy it, not because it is a handsome river, but because it has the elements of a great national thoroughfare between States, and will *pay* to be opened to commerce.—*Green Bay (Wis.) Advocate.*

Ohio and Lake Superior Railroad.

We alluded, a short time ago, to the project o building a railroad from this city *via* Saginaw and Mackinaw to the head of Lake Superior, and stated that it was supposed Mr. Latourette, of Fenton, Mich., was one of the leading spirits of the enterprise. This gentlemen has written a lengthy communication, which appeared in the *Detroit Advertiser*, in which, after speaking of the proposed route, he says he wishes it distinctly understood, as the "record" of this company, that they propose either to bridge or tunnel the straits of Mackinaw, so as to afford a railroad passage. He estimates that this bridge or tunnel can be constructed for $15,000,000, and predicts that the wants of trade and commerce will demand it; Detroit, and the interests of the upper and lower peninsulas will demand it; the Pacific seaboard, the Atlantic seaboard, and Asia and Europe demand it; and ventures the further prediction that "the time will come when cars will pass from Puget's Sound to Boston without ferriage or breaking bulk."

Immense land grants and a Government loan will be asked for; he says they are necessary, but it is not expected this aid will extend to that part of the route from Toledo to Saginaw. The aid desired is the same as that sought for the North Pacific Railroad.—*Toledo Blade.*

Interest and Dividends.

The Chicago and Alton Railroad Company have declared a cash dividend of five per cent. on the preferred and common stock of the company, payable at the office of M. K. Jesup & Co., 84 Broadway on the 13th of March.

The Wrightsville, York and Gettysburg Railroad Company has declared a dividend of 2 per cent. for the last year, less 10 per cent. thereof for national and State taxes.

☞ The New Jersey Legislature have confirmed the contract made between the Morris and Essex and Atlantic and Great Western Railways.

☞ The Woodstock (N. B.) Branch railway was formally opened on the 8th inst.

☞ The Paterson and Newark Railroad bill has passed both branches of the New Jersey Legislature.

☞ The suspension bridge across the Allegheny River, at Oil City, is to be completed by the first of September next.

Debt of California.

The debt of the State of California on the 30th of June, 1865, was as follows:

Civil bonds of 1857 in private hands		$3,121,500 00
Civil bonds of 1857 in custody of State Treasurer for school fund	606,000 00	
Civil bonds of 1860	198,500 00	
Soldiers' relief bonds in private hands	144,500 00	
Soldiers' relief bonds in custody of State Treasurer for school fund	59,000 00	
Soldiers' relief bonds in custody of State Treasurer for seminary fund	10,000 00	
Soldiers' bounty bonds	45,000 00	
Total funded debt		$4,184,500 00
Warrants outstand'g on Capital fund	18,116 46	
Warrants outstanding on soldiers' relief fund	386,178 63	
Warrants outstanding on soldiers' bounty fund	236,040 00	
Warrants outstanding on line officers' fund	500 00	
Warrants outstanding on military f'd	71,518 72	
Unfunded scrip due school fund	31,020 00	
Due swamp land fund	57,079 88	
Grand total		$4,974,953 69
From which deduct:		
Balance in general fund	$152,852 38	
Balance in interest and sinking funds after payment of July int.	86,970 40	
Total cash on hand	240,822 78	
Net State indebtedness July 1, 1865		$4,734,130 91

In the estimate of expenditures for the eighteenth fiscal year, $500,740 is for general expenses of State Government, and for the nineteenth fiscal year $770,740 will be required for the same purpose. These expenditures are payable out of the general fund. During the sixteenth fiscal year (the last for which complete returns have been received,) there was received into the general fund from all sources of revenue, exclusive of the ad valorem tax of 48¾ cents of each $100 of taxable property, $388,334 08. The assessed value of real and personal property for the year 1864 (the last for which complete returns have been received at this office) was $180,484,949 85. After deducting 20 per cent. for exemptions, delinquencies and costs of collection, an ad valorem tax of 30 cents on each $100 of taxable property will produce a revenue of $432,000. This sum, added to the amount received from miscellaneous sources named above, will make the annual revenues of the general fund $820,248 08, an excess of $267,503 08 over the estimated expenditures for the eighteenth fiscal year, and of $47,503 08 over those for the nineteenth year. It is therefore recommended by the controller that the rate of taxation for general purposes be reduced from 48¾ cents to 29¾ cents on each $100 of taxable property; thereby reducing the total State tax from $1 50 to 96 cents on each $100 valuation. Unless the Legislature imposes extraordinary burdens upon the general fund, or levies taxes for objects not embraced in existing laws, this reduction may be made with entire safety to the credit of the State; for the estimated expenditures of the eighteenth and nineteenth fiscal years, are in excess of the actual expenditures for the sixteenth, and the appropriations made for the seventeenth fiscal years; and there is every probability of an increase rather than a decrease in the revenues from miscellaneous sources and ad valorem tax.

The revenue derived from stamps has increased from $111,685 94 during the fourteenth fiscal year, to $190,205 71, during the sixteenth fiscal year.

NOTICE.

East Pennsylvania R. R. Co.

290 shares of the capital stock of this Company are to be sold at auction by ADRIAN H. MULLER, P. R. WILKINS & Co., Auctioneers, at Exchange Sales Room, No. 111 Broadway, in city of New York, on the 28th February inst. at 12½ o'clock.

This road is one of the connecting roads between this Metropolis and the West, *via* Allentown Route, in actual operation, and is included among the roads with which the Atlantic and Great Western Railroad Company recently made arrangements.

The statement of their affairs at their last annual meeting in January last showed that after the payment of every floating debt they have a surplus of profits of $494,918 90 on a capital stock of $654,400.

The road has in the past and is still earning sufficient to pay as large dividends as any railroad in the country.

It is worth by their annual statement nearly two dollars for one.

It also has the advantage of being in point of time the quickest route to Washington, when all arrangements now in progress are completed.

Property of every kind after the payment of every floating debt		$1,724,218 90
Capital stock	$654,400	
Bonds	574,900	
		1,229,300 00
Surplus profits, undivided		$494,918 90

NOTICE TO HOLDERS OF THE BONDS OF THE Vicksburg, Shreveport and Texas Railroad Co.

NOTICE is hereby given that the undersigned, are ready to pay the distributive or pro rata shares of the amount of the price bid for the property of the Vicksburg, Shreveport and Texas Railroad Company, at Sheriff's sale on 3d February, 1866; and that Joseph F. McGuire, will pay said sums on presentation to him at Monroe, La.

The following bonds were taken from the Company's safe by the U. S. Marines, and were never sold by the Company:

NOTICE TO CONTRACTORS.

RAILWAY CONTRACTORS are invited to submit to GEORGE M. BRAGGIOTTI, 117 Pearl Street, New York, Agents for Messrs. BELLOT DES MINIERES BROTHERS & Co., of Bordeaux, France, between now and the 5th of March next, proposals for the completion of the grading, bridging, &c., of the **AMERICAN CENTRAL RAILWAY OF ILLINOIS**, about 190 miles in length, from the City of New Boston, on the Mississippi River, to the Eastern Illinois State Line in the direction of Fort Wayne, Indiana. Contracts will be granted in Sections, and proposals must be accompanied with first class references as to competency, otherwise they will not be considered. For further particulars apply to the Chief Engineer of the Road, at his office in Galva, Henry County, Illinois, where profiles and specifications can also be inspected. 7t3

THE Chicago and Great Eastern RAILWAY COMPANY.

OFFER FOR SALE

$1,350,000

of their First Mortgage Sinking Fund Convertible Bonds, due April 1, 1895, bearing seven per cent. interest, payable in the city of New York on the first days of April and October in each year; being the *entire balance* of the Bonds which the Company is authorized to sell under the provisions of a mortgage to George N. Titus and James D. Fish, trustees, for $5,600,000, covering the whole line of the Company's road from Chicago, Illinois, to Richmond Indiana, 224 miles, with the franchises, equipment and appurtenances, and all other present and future acquired property.

The proceeds of these bonds now offered will extinguish the whole existing floating debt of the Company, and provide for the purchase of a large amount of additional rolling stock.

For copy of mortgage and further particulars apply at the office of the Company, No. 37 William street, New York, where subscriptions for the bonds will be received.

New York, February 13, 1866. 4t7

OFFICE OE THE

Chicago and Northwestern RAILWAY COMPANY, No. 8 Wall Street.

OFFERS WILL BE RECEIVED UNTIL THE FIRST day of March proximo, for $350,000 of the CONSOLIDATED SINKING FUND CONVERTIBLE MORTGAGE BONDS of this Company. These bonds are a portion of $2,000,000, issued for the purpose of providing additional rolling stock required to accommodate the growing business of the Company, and for the equipment of the additional road now in course of construction to Omaha on the Missouri, and the mortgage provides for the further issue of $500,000 more of said bonds ($2,500,000 in all) hereafter, for the same purpose, if such issue shall be found necessary.

The bonds bear date January 16, 1865, carrying seven per cent. interest payable quarterly in New York, have fifty years to run, and are secured by a deed of trust to Samuel J. Tilden, esq., upon all the Company's lines of road and equipment in the States of Illinois and Wisconsin, amounting to about 650 miles of road, more than 100 miles of which are subject to no other mortgage. This mortgage, together with all other liens, amount in the aggregate to only $20,000 per mile upon said roads.

Provision is also made in the mortgage for the absorption, at the discretion of the Board of Directors, of all prior liens into this class of bonds, in the expectation that eventually all the other bonds of the Company will be exchanged for these, leaving this class of bonds the only mortgage lien upon the Company's entire lines of road.

These Bonds are convertible into the Preferred stock of the Company, at the option of the holder, any time prior to January 1, 1870. For further particulars, inquire at the Company's Office.

By order of the Board of Directors.

H. H. BOODY, Agent.

New York, February 14, 1866. 2t7

RARITAN AND DELAWARE BAY R. R.

ON and after Monday 12th February, 1866, the Express Train for Camden will be discontinued.

The Steamer will leave Pier No. 8, North River daily (Sundays excepted), at 4.00 o'clock P. M., connecting with train for Manchester, Toms River, Long Branch, &c.

FREIGHT for CAMDEN and intermediate stations, will be taken at LOW RATES on the 4.00 o'clock line, reach Camden the next morning.

J. N. POTTER, President.

Pennsylvania Railroad.

The annual meeting of the stockholders of this company was held in Philadelphia on the 20th ult., at which the Nineteenth Annual Report of the Directors, for the year ending December 31, 1865, was presented:

OFFICE PENNSYLVANIA RAILROAD CO.,
PHILADELPHIA, Feb. 18, 1865.

To the Stockholders of the Pennsylvania Railroad Company:

The following statements exhibit the earnings and expenses during 1865, of the railways and canals owned and leased by the Pennsylvania Railroad Company:

PENNSYLVANIA RAILROAD.

And branches worked by it, except the Philadelphia and Erie Railroad.

EARNINGS.

From passengers, first class	$4,055,872 06
" emigrants	118,320 81
" United States troops	1,278,844 60
" " mails	80,130 55
" expenses—under contract	113,410 00
" extra express freight	370,313 85
" general freight	11,193,565 37
" miscellaneous sources	248,712 25
Total earnings	$17,459,169 49

EXPENSES.

Conducting transportation:

Ordinary expenditures	$3,490,847 07	
Erection of passenger and freight stations and extension of existing buildings	245,439 02	
		3,736,286 09
Motive power:		
Ordinary repairs and renewals, including eleven new engines, costing $284,142 12, charged to this account to meet depreciation, &c.; also erection of the machine shop and engine house at West Philadelphia.	$3,268,957 76	
Additional tools and shop machinery, chiefly outfit of Philadelphia & Erie Railroad	111,394 61	
Addit'nal locomotives purchased for Philadelphia and Erie Railroad and other railroads	1,434,561 03	
		4,814,913 40
Maintenance of cars:		
*Ordinary repairs and renewals, including erection of car shops at West Philadelphia.	$1,330,467 52	
Addit'nal freight cars	146,403 56	
Additional pass. cars.	180,754 31	
		1,657,625 39
Maintenance of road:		
Ordinary repairs of railways and renewals of struct's.	$2,625,520 35	
Additional 2d track and sidings	269,575 97	
		2,895,096 32
General expenses		166,137 34
Total expenditures connected with the business of the Pennsylvania Railroad Company, including addition to the facilities for transportation on its own road and that of the railroads it operates.		$13,270,058 54

RECAPITULATION.

Gross earnings	$17,459,169 49
Total ordinary exp.	$10,881,930 04
Total extraordinary expenses, consisting of additional second track and sidings, additional locomotives, cars, &c.	2,388,128 50
	13,270,058 54
Leaving a balance of	$4,189,110 95

The gross revenue of the line for 1865 is equal to $48,768 62 per mile of main line of road (358 miles,) and exceeds in the aggregate that of 1864 $2,700,111 83.

This increase is $839,297 73 upon passengers and emigrants, $3,300 39 upon United States mails, $831,566 05 upon ordinary, and $188,312 73 on express freights, $767,070 72 upon United States troops, and upon miscellaneous receipts $120,564 21.

The whole number of passengers carried over the road during the year was 2,861,836, and the average distance traveled by each passenger 71 5-10th miles.

The number of tons of freight moved (including 243,104 tons of fuel and other material transported for the company) was 2,798,810, embracing 1,074,757 tons of coal. The decrease in the coal traffic is 12,022 tons, and the whole tonnage of the road exceeds that of the last year 33,934 tons.

The ordinary expenditures for working and maintaining the company's roads were $10,881,930 04, which is equal to 62 32-100ths per cent. of their revenues, or including the expenditures for construction done on its own line and the outfit of the Philadelphia and Erie and other railroads, 76 6-100ths per cent.

The earnings of the company's canals were:

From Susquehanna Division	$140,912 38
" Juniata "	22,186 42
" Western Division (now aband'd)	105 00
" Miscellaneous sources	17,811 58
Total earnings	$181,015 38

—against $308,615 23 in 1864.

The cost of maintaining, enlarging and operating the canals was:

For Susquehanna Division	$183,779 36
For Juniata Division	87,268 69
For Western Division	8,795 46
	$279,843 51

Showing a loss during 1865 of $98,828 13. This loss is wholly due to an extraordinary freshet that occurred in March last upon all the tributaries of the North and West branches of the Susquehanna, causing a rise in the main river at Harrisburg three feet above any previous flood upon record, destroying navigation upon the only profitable portion of the company's canal until July.

This company has owned the Pennsylvania canals since August, 1857, during which time they have yielded revenues amounting to $1,882,826 72, and have cost for repairs and renewals $1,886,208 73; showing a small loss in operating them up to the 1st ultimo. Included in these expenditures, however, is the cost of enlarging the Susquehanna Division and rebuilding the structures upon the whole line, nearly all of which had been suffered to fall into decay by the original

* This includes $62,148 49 expended on cars in use on the Philadelphia and Erie Railroad.
